ED 240 284 CE 038 108

TITLE	Technician Education Yearbook 1984.
INSTITUTION	Prakken Publications, Inc., Ann Arbor, MI.
REPORT NO	ISBN-0-911168-54-0
PUB DATE	84
NOTE	366p.
AVAILABLE FROM	Prakken Publications, Inc., P.O. Box 8623, Ann Arbor, MI 48107 ($35.00).
PUB TYPE	Collected Works - Serials (022) -- Reference Materials - Directories/Catalogs (132) -- Reports - Descriptive (141)
EDRS PRICE	MF01 Plus Postage. PC Not Available from EDRS.
DESCRIPTORS	Case Studies; College Programs; Community Colleges; Community Resources; Competence; Cooperative Programs; Curriculum Development; Educational Cooperation; *Educational Needs; *Educational Practices; Needs Assessment; *Paraprofessional Personnel; Postsecondary Education; Professional Continuing Education; School Business Relationship; Teacher Improvement; *Technical Education; *Technical Occupations; Technological Advancement; Transfer of Training; Two Year Colleges; Vocational Education; Yearbooks

ABSTRACT

This yearbook deals with technician education. Included in a section on new issues, problems, and proposals for technician education are the following papers: "High Technology Challenges the Vocational-Technical Curriculum," by Walter J. Brooking; "Assessment of Technical Competency," by Gordon C. McMahon; "Industry and Education Cooperation Serves America's Needs," by Catharine P. Warmbrod; "The Ohio Technology Transfer Organization and Its Role in Two-Year Technical Education," by Kim Bonewit; "Contracting with Business and Industry: Use Your Community Resources," by Chuck Gold; and "Professional Development for Vocational Educators," by James L. Hoerner and E. Lynn Suydam. The second section of the paper consists of case studies of programs in various schools, including the robotics technology program at Macomb Community College, the laser and electrooptics technology program at North Central Technical Institute, the forest technician program at the State University of New York College of Environmental Science and Forestry at Wanakena, the pharmacy technology program at Santa Ana College, the business technology degree program in merchandising at J. Sargeant Reynolds Community College, and the leisure service careers program at Moraine Valley Community College. The remaining three sections of the yearbook consist of directories of institutions, technologies, and officials involved in technician education; a list of professional organizations concerned with technician education; and a bibliography of works dealing with technician education. Foreword

DESPITE a leveling off of enrollments in higher education, technician education continues to attract increasing numbers of students who look to it for preparation for a variety of occupations.

This eleventh edition of the *Technician Education Yearbook* continues to record substantial growth in the field, both in the number of institutions and the diversity of offerings. The rapid growth in technician training for the business-related fields is most dramatic. A marked growth in training available for the allied health and public service areas is also evident. In this edition, 19 new occupational technologies are listed, while the more traditional technologies continue to grow and develop.

In response to the development of four-year programs in technician training, especially in the industrially oriented fields, institutions offering such programs are again included in this edition. Frequently, graduates of these programs are known as technologists rather than technicians.

The directory of institutions offering technician training, Section 3, again indicates the growth of the field over the past two years. This year a total of 1,948 institutions is listed. When one remembers that only 701 institutions were listed in the first *Technician Education Yearbook* in 1963-64, the extent of the growth becomes even more apparent. Again this year, there has been a corresponding increase in the number and variety of curricula offered by these institutions.

The information for this directory—the only nationwide listing of schools offering technician training which includes not only the curricula offered but also personnel in charge of the programs, enrollment figures, admission requirements, and accreditations—was obtained from replies to more than 3,000 questionnaires sent out in 1983 to schools that were said to offer such training. The curricula cover a full range of technologies: industrial technologies, agricultural technologies, business-related technologies, civil technologies, electrical-electronics technologies, health-related technologies, medical technologies, consumer sciences, environmental control technologies, public service technologies, and many of the new, more specialized technologies.

For the sixth time, an additional and unique directory is part of *Technician Education Yearbook*. A directory listing 160 technologies and the institutions which offer curricula in them follows the listing of institutions. It is organized so that anyone wishing to find out where a specific technology is taught can refer to that technology and readily ascertain the names and state locations of institutions offering such a curriculum. This in the only current directory giving this information and should be of special interest and value to counselors, administrators, and those involved in or contemplating the establishment of a technology program.

Again this year, secretarial science leads the field as the most commonly offered technology. It is offered in 1,182 institutions. Accounting is the second most popular technology, being offered in 1,130 institutions, followed by nursing, business administration, data processing and systems analysis, electronics, and drafting.

It is with pride that we present this eleventh edition of *Technician Education Yearbook*. It contains, in addition to the directory of schools and technologies, a directory of federal and state officials of technician education; a series of articles on new issues, problems, and proposals; new case studies of innovative technician programs now in operation; a listing of professional organizations concerned with technician training; and a selected bibliography.

Our purpose in this edition remains the same as it was in the first ten editions: to be helpful to those institutions now engaged in technician training, to present ideas and suggestions for those planning to offer such training in the near future, and to give valuable information to guidance counselors so they can intelligently counsel young men and women who might plan careers as technicians.

—*The Editors*

Acknowledgments

FOR their cooperation, their help, and their encouragement in obtaining and preparing the material for this eleventh edition of *Technician Education Yearbook*, we wish to give special recognition to the following persons and organizations:

Staff members of the Division of Vocational and Technical Education, U.S. Department of Education, Washington, D.C., and especially Walter J. Brooking, Program Specialist, Technical Education.

Officials of the various state departments of education.

Staff members of the American Association of Community and Junior Colleges and the various professional organizations in the field whose activities are listed in Section 4 of this volume.

The many individuals, institutions, and companies serving the field of technician education.

And a sincere acknowledgment of thanks to all others who have cooperated in this publishing effort.

New Issues, Problems, and Proposals

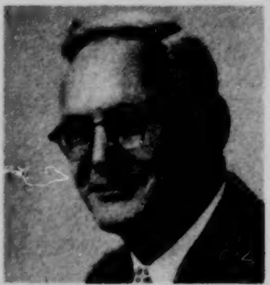
High Technology Challenges the Vocational-Technical Curriculum

by Walter J. Brooking

Education Specialist, Technical Education,
U.S. Department of Education,
Washington, D.C.

TECHNICAL educators who are preparing engineering-related technicians—especially electrical-electronic, mechanical, and computer science technicians—are presently confronted with an urgent challenge from what is being called "the high-technology explosion." As dramatic as this "explosion" seems today, it is not a sudden, isolated happening. It is simply a result of the application of increasingly complex technology which has evolved at an ever faster pace over the last 30 years. It is likely that even more rapid change and increased dependence on complex technology will occur in the future.

Reports in the media indicate that the U.S.'s productivity is declining when compared to some other nations, especially Japan, and that a world-wide technological revolution is taking place with an emphasis on increased automation. To survive economically, the U.S. must keep pace with advances in technology—computerized numerical control, robotics, CAD/CAM, microcircuits and microprocessors, etc. The sense of urgency shared by industrial leaders and economists has dramatized the need for an appropriate and immediate response to this challenge in both the industrial and educational community.



Walter J. Brooking

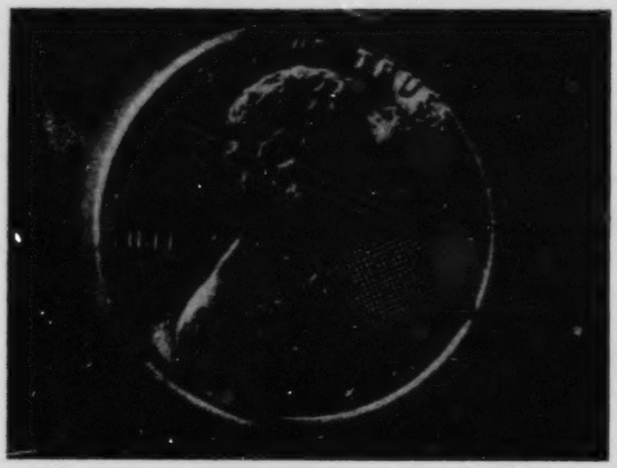
These dramatic technological advances demand more and more of technicians in various fields and therefore require changes in their preparation for employment. Much has been learned in the field of technical education over the last 30 years that relates to today's need to supply more highly skilled technicians—"super technicians" compared to those of even 10 years ago. A review of curriculum research and development undertaken over the past two decades by the U.S. Office of Education (recently merged into the U.S. Department of Education) can provide much that may be useful today in coping with the challenge of high technology.

Curriculum Research and Change

Some of the most revolutionary and far-reaching changes in the engineering technologies have taken place in electronics. The revolution began in the 60s with a shift from vacuum tubes to solid state transistors and printed circuits and then sped up even more dramatically in the 70s with the advent of the silicon chip. These developments in electronic technology have in turn greatly influenced technician education.

In the early 50s, electrical-electronics technology was concerned largely with electrical theory and principles, and electrical power distribution and use. In the late 50s, electronic technology began to emerge as a distinct discipline. In 1960, the U.S. Office of Education (USOE) published curriculum guides for both electrical technology and electronic technology for the first time. The USOE revised the electronic technology curriculum from vacuum-tube-based to solid-state-based and reprinted it under the same title in 1966. Included in the revision was an "Introduction to Computers" course. The revision reflected curriculum content selected from public and private programs and evaluated by a national panel of technical educators and representatives from industry.

During the same period, there were only two major technician programs that dealt with machines—power and related mechanical devices, and mechanical design and construction. The dramatic changes in electronic technology were mirrored in the mechanical technologies and in other fields as well. In 1962, the Office of Education published "Mechanical Technology (Design and Production)" and "Business Data Processing." As technology continued to advance, educators responded to the need to expand the traditional curriculum to encompass new technology and specialization while developing strong fundamentals and integrating important concepts from other disciplines.



Courtesy of IBM Corporation

This microprocessor is one-tenth the size of a penny and contains 1,496 circuits.

The Emergence of the "Super Technician"

Under contract to the USOE, the Instrument Society of America began to prepare an "Instrumentation Technician" guide in the early 60s. During the task analysis phase of this project, discussions with technical workers revealed that mechanical technicians found electricity-electronics mysterious and that electrical-electronic technicians felt ignorant about mechanisms, even though electrical currents and switches drive all sorts of mechanisms. Obviously, the instrumentation technician needed to be trained in both areas. The suggested curriculum guide, which was published in 1966, reflected this broad-based approach and also included a course on computers and computer systems. This was one of the first projects that featured a multidisciplinary approach to technician training.

Development of the instrumentation curriculum guide led the participants to propose that a different approach to teaching physics for engineering technicians was needed. The new approach should be based on the inherently analogous relationship between electrical, mechanical, pneumatic, hydraulic, and thermal energy factors used in modern devices and machines, thus teaching the principles and applications of all five forms of energy and power. This approach would provide the physics foundation for a new, broad-based electro-mechanical technology curriculum.

Other Interdisciplinary Programs

In the late 60s, numerical control technician education programs emerged. These curricula combined computer programming with mechanical processing so that computer programs could be written to drive mechanical processes. The USOE published a numerical control curriculum guide in 1970.

In the late 60s and early 70s, several programs were developed to prepare computer service engineering technicians. These programs were built on a strong electronic technology base with additional courses on mechanical devices and mechanisms that would be necessary to allow graduates to diagnose and correct malfunctions in large computers. Some computer companies provided these technician education programs as private proprietary education. Other computer companies cooperated with public and private schools to start programs to teach computer service or computer engineering technology.

Microcomputers play a role in many technical fields and often in the educational process itself.

In 1966, an effort to prepare and test a "curriculum to meet the changing manpower needs of the computer and business machine industries" began. This effort was especially interesting because it was carried out by a consortium supported by industries in the field, led by IBM, and involved seven schools with electronic technology programs. The 28 corporations involved in the consortium contributed equipment and funds, and there was a $98,000 grant from the Office of Education. Ward Technical Institute, a division of the University of Hartford (Connecticut), coordinated developmental work on the curriculum as well as other consortium activities.

The major task of the consortium was to add computer programming and the necessary knowledge and skills relating to electro-mechanical devices to existing electronics programs. This would prepare the graduate of the program to cope with the requirements of diagnosing inoperative computers or auxiliary units and repairing, maintaining, adjusting, or making minor modifications in them. The curriculum, published in 1968, was called "Electro-Mechanical Technology." It was considered moderately successful in serving industry needs. As a comprehensive electro-mechanical program, however, it lacked depth in mechanical, hydraulic, pneumatic, and thermal power principles.

The Electro-Mechanical Technician

Research in the field of electro-mechanical technology began with a nationwide study of technician needs conducted by the School of Industrial Education at Oklahoma State University and funded in part by the U.S. Office of Education. The results of this study, reported in 1966, indicated "a need for technicians with at least two years of specialized post-high school training. The skills and knowledge needed for these occupations were identified as differing significantly from those generally available in technician training programs offered by two-year colleges."[1]

The USOE, recognizing a need for a systematic research and development effort in the field of electro-mechanical technology, provided a grant to Technical Education Research Center (TERC) of Cambridge, Massachusetts, for this purpose. During the ensuing five-year period, TERC, working with Oklahoma State University, developed and tested a unique program of instruction in this new field. The results of this experimentation demonstrated that technicians can be prepared to feel comfortable with and to function in a comprehensive electro-mechanical mode.

The materials produced under the USOE contract included course outlines and instruction guides. However, technical instructors found the course content and sequences to be so different from those they had learned or were teaching that they considered them too difficult to adopt and use universally. In part this was because there were no published materials which described the required technical physics in terms of the analogous relationship of mechanical, electrical, thermal, and fluidic power. In spite of that limitation, by 1973, the materials developed through this research were being used in over 30 states, and several new electro-mechanical technician programs were started. These programs are still operating successfully today.

Other Research and Development

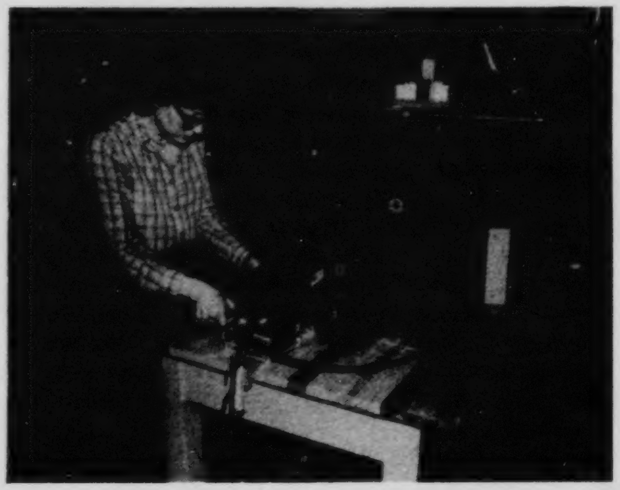
In addition to electro-mechanical technology, other major research and development programs for new and emerging technologies, which required knowledge and skills from more than one traditional technology, were undertaken in the late 1960s and early 1970s. Between 1967 and 1973, a curriculum and related course outlines for biomedical equipment technology were prepared and tested. In addition to electrical and mechanical elements, aspects of medical treatment and hospital administration were included in the curriculum.

A nuclear medical technology program, with a different mix of technologies and fields incorporated into the curriculum and courses, was developed between 1968 and 1974. The nature of radioactive isotopes and radiation as well as the development of a special physician-technician relationship were included in the program.

During this same period, laser electro-optics technology teaching and learning materials were developed. This program required that both a highly specialized electronic program and a technologically new laser-optical technology program be defined and documented in the curriculum.

A New Approach

In the laser electro-optics technology curriculum a different approach to the organization of the courses and the teaching/learning materials was used. The courses were broken down into six to twelve separate modules. Each module contained the needed knowledge and skills pertaining to a relatively free-standing concept, process, or simple subject. All were designed for use by both the instructor and the student. Each was competency based, and provided prerequisites, title and introduction, objectives, technical content, mathematics used, scientific basics, laboratory exercises, problems and a test. Because the modules broke the curriculum down into small increments, instructors found the modules easy to understand, to identify with, and to use as needed to meet their specialized needs. All subsequent technical curriculums developed by the USOE were in this modular form because of the great flexibility and ease of presentation it offered.



North Central Technical Institute used the TERC materials to set up a laser technician program.

---

[1] Maurice W. Roney, "A Field Study of Electro-Mechanical Technology Occupations" (Sept. 1966) and "A Post-High School Technical Curriculum" (Nov. 1966).

The learning materials developed under all but the most recent of the USOE contracts we have discussed have included curriculum outlines, showing courses in a sequence designed to teach all aspects of the technology. Detailed outlines were provided for each major technical aspect and related courses were designed to teach the technical knowledge, skills, procedures, and techniques which were distinctive to each. The technical courses were, in turn, supported by courses in the underlying physics and supporting mathematics, with some attempt to clarify and simplify the specific physics concepts relevant to each technology. Unfortunately, these curricula proved to be less successful over time than the new modular programs.

In contrast to the outline approach used in the previous projects, the modular electro-optics program offered a new approach which made the curriculum easier to utilize. The success of these projects led to further analysis and refinement of the modular concept to respond to the demands of teaching the increasing amounts of technical subject matter required by multidisciplinary programs.

Two major conclusions were drawn from this analysis. First, that the key additional curriculum task in each program was to teach the required theoretical physics concepts and supporting mathematics of electrical, mechanical, fluidal (pneumatic and hydraulic), and thermal energy systems, showing them to be analogous and behaving according to common characteristics. The second necessary element of this teaching approach is early and continuous class and laboratory learner involvement with the principles and use of all four forms of power.

Unified Technical Concepts in Physics

Since no physics teaching materials of this sort—organized along the unified technical concepts plan and suitable for teaching physics for technician programs which require a combination of electrical-electronic and mechanical-fluidal-thermal principles and practices—were available, the USOE undertook to develop them. From 1976 to 1980, the Office of Education funded grants to develop and test materials for a special "Unified Technical Concepts (UTC) in Physics" program for technicians. In 1980, this project published 183 separate teacher/learner competency-based modules. These materials are organized under 13 separate "Concept" headings, with a total of 170 separate "Application" modules within the 13 concepts.

Each concept module describes a basic aspect of physics and its application in the four energy systems—mechanical, fluidal, electrical, and thermal. Concept modules are designed for classroom presentation and include practical examples and demonstrations. Each application module describes the application of a *single* physical principle in one of the four energy systems. They are designed for laboratory use and include a discussion of the physics involved and a laboratory experiment to demonstrate the principle.

Instructor's guides provide assistance in using and teaching UTC Physics. These guides contain information on course design, module descriptions, equipment lists, solutions to the exercises, and helpful hints compiled from field tests. The Center for Occupational Research and Development (CORD), formerly Technical Education Research Center—Southwest, developed the materials. These physics teaching materials are being used in an increasing number of technical education programs, and by more and more employers for updating and strengthening the technical background of their employees.

The first new technical curriculum in which the modularized Unified Technical Concepts in Physics approach was incorporated was the "Energy Conservation and Use Technician Curriculum," developed under a USOE contract between 1978 and 1981. It is a two-year postsecondary curriculum consisting of 16 courses comprised of 124 separate modules plus selected technical physics modules. A program planning guide was also prepared. The curriculum was tested in four schools which implemented programs to use and test the new materials and curriculum. All four of the pilot schools graduated students from their programs in 1981, and all students who sought employment in the field of energy conservation and use obtained it.

The energy conservation and use technician must function in a truly comprehensive and multidisciplinary field where all forms of energy and power use and conservation must be understood, measured, evaluated, and managed. The initial technical preparation for this complex technology appears to have been made practical through the use of the USOE curriculum and materials. All four test sites are continuing the program.

Conclusion

The review of technical education curriculum research and development presented herein is obviously limited to the initiatives taken by the U.S. Office of Education under the Vocational Education Act of 1963 as amended over the past 20 years. These efforts reflect an attempt to address the nation's need for new kinds of technicians for emerging and changing technical occupations and to improve the quality of technician education. The purpose of this review, limited as it is, has been to illustrate that the challenges of high technology which technical educators currently face are not entirely new. Much on the subject has already been studied, tested, and documented.

Undoubtedly much is yet to be learned. At the same time, much is already known which will contribute to the preparation of adequately skilled and knowledgeable technicians to meet the challenge of high technology. By using the concepts and materials described herein, broad-based "super technicians" can be prepared within the traditional two-year period to meet the demands of high technology. It is not easy, but it can be done.

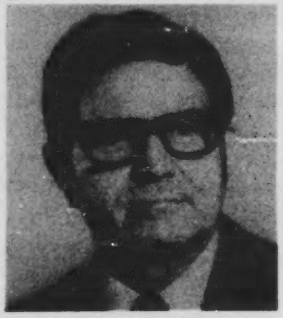
Assessment of Technical Competency

by Gordon C. McMahon

Former Executive Director,
National Occupational Competency Testing Institute

WITHIN the last hundred years, a developing and changing technology has radically altered the patterns of life and labor in the United States. Technological changes were at first so gradual that our educational system, presumably aware of its responsibility to serve the needs of society, continued to follow the traditional curriculum virtually unchanged, well into the third decade of the twentieth century. The changes that occurred then, following the authorization of vocational education in 1917, made relatively little impression on the vast establishment of American education. At no time in the succeeding 65 years has vocational education been allowed to meet adequately the needs of either the youth it should have served or the labor it should have supplied.

While there can be no question of the need to continue and expand vocational offerings at the secondary level, technology has again outpaced education. Youth who wish to enter the labor force and experienced workers whose occupations have been eliminated are not educationally prepared to handle the technical requirements of the new generation of jobs. Our educational system has not responded properly to the challenges of preparing workers to enter this new segment of the labor force. We have in the past produced an over-supply of engineers who design and control the technology and a shortage of the technicians who implement it.



Gordon C. McMahon

Fortunately, we have in place the basis of a system that can do a great deal to alleviate that shortage. The two-year technical institution and the community college with technical offerings were developed to complement our industry/business complex. Without the support of that industrial/business community, most of these colleges would never have been built.

Because it is administered by a local government entity, usually the county, the two-year college can offer programs that provide skills and technical knowledge to prospective employees that is useful to area business and industry. In return, business and industry will frequently provide support to the colleges in terms of machines, tools, supplies, and encouragement. If the college or institute is responsive to the needs of the community, a complementary arrangement of great benefit to everyone can develop.

In our fast-moving technological society, this arrangement cannot be static. The curriculum must be examined and reexamined to be sure that the technicians being trained are equipped to meet the challenge of the workplace; that they have a background in the mathematics and sciences directly related to the processes and equipment with which they will work; and that they understand the role they will play in the production process. It is not enough to develop a curriculum and transmit information and skills. We should be able to test the results, to assure both the school and the employer that the instruction has been absorbed and translated into usable and salable skills.

Accountability in Technical Education

Accountability seems to be a catchword in education; however, there is ample justification for demanding accountability in technical education. While each level of responsibility in the administration of publicly supported technical programs carries some burden of responsibility to the level above, all are accountable to the community at large for supplying technicians prepared to take their places in the labor force.

Accountability implies proof and it is at the level of proof that the system has been weakest. A sound program of testing, designed to measure the level of competence, should be a requirement in every technical education program. Since the validity and reliability of tests are difficult to establish when the sample is small and local, a nationally recognized system of competency-based testing has been established in Albany, New York. NOCTI, the National Occupational Competency Testing Institute, has developed, field tested, and subjected to item analysis and revision a large number of tests. The Institute has developed both teacher and student tests, with an emphasis at the community college and technical institute level on student tests.

Competency-based training and testing can be used successfully at many skill levels.

The Student Testing Movement

Almost four years ago, the executive director of NOCTI and several state directors of vocational education discussed the feasibility of building a set of tests which might appropriately evaluate the occupational/technical competency of two-year technical program students just prior to their graduation. After a period of consultation, the directors agreed to form a consortium and work with NOCTI in an all-out effort to fashion respectable tools of evaluation which would be appropriate for use with the two-year technical school graduate. Student Occupational Competency Achievement Testing (SOCAT) became a reality. Because state directors are generally responsible for both secondary and postsecondary programs, they indicated that the test should be developed for secondary graduates as well.

Under the NOCTI/SOCAT plan, participating states mutually agree upon test titles to be developed and work together to establish test construction teams in each of the states. All consortium states participate in the process of competency identification and verification and, in doing so, provide a certain leveling effect on any differences which exist within selected occupations from state to state. The NOCTI/SOCAT people involved in the construction of these tests recognize that this is a process with far-reaching implications. Once a committee has identified the required competencies for a particular occupation, this list is circulated to expert committees made up of experienced instructors and identified leaders from business and industry in several additional states. This process, in effect, establishes a standard for that specific occupation at entry level.

When we stop to consider that one of the common characteristics of the American worker is the ability to devise diverse ways of accomplishing the same job, we recognize that the simple process of creating a battery of occupational tests will not standardize the methodology of American business and industry. However, the process of task and competency identification that is taking place here may bring about some curriculum changes which eventually will create better training programs in private, proprietary technical and apprenticeship systems as well.

It is recognized that some tests are, by nature, a great deal more difficult than others. Thus, the test results which emanate from a cycle of testing are themselves an indicator as to whether the competencies selected are valid for evaluating individuals at this level in their development and preparation.

Each SOCAT test is made up of two parts: a written achievement test, consisting of approximately 160 to 180 multiple-choice questions; and a performance test which involves several jobs or assignments typical of those which a worker in the specific occupation might be asked to perform in the workplace on any given day.

Administering the Tests

In order to use the test, it is necessary that a dean or administrator be designated to direct their administration. NOCTI recommends that the tests be administered on three separate days. A short, standardized scholastic ability test is available and it is suggested that this be given first. It can be given by almost any staff member since the directions for its administration are quite clear and direct. This test requires 38 minutes. Generally the written achievement test is administered next. This test also can be administered by any staff member who is available since the directions are self-contained. Three hours must be scheduled for the achievement test, although most students will complete it in less time. The last test is the performance test. This test also requires three hours and this period should be uninterrupted. It must be administered by at least two individuals who are experts in the occupational/technical area concerned. If one is the regular instructor, NOCTI recommends that the other be a member of the advisory committee for that technical area. The two evaluators are requested to make separate evaluations of each student for each task and to average their scores. This tends to eliminate any teacher bias. It is also a tremendous opportunity to involve members of the public who serve on advisory committees.

Assessing the Results

All worksheets and test booklets are returned to NOCTI for scoring. The answer sheets are machine-scanned and transferred to a master tape. Calculations are later made by the computer. Each student receives an individual printout sheet giving the results of the three tests. Percentages and percentiles are reported for each subscore and a total for the student, the class, and for all students in that state who took that particular test is included. The teacher also receives a printout sheet which gives the identical information for the whole class.

After all testing within the states is completed, the accumulated data from all participating states will be available. If individual schools or states wish to use this data to establish cutoff points as passing scores, they may do so. A number of states are considering testing successful workers with the SOCATs as a method of establishing industry-based cutoff scores.

NOCTI completed the field testing of the first 20 SOCAT tests in the spring of 1982. Eleven states participated in the field testing and, following some very minor revision work, these tests were placed on the market in the winter and spring of 1983. An additional 10 tests were field tested during the spring semester of 1983. These will be prepared for sale following the item analysis and revision process. In situations where the same test is applicable at both the secondary and postsecondary levels, separate norms are available. The tests currently available are:

Accounting/
  Bookkeeping
Agriculture Mechanic
Auto Body
Auto Mechanic
Construction Electricity
Drafting
General Merchandising
General Office Clerk
Heating and Air
  Conditioning
Horticulture
Industrial Electronics
Machine Trades
Plumbing
Practical Nursing
Printing
Radio and TV Repair
Refrigeration
Sewn Products
Small Engine Repair
Welding

Tests which will be available soon are:

Banking, Savings, &
  Loan
Cabinetmaking
Carpentry
Commercial Foods
Computer Programmer
Construction Mason
Industrial Electrician
Medical Assistant
Production Agriculture
Truck and Bus
  Mechanic

If the state, county, or local administration wishes to take charge of the administration of the tests within the schools under its jurisdiction, it may secure the specific tests in the quantity it desires and may supervise the administration cycle. On the other hand, if an individual dean of a single school wishes to become involved, the tests may be secured and administered within a particular institution. The most important requirement is that the individuals in charge assume responsibility for the proper administration of the tests.

A concerted effort has been made by the test construction teams to build tests which include content appropriate to a specific occupation or a specific part of a recognized occupation. Thus, the tests are purposely more oriented toward the occupation as it currently exists in the workplace than toward courses as they may be taught in a particular school or state.

Courtesy of Emco-Maier Corporation

Preparation for high-technology occupations requires sophisticated training and comprehensive testing.

The Educators' Reactions

Although the members of the consortium recognized that this undertaking would require exceptional cooperation between the states and particularly between the individuals involved, the total significance of how this evaluation effort could improve the quality of vocational-technical education in the United States was not fully grasped. In fact, its real potential is yet to be realized. As the reports came back from the states participating in the field tests, it became obvious from the reactions of teachers and administrators that they were exceptionally pleased to have participated and that they looked forward to having standardized tests in vocational-technical education.

Initially, small workshops were conducted in various states to teach the proper methodology for the administration of the tests. The instructors and administrators seemed anxious to secure the correct information and to do a respectable job, but there was limited enthusiasm. However, as test results were made available and printouts were returned to the states, it became possible for instructors to show their students how they ranked when compared with other students in their own school and state and enthusiasm began to build. They also enjoyed the opportunity to chart their own scores on blank profile sheets provided by NOCTI.

In some states where field testing has been conducted, state education department personnel have held area meetings of local supervisory personnel to completely explain the test results and discuss how they might be used to bring about program improvement. We are happy to report that the acceptance of SOCAT testing by administrators at both the secondary and postsecondary levels has been overwhelming.

Conclusion

Most educators recognize that the utilization of the competency record, a practice put into effect by our federal offices, is really not a legitimate tool for the evaluation of a program considering the present state of the economy. It has been suggested that the SOCATs be used to show that students with appropriate scores have reached a level of competence whereby they can be correctly characterized as "employable" and that less emphasis be placed upon the current placement percentage.

In days past, it was the pattern of the United States Office of Education to encourage these kinds of projects through research or implementation grants. As we are all aware, federal educational funds are now somewhere between in short supply and nonexistent. If, out of necessity, we have to work together to produce a set of evaluation instruments that can be used to measure the competency of our vocational-technical graduates, it is possible that the final products will be of better quality than if they had been produced by a private research group. When we look at the supply of human resources employed in community colleges and technical schools and add to that the expertise of our secondary teachers, there really are few projects too large or too difficult for us to undertake if we work together.

As previously stated, several state directors of vocational education made the decision to fund the effort in this case. The National Occupational Competency Testing Institute, a private, nonprofit testing organization, thankful for their confidence and support, has been the coordinating agency for the production of the SOCAT tests.

We have only begun a very large undertaking. If you are in vocational-technical education at either the secondary or postsecondary level, we encourage you to use these tests and provide us with your critiques. We feel that by a combined effort we will build the finest set of evaluation instruments possible. We look forward to receiving your comments. The National Occupational Competency Testing Institute is now located at Ferris State College, Big Rapids, Michigan 49307.

Industry and Education Cooperation Serves America's Needs

by Catharine P. Warmbrod

Research Specialist,
National Center for Research in Vocational Education,
The Ohio State University,
Columbus, Ohio

WITH the scarcity of funds available for education and the increased demands upon postsecondary occupational education to serve the human resource development needs of industry and the retraining needs of the displaced worker, it is important that colleges maximize the use of their resources through collaborative activities with business, industry, labor, and government. Continual changes in technology require that industry and education work together to prepare, retrain, and update potential and present employees. Vocational and technical training in community, junior, and technical colleges has the potential of being one of America's strongest links in developing and revitalizing the economy in the 1980s and beyond. Many two-year colleges already have forged such links by establishing programs to strengthen both the skills of workers and the productive capacities of business and industry in their regions.

Technical Education and Economic Development

Technological advances, coupled with changes in the national economy, the shift from labor-intensive to capital-intensive production methods, the aging of the work force, and the increasingly high rate of unemployment over the last decade, have prompted two-year colleges to seek ways of becoming more involved in economic development. Because there have been few direct initiatives at the federal level to involve two-year colleges in economic development, state systems or individual community colleges have had to devise their own strategies. New roles have emerged or are emerging for two-year colleges, including: (1) more innovative training and educational programs; (2) a variety of industry services programs; (3) closer attention to the special needs of adult learners; and (4) new and closer linkages with state and local agencies, industry, unions, and professional and trade associations. This active role requires that community and technical colleges work closely with business and industry to offer the specific training, upgrading, and retraining needed and to share resources through cooperative endeavors to meet common goals. This helps create quality programs and supplies skilled workers to meet employers' needs.

Catharine Warmbrod

Two recent projects at the National Center for Research in Vocational Education focused on collaborative relationships between postsecondary education and industry. The word *industry* as used in this paper refers to business, industry, labor, government, and agricultural and medical organizations and agencies. The first project dealt with the sharing of resources between postsecondary occupational education and industry. The second project studied the retraining and upgrading of workers for industry by colleges and how the economic development of the area was affected.

Education and Industry Sharing Resources

The Sharing Resources Project identified and examined exemplary programs where there was sharing of facilities, equipment, materials, and personnel by two-year colleges and industry. In each state, sites were nominated by the state directors for two-year colleges and key representatives at the colleges were asked to describe their most outstanding collaborative programs via a questionnaire. They identified what the college and industry each contributed, the benefits to each, and what they considerd to be the critical elements for success in such endeavors. Responses to the questionnaire were received from 138 colleges in 39 states, providing descriptions of 219 programs and practices.

A book, *Sharing Resources: Postsecondary Education and Industry Cooperation*, reports information from the survey.[1] It contains a brief description of each of the 219 exemplary programs. From this body of information, the following guidelines have been formed to help other colleges that wish to implement new collaborative efforts with industry or to expand present efforts.

1. *There must be good, clear communication between key persons in industry and education.* Good communication requires that the persons in industry and education understand each other's roles and responsibilities and realize what each can offer.

2. *Excellence in teaching is essential.* Instructors must have knowledge of the industry they are involved with and must know how to gain the respect of and relate to the worker-student.

3. *Institutional flexibility is required to meet the needs of industry.* There must be flexibility in scheduling courses, in assigning faculty, and in designating locations where courses can be offered. Program times, length, and location must be consistent with the user's available hours and needs. Flexibility is also needed in selecting the mode of instruction, i.e., the delivery system.

4. *Programs offered must be of high quality.* When the college provides courses for industry, the programs must be up to date, relevant, and of high quality. Courses specifically tailored to the needs of a specific company are particularly effective. All parties should agree on course content.

5. *Appropriate, active advisory committees are important.* Industry's support and guidance in developing and maintaining programs are essential. Key personnel must be willing to volunteer time and resources.

6. *The educational institution should be able to respond quickly to meet industry needs.* This requires institutional flexibility and the knowledge and skill of involved college personnel. Short-term or modular courses can help provide quick delivery and successful outcomes.

7. *There must be a recognition of mutual needs.* To warrant the time, effort, and resources required for collaboration, the needs and benefits must be clearly perceived. The vision and persistence of interested parties is required. It takes the dedication of someone in both education and industry to make it work.

8. *The support of administrators and faculty within the college is required to successfully serve industry.* Administrators and faculty must see this as part of their institutional mission and recognize the benefits.

9. *Careful and thorough planning in each cooperative effort is essential.* A good survey of industrial needs and a realignment of educational objectives to meet those needs contribute to successfully serving industry. Through careful planning, the return on effort is maximized.

10. *A clearly written agreement or contract helps achieve successful completion of the joint endeavor.* When the duties and responsibilities of each party are clearly delineated, misunderstandings are reduced and performance is improved.

11. *The program should be evaluated on a continuing basis in order to update and improve it.* By assessing each program both as it progresses and at the end of the course of study, the content, procedures, and management of effort should improve.

A corporation-sponsored training seminar for claims adjusters was conducted at Triton College

Retraining and Upgrading of Workers

A special kind of sharing often occurs when community and technical colleges tailor their services to meet an industry's need for retrained or upgraded workers. There is a growing, critical need for these educational services as companies install new technical processes, as workers are forced to find employment in a new line of work, or as a company expands its work force or moves to another state.

To help colleges respond to this need for retraining and upgrading workers, the National Center for Research in Vocational Education conducted a project to study and report on colleges that had extensive and successful industry services programs. The colleges were selected to meet specific project criteria and the final selections were based on recommendations of the project's technical advisory panel and other leaders in the field.

---

Courtesy of State Technical Institute at Memphis

Cooperation with industry can provide access to a wide variety of specialized technical equipment.

The colleges studied were Tri-County Technical College in Pendleton, South Carolina; Macomb Community College in Warren, Michigan; State Technical Institute at Memphis in Tennessee; Triton College in River Grove, Illinois; and South Oklahoma City Junior College in Oklahoma. A qualitative research approach was used to gather information about the selected colleges, the companies they serve, and related state and local organizations and agencies. Key persons both within and external to each of the colleges were interviewed and pertinent documents and records were secured.

The information obtained was used in preparing a book, *Retraining and Upgrading Workers: A Guide for Postsecondary Educators*, to help community and technical colleges improve and expand retraining and upgrading services offered to industry.[2] The book contains case studies of each of the colleges, focusing on their industry services programs and other economic development activities. Each case study describes the economic environment in which the college exists, the state structure for two-year colleges and vocational education, and the state structure for economic development. Each college is presented in terms of its mission, organizational structure, funding, and distinctive features. Emphasis is placed on the college's structure for upgrading and retraining, with full descriptions of the roles, responsibilities, and relationships of all involved parties. This includes industry services (customized training), continuing education programs, and regular technical education programs for occupational advancement. The college's working relationships with state and local economic development and educational agencies are described. In-depth reports on customized training for the major companies with whom each college works are also presented from the viewpoint of both the industry and the college.

Information from all of the case studies was synthesized and analyzed to identify the critical elements for success—those factors that play a crucial role in enabling colleges to successfully serve the upgrading and retraining needs in industry and thereby contribute to the economic development of their communities and states. These critical elements may be viewed as recommendations for other colleges wishing to improve or expand their upgrading and retraining services.

Courtesy of Macomb Community College

Often, new types of technician programs can be implemented by sharing facilities and expenses.

Critical Elements and Recommendations

The following list summarizes the important factors when providing special services to industry:

1. Strong leadership on the part of the college president is essential in mobilizing the college to serve industry and to aid in local and state economic development.
2. A visible commitment to serving industry on the part of top college administrators is the key to fostering commitment throughout the college.
3. An explicit reference in the college's statement should commit the college to providing special training and educational services to industry.
4. Institutional flexibility is crucial when responding to industry's upgrading and retraining needs and to those of adult workers.

---

[2] Warmbrod, Catharine P. *Sharing Resources: Postsecondary Education and Industry Cooperation.* Columbus, Ohio: The National Center for Research in Vocational Education, The Ohio State University, 1981.

5. Good communication—both with outside organizations and within the college itself—is pivotal to serving industry's training needs.
6. The college must convince industry of its commitment to serving their needs.
7. Accurate and up-to-date profiles of local industries are vital to serving local economic development needs effectively.
8. Designating an office with the specific responsibility of providing industry training services is critical to success.
9. Companies must see how they will benefit from using the upgrading and retraining services provided by the college.
10. Becoming an integral part of the program for economic development is an advantage for a two-year college.
11. A staff development system that helps faculty keep up to date is crucial in delivering effective programs.
12. Active advisory committees are critical when seeking information and contacts for developing quality upgrading and retraining programs.
13. Up-to-date equipment is a key element in providing quality educational services to industry.
14. Close coordination is essential among college industry services representatives, customized training instructors, and company personnel when planning, conducting, and evaluating customized training courses.
15. Technically competent instructors who know how to teach adults effectively are necessary for quality training in an industrial context.
16. An institutional incentive system helps secure the involvement and cooperation of faculty.
17. Scheduling courses at times and places convenient to companies and their employees is critical to successful economic development outreach.
18. The inclusion of time for course development and evaluation in schedules and budgets for customized training is crucial to successful programs.
19. A "quick response" is a key factor in meeting industry's training needs effectively.
20. The sharing of resources among related colleges—especially those within a state system—should enable more colleges to meet industry's training needs.
21. Evaluation and feedback mechanisms which gauge the quality and outcome of customized instruction should be built into the courses in order to ensure successful programs.

Conclusion

The study of colleges and industry that are sharing resources and the study of college programs for upgrading and retraining workers both support the claim that two-year colleges can contribute substantially to local and state economic development despite very divergent economic climates, significantly different state community and technical college systems, and different institutional missions and structures. Colleges have found creative ways to adapt and respond to industry's needs. They have overcome such common problems as strict limits on funding and other resources, shifts in student demographics, scarcity of space and equipment, and the rapid pace of advancing technology. These colleges' track records show that they have made a real difference in their communities' economic health by providing training and other industry services that contribute significantly to job creation, industry retention, technology transfer, increased worker productivity, and the improvement of the work environment for local adults.

The value of practical experience in the development of technical competence cannot be overestimated.

The Ohio Technology Transfer Organization (OTTO) and Its Role in Two-Year Technical Education

by Kim Bonewit

Coordinator, Ohio Technology Transfer Organization,
Hocking Technical College,
Nelsonville, Ohio

THE state of Ohio has experienced many of the same financial ills as other midwestern states over the past several years. Some of the state's difficulties can be linked to a private-sector business and industrial environment which suffers from many of the same woes. Low worker productivity, obsolete machinery and methods, and a lack of sufficient stimulation in small business and industry have resulted in companies leaving the state, thereby draining Ohio of many well-paying jobs, future economic growth, and the financial resources to support 12 four-year universities and 25 two-year community and technical colleges. It has been suggested, ironically, that the resources necessary to keep Ohio's business and industry viable and growing can be found in the state's higher education system and within a variety of public (both state and federal) organizations where access from the private sector is difficult.

Rather than complain about what could, or should, be done, Ohio has taken a leadership role in the exchange of technological information with the establishment of the Ohio Technology Transfer Organization (OTTO). OTTO was founded in 1979 by the Ohio Board of Regents, which governs two- and four-year colleges within the state, and is funded for the biennium by the state legislature.

How Does OTTO Work?

The state of Ohio responded to the need to establish a partnership between the users of technical information, including small business and industry, and the generators of that information—generally federal laboratories, research and development firms, and, of course, the state's two-year and four-year colleges. The Ohio Board of Regents strategically placed technology transfer coordinators at 13 community and technical colleges. Using the format of the successful county agricultural extension agent as its model, each participating college employed an OTTO coordinator to assist the area's business and industry. The primary function of each coordinator is to assume an active, personal role in providing technical assistance to these organizations. The coordinator attempts to make a minimum of 10 new contacts each month and to respond to additional requests from current or former clients. Confidentiality is maintained with each client. The OTTO coordinator is often viewed as a "broker for technical information," in much the same way as a stock broker works to supply information and advise clients on potential investment opportunities.

Kim Bonewit

The OTTO coordinator's mission can be summed up in the following statements:

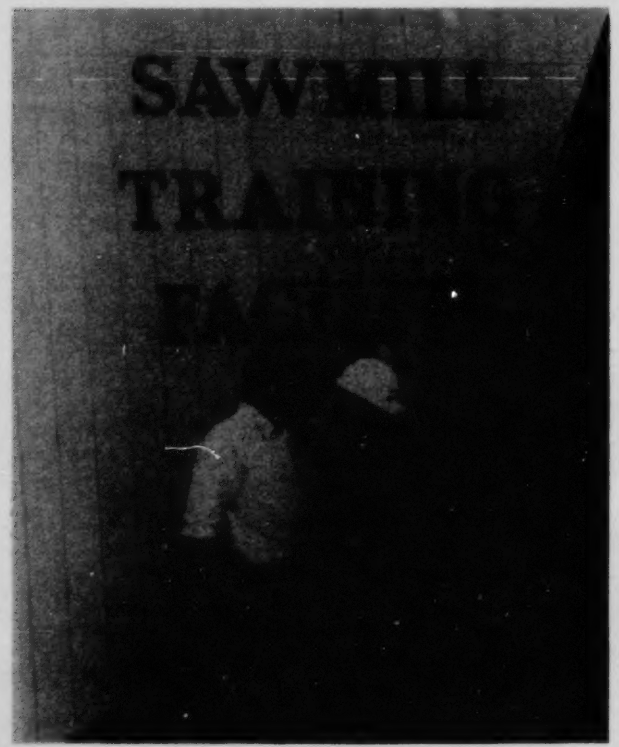
1. To work at the grassroots level to impart current or newly derived knowledge to Ohio's small business and industry.
2. To provide technical assistance to those small businesses or industries who currently do not have the capacity to generate or to retrieve technical data.
3. To respond to specific requests for technical assistance, whether it be for lower-level information or high "state-of-the-art" technology.
4. To encourage Ohio's business and industry, through awareness programs, to incorporate new levels of technology into their current knowledge with the hopes of increasing productivity and

reducing employee turnover.

5. To take an active role in developing innovative strategies that will encourage new industries to locate in Ohio.
6. To work with the leading industries within each coordinator's region to strengthen the current economy and enhance future economic development.

OTTO and The Ohio State University

The Ohio State University, one of the largest educational institutions in the United States, acts as the administrator and research coordinator for the organization. A full-time administrator and two research assistants aid the coordinators by accessing computerized data bases, such as the National Technical Information Service and Mechanized Information Center at OSU. Access to other industry-related data bases is also available at a fee. The organization also has an excellent working relationship with the directors of the Federal Laboratory Consortium, a network of over 200 laboratories. In 1982, four technical specialists were employed to further assist each coordinator in the fields of business management, marketing, electrical engineering, and structural engineering. Additionally, faculty members at The Ohio State University are called upon to bring their specific expertise to bear in solving a client's problems.



OTTO and Hocking Tech work closely with the active timber industry in southeastern Ohio.

OTTO and the Community and Technical College

Community and technical colleges were chosen as the educational institutions to house the OTTO coordinators for several reasons:

1. Ohio's community and technical colleges are regionally located and spaced in such a way as to permit each coordinator to serve five or more counties.
2. Each community and technical college teaches certain unique technologies which may have an immediate impact on the business and industry in its respective region.
3. Community and technical colleges are highly accessible to the people within the communities they serve.
4. Business and industry in Ohio are better served by a "network" of coordinators, assisting one another and combining technical expertise which is unique to each of the home campuses.
5. Each college is encouraged to provide increased opportunities for faculty and business interaction, with an emphasis on using faculty members' expertise in solving clients' problems.

OTTO and Hocking Technical College

OTTO has a very special relationship with Hocking Technical College in Nelsonville, Ohio. Because it is in a relatively rural area, Hocking Tech has a number of unique and innovative technical programs, created to serve the leading industries in the region. Forestry, sawmill operations, and recreation and wildlife programs offer students an opportunity to learn and earn in one of the finest hardwood regions of the United States. Students in the hotel and restaurant management, culinary arts, and travel and tourism programs have the benefit of training in a 40-unit, full-service motor lodge which is owned and operated by the college. The ceramic engineering program at Hocking Tech was the first in America to provide two-year training of technicians in an industry-oriented program for the ceramic industry, which is heavily concentrated in southeastern Ohio. Hocking Tech is the only college in the nation offering two-year training in heat processing technology. Graduates of this program, along with ceramic engineering, receive the highest salaries for entry-level technicians of all the associate degree programs offered by the college. The OTTO coordinator at Hocking Tech places special emphasis on working with business and industry in these fields because of the wealth of knowledge in these technical specialties.

The cooperation on the part of faculty and technical staff at the college has been enormous. These individuals, working with local industries, have opened many doors for the placement of graduates, the part-time employment of current students, and the creation of scholarship opportunities for future students. In many cases, the faculty and technical staff members have been compensated for their OTTO work by compensatory time off, extended summer contracts, and consulting fees paid by the companies for some of the longer, more time-consuming projects.

OTTO at Work

A local company which manufactures powdered-metal products experienced difficulty with surface rust on certain parts. The company requested OTTO/Hocking Tech's assistance in finding a better rust preventer or inhibitor for their products. They listed several requirements as prerequisites for the selection of the rust inhibitor. With those in hand, the OTTO coordinator made telephone calls to Battelle Memorial Institute in Columbus and to NASA's Lewis Research Center in Cleveland. Both institutions recommended a rust preventative which uses "vapor-phase inhibitors." They indicated that this type of preventative would probably enhance a powdered-metal part's ability to prevent rust, since the part is very porous. The OTTO coordinator subsequently arranged for samples of each inhibitor to be sent directly to the company for testing. One product was found superior and was selected because it could also be recycled through the tumbling machinery where the parts receive a coating of the rust inhibitor. As a result, the company anticipated a potential savings of $2,000-$3,000 per year for chemicals. In addition, the longer shelf life of the parts, coupled with a reduced return rate from customers, is immeasurable!

Hocking Tech's unique ceramics program is an invaluable technological resource.

Due to the successful relationship between OTTO/Hocking Tech and this company, a second request was received. The powdered metal industry suffers from a lack of technical information concerning the weldability of powdered-metal parts. Companies receive inquiries daily regarding the feasibility of and methods to be used in joining powdered-metal products, either to one another or to other ferrous and nonferrous materials. The OTTO coordinator discovered that The Ohio State University has one of the finest welding engineering departments in the United States and also houses a Welding Institute. The coordinator contacted a faculty member in the department and discussed the possibility of having a graduate student in welding engineering conduct a study of welding techniques for powdered-metal products. The graduate student would ultimately prepare a master's thesis on the weldability of powdered-metal parts. $30,000 was needed to support the proposed research project.

Since one small company could not afford to sponsor the research by itself, the OTTO coordinator contacted several other powdered-metal parts producers who expressed a similar need for welding information. As a result, a funding consortium of small companies is being formed to sponsor the year-long project. The results of the research may be valuable internationally and it gives the sponsoring companies a competitive edge in securing additional business resulting from this newly acquired knowledge. The state of Ohio can be proud of OTTO's role in this valuable linkage which enhances the sensitive and important relationship between small business and industry in the state and the state's educational resources.

Southeastern Ohio is one of the richest hardwood producing areas in the United States. The region supports numerous logging, sawmill, and wood-processing plants. One of these plants is the largest manufacturer and distributor of maple "butcher block" tables in the world. They also kiln-dry more than 10 types of hardwood for distribution to high school woodworking and industrial arts classes. Unfortunately, they were relatively unknown to local furniture craftsmen, woodworkers, and retail lumber stores. The OTTO coordinator developed a marketing program and arranged plant visits for local woodworkers, craftsmen, and retail lumber buyers. As a result, in the first half of 1982 $35,000 in sales was reported and a sales volume of $100,000 was projected by the year's end. The addition of two new employees is currently being considered to assist with sales and delivery to this previously untapped local market.

Cooperation Helps Everyone

The OTTO coordinator occasionally receives a request for assistance in developing a new product and/or marketing the product. Three very successful inventions that OTTO helped with have ultimately led to patents and actual manufacturing of the products.

OTTO/Hocking Tech helped the inventor of a videogame "joystick" distribute his product to authorized factory service centers of an internationally known computer and home video game manufacturer. As a sidelight to this particular project, a student manufacturing business was begun at the college. Students were subcontracted to assemble the units and their income was used to pay for tuition, fees, and books, helping to offset the recent loss of federal financial aid grants to these students.

An inventor of a self-tapping/self-locking bolt was aided when the OTTO coordinator located a local fastener company to manufacture the bolt in small quantities. This helped the inventor by freeing up his capital because he would not need to invest in the equipment, facilities, and manpower for manufacturing the bolt. The linkage also permitted the fastener company to consider hiring additional employees, working a second shift, and purchasing specialized equipment to replace some obsolete grinding and boring mills.

Another local inventor has developed and patented a temperature and humidity control alarm device for commercial and home refrigerators and freezers. Similar to the popular smoke alarm, the detector has a buzzer and warning light which is activated when the inside temperature of the refrigerator or freezer reaches an undesirable level, as could happen during an electrical outage or through a loss of the unit's freon gas. A marketing effort initiated by the OTTO coordinator resulted in finding several restaurant equipment wholesalers and retail appliance stores willing to test-market the product.

Hocking Tech Uses Its Expertise

Hocking Technical College is proud to have the foremost two-year ceramic engineering and heat processing programs in the country. The high caliber of engineering talent in those areas enabled the OTTO coordinator to assist a company who wished to reduce the energy costs for the operation of a heat-cleaning oven. The company is a producer and supplier of resin-impregnated fiberglass cloth. The finished material makes its way into fishing rods, surfboards, and "hot sticks" which are used by electric power companies to move high voltage wires from one place to another. Before the resin can be added to the fiberglass cloth, the material must be heat-cleaned at about 700°F to remove the sizing which coats the glass fibers and keeps the cloth clean during shipping and handling. At present, the heat-cleaning process takes 96-104 hours. This limits the turnover of the oven and the company is spending nearly $100,000 in energy costs yearly. The company's general manager's goal is to decrease the processing time by 25 percent and conserve energy.

The OTTO coordinator and a ceramic engineering faculty member visited the plant and the engineer determined that the 25 percent reduction was realistic. The engineer made several specific recommendations concerning the reconfiguration of the oven's burner and the installation of multiple excess air burners. If the company proceeds with these recommendations, it can expect to save $20,000 in energy costs yearly and decrease the oven's turnover time by 25 percent.

Hocking Technical College has become very concerned about its own energy costs. Toward that end, the college has drilled (the drilling was performed by the school's petroleum production classes) and is operating its own oil and gas wells. The college is using the compressed natural gas to power its fleet of vehicles and is considering converting its electrical heating and air conditioning system to natural gas. Because of Hocking Tech's commitment to oil and gas production, the OTTO coordinator is working closely with a local research and development firm which is developing state of the art natural gas applications using the Stirling engine.[1]

Helping Business Help Itself

One of the most pressing needs of small business and industry in Ohio is in the area of middle management development. To meet those needs, the OTTO/Hocking Tech coordinator has developed a subscription-style service for management seminars. One three-hour seminar is held each month for ten months. To provide maximum flexibility, a company may purchase a subscription so they can send different personnel to each session. The seminars are intensive and very practical. The participants are strongly encouraged by their employers to implement their newly acquired knowledge in their current position and work environment. Twenty-five percent of the companies' tuition fees are earmarked for OTTO-sponsored student scholarships within the college. Having the seminars on the college campus encourages the participants to learn more about additional course offerings and associate degree programs at Hocking Tech.

Conclusion

The partnership between small business and industry and the educational resources in the state of Ohio is crucial. The Ohio Technology Transfer Organization is serving both these sectors and promoting this partnership. In the decade to come, the fruits of this important linkage will become even more evident. With the help of OTTO, Ohio can meet its financial challenges, retain well-paying jobs, promote future economic development, and provide the resources necessary to maintain a viable higher education system.

---

[1] "The Stirling engine, sometimes called the hot air engine, was invented in 1816 by Rev. Robert Stirling. The engine is an external combustion engine which may derive its source of energy from concentrated solar energy, or it can burn coal, straw, wood, sawdust, or any other combustible substance imaginable" (*Near Term Marketable Products Involving Stirling Engine Technology*, Sunpower Inc., Athens, Ohio, 1982).

Contracting with Business and Industry: Use Your Community Resources

by Chuck Gold

Director, Management Development and Relations
and Former Director, Contracting with Business and Industry,
Bay de Noc Community College,
Escanaba, Michigan

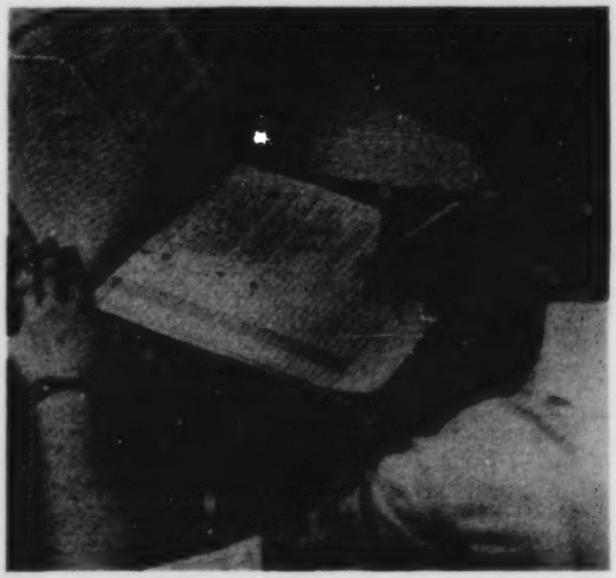
CORRELATING college career training programs with employment needs is not simple and there is no reason to expect it to become so in this increasingly technological society. Career options are rapidly growing, outlooks indicate further job specialization, and instructional costs are increasing while revenues are decreasing. In the face of all this, the challenge to make additional career training programs available increases by seemingly forbidding proportions. Yet, there is a unique approach developed by a small college in northern Michigan which offers a promising solution to the problem.

Bay de Noc Community College, in Escanaba, Michigan, has developed an innovative, interdisciplinary career training program called "Contracting with Business and Industry." The program was designed to meet the needs of students by expanding career training and assessment opportunities and by offering a new and viable approach for the career training needs of unemployed youth, displaced homemakers, adults, and others who were inadequately served through existing, traditional college program offerings.

A Unique Approach

"Contracting with Business and Industry" is a method of providing specialized individual career orientation and training. It does just what the name implies—makes an agreement between the students of Bay de Noc Community College and local business and industry. The college pays the business or industry $480 per student for providing 12 hours of specified instruction each week for two 16-week semesters. Upon completion, the student is awarded eight credits per semester for the off-campus instruction. The student is assessed the normal tuition rate for these credits.

Chuck Gold



In the CWB&I program, students in public service careers train in real-life settings.

Concurrent with the off-campus instruction, each student enrolls for a minimum of eight credit hours of related on-campus instruction. With the program so structured, students find it easier to integrate and relate what they are learning in the classroom with the knowledge they are gaining from their off-campus training. On-campus study provides instruction which develops the students' skills in job interviewing, interpersonal relations, resume preparation, the basics of the American enterprise system, and the psychology of adopting a positive attitude.

Each training position must be structured to allow for individual needs. The program director and the employer/trainer agree upon the prerequisite skills required in each particular field. Then, a clear set of performance objectives is designed. The resulting job profile serves, in part, as a set of guidelines for the employer/trainer who, in most cases, has had little experience with conventional teaching methods. The performance objectives are aimed at setting minimum performance standards for the student's off-campus instruction. The use of performance objectives is a way to direct and improve the quality of instruction. The ability to demonstrate the attainment of the levels of achievement indicated by each set of objectives reveals both the fact that the levels were properly defined and set and that the skill has been attained.

Courtesy of Maho Machine Tool Corporation

By using resources available in the community, CWB&I is able to offer a wide variety of career options.

A Contract Defines Responsibilities

When a student is accepted into a program, a contract is signed by the student, the employer/trainer, and the college. The contract specifies the responsibilities of each party involved. The responsibilities contracted for by the employer/trainer include an agreement to provide the instructional services necessary for the student to attain the skills specified in the performance objectives. The employer/trainer also agrees to keep records on each student's progress and to provide periodic student evaluation reports.

The college agrees to pay the employer/trainer for the instruction given to the student. Through vocational guidance and counseling, the college agrees to prepare the student to realize the maximum gain from this training experience. The college program coordinator keeps in close contact with the employer/trainer and the student during the training period and monitors the progress of the program.

The student agrees to follow certain rules of conduct and to make periodic reports evaluating personal progress. Apart from assisting the college in making improvements in the program, the written appraisals also encourage the students to better define their own attitudes toward the program.

The three reactors—students, employer/trainers, and college faculty and administration—aid in the formulation, refinement, and evaluation of this unique educational process. Another group, a local advisory committee comprised of participating students, employer/trainers, college faculty and staff, offers additional guidance for the program.

Serving a Wide Spectrum

The CWB&I program is open to anyone 18 years of age or older and serves a wide spectrum of individuals. Currently, the students' ages vary from the late teens to mid-fifties. Educational backgrounds range from a few who did not complete high school to college graduates. The program basically serves three groups of people.

The first group is those persons who may or may not have finished high school and have few skills for the job market. The individual in this category is generally "fed up" with going to school and the program appeals because of its streamlined practical approach.

The second group of people wants a two- or four-year college program but is uncertain about an occupational field. The CWB&I program gives these students an opportunity to "test the water." Students now have the advantage of being able to assess a particular field before their investment in time and schooling is too extensive to redirect.

The third group consists of older individuals and might also include the displaced homemaker or somebody currently unemployed. Often the person in this category possesses job skills, but they are outdated or not in demand at the time. Also, when one hits a certain age, prospective employers tend to be uninterested. Through the CWB&I program, these individuals are able to get a foot in the door, learn new skills, and eventually gain employment.

Students Learn While Doing

It might be useful here to clarify the differences between "Contracting with Business and Industry (CWB&I)" and cooperative education or internship programs. Although the philosophy and execution of cooperative education programs may vary from institution to institution, it can be said that a primary objective of cooperative education is to provide the student with some practical experience as the final phase of the educational process. This work experience is normally preceded by several semesters of occupationally related on-campus instruction. Generally, the student earns a modest wage while participating in this type of program and the educational institution has little input into the context and content of the work.

Students enter the CWB&I program because there are current job opportunities and retraining needs in many occupational areas where on-campus instruction cannot be provided by the college. In contrast to other programs, CWB&I uses existing on-campus courses to support a particular career objective and concurrently, using practicing professionals from local business and industry, fills in the voids with off-campus instruction. Students enrolled in the program receive academic credit for successful completion but do not receive pay while they are obtaining their "on-the-job" instruction. This feature in itself tends to eliminate students who are not highly motivated towards succeeding in the programs.

Another major difference is that Bay de Noc Community College pays the employer/trainer a minimal hourly rate for instructional services per student contact hour. Finally, on-site instruction received by the CWB&I student is precisely predetermined and evaluated through the use of prestated performance objectives and periodic evaluation reports.

The "Contracting with Business and Industry" program uses the local business and industrial complex of the community as a training laboratory wherein students can acquire capabilities under realistic settings while learning from practicing business professionals. Since the place of business is the classroom—whether a bank, doctor's office, or radio station—the need for large capital investments is circumvented.

Flexibility Enhanced

Because of the unique flexibility of the program, new training positions can rapidly be phased in and old positions phased out as the job market and student demand changes. The need for new capital expenditures is minimized. The State of Michigan has approved the CWB&I program and it is listed on the taxonomy of approved reimbursed courses offered by the college. This revenue combined with standard student tuition fees results in a financially self-supporting program.

The decision to try this approach was in part based on survey of the local job market conducted by the college and the Michigan Employment Security Commission. The survey revealed that far too frequently jobs were not filled simply because skilled or semi-skilled applicants were not available to apply for them. Nearly 20 percent of the job seekers were teenagers, most of whom had completed high school but lacked marketable skills. The survey also showed that many employers, especially those with small businesses, would rather leave a job slot unfilled or postpone filling it than hire an unskilled worker.

Employers held this attitude because training costs often exceeded a reasonable return on their investment. Minimum wage laws and the high cost of unemployment insurance and fringe benefits made on-the-job training an expensive proposition. Adding to the employer's dilemma, a substantial period of costly training was often followed by the discovery that the employee was unsuited for the job. Many employers felt the risks were too great.

The costs are also great for training in a school setting. The capital outlay required to implement a new vocational program at an existing institution varies considerably according to the specific program, the number of students to be served, the new equipment and facilities required, the geographic area, and other factors. The initial cost for programs with large demand, such as automotive repair or licensed practical nursing, normally runs from $50,000 to several hundred thousand dollars. In addition to this, instructional costs run approximately $50 per credit hour and support costs about $31 per credit hour. These costs are justifiable in occupations where employment needs are great. The difficulty is in offering programs in which employment needs are significant yet not great enough to justify a full-time program. When one considers that the newest *Dictionary of Occupational Titles* lists 20,000 separate titles, the need for viable and flexible career training alternatives becomes even more evident.

Career programs where the local demand is small and specialized can be successful in CWB&I.

Program Growth

The enthusiastic response to Bay de Noc Community College's CWB&I program has resulted in the program's growth from an original student participation of three in the fall of 1976 to 46 when the Winter 1983 semester opened. Students are involved in the following areas: meatcutting, banking, typesetting, newswriting, photography, radio announcing, commercial sign painting, physical therapy, emergency medical assistant, computer operator/progammer, industrial relations specialist, carpet installation, veterinary assistant, dental assistant, special education aide, advertising, layout and design, transportation clerk, title research and abstracting, substance abuse counseling, medical lab assistant, quality control assistant, interior decorating, insurance office assistant, optometric assistant, offset printing, upholstering, dietician aide, pharmacy assistant, food service, greenhouse operations, radio engineer assistant, TV newsperson, floral arranging, travel agency trainee, and medical records clerk.

The advantages of the new program, which began in the fall semester of 1976, became apparent almost immediately. Students were now afforded a wide choice of career training heretofore unavailable and they could promptly put their newly acquired knowledge to work—something they all found extremely gratifying. While most students felt that the eight credit hours of related studies they were required to take on campus helped to strengthen their capabilities, they unanimously agreed that they were learning more of practical value at the off-campus training site than was possible in a classroom.

As the program enters its eighth year, individual triumphs begin to accumulate and make an increasingly strong statement about the value of CWB&I to the entire community. Each personal success, each small accomplishment, however, remains a source of pride and satisfaction to Bay de Noc Community College. Sometimes the results are concrete and dramatic, as when a trainee's name is taken off the welfare rolls and put on a full-time payroll. Equally, though perhaps more subtly rewarding, are the instances in which a student acquires a newly enhanced sense of self-worth.

Placement is a primary goal of the CWB&I program. A placement rate of 87 percent indicates the effectiveness of the program. Employers strongly agree that it is desirable to hire workers with experience, especially workers they've seen perform.

Conclusion

The "Contracting with Business and Industry" program demonstrates the flexibility and diversity that is possible in postsecondary education. By serving students who might not have decided to attend college due to their unique needs, it sets an example for higher education. CWB&I has received awards from the National Association of Industry-Education Cooperation, the American Association of Community and Junior Colleges, Nova University, and the Delta Area Chamber of Commerce. Bay de Noc Community College's example proves that minimal enrollments and insufficient faculty are not insurmountable obstacles—instruction may be offered to only one student by a "practicing professional."

In the CWB&I program, the student is rewarded with training and marketable experience, and the employer/trainers are able to test personnel without risking financial hardship and to assess them in actual work settings. This expansion of programs offered by the college favorably reduces unemployment and offers students an opportunity for realistic career assessment. It also allows the college to serve additional students, especially those with unique needs, without requiring additional capital expenditures.

Most importantly, this collaborative enterprise binds together the resources of local business, industry, and education with community spirit. The local community, after all, is where the youth are, where their parents are, where the unemployed are, where educational policy is largely determined and wholly carried out, where employers hire, and where our responsibilities come to rest.

Professional Development for Vocational Educators

By James L. Hoerner and E. Lynn Suydam

Associate Professor and Research Associate, respectively,
Vocational-Technical Education,
Virginia Polytechnic Institute and State University,
Blacksburg, Virginia

WITH the ongoing expansion of vocational and technical education programs at both the secondary and postsecondary levels, the growing need for qualified administrators continues to intensify. New legislation and changing educational policies at the state and federal levels require regular updating of administrators. Changing technology, the tightening of budgets, the need for quality programs, frequent personnel turnover, constant reorganization, and the establishment of linkages between business and industry are additional factors that provide the impetus for inservice education for vocational education administrators. The Commonwealth of Virginia has recognized these demands at secondary and postsecondary levels and views inservice training for vocational administrators as an essential component in maintaining up-to-date, innovative, efficient, and effective vocational programs.

In July of 1980, the Virginia State Department of Education funded a leadership development project at Virginia Polytechnic Institute and State University (Virginia Tech). This project was intended to address the inservice training needs of vocational administrators across the state. The administrators were confronted with a variety of training needs and the project was designed to meet as many of these needs as possible, including: (1) the annual need for orientation of 15-20 new secondary and community college administrators; (2) the ongoing inservice training needs of secondary and community college administrators; (3) the desire to improve the articulation between local educational agencies and community colleges; and (4) the need to assist secondary vocational administrators in maintaining their certification. These four areas of concern were the basis around which the project's training programs were designed.

James Hoerner

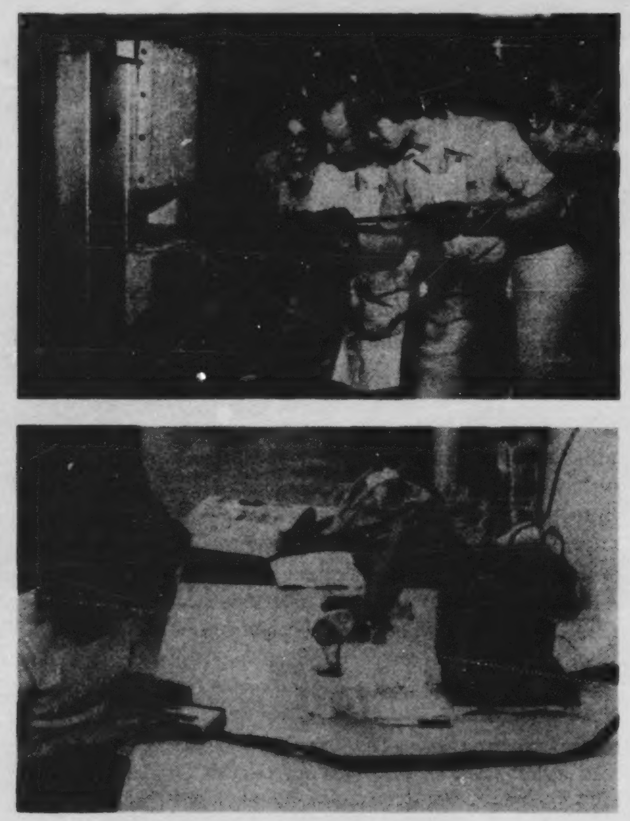
E. Lynn Suydam

Prior to the establishment of this project, the state department of vocational education, the Virginia community college system, local educational agencies, and individual community colleges had no systematic unified method of addressing these training concerns. Orientation for new administrators was dealt with on a school-by-school or college-by-college basis. As a result of this localized orientation, the new administrators were generally quite familiar with local needs, but state and systemwide policies, procedures, and services were not given the necessary attention. These new administrators often experienced difficulty in completing plans and reports required by the state.

The project also addressed the inservice needs of the experienced administrators. In order to maintain quality programs based on effective, efficient, and innovative leadership, vocational administrators need continual updating. Thus, inservice programs were presented which provided these individuals with some of the latest ideas for addressing current problems and concerns.

There is a strong interest in improving the articulation and integration of secondary and community college vocational programs in Virginia. One of the broad goals of the leadership development project was to improve the working relationship, at both the state and local levels, between the state department of vocational education, the Virginia community college system, local educational agencies, and local community colleges. Every attempt was made throughout the project to allow for cooperative planning, presentation, and participation in all activities.

Local directors and administrators of vocational centers are required to obtain six credits every five years in order to maintain their certification. Thus, a means that enabled those administrators in need of certification credits to obtain the desired credit was included in the design of the project's activities.



Administrators must be prepared to handle a broad spectrum of vocational programs.

During the initial planning phase, prior to the funding of the project, a number of other concerns were discussed. First, there was a desire to make sure that the program was of a high quality, and because of this concern for quality a number of unique aspects were included in the project. A second concern was that the project serve the total Commonwealth and address the needs of all vocational administrators at both the secondary and community college levels. A third concern was handling the large number of vocational administrators and the varied locations. The Commonwealth of Virginia has 140 local school divisions and 23 community colleges. The project served the leadership training needs of 274 local directors, vocational center administrators, community college administrators, and state staff.

A fourth concern was to insure the involvement of the state universities in Virginia that provide vocational teacher education. Because it was a statewide project, it was necessary to include all seven state universities which have vocational teacher education programs. They are George Mason University, James Madison University, Old Dominion University, Norfolk State University, Virginia Commonwealth University, Virginia State University and, of course, Virginia Tech. As a result of this concern, the assurance was made that the participants in the project would be able to receive graduate credit through the university of their choice for a number of activities. This proposal added a number of problems that had to be addressed, since each university has its own procedures and arrangements for handling registration, tuition, credit, and grading.

Purpose and Project Objectives

The purpose of this project was to design and implement a comprehensive leadership development program for local directors of vocational education and community college administrators. A special emphasis was placed on the needs of new administrators and the effective operation of local advisory councils. To address this purpose the following specific objectives were established: (1) conduct a one-year inservice leadership development program for all new vocational administrators; (2) conduct a series of inservice leadership training activities for current vocational administrators; (3) provide a series of competency-based administrator-training materials through purchase and/or development of such materials; (4) plan and conduct a series of statewide activities for local administrators and local advisory council personnel to improve the effectiveness of local advisory councils.

Project Organization

As has been indicated, there were numerous groups across Virginia that needed to be involved in order to make this project a success. To facilitate the involvement of the local administrators, state department staff, state advisory council personnel, and the university representatives, a number of committees were established. Virginia Tech served as the project sponsor and furnished the director, assistant director, and staff. The director and his staff established the following committees: University Coordinating Council, General Advisory Committee, Special Advisory Committee for Advisory Council Effectiveness, and Local Directors Advisory Council.

The University Coordinating Council included representatives from each of the seven participating universities. It met periodically to discuss programs, instructional materials, presentations, registration, and credit arrangements.

The General Advisory Committee for the project consisted of 10 persons representing local directors, deans of community colleges, the state department of education, regional vocational centers, the state advisory council, and teacher educators. This group gave direction as well as approval to the various kinds of activities that were conducted, including the selection of topics and suggested resource persons.

The Special Advisory Committee for Advisory Council Effectiveness was a very specific group which dealt only with the fourth objective and gave input concerning the type of activities that would help local administrators work more effectively with their local advisory councils. This committee consisted of five members, one from the state advisory council, one from the state staff, and three local vocational administrators.

The Local Directors Advisory Council had a representative from each of the seven regional groups of local directors of vocational education in the state. This group, which provides input to the state department, assisted the project with determining training needs and scheduling activities within the regions.

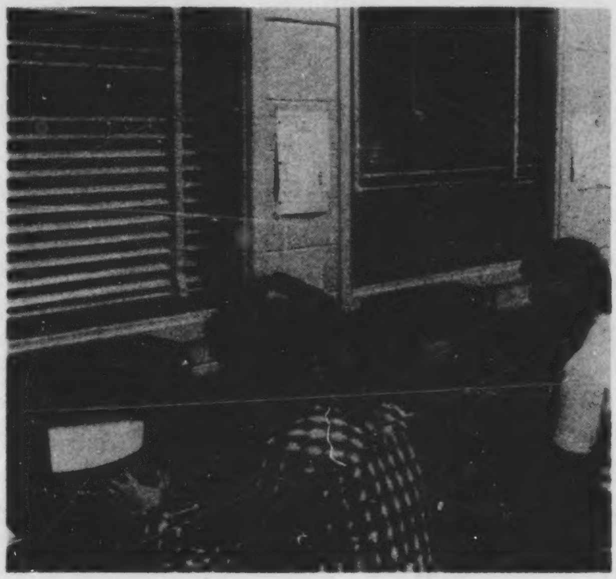
The segment of the population to be served by this project consisted of the statewide group of local directors of vocational education, state department of education supervisory personnel and provosts, and deans and division chairpersons of community colleges. These groups were further divided into two categories: (1) new administrators—those on the job less than one year; and (2) experienced administrators—those on the job more than one year.

Needs Survey

In order to identify the needs of this diverse and widely dispersed population, a needs survey was designed. The needs assessment survey was developed from a combination and consolidation of the 166 nationally validated competencies from the Ohio State University report (Norton, 1977) and the 87 competencies validated for local administrators in Virginia (Finch, 1977). The resulting instrument used in the project consisted of 73 competencies divided into nine categories. Each competency was rated on two four-point Likert scales. On one scale, an "importance scale," the respondents rated the competency according to its importance to their job (1 - very unimportant to 4 - very important); on the second, a "needs scale," the respondents rated the competency as it corresponded to their inservice training (1 - no need to 4 - great need). The survey instrument was reviewed and modified by the project's General Advisory Committee and mailed to 274 local directors, state department personnel, and community college personnel. Although demographic information was gathered on each respondent, names were not included and the respondents remained anonymous.

The data gathered by the assessment were summarized according to group (local directors, state department, and community college personnel), category (new and experienced administrators), and the seven vocational administrative regions. For each group, category, and region the competencies were ranked according to their combined mean on the "importance" and "needs" scales. For each region the top 10 competencies for each group and category were identified. Considerable overlap existed among the regions, and the project staff, working in cooperation with the General Advisory Committee, developed a year-long program of activities to address the needs of both new and experienced administrators across the state.

To provide up-to-date information, a modified version of this procedure was followed to identify activities for the second and third years of the project. Administrators were asked to submit suggested topics at each workshop throughout the year. During the summer of each academic year, a list of needs was developed from the topics identified by the administrators during the previous year. This list was then mailed to the 274 administrators that participated in the initial needs survey. The administrators were asked to select and prioritize the three topics on which they most wanted to receive information. Upon receipt and summarization of these data, the project staff, in cooperation with the General Advisory Commitee, developed an agenda of activities for the year. In this way, the project was able to address the current needs of the state's vocational education administrators.



The success of new curricula depends on a well-informed and timely effort from administrators.

Learning Activity Packages

In order to insure the quality of the activities and allow for a flexible presentation format, competency-based learning activity packages were developed to address the selected topics. The activities specified in the packages were developed to enable the participants to complete the assignments initiated in the workshop in their own work setting. The assignments were not just busywork, but planning, coordination, evaluation, reporting, and communication activities that were an actual part of their work. The intent of the assignments was to improve the administrators' work habits and method.

University Credit

Graduate credit for participation in the workshops and completion of the two competency-based learning activities was offered to those administrators who wanted it. To facilitate the awarding of credit, the University Coordinating Council developed a set of credit procedures. These procedures allowed participants to select an institution. The project staff then registered the participants and submitted the registration forms to the chosen universities. The participants' tuition was paid by the project and they received two semester hours or three quarter hours of graduate credit for their participation.

Delivery Strategies

The intent of the project was to conveniently present instruction to the vocational education administrator. Therefore, once the topics were identified, competency-based learning activity packages were designed. These activity packages became the basis of a series of workshops that were conducted across the state. These regional workshops allowed a large number of administrators to participate. The resource personnel selected to lead the regional workshops were teacher educators and state department, community college, and advisory council personnel. These individuals made presentations, led small group activities, and in general provided expertise and direction for the workshop sessions.

A one-day workshop was conducted in each of the seven regions. Each participant was given a competency-based learning activity package. Those administrators who wished to receive credit registered with one of the state universities and, following the workshop, completed the learning activity package in their work settings. Graduate credit was awarded for participating in two of these workshops and completing the learning activities package for each.

Orientation Workshops for New Administrators

Each year the New Administrators Workshops were conducted in early September. They were held in one location and the new administrators participated in four intensive sessions conducted by personnel from the state department of education. They received training in four areas: (1) the development of the annual plan; (2) maintenance and reporting of state and federal monies; (3) program evaluation; and (4) the administrative review and vocational education reporting system. The new administrators receiving graduate credit completed activities outlined in four associated learning activity packages over the remainder of the year. These activities concluded with the accurate and timely submission of the various reports required by the state department of education.

Inservice Workshop Topics

Activities were also designed for experienced administrators. Topics covered in the first two years of the project included: (1) implementation of competency-based education; (2) effective utilization of advisory councils; (3) a systematic approach to planning; (4) communications, human relations, and public relations; (5) program and personnel evalution; and (6) effective vocational guidance. These topics were addressed in workshops held separately in each of the seven regions. All administrators participated in the workshops and those receiving credit also completed the activities outlined in the respective learning activity packages.

During the second year of the project, a management approach called "model-netics" was added. Several participants received university credit for participating in this workshop. Forty-three administrators were instructed in this management approach during the spring of 1982.

The activities planned for the third year included the following: model-netics, the legal aspects of vocational education, and leadership. The management training program, model-netics, was planned to serve 60 administrators in three regions of the state. Workshops on the legal aspects of vocational education and leadership were scheduled in each of the seven administrative regions.

The project has thus far served 163 local directors, 58 state department employees, and 53 community college provosts, deans, and division chairpersons. Many of these individuals have participated in several of the activities offered by the project. Of these 274 vocational administrators, 183 have earned two or more graduate credits. To date, 43 administrators have completed the model-netics management training program and 41 new local and community college administrators have participated in new administrator workshops.

Evaluation

Each activity was evaluated by the participants and an annual evaluation was conducted by the project staff. To date, the comments and impressions of administrators across the state have been very positive. It was concluded that the project had addressed its objectives and had provided a quality program. In addition, the following benefits have accrued as a result of the project: the project represented an innovation in inservice education in Virginia by offering a flexible format; the project has extended the level of cooperation between the Virginia Community College System and the Virginia Department of Education; and the project was the first to offer credit from any one of the seven state universities and thus improved cooperation between these institutions. Finally, through the use of the annual needs assessment surveys, the project addressed the most current needs of vocational administrators across the state.

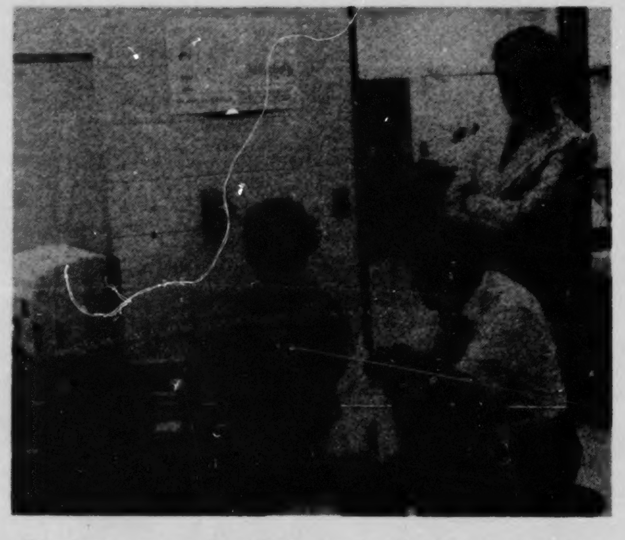
Summary

In summary, it is felt that the project has made a real contribution, a conclusion supported by comments from the participants in their evaluations. The participating administrators continually indicate that the activities were of benefit to them and improved their leadership skills. The philosophy of the project staff has been that the programs offered be designed to meet the needs of the administrators and every effort was taken to assure the programs focused on such leadership needs. The comments of the participants indicate that the project has successfully met this goal.

Several unique elements contributed to the success of the project. One of the strongest aspects of the program was that the activities were delivered on-site within the local regions. The workshops were scheduled in association with the local administrators' regional meetings, and therefore reduced the inconvenience to the participants and assured high levels of attendance.

Another unique element was the flexible start-stop arrangement. Since the activities were competency-based and addressed real problems and issues, the schedule was designed to meet the administrators' needs rather than the universities' needs. The administrators registered and completed their assignments at various times throughout the year. When they completed and submitted their work, a grade and credit was awarded. Some activities, such as the effective utilization of advisory councils, lasted as long as one year. This flexible arrangement was necessary in order to provide experiences which corresponded to the administrators' local situations.

A third important factor was the awarding of graduate credit. It enabled those administrators who were enrolled in graduate programs or working on certification requirements to apply credit for the project's activities to their respective needs. Also, paying the tuition and expenses for participants contributed to the uniqueness of the program. The project was able to do this for the first two years. A drastic reduction in funds, however, prevented this in the third year. Nevertheless, it improved the initial level of participation and therefore increased the quality of the program. The project's unique cooperative arrangement enabled the participants to receive credit from any of the seven state universitites. While the handling of registration and grade records was more complex, this element was an added feature of the project and was of benefit to the participants.



The importance of actively involved advisory committees cannot be overemphasized.

The last important element is that of individualized materials. If leadership training is to be effective, the materials and schedules should be adapted to the participants' needs and unique situations. It has been the experience of the project staff that if participants can work on activities that relate to their particular setting and problems, they feel that they are getting more from the experience.

These unique elements contributed greatly to the success of the project. It is hoped that this discussion will acquaint the reader with the leadership development program as conducted for local administrators of vocational education in the Commonwealth of Virginia. It is our opinion that many of the ideas might be relevant and useful in other states and regions.

Robotics Technology Program at Macomb Community College

by Edward J. Lynch

Dean, Occupational Education,
Macomb Community College,
Warren, Michigan

INDUSTRIAL robots have been used in experimental manufacturing applications for over 25 years. However, this aspect of flexible automation did not receive serious consideration by American industry until the late 1970s. Growth of the robotics industry in the 1980s and 1990s is projected to be explosive as a result of increased applications and the development of more sophisticated robots. The number of units in place by 1991 is expected to reach 100,000, compared to approximately 7,000 today. There are some people who refer to the use of these devices as a second Industrial Revolution that will far exceed the first in its impact on mankind. The robot, it is felt, has the capacity to change most aspects of how we live and work.

As labor costs increase and productivity gains become more difficult to achieve, it is clear that a reindustrialization of the United States will be accomplished only through the greater application of automation, computerization, and robotization. Robots do not need breaks, vacations, or sleep; do not get ill or bored; and can work in job situations that are hot, dirty, or noisy, contain radiation hazards, or are unsafe for humans. Increasingly, manufacturers are turning to robots to achieve production gains and improve product quality. This, in turn, is creating a demand for engineers, designers, technicians, and workers who understand the application and maintenance of robots. Fully informed and knowledgeable skilled tradespeople and equally skilled technicians and engineers for all aspects of implementation and maintenance will be needed.

The word *robot* comes from the Czech word for forced labor. Credit for its introduction is generally given to Karel Čapek who popularized it in a play entitled *Rossum's Universal Robots*. The basic function of a robot is to do the work of humans. In order to do this, it must have a guide and something to guide. The robot is usually guided by a computer/microprocessor which in turn guides an arm and/or fingers or grippers. The Robot Institute of America provides this definition of a robot, "A robot is a reprogrammable multifunctional manipulator designed to move material, parts, tools, or specialized devices through variable programmed motions for the performance of a variety of tasks." The key words that separate this type of device from other mechanical ones are *reprogrammable* and *multifunctional*. This allows for greater usefulness since the functions of the computer-controlled mechanical arm can be changed or modified by a change in the instructions without a change in the device itself.

Almost one half of the robots in use today in this country are in the automotive industry, performing functions from welding to painting. In other industries, robots are used to assemble refrigerators, drill aircraft wings, mine coal, and wash windows. Projects are underway to develop ways to use them to do a variety of different tasks, including spraying crops with pesticides and repairing satellites in space.

Advisory Committee

Macomb Community College is located in the northeast section of Metropolitan Detroit. With an enrollment of over 30,000 students, it is the largest of the 29 public community colleges in Michigan. Over one half of the students are enrolled in occupational programs. The primary service delivery area is Macomb County which, of the counties in this area, is the one most heavily dependent on the automotive industry. The auto industry is currently the largest user of robots and is expected to continue as the leader. Through the Applied Technology Department, Macomb Community

College has developed a strong relationship with the automotive industry and its supplier companies. Prior to the introduction of the course work in robotics, various college personnel worked closely with local industry. The Robotics Program at Macomb Community College was developed by building on a strong Applied Technology Electro-Mechanical Certificate Program. This program received approval from the State of Michigan Vocational Education Department in 1979.

The advisory committee included representatives from the automotive industry and its support industries, from manufacturers of robots, from tool and machine companies, and from the Robotics Section of the Society of Manufacturing Engineers. Educators were also included. The meetings began in 1978, long before the first courses were offered. Both formal and informal meetings were held. Some were held at the college and others were held at job sites. All aspects of training—specific program objectives, individual course modules, and the equipment best suited for comprehensive hands-on experience—were reviewed.

Discussions were held with both vendors and users to ensure that the equipment eventually purchased would represent state-of-the-art technology and provide a good cross-section of robotic devices found in the field. The equipment also had to relate to specific course objectives. Before purchasing any equipment, the advisory committee was asked to review our proposals and to make suggestions for modification. An ongoing relationship with the advisory committee is necessary to ensure that course modules and equipment remain in step with developments in this rapidly changing technology.

At Macomb Community College, students learn "hands on" how various types of robots operate.

In the lab, students are able to examine the complex innerworkings of an industrial robot.

Equipment and Facilities

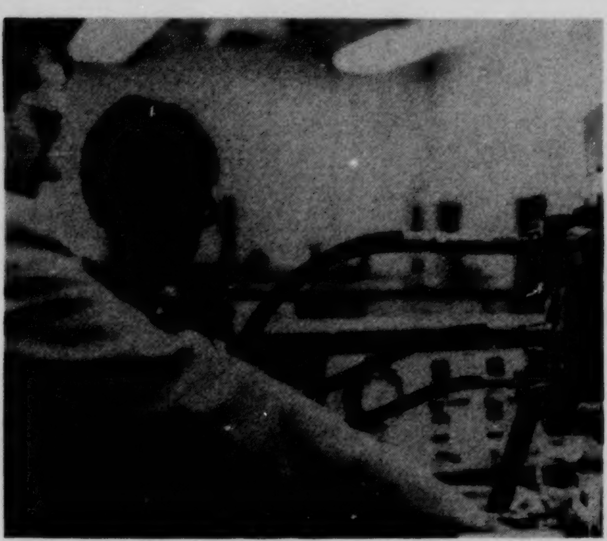
Equipment used to support this training falls into two broad categories: (1) that which is needed for hydraulic and electronics courses, both basic and advanced, and (2) specific items needed to provide hands-on training in the area of robotics. Macomb Community College has long offered strong programs in electronic and fluid power technology. As a result, the college has a number of well-equipped laboratories for training students in these fields. A significant investment is made regularly to maintain state-of-the-art technology in these programs.

Equipment acquired by the college to meet the special needs of the Robotics Program included programmable controllers and robots. Our research concluded that there were three different vendors' programmable controllers in use at various levels in industry. In 1979, the college purchased one controller from each of the three manufacturers. Additional units have been acquired from these same companies. In addition to the controllers, Macomb Community College acquired robots from three different manufacturers in 1980. Prices ranged from several thousand dollars for a "pick & place" type robot to over $70,000 for a sophisticated programmable unit. In 1982, the college obtained an additional robot and microcomputer package, three separate microcomputers, and a demonstration device with multiple arms. As a result, the college now trains students on equipment representing a wide cross-section of the types of programmable controllers and robots found in general use in local industries.

As the industry changes emphasis from hydraulics to electronics, the curriculum will require modification. As the equipment becomes more sophisticated (intelligent in visual and sensing ability), the program will also be adjusted to ensure that graduates continue to receive training employing the latest technology.

Faculty

All faculty employed to teach vocational courses at Macomb Community College have work experience in the subject being taught as well as the necessary academic qualifications. Thus, instructors are able to relate actual work experiences to the textbook. This provides the student with an added dimension and an understanding that is not available solely from a textbook. The faculty in the Robotics Technology Program are no exception. The full-time staff includes nine individuals teaching courses in electronics, fluid power, and robotics. The full-time staff is supplemented by a large number of adjunct faculty drawn from the local industrial community. The college strives to maintain a strong part-time staff in proportion with the full-time faculty. In this way the student receives the maximum benefit.



An understanding of hydraulics is an important element of Macomb's interdisciplinary approach to robotics.

Admission and Recruitment

As an open-door educational institution, Macomb Community College does not require high school graduation for admission. However, the vast majority of students do have high school diplomas. There are also many students who have completed several years of college work, including a large number who already possess a bachelor's or higher degree. As a result, the backgrounds of the students enrolled in robotics courses range from those without a high school diploma to those with master's degrees. There are some who have never been employed in the industrial field and there are engineers from local automotive companies.

Enrollment in the robotics program has progressed incrementally. The first students were individuals recruited directly from industry through our Applied Technology Department. This department maintains an active relationship with several hundred industrial firms. It provides the related classroom instruction required for industrial apprentices and training for the upgrading of journeymen. The first group of students have now completed the program and a number of them are now actively employed in the installation and maintenance of robots and associated equipment.

During the summer of 1980, the college began offering robotics training to students who, while not necessarily apprentices or journeymen, had had basic course work in either hydraulics or electronics. They were required to complete any work in either area that they had not studied earlier. After both basic areas of study were completed, the student was eligible to elect specific courses in robotics. In 1982, the college opened the program to students with no previous experience or training in either area, including recent high school graduates. There are now over 1,000 students at various levels of robotics training at Macomb Community College. Classes are offered from 7:00 A.M. to midnight five days a week and from 8:00 A.M. to 6:00 P.M. on Saturdays.

Program Review

At each stage of development, the college carefully reviewed the results of earlier efforts. Changes were made, both within specific courses and in the total program. For example, the early students were required to have only a minimal math competency. In stages, prerequisite courses in math were included. The level of difficulty was increased as higher levels of proficiency became necessary for success in the robotics courses. College-level physics was added as a prerequisite to the election of certain robotics courses. It is anticipated that a prerequisite level of proficiency in math and in reading will be required before future students will be eligible to elect any course in the Robotics Program. Other admission requirements may be introduced. Further, it is anticipated that admission to the Robotics Technology Program may eventually become quite selective and limited. While criteria and requirements for courses in robotics may change, the policy of open entry to the college will be continued. This provides an opportunity for students with deficiencies in math, reading, or any other area to obtain the necessary basic skill development prior to, or concurrent with, enrollment in other college courses.

Individuals seeking employment in automotive or related industries will find that more and more jobs in the future will require greater mental acuity and more education. There will be fewer jobs where physical effort or ability will be the primary consideration. The basic skill level of a significant number of those individuals recently unemployed as a result of technological change is very low. Before they can retrain, many will need to upgrade reading, writing, and math skills. Macomb, like many other community colleges, has developed a basic skill component to assess and plan programs for these students on an individual basis.

Curriculum

The robotics curriculum at Macomb Community College, which has developed over the past several years, is a two-year associate degree program which provides education and training in electronics, pneumatics, hydraulics, and mechanics. Specific skill development in these areas includes: controls, logic, and applications; pumps, compressors, and fluid power circuits; logic control systems; drives and linkages; electronic circuits, microprocessors, controllers, and robotic systems. Specific courses in robotics are built on these disciplines and a core of general education courses, including English, math, and physics, is required. The program is designed to maximize employment opportunities for graduates, both immediately and over the course of their career. It is designed to train technicians by providing hands-on skills and knowledge which prepare the individual for a wide variety of robot-related jobs. These jobs include installers, repair and maintenance, programmers, and design and applications technicians.

The Robotics Technology Program is dynamic and flexible. To date, its has undergone numerous changes and refinements and it will continue to change in response to the changing technological needs of industry and the students. Continued contact with industry and contributions from an active advisory committee are required. Input will continue to be solicited from users as well as manufacturers of robots. The curriculum will be modified to ensure currency of training. Alterations will be forthcoming that reflect a change in the market—the number of modules in electronics will be increased and the number in fluid power decreased.

Many individuals who have completed the program indicate a growing need for courses in supervision and management. This need will increase in the future as individuals employed early on in this industry enter management and as the number of robots being used continues to rise.

Placement

The original participants in this program were primarily industry-employed individuals who enrolled in order to upgrade the skills needed to service equipment already installed or soon to be installed at their companies. A large number of companies, both vendors and users, maintain contact with Macomb Community College, interviewing graduates and potential graduates. There are currently 19 firms manufacturing robots in Michigan. Ten of them are located in southeastern Michigan, which is the home of General Motors, Ford, Chrysler, American Motors, and Volkswagen of America. These firms continue to provide the largest market for program graduates. A recent call for technicians by General Motors resulted in four of the five positions going to Macomb Community College graduates. There were hundreds of applicants for the five positions.

Other opportunities in sales, installation, and maintenance exist. Support activities in customer service, testing, manufacturing, research, and development are also growing. A recent study by Robotics International projects 500,000 jobs in robotics by 1985, with the demand reaching 1.5 million by 1990. Currently, there are only a few thousand individuals employed in this industry.

One of the strengths in the design of the Robotics Technology Program at Macomb Community College is that it builds knowledge and skill in a number of areas (hydraulics, electronics, pneumatics, and mechanics). Graduates have a solid foundation providing multiple employment opportunities. This strong background will also provide the foundation for continued training in these areas as the technology changes. The program was designed to reduce the chances for future unemployment by increasing skills in more than one area and by ensuring basic skill development. This will enable the individual to transfer between the areas in order to take advantage of job opportunities as they occur.

ROBOTICS TECHNOLOGY CURRICULUM

First Semester	*Contact Hours*	*Credits*
Fluid Power Fundamentals	4	3
Pneumatic Fundamentals	4	3
Electric Theory—Electrical Equipment & Introduction to Machine Circuits	2	2
Metrology	4	3
Communications I	4	4
		15

Second Semester		
Fluid Power Circuits	4	3
Pneumatic Circuits	4	3
Algebra and Trigonometry	4	4
Basic Electrical/Electronic Service	4	3
Robotic Electrical/Electronic Service	4	4
		17

Third Semester		
The Physical Universe	6	4
Fluidic Control Systems	4	3
Electro Hydraulic Systems	4	3
Robotics I	3	3
Electrical—Automation Circuits & Introduction to Programmable Controllers (Lab)	3	3
		16

Fourth Semester		
History of Invention & Technology in America	3	3
Fluid/Mechano Drives & Linkages	4	3
Robotics II	4	3
Electrical—Logics & Programmable Controllers	2	2
Electrical—Mechanical Blueprint Reading	2	2
Humanities (Elective)	3	3
		16

Students are able to study and experiment with an industrial controller in the robotics lab.

Certification

Program graduates meet certification standards in a number of areas. This includes certificates from such organizations as the Society of Mechanical Engineers/Robotics International, the Robotics Institute of America, and the American Fluid Power Association. Robotics International has recently instituted a formal certification program for engineers and technologists in the field in order to raise and maintain professional standards. Two different areas for certification exist, each with its own requirements: (1) certification as a manufacturing engineer; (2) certification as a manufacturing technologist.

The Robot of 1990

A few years ago the robot was a transfer device—a machine which picked up objects at one point and moved them to another location. Today's robots perform a wide variety of tasks, including heavy lifting, die casting, welding, and spray painting. Today they have the capacity to learn and remember a variety of work-related motions and to see well enough to perform simple inspections. In 1976, this industry had sales in the $10-15 million range. By 1982, sales had grown to over $200 million, despite a very depressed economic climate. Over the next 10 years, a transition from the current predominance of fixed routine robots to "intelligent" ones is expected. Almost 3/4 of all robots on the market in 1990 will be equipped with a computer. Twenty percent will be making logical decisions in response to input received from visual or tactile sensors. New uses for the robot will be found as it becomes more "intelligent." Future frontiers will lie in developing better vision, mobility, and increased sensitivity to small changes.

It is projected that by 1990 50 percent of all assembly operations will incorporate robot technology compared to 5 percent today. The automotive industry and heavy manufacturing will continue to employ the largest number of robots but robots will be found performing other jobs in other areas. The results of a greater use of robots include safer and cleaner workplaces, improved job quality, reduced energy costs, and increased worker productivity. The ability of American companies to integrate robots will depend in a large part on the availability of a trained work force to service and maintain them.

Laser/Electro-Optics Technology at North Central Technical Institute

by Jim Johnson

Program Manager,
North Central Technical Institute,
Wausau, Wisconsin

LASER/ELECTRO-OPTICS has risen rapidly among high technology industries since its beginning in 1960, and postsecondary technical education has not been far behind in preparing people for employment in this fast-growing field. Nine years after Dr. T.H. Mainman produced the first working laser, the U.S. Office of Education awarded a curriculum development grant to Technical Education Research Centers (TERC)-Southwest, which produced materials and then field-tested them at Texas State Technical Institute at Waco. By the end of 1975, seven technically oriented schools were implementing portions of the TERC currriculum, which—produced in a modular format—was flexible and easily adapted to local school requirements.

The laser/electro-optics industry has shown a steady growth rate of about 20 percent a year, and a recent study* indicated that nearly 9,000 technicians were needed in 1980 and the demand by 1990 would approximate 25,000.

The laser, an intense light source, has found applications in virtually every phase of today's economy. Research and development is, and always has been, the largest single user of lasers. Ophthalmology and dermatology were among the first medical uses, and laser surgery recently has shown accelerated growth and potential. In industry, lasers are used in precision measuring devices, and high-power welding, drilling, and cutting machines.

The printing industry uses lasers in color separation processes and in extremely high-speed presses, and the laser is being studied as a component in optical data storage units for computers. Home entertainment systems are now available using video disks read by a laser beam. Entertainment light shows use moving laser beams, coordinated with music, to produce spectacular visual effects. Holography uses lasers to produce three-dimensional images for display purposes, industrial nondestructive testing, or as art forms.

Even supermarkets use lasers in automated check-out systems. The military is one of the largest users of lasers in such applications as tracking, measuring, and guidance systems.

Development of the Program

North Central Technical Institute began its laser/electro-optics program in 1976 by offering elective courses for credit to evening students seeking an associate degree in electronics technology. A four-course sequence was offered, and in 1978 the first four graduates entered the job market. By then the demand for the elective courses was so great that a two-year associate degree Laser Technician Program was set in place.

Beginning a program in any emerging technology presents unique problems. Staff is not readily available, equipment for hands-on instruction is expensive and is quickly outdated, curriculum materials are hard to find, and facilities may have to be remodeled to accommodate the program.

All of these problems confronted NCTI in 1978. To obtain a staff with the experience needed to teach laser technology, the college authorized a sabbatical leave which enabled me to cross-train to teach, organize, and administer the new program. Because qualified, work-experienced instructors are in short supply and generally not available, schools beginning laser/electro-optics technology programs may find it necessary to cross-train an instructor from a related field. Specialized short courses, such as those offered by the Laser Institute of America and the University of

---

*A job analysis survey for laser/electro-optics in the 1980s was conducted by Dr. Kris Moore of Baylor University in cooperation with Daniel Hull, President, Center for Occupational Research and Development, Waco, Texas.

Wisconsin-Madison, are useful for instructor preparation.

Acquisition of equipment is another problem. Most school budgets restrict the purchase of equipment during any one fiscal year to a portion of the total need. Although NCTI did purchase state-of-the art equipment at the outset, the institution—with the assistance of the Upper Great Lakes Regional Development Commission—also obtained many pieces of excess property equipment and acquired equipment on a loan basis from local businesses. During the intervening six years, these temporary pieces of equipment have, for the most part, been replaced.

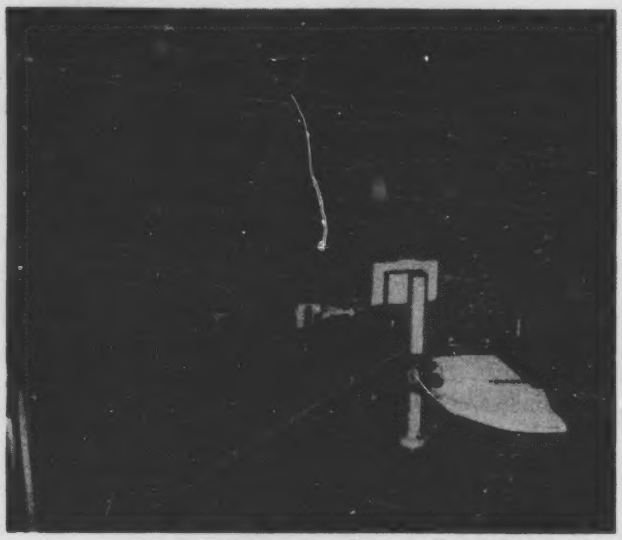


Photo by Daniel Sczygelski

In the lab, students learn how lasers operate—here a student aligns a laser interferometer.

Facilities & Equipment

Contrary to popular belief, the laser is not a particularly hazardous device when compared with other industrial, medical, or commercial tools. Proper precautions must be taken when using lasers to avoid eye and skin injuries, but similar safety precautions must also be observed in a welding shop. Safety procedures must be taught and strictly enforced. The design of the space in which lasers are operated should be coordinated with the type of lasers to be used and should contain built-in safety controls. Lasers are grouped into four categories of hazard potential. Inexperienced operators (most beginning students) should not be allowed to work with lasers other than the Class I or Class II variety. The area in which these lasers are operated needs few control measures—a standard science lab would do. However, Class III and Class IV lasers do require labs with control measures. For example, access to the room must be restricted; warning signs, flashing lights, or other warning devices should be placed to alert people to the laser operation; and doors should be interlocked to prevent entry during operation.

The cost of constructing a lab to accommodate the North Central Technical Institute Laser/Electro-Optics Technician Program was kept low by placing it in a courtyard between two buildings and using the three existing walls. The lecture room seats 30 students. Immediately adjoining is the introductory laser lab which allows 10 students to work simultaneously. All other labs are designed to have only one type of laser operating at a time. Room size restricts to three or four the number of students working at a given time. Each lab has water for cooling, 3-phase electrical outlets, 220 V outlets and 30 A, 110 V outlets. The doors have built-in interlock switches so that high-power lasers cannot operate unless the lab door is closed. Light-tight door seals also help to confine the laser light within the single lab. An intercom system allows the instructor to supervise all labs simultaneously from the central office, permitting him or her to answer questions without entering a lab, which would cause a system shut-down.

The Curriculum

Introduction to Lasers, the key course in the first semester, is an exploratory course with an even distribution of lecture and lab time. It teaches the theory of all lasers, using relatively safe Class II helium-neon (He-Ne) lasers. The student measures the characteristics of the laser output, cleans and aligns laser mirrors, and compares the design and properties of all lasers. Simultaneously, the student is studying electrical theory, practicing electrical and mechanical fabrication skills, and applying technical physics and mathematics.

The key course in the second semester is Laser Optics, a hybrid course containing both geometric and wave optics theory, coupled with the application of this theory to optical components used in lasers. Again, only low-power He-Ne lasers are used in the lab exercises, along with such conventional optical instruments as spectrometers, monochromators, interferometers, and polarizing elements.

Lasers and Electro-Optics Equipment is the key course in the third semester. Students work with medium- and high-power lasers, applying the theory learned in the first two semesters to a variety of lasers and measuring instruments. The course is divided into four relatively independent sections. Lecture portions of each are presented on videotape. Competency-based objectives for each section are accomplished in the lab.

In the first section—Ion-Lasers—the student works extensively with a four-watt argon laser, an optical spectrum analyzer, intercavity etalon, and associated electronic test equipment. In Molecular Lasers, subject of the second segment, an 80 watt-CW CO-2 laser is operated, aligned, and diagnosed. A high-power-pulsed TEA CO-2 laser is also operated.

The third section deals with optically pumped solid lasers. This includes work with ruby, ND:glass, and Nd:YAG lasers. Characteristics of optical flashlamps and their circuits are studied and the student disassembles, cleans, reassembles, aligns, and operates the laser. Both the spatial and temporal output characteristics of the beam are studied and measured. Laser system accessories are studied in the fourth section. These include acousto-optic modulators and deflectors, mechanical scanners, mode-locking techniques, optical detectors, and electro-optic devices. By spending approximately four weeks on each section, a student rotates through all four in one semester with time left for discussion and testing periods.

The fourth semester key course is Laser Application Projects It is heavily lab-oriented, with a scheduled six hours of lab time compared to one hour of lecture weekly. The instructor constantly monitors the lab work. Lecture time consists of evaluation of existing laser safety standards and reports on completed projects.

LASER/ELECTRO-OPTICS CURRICULUM

Student Placement

Forty graduates have been employed since the program began. Employers include Honeywell, Bendix Field Engineering, Spectra Physics, and Hughes Aircraft. Most graduates work in research and development jobs. The second largest category of employment is laser equipment manufacturing. Other graduates are employed by users of laser equipment.

The annual starting salaries of the 1980 graduating class averaged $17,600 and ranged from $14,900 to $20,600. Every graduate had more than one job offer, and all who sought employment in the field accepted positions.

Photo by Daniel Sczygelski

Employment opportunities for graduates of the laser/electro-optics program are widespread.

The Future of the Program

Although the two-year associate degree program is primary, important side benefits have materialized. As the result of several noncredit public information courses, local industries have become involved with laser applications. Student projects have been coordinated with the research needs of outside agencies. Students have studied the feasibility of laser applications of particular interest to local industry, business, and medical groups.

The Laser/Electro-Optics Technician Program grows in step with the growth of the industry. The first group of 20 students enrolled in 1978. Each succeeding year, 10 additional students entered the program until the capacity of 40 was reached. Enrollment in the fall of 1981 was 75 students in the full-time program and 20 more taking the elective courses offered in the evening program. More than 30 graduates are anticipated each year. Two instructors, an instructor/coordinator, and a paraprofessional/technician comprise the present program staff.

The need for laser/electro-optics technicians nationally is acute. About 20 schools—about half of which offer associate of science degrees—are attempting to meet industry's laser technician manpower requirements. At this point, employment needs exceed the educational community's ability to respond.

Forest Technician Program at The State University of New York, College of Environmental Science and Forestry—Wanakena

by J.E. Coufal

Director, Forest Technician Program,
The State University of New York,
College of Environmental Science and Forestry,
Wanakena, New York

THE Forest Technician Program at SUNY College of Environmental Science and Forestry at Wanakena, better known as the "New York State Ranger School," was founded in 1912. This was just one year after the founding of its parent institution, the State University of New York College of Environmental Science and Forestry (ESF). Forest technician schools started at about the same time in other states, but most were short-lived. The next oldest forest technician program in continuous operation in the U.S. dates back only to the late 1930s.

Many people attribute the Ranger School's success and longevity to its steadfast adherence to the education and training of forest technicians, whereas many of the other early forest technician schools tried to upgrade to baccalaureate programs. The Forest Technician Program assumes primary responsibility within ESF for instruction in technical forestry; that is, for teaching the applied knowledge and skills necessary for the practice of forestry in the forest and within the context of professional forest management. The Ranger School believes its function is to provide instruction that develops the skills and knowledge necessary to measure, record, manipulate, analyze, and interpret data necessary to planning, organizing, and decision making for the policy and operations of integrated forest management, as well as the skills and knowledge to carry out the decisions made. Most commonly, managerial tasks are carried out by a professional forester and the School of Forestry at ESF's main campus in Syracuse educates baccalaureate and advanced-degree foresters. The Forest Technician Program is an integral part of the School of Forestry and thus ESF presents a model of an integrated teamwork approach to forest resource management education, offering career opportunities from technician through postdoctoral work in one school and under one dean.

The Ranger School is surrounded by a state wilderness area and a 2,800-acre demonstration forest.

The Forest Technician Program is designed to concentrate on the production of trees as a crop, with lesser, but sufficient, emphasis on the other major resources of the forest, including water, wildlife, and recreation. This approach is used because the other major resources can and do exist on other than forested lands, but trees and the forest community are the distinctive and dominant elements of forests, and because timber harvest has characteristically been the cash crop. Other two-year programs in New York provide technician specializations in wildlife and recreation. Because land surveying and engineering-oriented forestry courses, such as aerial photogrammetry and forest roads, are important elements of the program, about one-quarter of all graduates have gone on to work in engineering areas, especially land surveying.

In Europe, the ratio of forest technicians to professional foresters is about 3:1 and this has often been recommended as a desirable ratio for the U.S. as well. However, the ratio of forest technicians to professional foresters in the U.S. is more on the order of 1:2 or 1:3, so that the good market for technicians at present should eventually become an excellent one. The Food and Agriculture Organization of the United Nations also predicts a need for thousands of forest technicians in Third World countries.

The specific objective of this program is to prepare graduates who are possessed of the skills and understanding of forestry necessary to be immediately employable in forest technology and related areas, to be able to grow on the job, and to be capable of direct transfer to baccalaureate forestry programs with a maximum of transfer credit. Graduates receive an A.A.S. degree and most often work as forest rangers; federal, state, county, and private-industry forest technicians or forestry aides; urban forest technicians; timber inventory specialists; timber sales supervisors, forest surveyors, and engineering aides; or forest protection technicians.

The Curriculum

The Ranger School and its curriculum are different from most schools and programs in a number of ways. The two-year degree program is part of a four-year and graduate system, and thus offers a model of integrated teamwork management as it should be practiced in the field. The Wanakena campus houses only one curriculum, the Forest Technician Program. The Wanakena campus is located in a relatively isolated forested area where supervised practice under conditions and in surroundings like those encountered on the job is very real. Students attend classes 40 hours per week and the ratio of typical college lecture and discussion to field work is about 50:50. Thus, the curriculum has been called an "add-on/hands-on program." The program also has a 1yr. + 1yr. design, whereby students can attend the college of their choice the first year, usually a nearby community college, and attend the Wanakena campus for an extended second year (35 weeks).

The first year of the 1 + 1 program design is basically a liberal arts package, building a sound foundation in math, biology, communications, and economics. The year at Wanakena is highly focused on technical forestry, including some basic forestry-oriented courses, such as general forest ecology, and tree structure and growth; many tool courses, such as forest mensuration (measurements), aerial photogrammetry, and surveying; courses related to major products of the forest other than trees, such as wildlife ecology and water resource management; courses related to human aspects, such as personnel management, and forest recreation; and, finally, courses at the center of forest practice, such as timber harvesting and silviculture.

The isolated location and long hours make for a pressure-filled year, but employers and graduates generally recognize the truth of the statement made by one private-industry representative commenting on Ranger School graduates, "Most importantly, aside from superior technical competence, the Ranger techs are superior in overall attitude and *work discipline*. They are used to 'putting out' . . . in my opinion the most valuable Ranger School lesson."

FOREST TECHNICIAN CURRICULUM

Freshman Year (Completed at a college of the student's choice)	*Credit Hours*
General Biology	8
English	6
Math	6
Economics	3
Electives	7

Silviculture II *or* Plane Surveying II	2
Total	25½

Facilities and Equipment

The most important facility at Wanakena is an immense outdoor laboratory. The school operates, as a demonstrational managed forest, the 2,800-acre James F. Dubuar Forest. This actively managed forest is surrounded on three sides by state-owned land that is part of the Adirondack Park, the biggest wilderness area east of the Rockies. The fourth side is bordered by private industrial forest land.

Here is an example of how students use the Dubuar Forest and how courses are integrated. In the fall semester, students make a boundary survey of one forest compartment during Plane Surveying I. The resulting map is graded for accuracy as part of this course and for presentation as part of the graphics course. In Forest Mensuration and Statistics II, in the spring semester, the students use the map to do a timber inventory of the same compartment and then complete the map with forest types and topographic features. The data calculated is then used to write a 5-year work plan for Forest Management, a kind of capstone effort pulling together various topics into a coherent whole.

The school is also well stocked with equipment, ranging from plumb bobs and Biltmore sticks to electronic distance measuring devices and a computer system. More important, perhaps, is the main building, which consists of a central service unit with dormitory wings on either side. The central unit contains classrooms, laboratories, a student lounge, faculty offices, a kitchen, and the dining hall. Thus students sleep, eat, relax, and go to class all in one building. This fosters a close-knit community feeling which is reinforced by the fact that the faculty live on campus and are essentially on call seven days a week.

Hands-on practice under conditions like those encountered on the job is common at the Ranger School

Faculty

Faculty members are chosen on the basis of their academic preparation, their previous forestry and related experience, and their commitment to technical forestry education and the intensive Ranger School methods. Most have 5-10 years of professional experience and all but one have master's degrees. Most of their experience and education has been aquired outside the state of New York.

The faculty are ably assisted by two technical assistants, usually A.A.S. degree holders with some job experience. With six faculty members and two technicians working with about 100 students, there is great opportunity for small group teaching and just plain getting to know each other, especially in view of the living arrangements.

The best way to learn about trees and plants is to study them in their natural habitat.

Student Recruitment and Placement

There is an early admissions program for high school seniors, or students may transfer after enrolling at another college. The critical need is to be certain that each student selects the right courses during the first year of college. Typically, about 90 percent of the students come from New York. The remaining 10 percent come from states adjacent to New York, although some have come from almost every state and from as far away as Puerto Rico and the Virgin Islands. There are usually several married students, and women now comprise about 15-18 percent of any class.

In general, industry has been the biggest employer of technicians over the past few years. The Ranger School has had better than average success in placing graduates. One year after graduation, only 6 percent of the class of 1981 was available for work. The rest of the class was employed or taking advanced study. The average starting salary for forest technicians is about $10,000 per year, with a range of $7,280-$19,500. Approximately 25 percent of each class goes on in a baccalaureate program, mostly in forestry, at ESF's School of Forestry.

Forest protection courses cover insects, disease, fire, and other hazards of the forest.

The Future of the Program

The essence of the Ranger School is its intensive program, the isolated location and close-knit community, and the dedicated faculty and students. These elements will continue as long as there are interested individuals. In a broad sense, forestry and similar environmental study areas should be reaching a degree of maturity. They rode the crest of "Earth Day" and environmentalism and went into a lull when high interest rates and tight mortgage money slowed the building industry. As the economy comes back to even keel, housing will still be a need and the importance of managed forests to the health and welfare of the country should be reasonably and rationally recognized.

In a specific sense, the Ranger School curriculum will continue to be adapted to meet changing needs. The school is currently investigating the possibilities of competency-based education, but it will strive to maintain its irreducible core and essence—hard work and high-quality work, and plenty of it!

Pharmacy Technology Program at Santa Ana College

by Gail B. Askew

Instructor, Pharmacy Technology,
Santa Ana College,
Santa Ana, California

A SHIFT has occurred in the role of the pharmacist as the concept of "clinical pharmacy" has developed. In many health care settings, the pharmacist is now spending a good deal of time in patient-oriented activities, for example, taking drug histories, monitoring drug therapy, and counseling patients on their medications. In order to provide these clinical services, supportive personnel have begun to take over the traditional drug-product-related aspects of pharmacy. Santa Ana College responded to the need to train such supportive personnel in the early 1970s. In 1972, after establishing an active advisory committee and completing a needs assessment survey in the Orange County area, the college instituted the Hospital Pharmacy Technician Program. The program, which was designed to train technicians for work in hospital pharmacies only, has evolved to include other aspects of pharmacy service as well. The Pharmacy Technology Program, as it is now called, continues to place an emphasis on the training required for hospital pharmacy employment for several reasons.

First and foremost among these is the restriction placed on the use of pharmacy technicians in the state of California. The State Board of Pharmacy has yet to recognize any category of pharmacy support personnel. State law also prohibits anyone other than a registered pharmacist (or licensed pharmacy student intern) from dispensing medication on prescription. As a result, the use of pharmacy technicians in the retail setting has been limited. Drug stores generally employ pharmacy technicians in a clerical capacity, to file prescriptions and type prescription labels.

Hospitals in California, however, have been using pharmacy technicians to perform many drug-product-related tasks due to a loophole in the pharmacy law. Because medication orders in a hospital setting fall under the "chart order exemption," they are not recognized as true prescriptions. The California State Board of Pharmacy has not addressed the issue of who may distribute medications pursuant to a chart order. Hospital pharmacists have taken advantage of this gap to delegate much of the responsibility for drug distribution to pharmacy technicians.

A second reason for our continued emphasis on training technicians for hospital pharmacy work is that employment opportunities and wages are greater there than in retail pharmacy. This is a direct result of the limitations placed on the use of pharmacy technicians in the retail setting. California is in the process of broadening its rules and regulations to allow the use of support personnel as several other states have done. Our program will be modified to reflect State Board of Pharmacy changes.

Students learn to perform particle checks on intravenous medications as part of their training.

Curriculum

Because there is no official recognition of pharmacy technicians in California at this time, no state guidelines for the training of such support personnel exist. Santa Ana College has relied heavily on the advice of its pharmacy technology advisory committee to delineate training objectives for the program. Competency standards published by the American Society of Hospital Pharmacists (ASHP) for hospital-based training programs have been adapted and incorporated into the program as well.

The Santa Ana College Pharmacy Technology Program is a four-semester certificate program which was developed to accommodate the part-time student. Students must complete 19.5 units of classroom, lab, and internship activities to obtain the certificate of completion. Students who desire an associate degree in pharmacy technology take the same 19.5 units, plus their general education courses. Frequently, students complete the certificate program, then continue taking general education courses on a part-ime basis until their degree requirements are satisfied.

Since the majority of students are employed full time while enrolled in the pharmacy courses, the program has been geared toward flexibility. Students may take classes in the daytime or evening. Internships are often done on weekends and during the summer. It is very common for students to take longer than the minimum four semesters to complete the 19.5 unit program because of family and work commitments.

The specialized technical courses which comprise our certificate program include:

Introduction to Pharmacy Technology: an orientation class designed to allow students to "sample the career" of the pharmacy technician. In addition to classroom discussions, students view an audiovisual presentation of the activities of pharmacy technicians at several local hospitals. Students then visit two hospital pharmacies for further orientation and observation. Graduates of our program, working at the visitation hospitals, act as "mentors" for this phase of the students' orientation.

Terminology for the Pharmacy Technician: a combination of basic anatomy and medical terminology. Using an organ system approach, body structure, function, and dysfunction are covered. Prescription terminology is also included. This course is a prerequisite for *Pharmacology* and both pharmacy lab courses

Pharmaceutical Calculations: a basic mathematics course which utilizes both lecture and math exercises. Emphasis is placed on the metric and apothecary systems of measurement, system conversions, and calculations involving dosages, solutions, and prescription formulas. Students are introduced to the concepts of milliequivalents, thermometry, and some types of commercial problems. This course is a prerequisite for both lab pharmacy courses.

Pharmacy Operations: a lecture/lab course covering the practical aspects of inpatient and outpatient drug distribution, including chart order transcription, ward stock and inventory control methods, drug dosage forms, and applicable pharmacy law. Prepackaging and compounding techniques are covered also.

Sterile Products: a lecture/lab class which develops the student's aseptic technique. Students work with a variety of parenteral drug products, actually preparing various types of sterile solutions. Concepts of sterilization, basic microbiology, and antibiotic pharmacology are also presented. This course has a heavy emphasis on sterile product dosage calculations.

Pharmacology: a study of the effects of drugs on the human body. Students are required to learn generic and trade names for drugs in the major pharmacologic classes. Actions and side effects of common drugs are also stressed.

Although not required for the certificate, a speech communications course and basic course in computers are recommended to all students in the program. Additional courses in chemistry and biology may also be helpful to students seeking associate degrees in pharmacy technology.

PHARMACY TECHNOLOGY CURRICULUM

First Semester	*Units*
Introduction to Pharmacy Technology	½
Terminology for the Pharmacy Technician	3
Pharmaceutical Calculations	2
Second Semester	
Pharmacy Operations	3
Pharmacology	3
Third Semester	
Sterile Products	4
Internship:Inpatient Pharmacy Services*	2
Internship: Outpatient Pharmacy Services*	1
Fourth Semester	
Internship: Sterile Products Pharmacy Services*	1
Recommended Electives:	
Speech Communications	
Computer and Society	
Total Credits	19½

*Internship courses continue from semester to semester until the student accumulates the recommended 85 hours per unit of credit.

Internship Program

Students who have successfully completed the pharmacy operations and/or sterile products courses, and who have demonstrated a minimum typing skill of 35 words per minute, are eligible to begin their internship. Three internship courses, covering all aspects of hospital pharmacy, are offered by the college. Completion of all three internship courses represents 340 hours of actual experience.

Pharmacy technician interns work in a volunteer capacity at one of over 40 hospitals affiliated with the Santa Ana College program. Although students are not paid for internship activities, many students are hired as a direct result of their internships. Students who are employed as pharmacy technicians while taking the internships most often use their work hours for internship credit.

During internship, students have the same duties and responsibilities as the pharmacy technicians employed by the hospital. The director of pharmacy or a specified staff pharmacist acts as preceptor for the student, with the college coordinator monitoring the overall progress of the student. The college requires each training facility to sign an affiliation agreement, which provides injury and malpractice insurance coverage for the students.

Attention to detail is critical when filling a unit-dose cassette.

Continuing Education

Santa Ana College began offering continuing education courses for pharmacy technicians in the fall of 1981. Each semester, a nine-week minicourse is presented. These courses are open to pharmacy technicians (our graduates, as well as those trained on the job) and other interested health care personnel. To date, courses in nonprescription drugs, a pharmacology update, and a sterile products review have been offered.

Facilities and Equipment

To adequately prepare students for internship, an attempt has been made to duplicate many common pharmacy activities in a lab setting. A mini-dispensary was constructed in the preparation area behind the pharmacy operations lab. The mini-dispensary is stocked with common nonprescription drugs (both bulk and unit-dose), manual prepackaging supplies (the Medi-Dose systems and oral syringes), various types of compounding and dispensing equipment (graduated conicals and cylinders, balances, ointment pads, spatulas, counting trays, prescription vials and bottles, labels, etc.), and basic pharmacy references (the *American Hospital Formulary Service, Facts and Comparisons, United States Pharmacopeia, Physician's Desk Reference, Red Book,* and *Blue Book*). Several typewriters and four sets of unit-dose cassettes were also purchased for the mini-dispensary.

The college also purchased a five-foot laminar flow hood for use in the sterile products lab. The major portion of the program's annual budget is used to purchase intravenous solutions and supplies for this course. It is important to realize that the equipment and materials used in our program have been accumulated over a 10-year period. Donations of outdated drugs, references, and supplies from local hospitals and drug manufacturers have helped defray expenses. Our advisory committee has been particularly helpful in locating surplus equipment which we have purchased at reduced cost.

We continue to use countertops for much of our lab work because of the limits on the number of students who can work in the mini-dispensary or laminar flow hood at any one time. Having specialized equipment just assures that each student will work with the "real thing" at some time prior to starting internship.

Students use the mini-dispensary to practice outpatient drug distribution skills.

Faculty

Since its establishment, the Santa Ana College program has relied heavily on the use of part-time instructors. In 1979, the college hired one full-time instructor who teaches the pharmacy operations and sterile products courses, as well as some basic lecture courses. The full-time instructor also acts as coordinator for the internships, serves as chair for the advisory committee, and is responsible for budget and recruitment activities for the program. Part-time instructors continue to teach the remainder of the lecture courses.

Although registered pharmacists make up the bulk of our part-time staff, a pharmacy technician (with a bachelor's degree in a related subject) and a registered nurse have served on the part-time faculty. The full-time instructor is required to be a registered pharmacist. Our current full-time instructor has experience in both hospital and retail pharmacy and has completed an ASHP-approved residency program in hospital pharmacy administration. The college also employs one pharmacy technician as an instructional aide for the pharmacy technology lab courses. Eight to 10 pharmacy technicians are employed as mentors for the orientation course.

Advisory Committee

The pharmacy technology advisory committee is a group of 12 members who serve two-year terms. The full-time instructor serves as permanent chair for the committee. Currently serving on the advisory committee are pharmacists from several local hospitals, the presidents-elect from the Orange County Society of Hospital Pharmacists and the Orange County Pharmacists Association (primarily a retail pharmacy group), the president of the Orange County chapter of the Association of Pharmacy Technicians, and two graduates of our program. This distribution allows us to obtain input from both hospital and retail pharmacists and from pharmacy technicians.

The advisory committee, which meets twice yearly, continues to be very active in keeping our curriculum current with the local practice of pharmacy. The committee has also been helpful in placing students for internships and in publicizing the program and its continuing education courses. Advisory committee members have also been helpful in locating surplus pharmacy materials and equipment for use in our lab courses.

Recruitment

Initially, recruitment was not a problem. The majority of our students were pharmacy technicians who had received partial training on the job. When our program began, local hospitals encouraged their employees to obtain formal training. Some even began requiring completion of our program for promotion from technician trainee to full technician status. As the supply of partially-trained technicians diminished, recruitment efforts became necessary. At present, we supply brochures to high schools and hospitals throughout Orange County. At least two additional mailings a year highlight our continuing education and orientation courses.

Pharmacists and pharmacy technicians have also been helpful in recruiting students for the program. Most of the local hospitals still refer pharmacy technician applicants to our program for formal training. Some hospital personnel departments routinely refer interested applicants to us, requiring enrollment in our program as a prerequisite to employment.

With the help of the Association of Pharmacy Technicians, we participate in high school career days and health fairs. We also visit health-related Regional Occupational Program (ROP) classes and have prepared displays at the annual meetings of the state pharmacy organizations. The audiovisual program prepared for the orientation course has been very useful for these types of presentations.

Perhaps the most useful recruitment tool has been the short write-up of the program inserted into our schedule of classes. Since the schedule of classes is mailed to every residence in our district, we have attracted many people reentering the job market as a result of this write-up. The Career Center on campus has also been helpful by making a copy of the orientation audiovisual program available to interested students. Several guidance classes have also asked for short presentations on the training and opportunities available for pharmacy technicians.

This student is prepackaging medication for unit-dose distribution.

Admissions

Any person 18 years of age or older, or who has a high school diploma, is eligible for admission to Santa Ana College. The Pharmacy Technology Program has no additional requirements for admission, although students must demonstrate math proficiency prior to enrolling in Pharmaceutical Calculations. In the orientation course, students are advised of the skills needed to be successful as a pharmacy technician: a good command of spoken English, good communications skills, a solid math background, and some degree of manual dexterity.

Student Placement

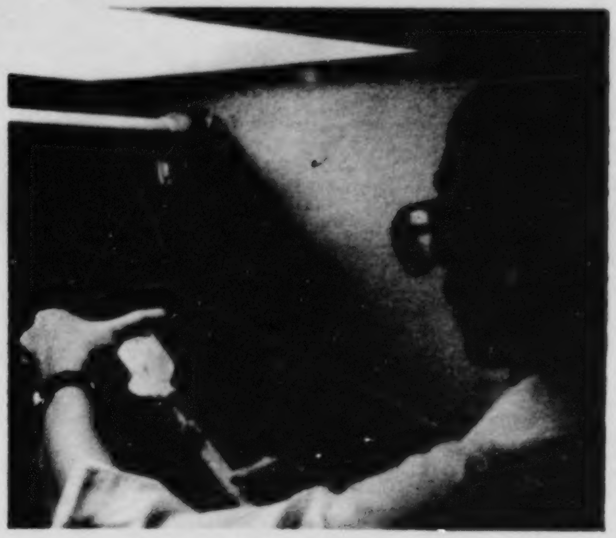
The majority of the students in our program are hired as a result of the internship activities. Because the demand for pharmacy technicians is high, some students find employment after completing just one or two semesters of the program. We maintain no formal placement service for pharmacy technicians beyond providing internship assignments. However, both hospital and retail pharmacies do contact us regarding potential employment opportunities. Openings are announced in the appropriate classes and are posted outside the pharmacy technology office. Pharmacy technician listings are also posted in the job placement center on campus.

Wages vary widely, although hospitals tend to link the pharmacy technician wage scale to that of the licensed vocational nurse. A student just completing the certificate program can expect a starting salary between $13,500 and $14,500 annually. Experienced pharmacy technicians earn between $15,000 and $18,500 annually. Some supervisory pharmacy technicians are earning over $24,000 annually. Starting salaries in the retail field are much closer to minimum wage, although union-member pharmacies may pay wages similar to those found in the hospital pharmacy.

The Future of the Program

Many of the future plans for our program hinge on the California State Board of Pharmacy. Hearings have begun on the use of support personnel in pharmacy. We anticipate official recognition of the pharmacy technician in the near future. When the role of the pharmacy technician has been officially defined, our program will again be modified. Expansion into retail pharmacy training sites for internships is a definite possibility. The advisory committee membership will also be adjusted to reflect the increased emphasis on retail pharmacy practice.

Until the State Board of Pharmacy makes its final judgment, however, we will continue to train pharmacy technicians to fill the specific needs of our local hospitals. The demand for well-trained pharmacy technicians is high and the need for pharmacy technician training programs will continue.



In the laminar flow hood, a student uses aseptic technique to withdraw medication.

Business Technology Degree in Merchandising at J. Sargeant Reynolds Community College

by Beverly Davis

Head, Merchandising Program,
J. Sargeant Reynolds Community College,
Richmond, Virginia

IN 1972, J. Sargeant Reynolds Community College was established as part of the Virginia Community College System. The college now has three campuses and is the third largest college in the system. The college offers some 50 different one- and two-year instructional programs. Since the Virginia Community College System follows an open admissions policy, any person who has a high school diploma or the equivalent, or who is at least 18 years of age and able to benefit from a program of instruction, may be admitted to J. Sargeant Reynolds Community College as either a regular or a special student.

The Merchandising Program was one of the original programs offered at the college. With the rapid growth in retailing, especially the development of malls, strip centers, boutiques, and specialty shops, there is a great demand for people with proper academic credentials, innovative ideas, and dynamic ability. The Business Technology Degree (AAS) in Merchandising is a management program designed for persons who hope to develop skills which will enhance their opportunities for full-time employment in merchandising and retailing occupations.

Student Recruitment

The Merchandising Program uses a multifaceted effort in the recruitment of students. The head of the program speaks at high schools in Metropolitan Richmond and supervises a recruitment program using the program's graduating seniors. The seniors are required to prepare a recruitment presentation, which describes the Merchandising Program, for use in the high schools. This approach encourages interaction between current students and prospective students. J. Sargeant Reynolds Community College also hosts an annual high school day for area students. The Merchandising Program participates in this project by providing information about its curriculum.

Another highly successful recruitment tool is the annual student-sponsored fashion show which showcases the accomplishments of fashion merchandising students. This project provides an opportunity for local high-school students to become involved in the program by allowing them to audition as models for the show. In addition to the modeling experience, students are exposed to the Merchandising Program.

Many retail employees recognize the need to upgrade existing skills and develop new ones for career advancement. In order to reach these prospective students, pamphlets and brochures are distributed quarterly to retail businesses in the area.

Curriculum

Two specializations are available in the context of the Merchandising Program: fashion merchandising and retail merchandising. The program offers an associate's degree which allows immediate entry into the job market. Students completing this program also have the option of transferring to many four-year colleges and universities to complete requirements toward a baccalaureate degree.

The first three quarters of the merchandising curriculum consist of general courses in communication, computation, and basic business skills. After completion of these courses, students may elect an area of specialization. Within its two areas of emphasis, the program offers a variety of specialized courses which are immediately applicable in the job market. All marketing and business courses must be completed with a grade of "C" or better. Students must repeat courses where they receive grades lower than "C."

FASHION MERCHANDISING CURRICULUM*

First Quarter	*Credits*
Accounting I	4
Introduction to Business	3
Fundamentals of Fashion	3
English Composition I	3
Orientation	1
Business Mathematics I	3

Seminar and Project in Merchandising	3
	20
Sixth Quarter	
American Constitutional Government	3
Business Law II (or approved Fashion/Retail elective)	3
Fashion Show Production	3
Visual Merchandising	3
Cooperative Education in Merchandising	5
	17
Total Credits	104

* RETAIL OPTION: Students choosing this option must substitute 9 credits in retail or business management courses in lieu of the specified fashion courses.

Faculty

The current head of the program has had extensive experience in the area of retailing, holds a master's degree in distributive education, and has done extensive postgraduate study in the area of marketing. In addition to the administrative responsibilities, the head of the program teaches several courses and supervises an extensive co-op program.

Additional part-time faculty is hired to teach specific courses. The faculty members are selected for their expertise in specialized areas and generally are currently employed in these areas. Master's degrees are preferred for all teaching faculty.

Facilities and Equipment

The merchandising department provides a simulated retail store as a laboratory for its students. This facility allows hands-on practical experience in all areas of retailing. Students are able to gain experience in display techniques, fashion coordination, electronic cash register operations, receiving and stocking merchandise, advertising layout, and many other retail operations. This laboratory also provides students with an opportunity to gain experience in sales and management.

Equipment used in the Merchandising Program at J. Sargeant Reynolds Community College includes:

- A point-of-sale terminal (NCR 2152)
- Mannequins
- Open showcases
- Advertising layout boards
- A display window
- Several types of merchandising units

Students learn how to operate the NCR 2152 point-of-sale terminal.

Co-op Program

During their second year, students are required to enroll in the cooperative education program. This program provides supervised work experience in correlation with classroom study and the student's career objective. This on-the-job training allows the students an opportunity to participate in real life experiences in the retail environment.

In addition to the work experience, students attend co-op seminars which give them a chance to compare merchandising management operations and functions in different types of retail establishments. These seminars provide information about a wide variety of options which will allow the students to make well-informed, realistic career choices. The co-op program also generates income which helps the students meet the cost of their education.

Advisory Committee

The advisory committee is composed of executive-level managers from retail industries in the area. This committee fosters cooperation between area merchants and the J. Sargeant Reynolds Community College Merchandising Program. The advisory committee also provides input for the development of new courses to meet changing trends in the retail industry.

More importantly, the cooperative relationship established between the college and area merchants facilitates student training and job placement, as well as recruitment of part-time faculty for specialized classes.

The Future of the Program

The Merchandising Program plans to establish a retail store in 1984 which will be staffed and managed exclusively by students enrolled in the program. Support for this venture has been secured from area merchants with the help of the advisory committee. This program-based retail store will provide additional opportunities for each student to gain management experience in buying, merchandising, sales promotion, inventory procedures, budgeting, etc. Graduates of the J. Sargeant Reynolds program would thus have a uniquely diverse background. It is hoped that this venture will be self-supporting and will eventually create some paid positions for the cooperative education program.

Through the continued implementation of innovative curricula, the Merchandising Program at J. Sargeant Reynolds Community College will remain responsive to changing trends in retailing.

The merchandising department's simulated retail store includes this display window.

Leisure Service Careers Program at Moraine Valley Community College

By Marilyn Twining

Coordinator, Leisure Service Careers Program,
Moraine Valley Community College,
Palos Hills, Illinois

DURING the past decade America has witnessed a rapid increase in the pursuit of leisure. With the leisure explosion, attitudes changed and leisure began to be accepted as a meaningful and necessary part of life. As a motivating force in American society, the leisure movement helps channel individuals toward a more constructive, wholesome, and fulfilled life.

The Leisure Service Careers Program was implemented at Moraine Valley Community College after a needs assessment was made in 1976 and two research studies were completed by the author of this article. An advisory committee comprised of professionals in the leisure field helped define the need for training for leisure-related jobs and identify the competencies required for these jobs.

Information from the audit, the research studies, the advisory committee, and outside consultants was used by the Career Education for Recreation and Tourism Project to develop a tentative list of the competencies needed by persons in various leisure occupations. Later, employees in selected leisure occupations were asked to complete a task analysis which ranked the competencies needed for various tasks. With this added information and state funding, the Leisure Service Careers Model was developed.

The project designated four areas as part of the "Leisure Career Family": recreation services, tourism, recreation resources, and amusement-entertainment. The final year of the project, 1976-77, was devoted to refining the lists of competencies, developing course titles and curricula, and organizing teaching materials. The following year, a pilot operation was in place at Moraine Valley Community College, offering two-year programs in recreational leadership and resource operation. In 1979, the commercial tourist recreational services option was added. Short-term certificates were made available in 1980. Leisure Facility Management was added in 1982. Health Fitness Technician, The Travel Industry, and Tourist Recreation were added in 1983. Additional two-year options as well as certificates will be added as future manpower requirements are identified.

Students visit many types of recreational facilities as part of their coursework.

Program is Competency Based

The Leisure Service Careers Program developed at Moraine Valley Community College is competency based and clearly defined so that it can be implemented at most two-year educational institutions. The competencies needed by entry-level personnel in leisure service careers were divided into four categories:

Technical Skill Competencies: The ability and skill to perform basic tasks—activities that constitute the logical and necessary steps in the work performed by the entry-level employee.

Problem-Solving Competencies: The ability and skill to recognize problems, assume responsibility, gather data, identify and analyze courses of action, and implement decisions.

Human Relations Competencies: The ability to cooperate and interact with other people.

Life Skill Competencies: The ability to develop knowledge and attitudes which will enhance professional growth.

The competencies identified as necessary for entry-level leisure career employees were further broken down into "tasks"—units of work activity that constitute logical and necessary steps in the performance of a specific duty. Like tasks were grouped into courses. A performance objective—a precise measurable display of a particular aspect of behavior to be exhibited by a learner under specified conditions—was written for each task. Performance guides are used to aid in sequencing the instructional units so that the learner will be best prepared to meet the competency requirements.

The Curricula

The two-year curricula in the Leisure Service Careers Program are organized around a core of general education and leisure care courses. Options in several specializations are chosen after the basic courses are completed.

A graduate of the Recreation Leadership Program will be able to plan, organize, instruct, and evaluate leisure activities; to supervise volunteers; to prepare budgets, inventories, reports, and evaluations; and to provide written and oral communications. Some related job titles are activity aide, activity leader, program leader, recreation leader, program supervisor, fitness specialist, program director, and sports professional. Agencies that might provide employment include park districts, recreation departments, YMCA's and YWCA's, scout programs, large corporations, and apartment complexes. The salary range for an entry-level employee in 1981 was $11,500-$14,600.

The Resources Operation Program graduate will be able to plan area and facility usage; to prepare budgets, inventories, reports, and evaluations; to provide written and oral communications; to maintain, develop, and protect resources. Possible job titles are center director, golf manager, camp director, groundskeeper, naturalist assistant, building/grounds supervisor, and park manager. The graduate will discover employment opportunities at health clubs, racquet clubs, ice arenas, parks, camps, golf courses, and other sports facilities. Starting salaries in 1981 ranged from $12,500-$18,000.

The Commercial/Tourist Recreational Services graduate will be able to plan, organize, instruct, and evaluate recreational activities for tourists; to market facilities to tourists; to provide for transportation to places of interest; to organize access to and develop attractions for tourists; and to sell leisure activities, equipment, instruction, and tours. Jobs available to graduates include travel consultant, tour planner, tour guide, social director, amusement manager, activity instructor, tourist enterprise owner or manager, and sales. Facilities and agencies providing employment include the travel industry, professional sports organizations, resorts, hotels, theme parks, dude ranches, camps, spas, etc. The starting salary averaged $12,000 in 1981 and most positions included commissions.

LEISURE SERVICE CAREERS CURRICULA

General Education Courses 22 Hours

Internship

Option 1—Recreation Leadership 18 Hours
Select *one* concentration

Physical Education Concentration
Health and Fitness Concentration
Special Interest Concentration
Humanities and Fine Arts Concentration

Option 2—Resource Operation 18 Hours
Select *one* concentration

Facility Management Concentration
Outdoor Management Concentration
Landscape Concentration
Turf Management Concentration

Option 3—Commercial/Tourist Recreational Services 18 Hours
Select *one* concentration

Travel Industry Concentration
Tourist Recreation Concentration
Marketing Commercial Recreation Concentration

Certificates

Certificates in several specializations can be obtained prior to completion of a two-year degree, while working on a two-year degree, after obtaining a two-year degree, or independently of a two-year degree. Certificates may be obtained in Leisure Facility Management, Health/Fitness Technician, The Travel Industry, and Tourist Recreation.

Faculty

Instructors in the Leisure Service Careers Program must be professional with experience in recreation, leisure studies, tourism, travel, outdoor recreation, resource management, or commercial recreation. The current coordinator of the program has three degrees in recreation and leisure with experience in public, semi-private, private, therapeutic, and commercial agencies. Each semester two or three part-time instructors are hired to teach leisure care courses. Courses within each option are taught by regular leisure services instructors and specialized instructors for each discipline.

An advisory committee made up of 14 professionals from various leisure service agencies meets once or twice a year. Recommendations from the committee have been helpful in determining and developing competency statements, creating employment opportunities for graduates, and securing part-time instructors. A field committee made up of 125 agencies assists in intern placement, on-site visits, class projects, panels, guest speakers, and job placement.

Recreation leadership students monitor participants in Employee Fitness Day.

Recruitment and Student Placement

Currently, 85 declared majors are enrolled in the various leisure service options and certification programs and another 50 individuals are taking a class or two. Recruitment has been carried out through word of mouth, participation in career days, special projects, speaking engagements, and written materials. The average age of the students in 25. Some of the students are now working in the field, some are changing careers, and others are first-time students. Nine out of 10 students are eventually employed by the agency where they intern or have part- or full-time employment, while one out of 10 continues toward an advanced degree.

Conclusion

Basing the instruction on specific competencies gives the student an opportunity to develop technical skills, problem-solving ability, human relations competencies, and life skills which are essential on the job. The Leisure Service Careers Program at Moraine Valley Community College has identified the competencies common and necessary to leisure service careers. The performance objectives set by the program can be achieved through a variety of modes of instruction including self-paced individualized instruction, seminars, independent study, open laboratories, workshops, audio-tutorial devices, computer-assisted instruction, as well as traditional teaching methods. At Moraine Valley Community College the Leisure Service Careers Program tries to offer the best course of study for each student.

The Future of the Program

Recent manpower trends indicate that the future of the recreation and leisure professions has a stable growth potential in the industrial, therapeutic, outdoor, community, semi-private, and commercial fields. The fastest growth in employment opportunities will be in the industrial and commercial areas.

Student reaction to the program has been very positive. There has been a steady growth in enrollment since 1977. Students are especially interested in the on-the-job training and work experience offered in the program. There is a very active professional club which works in close cooperation with the program and the program is a member of the Illinois Parks and Recreation Association. With increased employment opportunities and enrollments, we feel the program will continue to grow and improve in the future.

Section 3

Directories of Institutions, Technologies, and Officials

Directory of Institutions Offering Technician Training

THIS directory of schools, colleges, and other institutions offering technician training has been compiled with the help of state directors of technical and vocational education, the Division of Vocational and Technical Education of the U.S. Department of Education, the American Association of Community and Junior Colleges, the National Association of Trade and Technical Schools, and the individual institutions involved.

In all cases, data in the listings were obtained from questionnaires returned by the institutions themselves. Replies have been modified in style to conform to the categories used in this publication.

Markings Used in This Directory:

***after the name of the institution—**The institution did not reply to the questionnaire sent to them this year. Rather than omitting the institution from the directory, the information printed is a reprint of the information in the 1982 edition of *Technician Education Yearbook*. (A check was made, of course, to be sure the institution was still operating.) Information in the listings with an asterisk (*), consequently, may not be as up-to-date as the other listings.

In the list of technologies, the curriculums listed without any identification mark following them are preparatory curriculums (usually two years in length and requiring full-time attendance).

***after the technology listing—**The course is offered as an extension program (usually of varying lengths of time and requiring only part-time attendance)—or is offered as a one-year (or less) program.

****after the technology listing—**The subject is offered both as a preparatory curriculum and as an extension course.

(4) after the listing—The curriculum is offered as a four-year program.

(2-4) after the listing—The program is offered both as a two-year and a four-year course.

Abbreviations Used in This Directory:

Accreditation Associations

AACSB—American Assembly of Collegiate Schools of Business
AAMA—American Association of Medical Assistants
AAMRL—American Association of Medical Record Librarians
AAVA—American Association of Veterinary Assistants
ABET—Accreditation Board for Engineering and Technology
ABHES—Accrediting Bureau of Health Education Schools
ABMLS—Accrediting Bureau of Medical Laboratory Schools
ACBS—Accrediting Commission for Business Schools
ACJC—Accrediting Commission for Junior Colleges
ACS—American Chemical Society
ADA—American Dental Association/American Dietetics Association
ADAA—American Dental Assistants Association
AHEA—American Home Economics Association
AICS—Association of Independent Colleges and Schools
ALA—American Library Association
AMA—American Medical Association
AMRA—American Medical Records Association
AMT—American Medical Technologists
AOTA—American Occupational Therapy Association
ASCP—American Society of Clinical Pathologists
CSWE—Council on Social Work Education
FAA—Federal Aviation Agency
FIDER—Foundation for Interior Design Education Research
MSA—Middle States Association of Colleges and Secondary Schools
NAACLS—National Accrediting Agency for Clinical Laboratory Sciences
NATTS—National Association of Trade and Technical Schools
NCA—North Central Association of Colleges and Secondary Schools
NCATE—National Council for Accreditation of Teacher Education
NEA—New England Association of Colleges and Secondary Schools
NHSC—National Home Study Council
NLN(A)—National League for Nursing (Accreditation)
NWA—Northwest Association of Secondary and Higher Schools
SA—Southern Association of Colleges and Schools
WA—Western Association of Colleges and Schools

Other Abbreviations

ACT—American College Testing
BOCES—Board of Cooperative Educational Services
CEEB—College Entrance Examination Board
GATB—General Aptitude Test Battery
GED—General Educational Development Test
GPA or g.p.a.—grade point average
MAT—Mechanical Aptitude Test
PAT—Programmers Aptitude Test
SAT—Scholastic Aptitude Test

ALABAMA

Alabama Aviation & Technical College,

Technician enrollment: 3,600
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, advertising/marketing**, banking & finanace, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, management & supervision**, merchandising/sales**, real estate, secretarial science, architectural drafting, building construction, civil, highway, food processing & distribution, electronic, electronic communications, industrial electronics, dental assistant, dental hygiene, nursing**, X-ray**, industrial, solar, drafting, hydraulic, mechanical, welding, early childhood education, fire science, library science, police science, teacher assistant, criminal justice

California College of Medical Affiliates*,
1748 Market St., San Francisco, CA 94102
Private. Nicholas Sims, pres.
Accreditation: AORT
Admission: High-school graduate or GED
TECHNOLOGIES: Dental, dental assistant, laboratory technician, medical assistant, nursing, operating room assistant

California College of Podiatric Medicine,
1210 Scott St., San Francisco, CA 94115
Private. Stanley Burnham, pres.
Thomas V. Melillo, dean
Total enrollment: 418
TECHNOLOGIES: Health (4)*, medical (4)*

California Lutheran College,
60 Olsen Rd., Thousand Oaks, CA 91360
Private. Ronald Timmons, dir. of adm.
Total enrollment: 1,350
Accreditation: WA
Admission: Requirements vary—contact school
TECHNOLOGIES: Accounting (4), advertising (4), banking & finance (4), business administration (4), computer science (4), management & supervision (4), laboratory technician (4), mental health (4), nursing (4), early childhood education (4), police science (4)

California Maritime Academy,
P.O. Box 1392, Vallejo, CA 94590
Public. Joseph P. Rizza, pres.
Harvey R. Fraser, acad. dean
Total enrollment: 500
Technician enrollment: 500
Accreditation: WA, ABET, NAIT
Admission: High-school graduate with 2 years of algebra, 1 year of geometry, physics, or chemistry, U.S. citizen
TECHNOLOGIES: Engineering science, industrial, marine

California Polytechnic State University, San Luis Obispo, San Luis Obispo, CA 93407
Public. Warren J. Baker, pres.
R. G. Valpey, dean, eng. & tech.
Lark P. Carter, dean, ag. & nat. res.
Total enrollment: 15,406
Technician enrollment: 200
Accreditation: WA
Admission: High-school graduate, SAT or ACT for 4-yr. programs, 2.0 g.p.a. for technician programs
TECHNOLOGIES: Agricultural, animal science, horticulture, soils, food processing & distribution, electronic (4), industrial (4), air conditioning, heating & refrigeration (4), mechanical (4), mechanical & production, welding (4)

California State College, Stanislaus*,
800 Monte Vista Ave., Turlock, CA 95380
Public. Walter Olson, pres.
Total enrollment: 4,000
Accreditation: WA
Admission: Requirements vary—contact school
TECHNOLOGIES: Accounting (4), business administration (4), child growth & care (4), early childhood education (4)

California State University, Fresno,
Cedar & Shaw Aves., Fresno, CA 93740
Public. Harold H. Haak, pres.
Kent C. Davies, dir., adm. and records
Total enrollment: 15,000
Accreditation: WA
Admission: Requirements vary—contact school
TECHNOLOGIES: Agri-business (4), agricultural (4), animal science (4), horticulture (4), soils (4), accounting (4), advertising/marketing (4), banking & finance (4), business administration (4), data processing & systems analysis (4), merchandising/sales (4), office machine operation (4), real estate (4), retail management (4), secretarial science (4), architectural drafting (4), building construction (4), civil (4), structural engineering & design (4), surveying (4), apparel design/manufacturing, food processing & distribution (4), interior design (4), electrical (4), electronic (4), radio & TV (4), dietetics (4), health (4), medical laboratory (4), nursing (4), physical therapy (4), ceramic (4), graphic arts (4), automotive (4), drafting (4), drafting & tool design (4), machine tool (4), sheet metal (4), welding (4), correctional science (4), police science (4), public service (4), recreation (4), broadcasting (4), commercial art & design (4), criminal justice (4), marine (4), oceanography, transportation (4), urban engineering/planning (4)

California State University, Los Angeles,
5151 State Univ. Dr., Los Angeles, CA 90032
Public. James Rosser, pres.
Total enrollment: 23,000
Accreditation: WA
Admission: Requirements vary—contact school
TECHNOLOGIES: Accounting (4), advertising/marketing (4), business administration (4), computer science (4), data processing & systems analysis (4), real estate (4), apparel design/manufacturing (4), interior design (4), dietetics (4), health (4), medical laboratory (4), nursing (4), graphic arts (4), photographic (4), automotive (4), drafting (4), child growth & care (4), correctional science (4), fire science (4), police science (4), recreation (4), broadcasting (4), commercial art & design (4), criminal justice (4), transportation (4)

Canada College*,
4200 Farm Hill Blvd.,
Redwood City, CA 94061
Public. Samuel A. Ferguson, pres.
J.C. Williams, dean of instr.
Total enrollment: 8,000
Technician enrollment: 3,500
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Advertising/marketing, business administration, hospitality—hotel, motel, & restaurant management, management & supervision, secretarial science, food processing & distribution, environmental, pharmacy assistant, X-ray, child growth & care, court reporting, early childhood education, police science, public service, recreation, social welfare & services, criminal justice, special education, transportation

Casa Loma College*,
11600 Eldridge Ave.,
Lakeview Terrace, CA 91342
Private. Albert M. Elton, exec. dir.
Total enrollment: 75
Accreditation: National Assoc. of Practical Nurse & Ed. Svcs.
Admission: High-school graduate or 18 years of age or older
TECHNOLOGY: Nursing*

Cerritos College,
11110 E. Alondra Blvd., Norwalk, CA 90650
Public. Richard E. Whiteman, dean, voc. ed.
Bedal Diaz, assoc. dean, tech. div.
Martin H. Wensman, assoc. dean, bus. div.
Total enrollment: 22,976
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Agricultural, forestry, horticulture, accounting, advertising/marketing, banking & finance*, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, legal secretary, management & supervision, merchandising/sales, office machine operation, personnel, retail management, secretarial science, word processing, architectural drafting, architectural engineering, building construction, construction, masonry, apparel design/manufacturing, culinary, food processing & distribution, interior design, upholstery, computer maintenance, electrical, electro-mechanical, electro-mechanical drafting, electronic, electronic drafting, industrial electronics, microelectronics, radio & TV, biomedical, dental assistant, dental hygiene, medical assistant, medical secretary, nursing, pharmacy assistant, physical therapy, prosthetics & orthotics, cabinet & furniture making, ceramic, engineering science, industrial, manufacturing, metallurgical, numerical control, photographic, plastics, solar, aeronautical, auto body, automotive, drafting & tool design, industrial drafting & design, machine tool, small engine mechanics, welding, child growth & care, correctional science, early childhood education, legal/paralegal, police science, recreation, teacher assistant, air transport, commercial art & design, cosmetology, journalism, special education, travel

Cerro Coso Community College,
College Heights Blvd., Ridgecrest, CA 93555
Public. Raymond A. McCue, pres.
Richard A. Dodge, dean of instr.
Total enrollment: 4,300
Accreditation: WA
Admission: Open-door policy
TECHNOLOGIES: Agricultural*, accounting, advertising/marketing*, banking & finance*, business administration, computer science, data processing & systems analysis, management & supervision*, office machine operation*, personnel*, real estate, secretarial science, word processing, architectural drafting*, interior design*, electrical, electro-mechanical*, electronic, electronic drafting*, microelectronics*, environmental*, natural resources management & conservation*, dietetics*, emergency medical*, nursing, engineering science, quality control*, aeronautical*, air conditioning, heating, & refrigeration, automotive, aviation/aviation maintenance*, drafting, industrial drafting & design, machine tool, sheet metal*, small engine mechanics*, welding, early childhood education, fire science, library science, criminal justice, journalism*, technical writing*

Chapman College*,
333 N. Glassell, Orange, CA 92666
Private. G.T. Smith, pres.
C. Sinclair, dean of faculty
Total enrollment: 1,180
Technician enrollment: 200
Accreditation: WA
Admission: High-school graduate with g.p.a. of 2.5 or better, SAT of 850 or higher
TECHNOLOGIES: Accounting (4), advertising/

marketing (4), banking & finance (4), business administration (4), real estate (4), recreation (4), criminal justice (4)

Citrus College,
18824 E. Foothill Blvd., Azusa, CA 91702
Public. Robert D. Haugh, pres./supt.
Glen R. Guldberg, dean of voc. ed.
Total enrollment: 10,052
Technician enrollment: 6,500
Accreditation: WA
Admission: High-school graduate, ACT or SAT or SCAT
TECHNOLOGIES: Forestry*, accounting**, advertising/marketing**, data processing & systems analysis**, management & supervision*, merchandising/sales**, real estate*, secretarial science**, surveying*, interior design, electronic, radio & TV*, air conditioning, heating, & refrigeration*, auto body*, automotive**, diesel**, drafting**, machine tool**, small engine mechanics*, child growth & care*, early childhood education, library science**, police science**, public service, cosmetology**, special education

City College of San Francisco,
50 Phelan Ave., San Francisco, CA 94112
Public. Warren White, acting pres.
Jules Fraden, vice-pres. of instr.
Total enrollment: 26,000
Technician enrollment: 12,000
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, banking & finance, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, insurance, merchandising/sales, real estate, retail management, secretarial science, civil, electrical, electro-mechanical, dental assistant, medical assistant, medical records, nursing, X-ray, chemical, graphic arts, lithographic, photographic, aviation/aviation maintenance, drafting, industrial drafting & design, mechanical, court reporting, early childhood education, fire science, legal/paralegal, library science, police science, broadcasting, transportation

Coastline Community College,
10231 Slater Ave., Fountain Valley, CA 92708
Public. John L. Buller, pres.
Total enrollment: 22,000
Technician enrollment: 7,500
Accreditation: WA
Admission: Open-door policy
TECHNOLOGIES: Agricultural, accounting, banking & finance, business administration, insurance, legal secretary, management & supervision, merchandising/sales, office machine operation, personnel, real estate, secretarial science, word processing, electrical, electro-mechanical, natural resources management & conservation, energy technology, quality control, court reporting, travel

Cogswell College*,
600 Stockton St., San Francisco, CA 94108
Private. Dalhart R. Eklund, pres.
S.G. Migocki, dean academic affairs
Total enrollment: 500
Technician enrollment: 400
Accreditation: WA, ECPD
Admission: High-school graduate or GED, medical exam
TECHNOLOGIES: Soils*, accounting*, management & supervision*, statistical*, architectural drafting*, building construction*, civil (4), structural engineering & design, surveying*, electro-mechanical drafting*, electronic (2-4), electronic communications*, environmental*, occupational safety*, air conditioning, heating, & refrigeration*, auto body*, drafting*, drafting & tool design*, fluid power*, hydraulic*, industrial drafting & design*, machine tool*, mechanical (2-4), mechanical & production*, welding*, journalism*, technical writing*,

College of Alameda,
555 Atlantic Ave., Alameda, CA 94501
Public. Donald R. Hongisto, pres.
Total enrollment: 6,805
Technician enrollment: 3,000
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, legal secretary*, management & supervision, merchandising/sales, office machine operation, secretarial science, word processing, apparel design/manufacturing, upholstery, dental assistant, medical assistant, aeronautical, auto body, auto-diesel, automotive, aviation/aviation maintenance, diesel, welding, special education, accounting

College of Marin,
Kentfield, CA 94904
Public. Irwin P. Diamond, pres.
Total enrollment: 7,000
Technician enrollment: 2,700
Accreditation: WA
Admission: 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, legal secretary, management & supervision, merchandising/sales, office machine operation, real estate, retail management, secretarial science, word processing, architectural drafting, civil, surveying*, interior design*, electro-mechanical*, electronic, electronic communications*, industrial electronics, microelectronics*, dental assistant, emergency medical*, medical assistant*, nursing**, X-ray*, graphic arts*, numerical control*, photographic*, aeronautical*, auto body, automotive, drafting*, industrial drafting & design*, machine tool, welding**, child growth & care*, court reporting, early childhood education, fire science, police science, recreation*, teacher assistant, journalism*, marine

College of Notre Dame,
Belmont, CA 94002
Private. Sr. Veronica Skillin, pres.
Total enrollment: 1,500
Technician enrollment: 500
Accreditation: WA
Admission: SAT, 4 yrs. of English, 2 yrs. of math, history, and foreign language, 1 yr. of lab science
TECHNOLOGIES: Business administration (4), data processing & systems analysis (4), interior design (4), dietetics (4), medical assistant (4), engineering science

College of San Mateo,
1700 W. Hillsdale Blvd., San Mateo, CA 94402
Public. Lois A. Callahan, dean of instr.
Gilbert B. Gossett, dean of instr.
Total enrollment: 16,000
Technician enrollment: 3,000
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, insurance, legal secretary, management & supervision, merchandising/sales, office machine operation, real estate, retail management, secretarial science, word processing, architectural drafting, architectural engineering, building construction, surveying, apparel design/manufacturing, interior design, commercial broadcast, electromechanical drafting, electronic, electronic communications, electronic drafting, industrial electronics, radio & TV, dental assistant, medical assistant, medical records, nursing, operating room assistant, graphic arts, industrial, technical & industrial illustration, aeronautical, aviation/aviation maintenance, drafting, drafting & tool design, industrial drafting & design, machine tool, welding, fire science, police science, recreation, broadcasting, commercial art & design, cosmetology, journalism, transportation

College of the Canyons,
26455 N. Rockwell Canyon Rd.,
Valencia, CA 91355
Public. R. C. Rockwell, supt./pres.
John Drislane, dean of instr.
Total enrollment: 3,700
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting**, computer science, management & supervision**, office machine operation**, secretarial science**, electronic**, nursing**, quality control, automotive**, drafting**, welding, early childhood education**, library science**, police science**, special education

College of the Desert,
43-500 Monterey Ave.,
Palm Desert, CA 92260
Public. Fern Stout, pres.
Bruce Usher, chm., eng. tech. & math
Total enrollment: 11,000
Technician enrollment: 2,250
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Agri-business, agricultural, horticulture, accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, management & supervision, office machine operation, real estate, secretarial science, architectural drafting, structural engineering & design, interior design, upholstery, air, water, & wastewater, natural resources management & conservation, medical assistant, nursing, industrial, air conditioning, heating, & refrigeration, appli-

ance service, auto-diesel, automotive, diesel, drafting, heavy equipment operation/service, industrial drafting & design, machine tool, welding, early childhood education, fire science, library science, police science, recreation, broadcasting, journalism

College of the Redwoods,
Eureka, CA 95501
Public. D. D. Weichert, pres./supt.
Total enrollment: 8,605
Technician enrollment: 2,800
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Agri-business, agricultural, animal science, forestry, horticulture, soils, accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, management & supervision, merchandising/sales, personnel, secretarial science, architectural drafting, building construction, civil, surveying, electro-mechanical drafting, electronic, industrial electronics, radio & TV, air, water, & wastewater, biomedical, dental assistant*, health**, medical assistant, nursing, chemical, numerical control, aeronautical, automotive, aviation/aviation maintenance, diesel, drafting, heavy equipment, operation/service, machine tool, mechanical, small engine mechanics, welding, correctional science, court reporting, early childhood education, fire science, police science, recreation, social welfare & services

College of the Siskiyous,
800 College Ave., Weed, CA 96094
Public. Eugene Schumacher, pres.
Gary T. Peterson, vice-pres., instr.
Total enrollment: 3,150
Technician enrollment: 500
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Agri-business, agricultural, animal science, forestry, accounting, computer science, management & supervision, secretarial science, word processing, civil, radio & TV, natural resources management & conservation, emergency medical, nursing, forest products, automotive, heavy equipment operation/service, welding, child growth & care, early childhood education, library science, police science, recreation, teacher assistant, cosmetology

Columbia College,
P.O. Box 1849, Columbia, CA 95310
Public. W. Dean Cunningham, pres.
Dean Colli, voc. ed. coord.
Total enrollment: 3,300
Technician enrollment: 1,600
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Forestry**, soils**, accounting, advertising/marketing, banking & finance**, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management**, management & supervision**, merchandising/sales**, office machine operation**, real estate**, retail management*, secretarial science, building construction, surveying**, food processing & distribution, air, water, & wastewater**, environmental**, natural resources management & conservation**, sanitary engineering*, emergency medical**, health, nursing**, forest products, occupational safety*, auto-diesel**, automotive**, combustion power**, diesel**, drafting**, heavy equipment operation/service**, welding**, fire science**, library science**, police science**, public service**, recreation, social welfare & services*

Columbia College—Hollywood,
925 N. LaBrea Ave., Hollywood, CA 90038
Private. Ernest M. Baumeister, pres.
Andre F. Stojka, dept. of cinema
William Mayhew, dept. of broadcasting
Total enrollment: 350
Technician enrollment: 350
Accreditation: NATTS
Admission: High-school graduate
TECHNOLOGIES: Commercial broadcast (2-4), electronic communications, radio & TV (2-4), photographic, broadcasting (2-4), journalism

Compton Community College,
1111 E. Artesia Blvd., Compton, CA 90221
Public. Abel B. Sykes, Jr., pres./supt
William M. Vega, vice-pres., acad. affairs
Total enrollment: 4,500
Technician enrollment: 1,500
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, business administration, computer science, data processing & systems analysis, management & supervision, office machine operation, secretarial science, architectural drafting, electronic, electronic communications, electronic drafting, industrial electronics, radio & TV, robotics, medical assistant, nursing, graphic arts, lithographic, photographic, automotive, drafting, drafting & tool design, industrial drafting & design, machine tool, welding, police science, public service, recreation

Condie College*,
4340 Stevens Creek Blvd., San Jose, CA 95129
Private. Marion A. Condie, dir.
Total enrollment: 300
Technician enrollment: 150
Accreditation: NATTS, AICS
Admission: High-school graduate
TECHNOLOGIES: Data processing & systems analysis, management & supervision, secretarial science, computer maintenance, electronic

Contra Costa College*,
2600 Mission Bell Dr., San Pablo, CA 94806
Public. H. Rex Craig, pres.
K. Jackson, dir., vo-tech ed.
Total enrollment: 9,332
Technician enrollment: 3,050
Accreditation: WA
Admission: Requirements vary for specific programs
TECHNOLOGIES: Accounting, banking & finance*, business administration, data processing & systems analysis, management & supervision, merchandising/sales, real estate, retail management, secretarial science, architectural engineering, building construction*, structural engineering & design, surveying*, culinary, interior design, upholstery*, electrical, industrial electronics, radio & TV, air, water, & wastewater, dental assistant, medical assistant, nursing, graphic arts*, instrumentation*, metallurgical, occupational safety*, photographic*, textile*, appliance service, auto body, automotive, welding, correctional science, early childhood education, library science, police science, public service, technical writing*

Control Data Institute,
1930 Market St., San Francisco, CA 94102
Private.
Total enrollment: 400
Technician enrollment: 250
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Data processing & systems analysis, computer maintenance

Cosumnes River College,
8401 Center Parkway, Sacramento, CA 95823
Public. Vincent P. Padilla, pres.
R. Allerton, dean, occ. ed.
Total enrollment: 6,625
Technician enrollment: 4,822
Accreditation: WA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, agricultural, animal science, accounting, data processing & systems analysis, management & supervision, office machine operation, secretarial science, construction, interior design, radio & TV, environmental, emergency medical, medical assistant, energy technology, automotive, drafting, industrial drafting & design, small engine mechanics, child growth & care, fire science, recreation

Crafton Hills College,
11711 Sand Canyon Rd., Yucaipa, CA 92399
Public. William J. Moore, pres.
Charles Simcox, asst. dean, occ. ed.
Total enrollment: 4,500
Technician enrollment: 1,200
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Agri-business, agricultural, horticulture, accounting, advertising/marketing, business administration, computer science, data processing & systems analysis, legal secretary, management & supervision, real estate, secretarial science, word processing, emergency medical**, inhalation/respiratory therapy**, medical assistant*, medical records*, optical, welding*, fire science**, police science**

Cuesta Community College,
P.O. Box J, San Luis Obispo, CA 93403
Public. Edwin M. Pearce, dean
Total enrollment: 6,408
Technician enrollment: 3,600
Accreditation: WA
Admission: High-school graduate or Cal. high-school proficiency exam or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, management & supervision, office machine operation, real estate, secretarial science, word processing, building construction, civil, surveying, apparel design/manufac-

turing, commercial broadcast, computer maintenance, electrical, electronic, radio & TV, natural resources management & conservation, emergency medical, medical assistant, nursing, cabinet & furniture making, industrial, photographic, solar, air conditioning, heating, & refrigeration, auto body, auto-diesel, automotive, combustion power, diesel, drafting, industrial drafting & design, internal combustion, machine tool, mechanical, motorcycle mechanics, sheet metal, small engine mechanics, child growth & care, community service, correctional science, early childhood education, fire science, library science, police science, broadcasting

Cuyamaca College,
2950 Jamacha Rd., El Cajon, CA 92020
Public. Wallace F. Cohen, pres.
Phyllis L. Wiedman, vice-pres., instr. & student svcs.
Total enrollment: 3,120
Technician enrollment: 1,912
Accreditation: WA
Admission: High-school graduate or GED, 18 years of age or older
TECHNOLOGIES: Horticulture, computer science, real estate, architectural drafting, surveying, electronic, technical & industrial illustration, automotive, drafting, welding

Cypress College*,
9200 Valley View St., Cypress, CA 90630
Public. Jack Scott, pres.
Total enrollment: 12,000
Technician enrollment: 3,000
Accreditation: WA
Admission: Open-door policy
TECHNOLOGIES: Hospitality—hotel, motel, & restaurant management**, culinary*, photographic**, aeronautical**, air conditioning, heating, & refrigeration**, appliance service**, auto body**, automotive**, aviation/aviation maintenance, public service**, recreation**, air transport**, marine**, transportation

Cypress College, Mortuary Science Department, 9200 Valley View St.,
Cypress, CA 90630
Public. Robert A. Baughman chm.
Doug Metz, lab. tech.
Total enrollment: 15,000
Technician enrollment: 110
Accreditation: WA, Amer. Board of Funeral Svc. Ed.
Admission: High-school graduate or GED min.
TECHNOLOGY: Mortuary science

DeAnza College,
21250 Stevens Creek Blvd.,
Cupertino, CA 95014
Public. A. Robert DeHart, pres.
Total enrollment: 28,000
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, business administration, data processing & systems analysis, management & supervision, office machine operation, secretarial science, statistical, computer maintenance, health, medical assistant, nursing, graphic arts, photographic, quality control, technical & industrial illustration, automotive, drafting, machine tool, police science, recreation

Diablo Valley College,
321 Golf Club Rd., Pleasant Hill, CA 94523
Public. William P. Niland, pres.
John G. Kelly, dean of instr.
Total enrollment: 19,812
Technician enrollment: 5,324
Accreditation: WA
TECHNOLOGIES: Horticulture, accounting, banking & finance, hospitality—hotel, motel, & restaurant management, management & supervision, merchandising/sales, real estate, secretarial science, architectural drafting, building construction, construction, structural engineering & design, apparel design/manufacturing, computer maintenance, electronic, dental, dental assistant, air conditioning, heating, & refrigeration, drafting, machine tool, mechanical, early childhood education, library science, police science, criminal justice

Don Bosco Technical Institute,
1151 San Gabriel Blvd., Rosemead, CA 91770
Private. William P. Schafer, pres.
Robert Sullivan, coord. of tech.
Total enrollment: 315
Technician enrollment: 315
Accreditation: WA
Admission: High-school graduate
TECHNOLOGIES: Building construction, electronic, graphic arts, lithographic, metallurgical, automotive, drafting, industrial drafting & design, mechanical & production

East Los Angeles College,
1301 Brooklyn Ave.,
Monterey Park, CA 91754
Public. Arthur Avila, pres.
Noel Korn, dir. of occ. ed.
Total enrollment: 18,000
Technician enrollment: 5,500
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, data processing & systems analysis, management & supervision, merchandising/sales, office machine operation, real estate, retail management, secretarial science, architectural drafting, civil, structural engineering & design, apparel design/manufacturing, computer maintenance, electronic, emergency medical, health, inhalation/respiratory therapy, laboratory technician, medical assistant, medical records, mental health, nursing, graphic arts, photographic, automotive, drafting, child growth & care, fire science, legal/paralegal, police science, public service, social welfare & services, criminal justice, journalism, special education, urban engineering/planning

Edison Technical Institute,
4629 Van Nuys Blvd., Van Nuys, CA 91403
Private. E. Charles Alvarez, pres.
Thomas W. Oliver, dir. of ed.
Total enrollment: 200
Technician enrollment: 175
Admission: High-school graduate or GED
TECHNOLOGIES: Computer science**, computer maintenance**, electronic, electronic communications, industrial electronics, microelectronics**

El Camino College,
16007 Crenshaw Blvd., Torrance, CA 90506
Public. Rafael Coutada, pres.
Tony Thele, dean, voc. ed.
Total enrollment: 31,000
Technician enrollment: 16,000
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, banking & finance, data processing & systems analysis, management & supervision, merchandising/sales, office machine operation, personnel, real estate, secretarial science, word processing, architectural drafting, construction, culinary, food processing & distribution, electronic, radio & TV, air, water, & wastewater, emergency medical, inhalation/respiratory therapy, medical assistant, medical records, nursing, occupational therapy, prosthetics & orthotics, radiation, X-ray, graphic arts, industrial metallurgical, photographic, quality control, technical & industrial illustration, air conditioning, heating, & refrigeration, auto body, automotive, drafting, machine tool, welding, early childhood education, fire science, legal/paralegal, police science, social welfare & services, cosmetology, special education, transportation

Eureka Adult School*,
1915 J. St., Eureka, CA 95501
Public. Ken Stodder, prin.
Total enrollment: 5,600
Technician enrollment: 500
Accreditation: WA
Admission: Previous experience in course area
TECHNOLOGIES: Building construction*, electrical*, automotive*, machine tool*

Evergreen Valley College,
3095 Yerba Buena Rd., San Jose, CA 95135
Public. Greg Ohanneson, asst. dean, occ. ed.
Kenneth Marr, provost
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, business administration, computer science, data processing & systems analysis, management & supervision, secretarial science, word processing, civil, electronic, electronic drafting, nursing, engineering science, automotive, drafting, industrial drafting & design, welding, criminal justice

Feather River College,
P.O. Box 1110, Quincy, CA 95971
Public. Joseph Brennan, pres.
K. White, facilitator of instr.
Total enrollment: 1,500
Technician enrollment: 600
Accreditation: WA, State Ed. Dept.
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Agri-business, forestry, accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, merchandising/sales, office machine operation, secretarial science, word processing, building construction, natural resources management & conservation, emergency medical, health, ceramic, energy technology, industrial,

solar, textile, aeronautical, auto-diesel, automotive, small engine mechanics, welding, child growth & care, community service, early childhood education, fire science, police science, criminal justice, fisheries, special education, technical writing

Foothill-DeAnza Community College District,
12345 El Monte Rd., Los Altos Hills, CA 94022
Public. Robert W. Walker, asst. dir., voc. ed.
TECHNOLOGIES: Animal science, horticulture, banking & finance, business administration, management & supervision, real estate, retail management, secretarial science, electronic, electronic communications, biomedical, dental assistant, inhalation/respiratory therapy, medical assistant, nursing, physical therapy, radiation, X-ray, photographic, quality control, technical & industrial illustration, automotive, aviation/aviation maintenance, industrial drafting & design, machine tool, child growth & care, library science, police science, public service, recreation, broadcasting, commercial art & design, transportation

Fresno City College,
1101 E. University Ave., Fresno, CA 93741
Public. Clyde McCully, pres.
G. Fries, assoc. dean of instr., occ. ed.
Total enrollment: 15,000
Technician enrollment: 11,000
Accreditation: WA
Admission: Open-door policy

Total enrollment: 10,100
Technician enrollment: 4,850
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, agricultural, accounting, advertising/marketing, business administration, data processing & systems analysis, management & supervision, merchandising/sales, office machine operation, real estate, retail management, secretarial science, architectural drafting, building construction, civil, electronic, emergency medical*, inhalation/respiratory therapy, medical records, radiation, engineering science, graphic arts, auto body, automotive, aviation/aviation maintenance, mechanical & production, welding, child growth & care, fire science, legal/paralegal, criminal justice

Arapahoe Community College,
5900 S. Santa Fe Dr., Littleton, CO 80120
Public. Nancy L. Goodwin, pres.
Total enrollment: 6,500
Accreditation: NCA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, insurance, legal secretary, management & supervision, merchandising/sales, office machine operation, personnel, real estate, retail management, secretarial science, word processing, architectural drafting, apparel design/manufacturing, culinary, interior design, electrical, electro-mechanical, electro-mechanical drafting, electronic, electronic drafting, industrial electronics, emergency medical, health, laboratory technician, medical assistant, medical laboratory, medical records, nursing, energy technology, auto body, automotive, drafting, industrial drafting & design, welding, child growth & care, early childhood education, legal/paralegal, police science, recreation

Bel-Rea Institute of Animal Technology,
9870 E. Alameda Ave., Denver, CO 80231
Private. Marc Schapiro, dir.
Total enrollment: 90
Technician enrollment: 90
Accreditation: AVMA, NATTS
Admission: High-school graduate, ACT, 3 letters of recommendation
TECHNOLOGY: Animal science

Blair Junior College,
828 Wooten Rd., Colorado Springs, CO 80915
Private. Steve Tucker, dir.
Julie Cheeseman, dean of academics
Total enrollment: 684
Technician enrollment: 684
Accreditation: AICS
Admission: High-school graduate or GED, entrance exam
TECHNOLOGIES: Accounting, business administration, computer science, secretarial science, word processing*, electronic, medical secretary*, travel

Boulder Valley Area Vocational Technical Center, 6600 Arapahoe, Boulder, CO 80303

Public. Stanley Lancaster, dir., voc./ad. ed.
Total enrollment: 600
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Data processing & systems analysis, secretarial science, word processing, building construction, electrical, electronic, medical assistant, medical records, nursing, graphic arts, auto body, automotive, drafting, machine tool, welding, cosmetology

Colorado Aero Tech Inc.,
10851 W. 120th Ave., Broomfield, CO 80020
Private. Owen W. Johnson, pres./dir.
Total enrollment: 600
Accreditation: NATTS, FAA, BIA, State Ed. Dept.
Admission: High-school graduate or GED, 17 years of age or older
TECHNOLOGIES: Aeronautical, aviation/aviation maintenance, mechanical

Colorado College of Medical & Dental Careers,
445 Grant, Denver, CO 80203
Private. Richard K. Shephard, dir.
Total enrollment: 300
Accreditation: NATTS
Addmission: High-school graduate or GED, physical exam
TECHNOLOGIES: Dental assistant, health, medical assistant

Colorado Mountain College, Spring Valley,
Glenwood Springs, CO 81601
Public. F. Dean Lillie, pres.
Harvey Telinde, dean, occ. ed.
Total enrollment: 1,670
Technician enrollment: 867
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agricultural, animal science, horticulture, accounting, advertising/marketing, computer science, hospitality—hotel, motel, & restaurant management, management & supervision, secretarial science, civil, surveying, electrical, electro-mechanical, environmental, natural resources management & conservation, emergency medical, optical, chemical, graphic arts, photographic, solar, drafting & tool design, heavy equipment operation/service, hydraulic, mechanical, welding, child growth & care, community service, fire science, police science, recreation, commercial art & design, criminal justice

Colorado Mountain College, Timberline,
Leadville, CO 80461
Public. F. Dean Lillie, pres.
Tom Gillis, dir. of instr.
Total enrollment: 1,567
Technician enrollment: 732
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, business administration, computer science, hospitality—hotel, motel, & restaurant management, secretarial science, electro-mechanical, environmental, emergency medical, diesel, welding, correctional science, recreation

Colorado Northwestern Community College,
Rangely, CO 81648
Public. James H. Bos, pres.
Total enrollment: 337
Technician enrollment: 254
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Secretarial science, building construction, dental hygiene, instrumentation, aviation/aviation maintenance, petroleum

Colorado Technical College,
655 Elkton Dr., Colorado Springs, CO 80907
Private. Marilyn O. Sullivan, pres.
William C. McPeek, dean
Total enrollment: 600
Technician enrollment: 600
Accreditation: NCA, ABET
Admission: Open-door policy
TECHNOLOGIES: Computer science (2-4), electronic (2-4), biomedical (2-4), solar (2-4)

Community College of Denver, North Campus,
3645 W. 112 Ave., Westminster, CO 80030
Public. John H. Swenson, vice-pres.
Donald R. Mankenberg, dean of instr.
Total enrollment: 5,305
Technician enrollment: 3,531
Accreditation: NCA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, business administration, data processing & systems analysis, management & supervision, office machine operation, retail management, secretarial science, architectural drafting, electronic, industrial electronics, dental assistant, dietetics, inhalation/respiratory therapy, nursing, industrial, auto body, automotive, drafting, drafting & tool design, machine tool, mechanical, small engine mechanics, welding, child growth & care, early childhood education

Community College of Denver, Red Rocks,
12600 W. 6th Ave., Golden, CO 80401
Public. Richard E. Wilson, vice-pres.
A. Barry Noonan, dean of instr.
Total enrollment: 3,945
Technician enrollment: 2,500
Accreditation: NCA
Admission: High-school graduate or GED or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, business administration, computer science, management & supervision, merchandising/sales, office machine operation, real estate, secretarial science, word processing, architectural drafting, building construction, civil, surveying, electro-mechanical drafting, electronic, electronic drafting, robotics, air, water, & wastewater, environmental, natural resources management & conservation, solar, auto-diesel, automotive, drafting, fluid power, heavy equipment operation/service, hydraulic, industrial drafting, & design, welding, child growth & care, fire science, recreation, criminal justice

Denver Automotive & Diesel College, Inc.,
460 S. Lipan, Denver, CO 80223
Private. Robert L. Steinmetz, dir.
Total enrollment: 1,350
Technician enrollment: 1,350
Accreditation: NATTS, St. Board for Comm. Colleges & Occ. Ed.
Admission: High-school graduate or GED
TECHNOLOGIES: Auto body, automotive, diesel

Denver Institute of Technology, Inc.,
The Educational Plaza, 7350 N. Broadway,
Denver, CO 80221
Private. Jerald B. Sirbu, vice-pres., adm.
Roger Oviatt, vice-pres. of ed.
Total enrollment: 600
Technician enrollment: 600
Accreditation: NATTS, St. Board for Comm. Colleges & Occ. Ed.
TECHNOLOGIES: Architectural drafting, civil, surveying, computer maintenance, electronic, electronic drafting*, industrial electronics, laser, microelectronics, air conditioning, heating, & refrigeration, automotive, drafting, motorcycle mechanics, small engine mechanics

Electronic Technical Institute, Inc.,
1070 Bannock St., Denver, CO 80204
Private. Mary R. Roland, pres.
Charles F. Mozer, tech. dir.
Total enrollment: 150
Technician enrollment: 150
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Computer maintenance, electronic, industrial electronics, microelectronics

Emily Griffith Opportunity School,
1250 Welton St., Denver, CO 80204
Public. Ladell M. Thomas, adm.
Total enrollment: 34,000
Technician enrollment: 2,117
Accreditation: NCA, State Ed. Dept.
TECHNOLOGIES: Data processing & systems analysis**, aviation electronics**, computer maintenance**, electrical**, electronic communications**, industrial electronics**, radio & TV**, medical laboratory**, air conditioning, heating, & refrigeration**, auto body**, automotive**, aviation/aviation maintenance**, drafting**, machine tool**, welding**

Lamar Community College,
2401 S. Main, Lamar, CO 81052
Public. Marvin E. Lane, chief admin. officer
Total enrollment: 500
Technician enrollment: 250
Accreditation: NCA, State Ed. Dept.
Admission: Open-door policy, 16 years of age or older
TECHNOLOGIES: Animal science, secretarial science, building construction, automotive, welding, cosmetology

Larimer County Vo-Tech Center,
4616 S. Shields St., P.O. Box 2397,
Fort Collins, CO 80522
Public. Jack Stoddard, dir.
Total enrollment: 550
Accreditation: NCA
Admission: 16 years of age or older
TECHNOLOGIES: Horticulture, accounting, secretarial science, electronic, radio & TV, air, water, & wastewater, dental assistant, nursing, automotive, drafting, machine tool, welding

Mesa College*,
1120 N. Ave., Grand Junction, CO 81501
Public. John Tomlinson, pres.
A.D. Anderson, dir., voc. school
Total enrollment: 3,274
Technician enrollment: 775
Accreditation: NCA

Admission: Open-door policy
TECHNOLOGIES: Agricultural, accounting, business administration, secretarial science, civil, electrical, electronic, dental assistant, nursing, X-ray, graphic arts, auto body, automotive, diesel, drafting, hydraulic, welding, early childhood education, police science, recreation

Metropolitan State College,
1006 11th St., Denver, CO 80204
Public. Richard M. Fontera, pres.
H.J. Bestervelt, dean, eng. tech.
Total enrollment: 16,000
Technician enrollment: 1,000
Accreditation: NCA, ABET
Admission: High-school graduate or GED
TECHNOLOGIES: Civil (4), surveying (4), electronic (4), nursing (4), mechanical (4)

Morgan Community College,
17800 Rd. 20, Fort Morgan, CO 80701
Public. Larry D. Carter, pres.
Total enrollment: 950
Technician enrollment: 250
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Agricultural, animal science, accounting, business administration, computer science, data processing & systems analysis, secretarial science, word processing, building construction, electronic, auto body, automotive, welding

Northeastern Junior College*,
100 College Dr., Sterling, CO 80751
Public. Marv Weiss, pres.
Hilbert Kahl, occ. dean
Total enrollment: 1,287
Technician enrollment: 524
Accreditation: NCA
Admission: 16 years of age or older
TECHNOLOGIES: Agri-business, agricultural**, accounting, management & supervision, office machine operation, secretarial science, building construction, electronic, emergency medical*, nursing, auto body, automotive, mechanical & production, community service*, cosmetology

Otero Junior College*,
La Junta, CO 81050
Public. W.L. McDivitt, pres.
Jim Litle, dean of occ. ed.
Total enrollment: 675
Technician enrollment: 250
Accreditation: NCA, State Ed. Dept.
Admission: High-school graduate or special permission
TECHNOLOGIES: Agri-business, agricultural, accounting, business administration, data processing & systems analysis, secretarial science, architectural drafting, civil, construction, emergency medical, nursing, diesel, drafting, heavy equipment operation/service, machine tool, welding, early childhood education

Pikes Peak Community College,
5675 S. Academy Blvd.,
Colorado Springs, CO 80906
Public. Donald McInnis, pres.
Betty Cooke, dean, occ. ed.
Total enrollment: 5,925
Accreditation: NCA, ADNUR, DA, PNUR
Admission: Open-door policy
TECHNOLOGIES: Horticulture, accounting, banking & finance, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, legal secretary, management & supervision, merchandising/sales, secretarial science, architectural drafting, construction, electronic, microelectronics, dental, dietetics, nursing, graphic arts, occupational safety, solar, air conditioning, heating, & refrigeration, appliance service, auto body, auto-diesel, automotive, heavy equipment operation/service, machine tool, mechanical, welding, child growth & care, correctional science, fire science, police science, social welfare & services, broadcasting, commercial art & design, criminal justice

Pikes Peak Institute of Medical Technology,
25 N. Wahsatch Ave.,
Colorado Springs, CO 80903
Private. Alice E. Johnson, pres./adm.
Larry J. Fulks, head of faculty
Total enrollment: 100
Technician enrollment: 100
Accreditation: ABHES
Admission: High-school graduate with C average or better or GED, typing ability for medical assistant
TECHNOLOGIES: Laboratory technician, medical assistant

Pueblo Community College,
900 W. Orman Ave., Pueblo, CO 81004
Public. Ron Meek, pres.
Tony Zeiss, vice-pres. of instr.
Jim Foulks, vice-pres., student svcs.
Total enrollment: 957
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Data processing & systems analysis*, legal secretary*, office machine operation, secretarial science, word processing*, electronic, dental hygiene, inhalation/respiratory therapy, occupational therapy, X-ray, air conditioning, heating, & refrigeration, auto body, automotive, diesel, drafting, machine tool, welding, criminal justice, transportation

Regis College*,
W. 50th & Lowell Blvd., Denver, CO 80221
Private. William R. Regan, dir. of adm.
Total enrollment: 1,100
Technician enrollment: 275
Accreditation: NCA
Admission: High-school graduate with 2.5 g.p.a. or GED, ACT or SAT
TECHNOLOGIES: Accounting (4), business administration (4), medical records (4)

San Juan Basin Area Vocational Technical School, P.O. Box 970, Cortez, CO 81321
Public. Howard N. Acott, dir.
Total enrollment: 800
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting, secretarial science, building construction, electrical, electronic, electronic communications, emergency medical, nursing, automotive, diesel, heavy equipment operation/service, welding

Trinidad State Junior College,
600 Prospect, Trinidad, CO 81082
Public. Thomas W. Sullivan, pres.
Leonard A. Hawley, tech. chm.
Total enrollment: 1,200
Technician enrollment: 800
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Soils, accounting, advertising/marketing, business administration, data processing & systems analysis, office machine operation, secretarial science, architectural drafting, building construction, civil, surveying, interior design, computer maintenance, electronic, natural resources management & conservation, emergency medical, nursing, photographic, auto body, automotive, drafting, heavy equipment operation/service, industrial drafting & design, welding, police science, cosmetology, criminal justice, journalism, mining

University of Southern Colorado*,
2200 Bonforte Blvd., Pueblo, CO 81001
Public. Lyle C. Wilcox, pres.
Ray L. Sisson, dean, applied sci. & eng. tech.
Total enrollment: 4,685
Technician enrollment: 1,017
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Data processing & systems analysis, electronic (2-4), engineering science, metallurgical (2-4), automotive (2-4), mechanical (2-4), mechanical & production

CONNECTICUT

Asnuntuck Community College,
Box 68, Enfield, CT 06082
Public. Daniel McLaughlin, pres.
D. Franke, dean, tech. ed.
Total enrollment: 1,800
Technician enrollment: 800
Accreditation: NEA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, management & supervision, merchandising/sales, real estate, retail management, secretarial science, environmental, chemical, child growth & care, community service, early childhood education, library science, public service, social welfare & services, journalism

Central Connecticut State College,
Stanley St., New Britain, CT 06050
Public. J. Duffy, dean
Andrew Baron, chm., ind. tech.
Total enrollment: 13,300
Technician enrollment: 490
Accreditation: NEA, NCATE, ACE, AACTE
Admission: High-school graduate
TECHNOLOGIES: Building construction (4), construction (4), electrical (4), electro-mechanical (4), graphic arts (4), industrial (4), occupational safety (4), plastics (4), automotive (4), combustion power (4), drafting (4), fluid power (4), hydraulic (4), industrial drafting & design (4), machine tool (4), mechanical & production (4), sheet metal (4), small engine mechanics (4), welding (4), public service (4), transportation (4)

Connecticut School of Electronics,
586 Boulevard, New Haven, CT 06519
Private. Kenneth A. Titus, dir.
Albert J. Marcarelli, tech. dir.
Total enrollment: 600
Technician enrollment: 600
Accreditation: NATTS
Admission: High-school graduate with algebra for day school, 2 years of high school for night school
TECHNOLOGIES: Data processing & systems analysis, computer maintenance, electronic, electronic communications, industrial electronics

Greater Hartford Community College,
61 Woodland St., Hartford, CT 06105
Public. Arthur C. Banks, Jr., pres.
S.J. Oleon, dean of faculty
Total enrollment: 3,327
Accreditation: NEA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, management & supervision, secretarial science, word processing, medical assistant, nursing, early childhood education, public service, social welfare & services

Greater New Haven State Technical College,
222 Maple Ave., North Haven, CT 06473
Public. Thomas J. Sullivan, pres.
TECHNOLOGIES: Accounting*, advertising/marketing*, banking & finance*, data processing & systems analysis, insurance*, management & supervision*, personnel*, architectural drafting*, electrical, electro-mechanical*, electro-mechanical drafting*, electronic, electronic communications*, electronic drafting*, industrial electronics, microelectronics*, environmental*, biomedical, graphic arts, industrial, lithographic*, numerical control*, solar*, automotive*, drafting*, drafting & tool design*, fluid power*, hydraulic*, industrial drafting & design*, machine tool*, mechanical, mechanical & production*, fire science*, technical writing*

Hartford State Technical College,
401 Flatbush Ave., Hartford, CT 06106
Public. Kenneth E. DeRego, pres.
Raymond J. Wodatch, dean of instr.
Total enrollment: 1,983
Accreditation: NEA, ABET
TECHNOLOGIES: Agricultural, computer science*, data processing & systems analysis, management & supervision*, architectural drafting*, civil, highway, structural engineering & design, surveying, electrical, electronic, electronic communications, microelectronics*, environmental*, chemical, energy,*, manufacturing, numerical control*, plastics*, quality control*, air conditioning, heating, & refrigeration**, hydraulic*, mechanical, welding*, fire science

Harvard H. Ellis Regional Vocational-Technical School*, P.O. Box 149, Maple St., Danielson, 06239
Public. Arthur R. Quimby, Jr., dir.
Total enrollment: 560
Technician enrollment: 175
Accreditation: NEA, FAA, State Ed. Dept.
Admission: High-school graduate
TECHNOLOGIES: Architectural drafting, building construction, electrical, electronic, industrial electronics, aeronautical, automotive, aviation/aviation maintenance, drafting, drafting & tool design, industrial drafting & design, machine tool, cosmetology

Henry Abbott Regional Vocational-Technical School, Hayestown Ave., Danbury, CT 06810
Public. Arthur J. Haddad, supv.
Total enrollment: 900
Technician enrollment: 500
Accreditation: State Ed. Dept., ABET
Admission: High-school graduate
TECHNOLOGIES: Building construction*, civil, computer maintenance, electrical**, electromechanical*, electro-mechanical drafting*, industrial electronics*, cabinet & furniture making*, chemical, graphic arts*, air conditioning, heating, & refrigeration*, appliance service*, automotive*, drafting*, drafting & tool design*, machine tool, mechanical

Horace C. Wilcox Regional Vocational-Technical School, Oregon Rd., Meriden, CT 06450
Public. Robert M. Dorsey, dir.
John Nylander, supv., ad. ed.
Accreditation: NEA, State Ed. Dept.
Admission: Requirements vary—contact school
TECHNOLOGIES: Building construction*, electrical, electronic*, air, water, & wastewater*, sanitary engineering, air conditioning, heating, & refrigeration*, automotive*, industrial drafting & design, machine tool*, mechanical, sheet metal, welding, cosmetology

Housatonic Community College,
510 Barnum Ave., Bridgeport, CT 06608
Public. Vincent Darnowski, pres.
Phyllis J. Gutowski, dir., med. lab. tech.
Total enrollment: 2,600
Technician enrollment: 60
Accreditation: NEA, AMA
Admission: Open-door policy
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, management & supervision, secretarial science, medical laboratory, community service, early childhood education, criminal justice

Manchester Community College,
P.O. Box 1046, Manchester, CT 06040
Public. William E. Vincent, pres.
Total enrollment: 6,500
Technician enrollment: 1,200
Accreditation: NEA, State Ed. Dept.
Admission: High-school graduate or GED, placement exams
TECHNOLOGIES: Accounting**, advertising/marketing, business administration**, data processing & systems analysis**, hospitality—hotel, motel, & restaurant management, legal secretary, real estate**, secretarial science, word processing, inhalation/respiratory therapy, laboratory technician, medical laboratory, occupational therapy, correctional science, early childhood education, police science, social welfare & services, criminal justice

Mattatuck Community College,
750 Chase Parkway, Waterbury, CT 06708
Public. Kenneth H. Summerer, pres.
Joseph V. Cistulli, dean of instr.
Total enrollment: 3,568
Accreditation: NEA, BHE
Admission: High-school graduate or GED
TECHNOLOGIES: Agricultural, accounting**, advertising/marketing**, business administration, computer science*, management & supervision**, secretarial science**, word processing*, culinary*, mental health**, nursing, X-ray, automotive**, early childhood education**, legal/paralegal**, social welfare & services**, criminal justice**

Middlesex Community College,
Middletown, CT 06457
Public. Robert A. Chapman, pres.
Total enrollment: 2,896
Technician enrollment: 1,100
Accreditation: NEA
Admission: Open-door policy
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, legal secretary, secretarial science, environmental, X-ray, commercial art & design

Mitchell College,
New London, CT 06320
Private. Edward F. O'Neill, dir., adm.
Total enrollment: 550
Technician enrollment: 70
Accreditation: NEA
Admission: Requirements vary for specific programs
TECHNOLOGIES: Accounting, business administration, secretarial science, early childhood education, recreation, social welfare & services, special education

Northwestern Connecticut Community College*, Park Place, Winsted, CT 06098
Public. Regina M. Duffy, pres.
Total enrollment: 2,504
Accreditation: NEA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, business administration, secretarial science, early childhood education, library science, recreation, criminal justice

Norwalk Community College,
333 Wilson Ave., Norwalk, CT 06854
Public. William Schwab, pres.
Mary W. Brackett, acad. dean
Total enrollment: 3,500
Technician enrollment: 1,700
Accreditation: NEA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting**, advertising/marketing**, business administration**, data processing & systems analysis**, secretarial science**, inhalation/respiratory therapy, nursing, early childhood education**, legal/paralegal, library science**, police science**, recreation**, social welfare & services, journalism*

Norwalk State Technical College,
181 Richards Ave., Norwalk, CT 06854
Public. William M. Krummel, pres.
Richard Olson, dean
Total enrollment: 2,000
Technician enrollment: 2,000
Accreditation: NEA, ABET
Admission: High-school graduate with 4 units

of English, 3 units of math, and 1 unit of lab science
TECHNOLOGIES: Computer science, data processing & systems analysis, architectural engineering, civil, electrical, electro-mechanical, environmental, engineering science, industrial, manufacturing, numerical control*, mechanical, fire science, technical writing*

Porter & Chester Institute: Rocky Hill, Stratford*, Waterbury, Enfield (*See individual listings for more information on these branches.) Main Office: 2139 Silas Deane Hwy., P.O. Box 330, Rocky Hill, CT 06067
Private. Henry J. Kamerzel, exec. dir.
Accreditation: NATTS
Admission: High-school graduate
TECHNOLOGIES: Architectural drafting, architectural engineering, building construction, civil, construction, masonry, structural engineering & design, surveying, computer maintenance, electro-mechanical, electro-mechanical drafting, electronic, electronic communications, electronic drafting, industrial electronics, plastics, technical & industrial illustration, air conditioning, heating, & refrigeration, auto-diesel, automotive, combustion power, diesel, drafting, drafting & tool design, fluid power, hydraulic, industrial drafting & design, internal combustion, machine tool, mechanical, urban engineering/planning

Porter & Chester Institute, Stratford,
690 Lordship Blvd., P.O. Box 364,
Stratford, CT 06497
Private. W.L. Brown, exec. dir.
Accreditation: NATTS
Admission: High-school graduate
TECHNOLOGIES: Architectural drafting, architectural engineering, building construction, civil, construction, masonry, structural engineering & design, surveying, electro-mechanical, electro-mechanical drafting, electronic, electronic communications, electronic drafting, industrial electronics, plastics, technical & industrial illustration, air conditioning, heating, & refrigeration, auto-diesel, automotive, aviation/aviation maintenance, combustion power, diesel, drafting, drafting & tool design, fluid power, hydraulic, industrial drafting & design, internal combustion, machine tool, mechanical, welding, urban engineering/planning

Post College,
800 Country Club Rd., Waterbury, CT 06708
Private. Douglas R. Picht, pres.
James E. Brady, dean, cont. ed.
Total enrollment: 1,320
Technician enrollment: 900
Accreditation: NEA, St. Board of Higher Ed.
Admission: High-school graduate or GED, ACT
TECHNOLOGIES: Accounting (2-4), advertising/marketing (2-4), business administration (2-4), legal secretary, management & supervision (2-4), secretarial science (2-4), interior design, early childhood education, recreation

Quinebaug Valley Community College,
24 School St., Danielson, CT 06239
Public. Robert E. Miller, pres.
Total enrollment: 972

Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Animal science (4), accounting (2-4), advertising/marketing (4), banking & finance (4), business administration (2-4), data processing & systems analysis (2-4), legal secretary, management & supervision (4), secretarial science, environmental (4), health, inhalation/respiratory therapy (4), medical (4), nuclear medicine (4), nursing (2-4), occupational therapy (4), physical therapy (4), radiation, X-ray

Samuel I. Ward Technical College, University of Hartford*, 200 Bloomfield Ave.,
West Hartford, CT 06117
Private. S.J. Trachtenberg, pres.
J.D. Driscoll, dean
Technician enrollment: 450
Accreditation: NEA, ABET, State Ed. Dept.
Admission: High-school graduate, 2 years of algebra, 1 year of science/physics, or completion of pretechnology program
TECHNOLOGIES: Computer maintenance, electrical (2-4), electro-mechanical, electronic (2-4), electronic communications, industrial electronics, microelectronics, radio & TV

South Central Community College,
60 Sargent Dr., New Haven, CT 06511
Public. Richard M. Turner III, pres.
Total enrollment: 2,318
Technician enrollment: 800
Accreditation: NEA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, business administration, data processing & systems analysis, insurance, secretarial science, dietetics, nuclear medicine, radiation, X-ray, early childhood education, social welfare & services

Southern Connecticut State College,
New Haven, CT 06515
Public. Frank Harrison, pres.
Total enrollment: 10,481
Technician enrollment: 1,000
Accreditation: NEA, NCATE, NLN, CSWE, ALA
TECHNOLOGIES: Accounting (4), computer science (4)*, health (4)*, nursing (4)*, early childhood education(4)*, library science (4)*, social welfare & services(4)*, journalism(4)*, special education (4)*

Thames Valley State Technical College,
574 New London Turnpike,
Norwich, CT 06360
Public. Donald R. Welter, pres.
John R. Green, dean of instr.
Total enrollment: 1,750
Technician enrollment: 1,200
Accreditation: NEA, ABET
Admission: High-school graduate with 4 units of English, 2 units of math, and 1 unit of science
TECHNOLOGIES: Data processing & systems analysis, architectural drafting*, civil, electrical, industrial electronics*, chemical, industrial, manufacturing, aviation/aviation maintenance, industrial drafting & design*, mechanical, fire science

Tunxis Community College,
Farmington, CT 06032
Public. Robert A. Chapman, interim pres.
Total enrollment: 3,200
Accreditation: NEA
Admission: High-school graduate or GED, 18 years of age or older
TECHNOLOGIES: Accounting, business administration, data processing & systems analysis*, legal secretary, real estate*, secretarial science, word processing*, dental, dental assistant, dental hygiene, graphic arts, correctional science, police science

Waterbury State Technical College,
1460 W. Main St., Waterbury, CT 06708
Public. Charles A. Ekstrom, pres.
Albert A. Seretny, dean of instr.
Total enrollment: 1,885
Technician enrollment: 1,800
Accreditation: NEA, ABET
Admission: High-school graduate with 4 units of English, 2 units of math, and 1 unit of lab science, SAT
TECHNOLOGIES: Data processing & systems analysis**, management & supervision, electrical, chemical, manufacturing, numerical control*, quality control*, industrial drafting & design*, mechanical, fire science

DELAWARE

Brandywine College*,
P.O. Box 7139, Wilmington, DE 19803
Private. Clarence R. Moll, pres.
Total enrollment: 1,200
Technician enrollment: 800
Accreditation: MSA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, business administration, management & supervision, office machine operation, secretarial science, legal/paralegal, police science

Delaware Technical & Community College,

Total enrollment: 1,115
Accreditation: MSA, Comm. on Higher Ed.
Admission: High-school graduate or GED or 18 years of age or older
TECHNOLOGIES: Accounting, banking & finance, business administration, data processing & systems analysis, secretarial science, word processing, architectural engineering, civil, food processing & distribution, electronic, dental assistant, dental hygiene, inhalation/respiratory therapy, nuclear medicine, nursing, medical secretary, engineering science, industrial, instrumentation, air conditioning, heating, & refrigeration, mechanical, community service, correctional science, early childhood education, fire science, police science, social welfare & services, transportation

Goldey Beacom College,
4701 Limestone Rd., Wilmington, DE 19808
Private. Susan E. Zawislak, dir. adm.
Total enrollment: 997
Accreditation: MSA
Admission: High-school graduate or GED, CGPT
TECHNOLOGIES: Accounting, advertising/marketing, business administration, computer science (2-4), legal secretary, management & supervision, real estate*, secretarial science, word processing*

DISTRICT OF COLUMBIA

The American University,
4400 Massachusetts Ave. N.W.,
Washington, DC 20016
Private. Richard Berendzen, pres.
Total enrollment: 11,500
Accreditation: MSA
TECHNOLOGIES: Data processing & systems analysis (4)*, laboratory technician (4), nursing (4)*, child growth & care, community service, broadcasting (4), commercial art & design (4), criminal justice (2-4)*

Howard University,
2400 Sixth St. N.W., Washington, DC 20059
Private. James E. Cheek, pres.
Total enrollment: 11,624
Technician enrollment: 4,131
Accreditation: MSA
Admission: Requirements vary—contact school
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, hospitality—hotel, motel, & restaurant management, insurance, real estate, architectural drafting (4), civil (4), food processing & distribution (4), interior design (4), electronic communications (4), radio & TV (4), dental (4), dental assistant, dental hygiene (2-4), dietetics (4), laboratory technician (4), medical assistant, medical laboratory (4), nursing (4), occupational therapy (4), physical therapy (4), radiation (2-4), textile (4), broadcasting (4), commercial art & design (4)

Strayer College (2 Campuses),
601 13th St. N.W., Washington, DC 20005
3045 Columbia Pike, Arlington, VA 22204
Private. Charles B. Harrington, pres.
Total enrollment: 1,773
Accreditation: MSA
Admission: High-school graduate or equivalent
TECHNOLOGIES: Accounting (2-4), advertising/marketing, business administration (2-4), data processing & systems analysis (2-4), legal secretary, secretarial science, word processing

University of the District of Columbia*,
4200 Connecticut Ave. N.W.,
Washington, DC 20008
Public. Lisle C. Carter, pres.
Total enrollment: 13,901
Technician enrollment: 4,669
Accreditation: MSA
Admission: High-school graduate
TECHNOLOGIES: Animal science (4), forestry, horticulture (4), accounting (2-4), advertising/marketing(4), banking & finance (4), business administration (4), management & supervision (2-4), merchandising/sales (4), secretarial science (4), architectural engineering (4), building construction (4), civil (4), construction (4), food processing & distribution (2-4), electro-mechanical (4), air, water, & wastewater (4), environmental (4), inhalation/respiratory therapy (2-4), nursing (2-4), radiation (4), chemical (4), aeronautical (4), mechanical (4), child growth & care (4), early childhood education (4), library science (2-4), recreation (4), social welfare & services (2-4), criminal justice (4), marine (4), mortuary science (4), special education (4)

FLORIDA

Barry University,
11300 N.E. 2 Ave., Miami, FL 33161
Private. Deborah Iacono, dean of adm.
Total enrollment: 3,181
Accreditation: SA
Admission: High-school graduate, SAT
TECHNOLOGIES: Accounting (4), advertising/marketing (4), business administration (4), computer science (4), inhalation/respiratory therapy (4), medical (4), nuclear medicine (4), nursing (4)

Bethune-Cookman College,
640 Second Ave., Daytona Beach, FL 32015
Private. R. Bamberg, dir., med. tech.
Total enrollment: 1,500
Technician enrollment: 28
Accreditation: CAHEA, NAACLS
Admission: Two years prerequisite course work in biology, chemistry, math, and general studies
TECHNOLOGY: Medical laboratory (4)

Biscayne Paramedical Institute*,
DuPont Plaza, 300 Biscayne Blvd. Way,
Miami, FL 33131
Private. L.G. Lottenberg, exec. dir.
Total enrollment: 175
Technician enrollment: 75
Accreditation: ABHES
Admission: High-school graduate
TECHNOLOGY: Medical laboratory

Brevard Community College (3 Campuses),
1519 Clearlake Rd., Cocoa, FL 32922
3865 N. Wickham Rd., Melbourne, FL 32935
1111 N. Washington, Titusville, FL 32780
Public. Maxwell C. King, pres.
J. Keller, dean of instr.
Total enrollment: 10,900
Technician enrollment: 5,060
Accreditation: SA, State Ed. Dept.
Admission: Open-door policy
TECHNOLOGIES: Horticulture, banking & finance, business administration, computer science, merchandising/sales, real estate, secretarial science, building construction, upholstery, electrical, electronic, industrial electronics, radio & TV, environmental, biomedical, dental assistant, emergency medical, inhalation/respiratory therapy, medical laboratory, nursing, radiation, cabinet & furniture making, photographic, solar, technical & industrial illustration, appliance service, automotive, drafting, machine tool, sheet metal, small engine mechanics, welding, child growth & care, fire science, police science, cosmetology, criminal justice, marine, technical writing

Broward Community College,
225 E. Las Olas Blvd.,
Fort Lauderdale, FL 33301
Public. Hugh Adams, pres.
Clinton D. Hamilton, exec. vice-pres.
George Mehallis, exec. dir., tech. ed.
Total enrollment: 50,000
Technician enrollment: 20,000
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Agricultural, accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, insurance, legal secretary, management & supervision, merchandising/sales, real estate, retail management, secretarial science, architectural drafting, architectural engineering, building construction, civil, apparel design/manufacturing, food processing & distribution, interior design, aviation electronics, electro-mechanical, electro-mechanical drafting, electronic, robotics, air, water, & wastewater, biomedical, dental assistant, dietetics, emergency medical, inhalation/respiratory therapy, laboratory technician, medical, medical assistant, medical laboratory, nuclear medicine, nursing, physical therapy, radiation, X-ray, drafting, community service, correctional science, court reporting, early childhood education, fire science, legal/paralegal, police science, public service, commercial art & design, criminal justice, journalism, transportation

Central Florida Community College,
P.O. Box 1388, Ocala, FL 32678
Public. Henry E. Goodlett, pres.
Fred O. Young, dean, vo-tech ed.
Total enrollment: 3,700
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, management & supervision, secretarial science, building construction, civil, computer maintenance, electro-mechanical, nursing, radiation, engineering science, drafting, industrial drafting & design, correctional science, police science, special education

Charron-Williams College, Paramedical Division*, 255 S.W. 8 St., Miami, FL 33130
Private. Irving Goldstein, pres.
Sylvia Ben, ed. dir.
Total enrollment: 400
Technician enrollment: 100
Accreditation: AICS, ABHES
Admission: High-school graduate or GED
TECHNOLOGIES: Dental, dental assistant, medical assistant, medical laboratory

Chipola Junior College*,
Marianna, FL 32446
Public. Raymond M. Deming, pres.
A.B. Caraway, dean, vo-tech ed.
Total enrollment: 1,300
Technician enrollment: 100
Accreditation: SA
Admission: High-school graduate
TECHNOLOGIES: Agricultural, business administration, data processing & systems analysis,

secretarial science, electronic, radio & TV, emergency medical, mental health, nursing, automotive, welding, correctional science, police science

College of Boca Raton,
Boca Raton, FL 33431
Private. Donald E. Ross, pres.
James Matthews, acad. dean
Total enrollment: 500
Technician enrollment: 200
Accreditation: SA
Admission: High-school graduate, recommendations
TECHNOLOGIES: Accounting (4), advertising/marketing (4), banking & finance (4), business administration (2-4), computer science (2-4), hospitality—hotel, motel, & restaurant management (2-4), management & supervision (2-4), word processing, electronic (2-4), inhalation/respiratory therapy*, graphic arts, early childhood education, air transport (4), commercial art & design, mortuary science

Collier County Vocational Technical Center,
3202 Estey Ave., Naples, FL 33942
Public. William Perry, dir.
Norm Taylor, pupil personnel svcs.
Total enrollment: 750
Technician enrollment: 450
Accreditation: SA, COEIC
TECHNOLOGIES: Horticulture, accounting, computer science, legal secretary, office machine operation, secretarial science, word processing, building construction, electronic, electronic communications, microelectronics, radio & TV, health, nursing, industrial, automotive, motorcycle mechanics, small engine mechanics, public service, cosmetology, marine

Daytona Beach Community College,
P.O. Box 1111, Daytona Beach, FL 32015
Public. Charles H. Polk, pres.
J. Roland Smith, dir., tech. & ind. ed.
M. Tucker, dean, occ. ed.
Total enrollment: 8,461
Technician enrollment: 1,009
Accreditation: SA
Admission: High-school graduate
TECHNOLOGIES: Horticulture, accounting, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, merchandising/sales, secretarial science, word processing, architectural drafting, building construction, civil, construction, electronic, electronic communications, dental assistant, emergency medical, inhalation/respiratory therapy, mental health, nursing, operating room assistant, cabinet & furniture making, lithographic, photographic, air conditioning, heating, & refrigeration, auto body, auto-diesel, automotive, machine tool, motorcycle mechanics, small engine mechanics, welding, correctional science, fire science, police science, recreation, social welfare & services, commercial art & design

Dixie Hollins High School,
4940 62nd St. N., St. Petersburg, FL 33709
Public. Charley J. Williams, Jr., prin.
John Reynolds, asst. prin.
Lisa Komarow, asst. prin.
Total enrollment: 2,000
Technician enrollment: 400
Accreditation: SA
Admission: Requirements vary for specific programs
TECHNOLOGIES: Office machine operation, secretarial science, statistical, food processing & distribution, industrial electronics, graphic arts, photographic, automotive, drafting, commercial art & design, cosmetology

Dunedin Comprehensive High School*,
1651 Pinehurst Rd., Dunedin, FL 33528
Public. Francis M. Freeman, prin.
Carl C. George, asst. prin.
Total enrollment: 2,200
Technician enrollment: 375
Accreditation: SA
TECHNOLOGIES: Construction, masonry, industrial electronics, automotive, drafting, cosmetology

Edison Community College*,
College Parkway, Fort Myers, FL 33907
Public. David G. Robinson, pres.
Total enrollment: 5,000
Technician enrollment: 1,438
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Banking & finance, data processing & systems analysis, secretarial science, nursing

Embry-Riddle Aeronautical University,
Regional Airport, Daytona Beach, FL 32014
Private. Jack R. Hunt, pres.
Jeffrey Ledewitz, vice-pres., chancellor
Total enrollment: 8,054
Technician enrollment: 4,500
Accreditation: SA, FAA, ABET
Admission: High-school graduate or GED
TECHNOLOGIES: Business administration (4), computer science (4), data processing & systems analysis, management & supervision (2-4), aviation electronics, engineering science (2-4), aeronautical (4), aviation/aviation maintenance (2-4), air transport (2-4)

Florida A&M University,
P.O. Box 338, Tallahassee, FL 32307
Public. Charles C. Kidd, dean, eng. sci., tech., & ag.
Total enrollment: 5,194
Technician enrollment: 729
Accreditation: ABET, CET, EET
Admission: High-school graduate
TECHNOLOGIES: Data processing & systems analysis (2-4), architectural engineering, building construction, civil, construction, electronic (2-4), engineering science

Florida College,
Temple Terrace, FL 33617
Private. C.G. Caldwell III, dean & adm. officer
Total enrollment: 426
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, computer science, office machine operation, secretarial science, journalism

Florida Institute of Technology,
Melbourne, FL 32901
Private. Jerome Keuper, pres.
Total enrollment: 7,061
Technician enrollment: 1,304
Accreditation: SA, ABET
Admission: High-school graduate
TECHNOLOGIES: Computer science (2-4), electronic, environmental (2-4), medical (2-4), photographic, air transport (2-4), marine, oceanography (2-4), petroleum

Florida International University*,
Tamiami Trail, Miami, FL 33199
Public. Gregory B. Wolfe, pres.
Total enrollment: 11,673
Technician enrollment: 4,150
Accreditation: SA
TECHNOLOGIES: Accounting (4), business administration (4), data processing & systems analysis (4), hospitality—hotel, motel, & restaurant management (4), real estate (4), architectural engineering (4), building construction (4), civil (4), construction (4), structural engineering & design (4), apparel design/manufacturing (4), interior design (4), computer maintenance (4), electrical (4), electro-mechanical (4), electronic (4), industrial electronics (4), dietetics (4), health (4), medical, medical laboratory (4), medical records (4), occupational therapy (4), physical therapy (4), industrial (4), occupational safety (4), textile (4), air conditioning, heating, & refrigeration (4), mechanical (4), child growth & care (4), criminal justice (4), urban engineering/planning (4)

Florida Junior College at Jacksonville,
501 W. State St., Jacksonville, FL 32202
Public. Benjamin R. Wygal, pres.
Eric R. Mills, dean, occ. & ad. ed.
Total enrollment: 78,800
Technician enrollment: 11,000
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate
TECHNOLOGIES: Accounting, banking & finance, business administration, data processing & systems analysis, hospitality—hotel, motel, & restraurant management, insurance, merchandising/sales, real estate, secretarial science, word processing, architectural drafting, building construction, civil, apparel design/manufacturing, culinary, food processing & distribution, interior design, electronic, radio & TV, dental assistant, dental hygiene, emergency medical, inhalation/respiratory therapy, medical laboratory, nursing, operating room assistant, X-ray, graphic arts, air conditioning, heating, & refrigeration, appliance service, auto body, automotive, diesel, industrial drafting & design, mechanical, small engine mechanics, welding, child growth & care, correctional science, fire science, police science, cosmetology, transportation

Florida State University,
Tallahassee, FL 32306
Public. Bernard F. Sliger, pres.
Total enrollment: 22,020
Accreditation: SA
Admission: Requirements vary—contact school
TECHNOLOGIES: Hospitality—hotel, motel, & restaurant management (4), interior design (4), nursing (4), correctional science (4), criminal justice (4)

George T. Baker Aviation School,
3275 N.W. 42nd Ave., Miami, FL 33142
Public. Vincent Pavicic, prin.
G. Carr, coord., voc. ed.

Total enrollment: 750
Technician enrollment: 750
Accreditation: SA, FAA
Admission: High-school graduate
TECHNOLOGIES: Aviation electronics, quality control, aeronautical, aviation/aviation maintenance

Gulf Coast Community College,
5230 W. Highway 98, Panama City, FL 32401
Public. Lawrence W. Tyree, pres.
L.E. Baber, dean, career ed.
Total enrollment: 3,500
Technician enrollment: 1,800
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, management & supervision, merchandising/sales, office machine operation, real estate, retail management, secretarial science, architectural drafting, architectural engineering, building construction, civil, construction, commercial broadcast, electro-mechanical, electro-mechanical drafting, electronic, electronic communications, electronic drafting, radio & TV, dental hygiene, inhalation/respiratory therapy, mental health, nursing, air conditioning, heating, & refrigeration, drafting, child growth & care, fire science, police science, social welfare & services, broadcasting, commercial art & design, marine

Haney Vocational-Technical Center*,
3016 Highway 77, Panama City, FL 32405
Public. William E. Kirby, dir.
Total enrollment: 3,777
Technician enrollment: 1,758
Accreditation: SA
TECHNOLOGIES: Horticulture, accounting, banking & finance, hospitality—hotel, motel, & restaurant management, management & supervision, merchandising/sales, office machine operation, secretarial science, architectural drafting, construction, masonry, apparel design/manufacturing, food processing & distribution, electrical, industrial electronics, nursing, occupational therapy, industrial, air conditioning, heating, & refrigeration, automotive, drafting, sheet metal, small engine mechanics, welding, child growth & care, early childhood education, legal/paralegal, commercial art & design, cosmetology, marine

Hillsborough Community College*,
P.O. Box 32127, Tampa, FL 33622
Public. Edward R. Mattson, dir., occ. ed.
Total enrollment: 12,000
Technician enrollment: 4,700
Accreditation: SA, State Ed. Dept.
Admission: Open-door policy
TECHNOLOGIES: Agri-business, animal science*, horticulture*, accounting, advertising/marketing**, banking & finance*, business administration**, data processing & systems analysis**, hospitality—hotel, motel, & restaurant management**, insurance*, management & supervision**, merchandising/sales**, office machine operation**, personnel*, real estate*, secretarial science*, statistical**, architectural drafting**, building construction, construction, surveying, apparel design/manufacturing**, culinary*, electrical, electro-mechanical, electro-mechnical drafting, electronic, electronic communications, electronic drafting, industrial electronics, air, water, & wastewater**, emergency medical**, medical, mental health, nuclear medicine, nursing**, optical, psychiatric*, radiation, X-ray, ceramic*, instrumentation, occupational safety**, photographic*, child growth & care*, community service*, correctional science**, fire science**, legal/paralegal, police science**, public service*, recreation*, social welfare & services*, criminal justice, marine, transportation

Indian River Community College*,
3209 Virginia Ave., Fort Pierce, FL 33450
Public. Herman A. Heise, pres.
R.W. Moses, assoc. dean, occ. ed.
Total enrollment: 5,000
Technician enrollment: 2,500
Accreditation: SA
Admission: High-school graduate
TECHNOLOGIES: Agri-business*, agricultural, animal science, horticulture, soils**, banking & finance, data processing & systems analysis**, hospitality—hotel, motel, & restaurant management, management & supervision, merchandising/sales, office machine operation, real estate, secretarial science, architectural drafting**, building construction**, civil, apparel design/manufacturing, culinary, food processing & distribution, computer maintenance, electro-mechanical drafting**, electronic**, electronic communications**, radio & TV, dental, dental assistant, medical, medical laboratory, medical records, nursing**, graphic arts, industrial, quality control, air conditioning, heating, & refrigeration, auto body, automotive, drafting, industrial drafting, & design**, welding, early childhood education, fire science, legal/paralegal, police science, criminal justice, special education

International Fine Arts College,
1737 N. Bayshore Dr., Miami, FL 33132
Private. Edward Porter, pres.
Daniel Stack, dean
Total enrollment: 250
Technician enrollment: 250
Accreditation: SA
Admission: High-school graduate
TECHNOLOGIES: Advertising/marketing, merchandising/sales, retail management, apparel design/manufacturing, interior design, commercial art & design

Jones College,
Arlington Expressway, Jacksonville, FL 32211
Private. Jack H. Jones, pres.
James M. Patch, vice-pres.
Total enrollment: 1,305
Technician enrollment: 1,305
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (2-4), advertising/marketing (2-4), business administration (2-4), data processing & systems analysis (2-4), management & supervision (2-4), secretarial science, court reporting, broadcasting

Lake City Community College,

Accreditation: SA
Admission: Requirements vary for specific programs
TECHNOLOGIES: Forestry, horticulture, advertising/marketing, banking & finance, business administration, data processing & systems analysis, merchandising/sales, real estate, secretarial science, masonry, nursing, automotive, small engine mechanics, welding, cosmetology, criminal justice

Lake County Area Vocational-Technical Center, 2001 Kurt St., Eustis, FL 32726
Public. Maxine Felts, dir.
Thomas Winters, asst. dir.
Total enrollment: 1,225
Accreditation: SA, COEI
Admission: Requirements vary for specific programs
TECHNOLOGIES: Horticulture, accounting, data processing & systems analysis, management & supervision, office machine operation, secretarial science, word processing, architectural drafting, building construction, construction, masonry, culinary, electrical, electronic, industrial electronics, air, water, & wastewater, dental, emergency medical, health, inhalation/respiratory therapy, nursing, operating room assistant, cabinet & furniture making, photographic, air conditioning, heating, & refrigeration, appliance service, auto body, automotive, diesel, drafting, industrial drafting & design, small engine mechanics, welding, child growth & care, early childhood education, police science, cosmetology

Lake Sumter Community College,
Leesburg, FL 32748
Public. Robert Palinchak, pres.
Mary Caponi, chm., bus. & tech.
Total enrollment: 1,200
Technician enrollment: 110
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate
TECHNOLOGIES: Accounting, banking & finance, business administration, computer science, data processing & systems analysis, legal secretary, office machine operation, secretarial science, word processing, nursing, drafting, community service, correctional science, broadcasting, commercial art & design, criminal justice

Lakeland College*,
P.O. Box 3612, Lakeland, FL 33802
Private. Eugene L. Roberts, pres.
Wm. C. McGraw, Jr., vice-pres.
Total enrollment: 275
Accreditation: AICS
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, management & supervision, secretarial science

Lee County Area Vocational-Technical School,
3800 Michigan Ave, Fort Myers, FL 33901
Public. Ronald E. Pentiuk, dir.
Total enrollment: 800
Accreditation: SA
Admission: Aptitude test
TECHNOLOGIES: Horticulture*, data processing & systems analysis*, word processing*, archi-

tectural drafting*, masonry*, culinary*, electrical*, electronic*, industrial electronics*, radio & TV*, medical assistant*, nursing*, operating room assistant*, graphic arts*, air conditioning, heating, & refrigeration*, auto body*, automotive*, diesel*, drafting*, small engine mechanics*, welding*, child growth & care*, public service*, cosmetology*, criminal justice*, marine*

Manatee Junior College,
5840 26th St. W., Bradenton, FL 33507
Public. Stephen J. Korcheck, pres.
B.R. Tinsley, Jr., dean, occ. & tech. ed.
Total enrollment: 6,604
Technician enrollment: 3,468
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate or equivalent, 3 years of math. aptitude test, interview
TECHNOLOGIES: Advertising/marketing, banking & finance, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, legal secretary, management & supervision, personnel, real estate, secretarial science, architectural drafting, building construction, civil, aviation electronics, electrical, electronic drafting, air, water, & wastewater*, environmental, biomedical, inhalation/respiratory therapy, medical laboratory, nursing, X-ray, industrial, manufacturing*, quality control, drafting, drafting & tool design, industrial drafting & design, correctional science, police science, social welfare & services, teacher assistant, air transport, criminal justice, urban engineering/planning

Miami-Dade Community College,
11011 S.W. 104 St., Miami, FL 33176
Public. Robert McCabe, pres.
William Succop, assoc. dean, occ. ed.
Total enrollment: 58,350
Technician enrollment: 11,988
Accreditation: SA
Admission: High-school graduate or GED or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, insurance, legal secretary, management & supervision, merchandising/sales, office machine operation, personnel, real estate, retail management, secretarial science, word processing, architectural drafting, architectural engineering, building construction, civil, construction, highway, structural engineering & design, surveying, apparel design/manufacturing, food processing & distribution, interior design, aviation electronics, commercial broadcast, computer maintenance, electrical, electro-mechanical, electromechanical drafting, electronic, electronic communications, electronic drafting, industrial electronics, microelectronics, radio & TV, air, water, & wastewater, sanitary engineering, dental hygiene, dietetics, emergency medical, inhalation/respiratory therapy, laboratory technician, medical laboratory, medical records, nursing, optical, radiation, X-ray, engineering science, graphic arts, industrial, instrumentation, lithographic, manufacturing, numerical control, photographic, solar, technical & industrial illustration, aeronautical, air conditioning, heating, & refrigeration, aviation/aviation maintenance, drafting, industrial drafting & design, mechanical & production, correctional science, court reporting, early childhood education, fire science, police science, recreation, social welfare & services, teacher assistant, commercial art & design, criminal justice, mortuary science, transportation, travel

Mid-Florida Technical Institute,
2900 W. Oak Ridge Rd.,
Orlando, FL 32809
Public. Joseph Stephens, dir.
Frank Kral, asst. dir.
Total enrollment: 2,800
Technician enrollment: 2,400
Accreditation: SA
Admission: 16 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, office machine operation, real estate, secretarial science, word processing, architectural drafting, apparel design/manufacturing, culinary, food processing & distribution, upholstery, electrical, electro-mechanical drafting, electronic, electronic drafting, industrial electronics, graphic arts, lithographic, numerical control, photographic, technical & industrial illustration, air conditioning, heating, & refrigeration, appliance service, auto body, auto-diesel, automotive, aviation/aviation maintenance, diesel, heavy equipment operation/ service, industrial drafting & design, machine tool, motorcycle mechanics, office machine repair, small engine mechanics, welding, child growth & care, commercial art & design, travel

North Florida Junior College*,
Turner Davis Dr., P.O. Drawer 419,
Madison, FL 32340
Public. Gary P. Sims, pres.
John Sands, dir., occ. & ad. ed.
Total enrollment: 2,357
Technician enrollment: 839
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate or equivalent
TECHNOLOGIES: Horticulture, accounting, data processing & systems analysis, office machine operation, masonry, computer maintenance, sanitary engineering, nursing, automotive, drafting, police science, cosmetology

North Technical Education Center,
7071 Garden Rd., Riviera Beach, FL 33404
Public. Norman Lemstrom, dir.
Total enrollment: 1,510
Technician enrollment: 860
Accreditation: SA, St. Board of Nursing, St. Board of Cosmetology
Admission: High-school graduate or 16 years of age or older and not attending high school
TECHNOLOGIES: Horticulture, accounting, merchandising/sales, secretarial science, word processing, apparel design/manufacturing, culinary, electrical, electronic, radio & TV, medical assistant, nursing, cabinet & furniture making, graphic arts, air conditioning, heating, & refrigeration, auto body, automotive, drafting, machine tool, sheet metal, small engine mechanics, welding, commercial art & design, cosmetology

Okaloosa-Walton Junior College,
College Blvd., Niceville, FL 32578
Public. J.E. McCracken, pres
J.A. Durham, dean of instr.
Total enrollment: 3,715
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, insurance*, management & supervision, merchandising/sales, office machine operation**, real estate, retail management, secretarial science**, word processing**, architectural drafting, apparel design/manufacturing, food processing & distribution**, electronic, electronic communications*, industrial electronics, air, water, & wastewater*, emergency medical**, graphic arts, photographic*, air conditioning, heating, & refrigeration, auto body, automotive**, diesel, drafting**, industrial drafting & design, welding, child growth & care**, community service**, correctional science**, early childhood education**, fire science, police science**, social welfare & services, criminal justice**

Palm Beach Junior College,
4200 Congress Ave., Lake Worth, FL 33461
Public. John M. Schmiederer, dean, voc. ed.
Total enrollment: 10,264
Technician enrollment: 2,440
Accreditation: SA
Admission: High-school graduate
TECHNOLOGIES: Accounting, banking & finance, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, insurance, legal secretary, management & supervision, merchandising/sales, real estate, retail management, secretarial science, word processing, architectural drafting, building construction, surveying, culinary, food processing & distribution, electrical, electronic, electronic drafting, microelectronics, air, water, & wastewater, dental, dental assistant, dietetics, emergency medical, inhalation/respiratory therapy, laboratory technician, medical laboratory, mental health, nursing, occupational therapy, X-ray, engineering science, graphic arts, air conditioning, heating, & refrigeration, automotive, drafting, drafting & tool design, correctional science, early childhood education, fire science, legal/paralegal, library science, police science, air transport

Pensacola Junior College,
1000 College Blvd., Pensacola, FL 32504
Public. Horace E. Hartsell, pres.
Noojin Walker, acad. vice-pres.
Total enrollment: 11,000
Technician enrollment: 4,000
Accreditation: SA
Admission: Requirements vary—contact school
TECHNOLOGIES: Horticulture, accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, management & supervision, merchandising/sales, office machine operation, retail management, secretarial science, building construction, civil, construction, structural engineering & design, surveying, com-

mercial broadcast, electrical, electronic, industrial electronics, radio & TV, environmental, dental assistant, dietetics, emergency medical, inhalation/respiratory therapy, medical assistant, medical records, nursing, X-ray, engineering science, graphic arts, air conditioning, heating, & refrigeration, appliance service, auto body, automotive, drafting, industrial drafting & design, machine tool, mechanical, welding, child growth & care, correctional science, early childhood education, fire science, legal/paralegal, police science, broadcasting, commercial art & design, cosmetology, criminal justice

Pinellas Vocational Technical Institute,
6100 154th Ave. N., Clearwater, FL 33520
Public. Warren R. Liaux, dir.
Total enrollment: 3,500
Technician enrollment: 3,500
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate or GED, testing for students without diploma, 16 years of age or older

Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, agricultural, accounting, banking & finance, business administration, computer science, data processing & systems analysis, legal secretary, management & supervision, merchandising/sales, office machine operation, secretarial science, word processing, nursing, industrial, correctional science, police science, recreation, criminal justice

South Georgia Technical & Vocational School,
P.O. Box 1088, Americus, GA 31709
Public. Dea O. Pounders, dir.
Ellison L. Whitt, asst. dir.
Total enrollment: 905
Technician enrollment: 400
Accreditation: SA, State Ed. Dept.
TECHNOLOGY: Electronic

Southern Technical Institute,
1112 Clay St., Marietta, GA 30060
Public. Stephen R. Cheshier, pres.
Total enrollment: 3,300
Technician enrollment: 3,300
Accreditation: SA, ABET
Admission: High-school graduate or GED, SAT
TECHNOLOGIES: Computer science (2-4)*, data processing & systems analysis, management & supervision (2-4)*, architectural drafting, architectural engineering (2-4), building construction (4)*, civil (2-4)*, masonry*, structural engineering & design*, surveying (2-4)*, apparel design/manufacturing (2-4)*, computer maintenance*, electrical (2-4)*, electronic (2-4)*, electronic communications (4), microelectronics*, air, water, & wastewater*, environmental*, sanitary engineering*, industrial (2-4)*, manufacturing (4), quality control, solar*, textile (2-4)*, air conditioning, heating, & refrigeration*

Swainsboro Area Vocational-Technical School*, 201 Kite Rd., Swainsboro, GA 30401
Public. Don Speir, dir.
Total enrollment: 500
Technician enrollment: 50
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, management & supervision, secretarial science, architectural drafting, surveying (2-4), electrical, electronic, electronic communications, industrial electronics, radio & TV, medical assistant, nursing, air conditioning, heating, & refrigeration, automotive, drafting, machine tool, child growth & care, cosmetology

Thomas Area Technical School,
P.O. Box 1578, Thomasville, GA 31792
Public. Charles R. DeMott, dir.
Total enrollment: 2,951
Technician enrollment: 175
Accreditation: SA
Admission: High-school graduate preferred, 16 years of age or older
TECHNOLOGIES: Accounting*, computer science*, legal secretary*, office machine operation*, secretarial science*, word processing*, architectural drafting**, civil**, electrical**, electronic**, emergency medical*, inhalation/respiratory therapy*, nursing, X-ray, industrial**, air conditioning, heating, & refrigeration*, auto body*, auto-diesel*, diesel*, drafting & tool design*, industrial drafting & design*, machine tool*, mechanical*, small engine mechanics*, welding*, child growth & care*

Troup County Area Vocational-Technical School, Fort Drive, LaGrange, GA 30240
Public. Harold Wynn, dir.
Vern Bean, electronic tech.
Sandra Hood, X-ray
Total enrollment: 325
Technician enrollment: 40
Accreditation: SA
Admission: High-school graduate, 16 years of age or older, placement test
TECHNOLOGIES: Electronic, X-ray

Upson County Area Vocational-Technical School, P.O. Box 1089, Thomaston, GA 30286
Public. Leon Barnes, dir.
Total enrollment: 1,280
Technician enrollment: 75
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate or GED, entrance exam
TECHNOLOGIES: Highway*, electrical*, electro-mechanical, electronic*, automotive*

Valdosta Area Vocational-Technical School,
Rt. 1, Box 202, Valdosta, GA 31601
Public. Seab H. Miller, dir.
Total enrollment: 500
Technician enrollment: 220
Accreditation: SA
Admission: High-school graduate
TECHNOLOGIES: Accounting, computer science, management & supervision, secretarial science, architectural drafting, electrical, electronic communications, industrial electronics, medical laboratory, nursing, operating room assistant, X-ray, automotive, diesel, drafting, machine tool, cosmetology

Waycross Junior College,
Waycross, GA 31501
Public. James M. Dye, pres.
Mary F. Estes, dean
Total enrollment: 545
Technician enrollment: 140
Accreditation: SA
Admission: High-school graduate, SAT
TECHNOLOGIES: Forestry, secretarial science, architectural drafting, electronic, laboratory technician, nursing, child growth & care

Waycross-Ware County Area Vocational-Technical School, 1701 Carswell Ave., Waycross, GA 31501
Public. Joseph R. Miller, dir.

M. Henderson, postsecondary coord.
Total enrollment: 1,028
Technician enrollment: 80
Accreditation: SA
Admission: High-school graduate preferred, 16 years of age or older
TECHNOLOGIES: Forestry, data processing & systems analysis, electronic, medical laboratory*, operating room assistant*, X-ray

West Georgia College,
Maple St., Carrollton, GA 30118
Public. Maurice K. Townsend, pres.
Total enrollment: 6,050
Technician enrollment: 1,879
Accreditation: SA
Admission: High-school graduate or equivalent, SAT
TECHNOLOGIES: Business administration (4), computer science (2-4), secretarial science (2-4), microelectronics (4), nursing, criminal justice (2-4)

HAWAII

Brigham Young University—Hawaii Campus,
Laie, HI 96762
Private. J. Elliot Cameron, pres.
Total enrollment: 1,828
Technician enrollment: 75
Accreditation: WA
Admission: High-school graduate, ACT
TECHNOLOGIES: Agricultural, accounting (2-4), hospitality—hotel, motel, & restaurant management (2-4), management & supervision (4), secretarial science (2-4), building construction (2-4), electronic (2-4), automotive (2-4), child growth & care, commercial art & design, travel (2-4)

Electronics Institute,
1111 Bishop St., Rm. 6, Honolulu, HI 96813
Private. Theodora M. Yagi, prin.
Total enrollment: 200
Technician enrollment: 200
Admission: High-school graduate or equivalent
TECHNOLOGIES: Computer maintenance, electrical, electro-mechanical, electronic, electronic communications, electronic drafting, industrial electronics, microelectronics, radio & TV

Hawaii Community College, University of Hawaii at Hilo, 1175 Manono St.,
Hilo, HI 96720
Public. Mitsugu Sumada, provost
Total enrollment: 1,865
Technician enrollment: 1,016
Accreditation: WA
Admission: Open-door policy
TECHNOLOGIES: Agricultural, accounting, data processing & systems analysis, merchandising/sales, secretarial science, architectural drafting, apparel design/manufacturing, electrical, electronic, nursing, auto body, automotive, diesel, sheet metal, welding, fire science, criminal justice

Hawaii School of Business,
111 N. King St., Honolulu, HI 96817
Private. Glenn B. Hinchey, dir.
Total enrollment: 400
Accreditation: AICS
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, business administration, computer science*, hospitality—hotel, motel, & restaurant management, legal secretary*, office machine operation, secretarial science, word processing*, court reporting, air transport

Honolulu Community College,
874 Dillingham Blvd., Honolulu, HI 96817
Public. C. Yoshioka, provost
P.R. Kissinger, dean of instr.
Total enrollment: 5,325
Technician enrollment: 3,677
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Secretarial science**, architectural drafting, building construction, apparel design/manufacturing, food processing & distribution, electrical, electronic**, electronic communications, engineering science**, industrial**, occupational safety**, plastics, air conditioning, heating, & refrigeration, auto body, automotive**, aviation/aviation maintenance, heavy equipment operation/service, machine tool, sheet metal, welding, community service**, early childhood education**, fire science**, police science**, commercial art & design**, cosmetology**, marine

Kauai Community College,
3-1901 Kaumualii Hwy., Lihue, HI 96766
Public. David Iha, provost
David Kawate, dean of instr.
Bob Tsuda, div. chm.
Total enrollment: 1,013
Technician enrollment: 344
Admission: High-school graduate and/or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, merchandising/sales, office machine operation, secretarial science, building construction, construction, electrical, nursing, auto body, automotive, welding, fire science, police science

Leeward Community College,
96-045 Ala Ike, Pearl City, HI 96782
Public. Melvyn K. Sakaguchi, provost
John Morton, dean of instr.
Total enrollment: 6,195
Technician enrollment: 2,283
Accreditation: WA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, computer science, management & supervision, secretarial science, architectural drafting, culinary, graphic arts, automotive, recreation, social welfare & services, marine (4)

Maui Community College,
310 Kaahumanu Ave., Kahului, HI 96732
Public. Alma K. Cooper, provost
Clyde Sakamoto, dean of instr.
Total enrollment: 2,300
Technician enrollment: 695
Accreditation: WA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Agricultural, horticulture, accounting, hospitality—hotel, motel, & restaurant management, merchandising/sales, secretarial science, building construction, apparel design/manufacturing, culinary, nursing, auto body, automotive, welding, child growth & care, police science, social welfare & services

IDAHO

Boise State University*,
1910 University Dr., Boise, ID 83725
Public. John H. Keiser, pres.
D.V. Healas, dean, vo-tech ed.
Total enrollment: 11,000
Technician enrollment: 759
Accreditation: NWA
Admission: Interview and evaluation
TECHNOLOGIES: Agricultural, horticulture, advertising/marketing, merchandising/sales, office machine operation*, food processing & distribution, electrical, electro-mechanical, electronic, industrial electronics, air, water, & wastewater, dental assistant, nursing, operating room assistant, air conditioning, heating, & refrigeration, auto body, automotive, diesel, drafting, heavy equipment operation/service, machine tool, mechanical, small engine mechanics, welding, child growth & care

College of Southern Idaho,
1300 Kimberly Rd., Twin Falls, ID 83301
Public. Orval L. Bradley, dean
Total enrollment: 1,500
Technician enrollment: 500
Accreditation: NWA
Admission: High-school graduate or GED, GATB
TECHNOLOGIES: Agri-business**, agricultural**, soils**, accounting*, advertising/marketing**, business administration**, management & supervision, personnel**, secretarial science**, architectural drafting**, civil**, surveying*, food processing & distribution**, electrical**, electronic communications**, radio & TV**, health*, nursing**, appliance service**, auto body**, auto-diesel**, automotive**, drafting**, hydraulic**, mechanical & production, welding**, fire science*, library science (4), police science**, public service**, commercial art & design*

Eastern Idaho Vocational-Technical School,
2299 E. 17th St., Idaho Falls, ID 83401
Public. John Christofferson, dir.
Total enrollment: 2,500
Technician enrollment: 544
Accreditation: NWA
Admission: High-school graduate, GATB, 16 years of age or older
TECHNOLOGIES: Agri-business, agri-mechanics*, merchandising/sales*, secretarial science*, computer maintenance, electronic*, radio & TV, dental, dental assistant*, nursing, radiation, industrial*, automotive*, welding

Idaho State University, School of Vocational-Technical Education, Pocatello, ID 83209
Public. Robert Crabtree, dean
Ernest Dahlquist, tech. ed. coord.
Total enrollment: 9,234

Technician enrollment: 1,717
Accreditation: NWA
Admission: High-school graduate and/or GATB or ASVAB
TECHNOLOGIES: Data processing & systems analysis, legal secretary, merchandising/sales, secretarial science, civil, surveying, culinary, upholstery, computer maintenance, electrical, electro-mechanical, electro-mechanical drafting, electronic communications, industrial electronics, laser, nursing, graphic arts, instrumentation, auto body, automotive, aviation/aviation maintenance, diesel, industrial drafting & design, mechanical, office machine repair, welding, police science, cosmetology

INEL/University of Idaho Education Program*,
P.O. Box 778, Idaho Falls, ID 83401
Public. Fred Tingey, dir.
Total enrollment: 900
Technician enrollment: 200
Accreditation: NWA
TECHNOLOGIES: Computer science, electronic, industrial, occupational safety, quality control, mechanical

North Idaho College,
1000 W. Garden Ave.,
Coeur d'Alene, ID 83814
Public. Barry Schuler, pres.
Clarence Haught, dir.
Total enrollment: 2,020
Technician enrollment: 500
Accreditation: NWA
Admission: High-school graduate or GED, 18 years of age or older
TECHNOLOGIES: Forestry, accounting*, banking & finance, data processing & systems analysis**, management & supervision*, merchandising/sales**, office machine operation*, personnel*, secretarial science**, architectural drafting, building construction*, civil*, highway*, surveying, food processing & distribution*, electro-mechanical drafting**, electronic, electronic drafting*, industrial electronics, radio & TV, emergency medical*, medical laboratory, nursing**, photographic*, auto body, auto-diesel, automotive, diesel, drafting, fluid power*, hydraulic*, industrial drafting & design, small engine mechanics, welding, child growth & care**, early childhood education*, fire science*, police science**, recreation*, social welfare & services, journalism, special education*, technical writing*

Northwest Nazarene College,
Nampa, ID 83651
Private. A. Gordon Wetmore, pres.
Total enrollment: 1,258
Accreditation: NWA
Admission: High-school graduate
TECHNOLOGIES: Accounting (4), business administration (2-4), secretarial science, electronic, recreation (4), social welfare & services (4), broadcasting, special education (4)

Ricks College,
Rexburg, ID 83440
Private. Bruce Hafen, pres.
Donald C. Bird, chm., ind. science
Total enrollment: 6,539
Technician enrollment: 1,178
Accreditation: NWA, ABET
Admission: Requirements vary—contact school
TECHNOLOGIES: Agri-business, agricultural, horticulture, accounting, computer science, data processing & systems analysis, secretarial science, architectural drafting, building construction**, apparel design/manufacturing, interior design, electronic, nursing, manufacturing, automotive, drafting, welding**, child growth & care, police science

ILLINOIS

Aero-Space Institute,
57 West Grand Ave., Chicago, IL 60611
Private. Alfred F. Stott, dir.
Total enrollment: 108
Technician enrollment: 108
Accreditation: State Ed. Dept.
Admission: High-school graduate
TECHNOLOGIES: Business administration (2-4), aeronautical (2-4)

Allied Institute of Technology,
5150 W. Roosevelt Rd., Chicago, IL 60650
Private. William N. Wildish, dir.
Stephen C. Liss, dir. of ed.
Total enrollment: 400
Technician enrollment: 400
Accreditation: NATTS
Admission: High-school graduate
TECHNOLOGIES: Automotive, drafting & tool design

Aurora College*,
347 S. Gladstone, Aurora, IL 60507
Private. Alan J. Stone, pres.
Charles Coughlin, dir. of adm.
Total enrollment: 1,250
Technician enrollment: 591
Accreditation: NCA
Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Accounting (4), business administration (4), data processing & systems analysis (4), nursing (4), social welfare & services (4), criminal justice (4)

Belleville Area College,
2500 Carlyle Rd., Belleville, IL 62221
Public. Bruce Wissore, pres.
Robert Eskridge, dean, career ed.
Total enrollment: 11,848
Technician enrollment: 4,200
Accreditation: NCA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business**, horticulture**, accounting**, advertising/marketing**, computer science**, data processing & systems analysis, management & supervision**, real estate**, retail management**, secretarial science**, construction**, aviation electronics, electronic, industrial electronics, emergency medical**, inhalation/respiratory therapy, laboratory technician, medical assistant, medical laboratory, medical records, nursing, operating room assistant, physical therapy, X-ray, air conditioning, heating, & refrigeration, aviation/aviation maintenance, drafting, industrial drafting & design, welding, fire science, police science, cosmetology, criminal justice

Black Hawk College,
6600 34 Ave., Moline, IL 61265
Public. Dewayne L. Frey, dean, career prog.
Total enrollment: 5,285
Technician enrollment: 500
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, agricultural, animal science, accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, management & supervision, merchandising/sales, office machine operation, real estate, retail management, secretarial science, surveying, apparel design/manufacturing, interior design, electrical, electronic, industrial electronics, radio & TV, dental assistant, emergency medical, inhalation/respiratory therapy, medical records, mental health, nursing, X-ray, air conditioning, heating, & refrigeration, auto body, auto-diesel, automotive, diesel, drafting, drafting & tool design, fluid power, hydraulic, machine tool, mechanical, small engine mechanics, welding, child growth & care, fire science, police science, broadcasting, cosmetology, criminal justice, technical writing

Black Hawk College—East Campus,
P.O. Box 489, Kewanee, IL 61443
Public. Ronald F. Williams, pres.
Total enrollment: 866
Technician enrollment: 530
Accreditation: NCA
Admission: Open-door policy

Total enrollment: 14,000
Technician enrollment: 7,000
Accreditation: NCA, ICCB, Ill. Board of Higher Ed.
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business**, agricultural**, horticulture**, accounting**, advertising/marketing**, business administration**, data processing & systems analysis**, insurance**, management & supervision**, merchandising/sales**, office machine operation**, personnel**, real estate**, retail management**, secretarial science**, architectural drafting, building constuction**, construction*, apparel design/manufacturing**, culinary**, food processing & distribution, interior design**, computer maintenance, electrical, electro-mechanical, electronic, industrial electronics, air, water, & wastewater*, environmental**, dental, dental assistant, medical records**, nursing, X-ray, occupational safety**, automotive, drafting, drafting & tool design, industrial drafting & design, machine tool, mechanical & production, welding, community service**, correctional science, fire science**, library science, police science**, public service**, social welfare & services, criminal justice**, special education, transportation**

Kaskaskia College, Community College District #501*, Shattuc Rd.,
Centralia, IL 62801
Public. Paul Blowers, pres.
Bruce Stahl, dean
Paul Hillis, voc. dean
Total enrollment: 2,800
Technician enrollment: 1,000
Accreditation: NCA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, agricultural, accounting, business administration, data processing & systems analysis, management & supervision, secretarial science, electronic, dental assistant, nursing, operating room assistant, radiation, engineering science, air conditioning, heating, & refrigeration, auto body, automotive, drafting, mechanical & production, welding, child growth & care, police science, cosmetology

Kennedy-King College,
6800 S. Wentworth, Chicago, IL 60621
Public. Ewen M. Akin, pres.
Randall Johnson, dean, faculty & instr.
Total enrollment: 8,750
Technician enrollment: 3,700
Accreditation: NCA
Admission: High-school graduate
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, management & supervision, secretarial science, architectural drafting, building construction, food processing & distribution, commercial broadcast, radio & TV, nursing, engineering science, graphic arts, industrial, lithographic, photographic, air conditioning, heating, & refrigeration, autodiesel, automotive, combustion power, drafting, fluid power, hydraulic, internal combustion, welding, library science, recreation, commercial art & design

Kishwaukee College,
Malta, IL 60150
Public. Don P. Higgs, dean of instr.
TECHNOLOGIES: Agri-business, agricultural, agri-mechanics, horticulture, accounting, advertising/marketing, data processing & systems analysis, management & supervision, real estate, secretarial science, word processing, architectural drafting, electro-mechanical, electronic, industrial electronics, air, water, & wastewater, emergency medical*, nursing, X-ray, industrial, technical & industrial illustration, auto body, automotive, diesel, industrial drafting & design, machine tool, mechanical & production, welding, child growth & care,

early childhood education, fire science, police science, teacher assistant, criminal justice, technical writing

Lake Land College,
South Rte. 45, Mattoon, IL 61938
Public. Robert Webb, pres.
Charles W. Cole, dean
Total enrollment: 1,750
Technician enrollment: 845
Accreditation: NCA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Agri-business, agricultural**, accounting**, data processing & systems analysis, management & supervision**, office machine operation*, real estate, secretarial science**, architectural drafting, civil, commercial broadcast, electrical, electronic**, electronic communications, dental, dental assistant, dietetics, nursing, industrial, automotive**, drafting**, machine tool, welding, child growth & care**, fire science, police science, cosmetology

Lewis & Clark Community College,
Godfrey, IL 62035
Public. Wilbur R.L. Trimpe, pres.
C.E. VanHoy, dean of instr.
Total enrollment: 6,000
Technician enrollment: 3,200
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, agricultural, accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, management & supervision, real estate, secretarial science, word processing, electro-mechanical, radio & TV, air, water, & wastewater, dental assistant, medical laboratory, nursing, auto body, auto-diesel, automotive, diesel, drafting, welding, child growth & care, court reporting, fire science, library science, broadcasting, cosmetology, criminal justice

Lewis University,
Route 53, Romeoville, IL 60441
Private. Br. David Delahanty, pres.
N.J. Bonacci, aviation dept.
Total enrollment: 2,800
Technician enrollment: 200
Accreditation: NCA, FAA
Admission: High-school graduate or GED (veterans only)
TECHNOLOGY: Aviation/aviation maintenance (2-4)*

Lincoln Land Community College,
Shepherd Rd., Springfield, IL 62708
Public. Robert L. Poorman, pres.
Total enrollment: 6,467
Technician enrollment: 2,264
Accreditation: NCA
TECHNOLOGIES: Agri-business, agricultural, horticulture, accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, insurance, management & supervision, office machine operation, real estate, retail management, secretarial science, architectural drafting, civil, construction, highway, surveying, electronic, environmental, natural resources management & conservation, dental assistant, inhalation/respiratory therapy, medical records, nursing, radiation, X-ray, engineering science, air conditioning, heating, & refrigeration, automotive, heavy equipment operation/service, child growth & care, correctional science, fire science, legal/paralegal, police science, social welfare & services, criminal justice, special education, transportation

Lincoln Trail College,
R.R. #3, Robinson, IL 62454
Public. Richard Sanders, pres.
Total enrollment: 2,000
Technician enrollment: 800
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Banking & finance, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, office machine operation, secretarial science, architectural drafting, building construction, construction, culinary, air, water, & wastewater, natural resources management & conservation, nursing, air conditioning, heating, & refrigeration, drafting, machine tool, cosmetology

The Loop College,
30 E. Lake St., Chicago, IL 60601
Public. Salvatore Rotella, vice-chancellor
Sheppard Kaminars, dean of instr.
Total enrollment: 7,609
Technician enrollment: 4,013
Accreditation: NCA
Admission: High-school graduate or GED, 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, merchandising/sales, secretarial science, word processing, architectural drafting, mental health, correctional science, early childhood education, police science, public service, social welfare & services, commercial art & design, travel

MacCormac Junior College,
327 South LaSalle St., Chicago, IL 60604
Private. Gordon C. Borchardt, pres.
Total enrollment: 716
Technician enrollment: 716
Accreditation: NCA
Admission: High-school graduate or GED, ACT
TECHNOLOGIES: Accounting, business administration, secretarial science, interior design, court reporting, legal/paralegal, commercial art & design, travel

McHenry County College,
Crystal Lake, IL 60014
Public. Robert C. Bartlett, pres.
Richard Fuhler, dean, instr.
Total enrollment: 4,400
Technician enrollment: 1,200
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, agricultural, horticulture, accounting, advertising/marketing, banking & finance, data processing & systems analysis, management & supervision, office machine operation, secretarial science, electronic, emergency medical, industrial, automotive, drafting, child growth & care, criminal justice

Midstate College,
244 S.W. Jefferson, Peoria, IL 61602
Private. Rita M. Bullock, dean
Total enrollment: 400
Technician enrollment: 400
Accreditation: NCA, AICS
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, computer science, legal secretary, merchandising/sales, office machine operation*, real estate*, secretarial science, word processing*, medical assistant, court reporting, legal/paralegal, travel

Millikin University,
Decatur, IL 62522
Private. J. Roger Miller, pres.
R.A. Mannweiler, dean, Tabor School of Business and Engineering
Total enrollment: 1,534
Technician enrollment: 645
Accreditation: NCA
Admission: High-school graduate, ACT or SAT
TECHNOLOGIES: Accounting (4), advertising/marketing (4), banking & finance (4), business administration (4), computer science (4), data processing & systems analysis (4), management & supervision (4)*, personnel (4), medical (4), physical therapy (4), engineering science (4), industrial (4), welding (4)

Moraine Valley Community College,
10900 S. 88th Ave., Palos Hills, IL 60465
Public. Fred Gaskin, pres.
Byron E. Kee, vice-pres., instr.
Total enrollment: 16,000

Oakton Community College,
1600 East Golf Rd., Des Plaines, IL 60016
Public. William A. Koehnline, pres.
Kathleen Arns, asst. vice-pres.
Total enrollment: 9,655
Technician enrollment: 3,620
Accreditation: NCA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, insurance, management & supervision, office machine operation, real estate, secretarial science, word processing, architectural drafting, architectural engineering, electronic, biomedical, laboratory technician, medical laboratory, medical records, nursing, physical therapy, radiation, X-ray, air conditioning, heating, & refrigeration, automotive, machine tool, child growth & care, fire science, public service, journalism, technical writing, transportation

Olive-Harvey College,
10001 S. Woodlawn Ave., Chicago, IL 60628
Public. Homer D. Franklin, pres.
Tommy Sheats, dean of instr.
Total enrollment: 4,187
Technician enrollment: 2,583
Accreditation: NCA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, business administration, data processing & systems analysis, secretarial science, architectural drafting, civil, highway*, structural engineering & design*, surveying*, electro-mechanical, industrial electronics*, environmental, nursing, chemical, engineering science, instrumentation, drafting, mechanical

Olivet Nazarene College,
Kankakee, IL 60901
Private. Leslie Parrott, pres.
Willis E. Snowbarger, dean
Total enrollment: 2,140
Technician enrollment: 350
Accreditation: NCA, NCATE, NLN
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (4), business administration (4), computer science (2-4), secretarial science, food processing & distribution, dietetics (4), medical (4), nursing (4), engineering science (2-4), social welfare & services (2-4), teacher assistant, broadcasting (4), criminal justice (4), journalism (4)

Parkland College,
2400 W. Bradley Ave., Champaign, IL 61820
Public. William M. Staerkel, pres.
C.H. Matz, asst. dean, career ed.
Total enrollment: 9,300
Technician enrollment: 4,383
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, agricultural, animal science, accounting, advertising/marketing, banking & finance, data processing & systems analysis, insurance, merchandising/sales, office machine operation, real estate, retail management, word processing, architectural drafting, building construction, food processing & distribution, electro-mechanical drafting, electronic, dental, dental assistant, inhalation/respiratory therapy, nursing, pharmacy assistant, radiation, engineering science, graphic arts, automotive, diesel, machine tool, mechanical, small engine mechanics, child growth & care, fire science, recreation, broadcasting, cosmetology, criminal justice, journalism, special education, transportation

Parks College of St. Louis University,
Cahokia, IL 62206
Private. Paul A. Whelan, vice-pres.
K. Stanger, chm., aircraft/eng.
Total enrollment: 1,051
Technician enrollment: 559
Accreditation: NCA
TECHNOLOGIES: Business administration (4), hospitality—hotel, motel, & restaurant management (4), management & supervision, aeronautical (4), aviation/aviation maintenance

Prairie State College*,
202 S. Halstead, Chicago Heights, IL 60411
Public. Richard C. Creal, pres.
N.A. Petersanti, dir., career ed.
Total enrollment: 6,136
Technician enrollment: 2,920
Accreditation: NCA
Admission: Open-door policy, ACT
TECHNOLOGIES: Data processing & systems analysis, management & supervision, secretarial science, architectural drafting, electronic, industrial electronics, air, water, & wastewater, sanitary engineering, industrial, air conditioning, heating, & refrigeration, automotive, aviation/aviation maintenance, drafting & tool design, hydraulic, machine tool, mechanical, sheet metal, welding, fire science, police science, transportation

Proviso Township High Schools,
807 S. First Ave., Maywood, IL 60153
Public. Thomas Millikin, prin., East
Robert Milano, prin., West
Dan Heintz, dir., vo-tech ed.
Total enrollment: 5,600
Technician enrollment: 2,400
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting, computer science**, data processing & systems analysis**, secretarial science, word processing, apparel design/manufacturing, upholstery, electrical, radio & TV, lithographic, automotive, drafting, drafting & tool design (4), hydraulic (4), machine tool (4), welding

Rend Lake College*,
R.R. #1, Ina, IL 62846
Private. Harry J. Braun, pres.
C. Turner, dean, vo-tech. ed.
Total enrollment: 3,815
Technician enrollment: 1,900
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agricultural, accounting, advertising/marketing, management & supervision, secretarial science, architectural drafting, architectural engineering, construction, surveying, interior design, natural resources management & conservation, nursing, automotive, welding, police science, cosmetology

Robert Morris College (2 Campuses),

Rosary College*,
7900 W. Division St., River Forest, IL 60305
Private. Sr. Jean Murray, pres.
Norman Carroll, dean
Total enrollment: 1,590
Accreditation: NCA, ALA
Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Accounting (4), business administration (4), apparel design/manufacturing (4), food processing & distribution (4), dietetics (4)

Southeastern Illinois College,
Route 4, Harrisburg, IL 62946
Public. Robert I. Gregg, dean
Total enrollment: 3,000
Technician enrollment: 1,000
Accreditation: NCA
Admission: High-school graduate or ability to profit from instruction
TECHNOLOGIES: Agri-mechanics**, forestry, horticulture**, accounting, banking & finance*, computer science**, legal secretary, real estate*, secretarial science, architectural drafting**, building construction, surveying**, electronic**, industrial electronics**, air, water, & wastewater, emergency medical*, nursing**, auto body**, automotive**, diesel*, welding**, child growth & care, correctional science**, fire science*, police science**, cosmetology*

Southern Illinois University at Carbondale,
Carbondale, IL 62901
Public. Harry G. Miller, dean
Total enrollment: 3,500
Technician enrollment: 2,200
Accreditation: NCA, ADA, APTA, AIA, FAA, Amer. Board of Funeral Service Ed.
Admission: High-school graduate or GED, SAT or ACT
TECHNOLOGIES: Data processing & systems analysis, office machine operation, secretarial science, architectural drafting, architectural engineering, building construction, computer maintenance*, electronic, industrial electronics*, microelectronics*, biomedical, dental, health, inhalation/respiratory therapy, medical assistant, medical laboratory, nursing, physical therapy, radiation, graphic arts, numerical control, automotive, aviation/aviation maintenance, industrial drafting & design, mechanical & production, correctional science, court reporting, police science, commercial art & design, journalism, mortuary science

State Community College,
601 Brady Ave., East St. Louis, IL 62201
Public. S.K. Sabharwal, dean of instr.
Roger Conner, dir., vo-tech prog.
Total enrollment: 1,800
Technician enrollment: 850
Accreditation: NCA
Admission: High-school graduate
TECHNOLOGIES: Agricultural*, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, merchandising/sales, office machine operation, retail management*, secretarial science, word processing*, architectural drafting*, architectural engineering*, building construction, masonry, structural engineering & design, food processing & distribution, upholstery*, electronic, electronic communications, radio & TV, air, water, & wastewater, sanitary engineering, dietetics, emergency medical, nursing, energy, graphic arts, photographic, auto body, auto-diesel, automotive, drafting, sheet metal, small engine mechanics, welding, child growth & care, community service, early childhood education, fire science, library science*, police science, teacher assistant, criminal justice, special education

Thornton Community College,
15800 S. State St., South Holland, IL 60473
Public. N.G. Rooney, dean, career ed.
Total enrollment: 11,000
Technician enrollment: 4,600
Accreditation: NCA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, insurance, management & supervision, office machine operation, real estate, retail management, secretarial science, word processing, architectural engineering, building construction, surveying, electronic, natural resources management & conservation, biomedical, mental health, nursing, occupational therapy, X-ray, chemical, graphic arts, metallurgical, solar, aviation/aviation maintenance, drafting, machine tool, mechanical, welding, child growth & care, fire science, public service, social welfare & services, teacher assistant, commercial art & design, criminal justice, special education

Trinity Christian College,
6601 W. College Dr., Palos Heights, IL 60463
Private. Girard Van Groningen, pres.
Jack Brothers, dept. hd., business
Gary Van Dyk, dept. hd., medical
Total enrollment: 440
Technician enrollment: 240
Accreditation: NCA
Admission: High-school graduate with C average or better, ACT or SAT
TECHNOLOGIES: Accounting (4), advertising/marketing (4), business administration (4), computer science (4), dental (4), laboratory technician (4), medical (4), nursing (4), physical therapy (4), psychiatric (4)

Triton College,
2000 Fifth Ave., River Grove, IL 60171
Public. Daniel Moriarty, acting pres.
V. Magnesen, dean, career ed.
Total enrollment: 27,198
Technician enrollment: 12,500
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Horticulture, accounting**, advertising/marketing**, business administration, data processing & systems analysis**, hospitality—hotel, motel, & restaurant management, management & supervision**, office machine operation, real estate**, secretarial science**, word processing, architectural engineering**, building construction, construction, electronic, industrial electronics, laser, robotics, dental, dental assistant, inhalation/respiratory therapy, laboratory technician, medical assistant, medical laboratory, nuclear medicine, nursing, operating room assistant, X-ray, engineering science, lithographic, metallurgical, air conditioning, heating, & refrigeration, automotive, diesel, drafting & tool design, industrial drafting & design, machine tool, mechanical, welding, child growth & care, court reporting, fire science**, police science**, recreation, commercial art & design, transportation

Truman College, City Colleges of Chicago,
1145 W. Wilson, Chicago, IL 60640
Public. W.B. Appelson, pres.
J.W. Gianopulos, vice-pres., career prog.
Total enrollment: 6,400
Technician enrollment: 2,000
Accreditation: NCA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, merchandising/sales, office machine operation, secretarial science, word processing, architectural drafting, architectural engineering, medical, medical records, nursing, chemical, engineering science, drafting, industrial drafting & design, child growth & care, correctional science, police science, recreation, journalism

University of Health Sciences, The Chicago Medical School, School of Related Health Sciences, V.A. Medical Center, Bldg. 51,
North Chicago, IL 60064
Private. Cynthia Adams, dean & chm., med. tech.
Total enrollment: 30
Accreditation: CAHEA/AMA
TECHNOLOGIES: Biomedical (4), laboratory technician (4), medical laboratory (4), instrumentation (4), quality control (4)

University of Illinois, Institute of Aviation,
Willard Airport, Savoy, IL 61874
Public. Henry L. Taylor, dir.

David L. DePue, hd., maint. trng.

Accreditation: NCA
Admission: High-school graduate
TECHNOLOGIES: Soils (4), hospitality—hotel, motel, & restaurant management (4), air, water, & wastewater (4), environmental (4), natural resources management & conservation (4), sanitary engineering (4), biomedical (4), health (4), laboratory technician (4), medical laboratory (4), nursing (4), physical therapy (4), police science (4), recreation (4), social welfare & services (4), criminal justice (4), urban engineering/planning (4)

Henry Ford Community College,
5101 Evergreen, Dearborn, MI 48128
Public. Stuart M. Bundy, pres.
John Nagohosian, ind. tech.

Total enrollment: 16,413
Accreditation: NCA, Mich. Commission on College Accreditation
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, business administration, computer science, hospitality—hotel, motel, & restaurant management, management & supervision, secretarial science, word processing, architectural drafting, architectural engineering, building construction, interior design, electrical, inhalation/respiratory therapy, laboratory technician, medical assistant, medical records, nursing, energy, metallurgical, numerical control, occupational safety, aeronautical, air conditioning, heating, & refrigeration, auto-diesel, automotive, diesel, drafting, fluid power, heavy equipment operation/service, hydraulic, machine tool, sheet metal, small engine mechanics, welding, legal/paralegal, library science, commercial art & design, criminal justice, journalism, transportation

Highland Park Community College,
Third at Glendale,
Highland Park, MI 48203
Public. Chrystine Shack, pres.
Eugene Simms, dean, occ. ed.
Total enrollment: 2,700
Technician enrollment : 1,600
Accreditation: NCA
Admission: High-school graduate or GED or 18 years of age or older
TECHNOLOGIES: Computer science, management & supervision, secretarial science, word processing, electronic, dental, inhalation/respiratory therapy, medical, medical assistant, medical laboratory, medical records, nursing, operating room assistant, engineering science, industrial, automotive, industrial drafting & design, welding

ITT Technical Institute,
3013 Eastern Ave., Grand Rapids, MI 49508
Private. Leland F. Drennan, sch. dir.
Total enrollment: 500
Technician enrollment: 500
Accreditation: NATTS
Admission: High-school graduate
TECHNOLOGY: Electronic

Jackson Community College*,
2111 Emmons Rd., Jackson, MI 49201
Public. Clyde LeTarte, pres.
W. Ollila, dean, occ. ed.
Total enrollment: 15,000
Technician enrollment: 600
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting, data processing & systems analysis, management & supervision, secretarial science, electro-mechanical, electronic, emergency medical*, nursing**, X-ray, industrial, automotive, drafting, drafting & tool design, machine tool, mechanical, welding, police science, criminal justice

Kalamazoo Valley Community College,
6767 W. "O" Ave., Kalamazoo, MI 49009
Public. Marilyn J. Schlack, pres.
M.B. Lee, dean of instr.
Total enrollment: 8,130
Technician enrollment: 4,185
Accreditation: NCA
Admission: High-school graduate or beyond high-school age
TECHNOLOGIES: Accounting, business administration, data processing & systems analysis, office machine operation, secretarial science, word processing, building construction, electrical, electronic, dental, emergency medical, inhalation/respiratory therapy, nursing, air conditioning, heating, & refrigeration, automotive, drafting, drafting & tool design, industrial drafting & design, machine tool, welding, community service, fire science, police science, recreation

Kellogg Community College*,
450 North Ave., Battle Creek, MI 49016
Public. Richard F. Whitmore, pres.
R.D. Steely, dean, occ. prog.
Total enrollment: 7,391
Technician enrollment: 3,000
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, business administration, data processing & systems analysis, management & supervision, office machine operation, secretarial science, electronic, radio & TV, dental, dental assistant, medical laboratory, nursing, physical therapy, X-ray, industrial, automotive, industrial drafting & design, mechanical, mechanical & production, fire science, legal/paralegal, social welfare & services, criminal justice, transportation

Kirtland Community College,
Rte. 4, Box 59A, Roscommon, MI 48653
Public. Raymond Homer, chief exec. officer
R. Silverman, dean of instr.
Total enrollment: 2,000
Technician enrollment: 1,200
Accreditation: NCA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Forestry, accounting, banking & finance, business administration, management & supervision, secretarial science, civil, surveying, electrical, electro-mechanical drafting, electronic, industrial electronics, air, water, & wastewater, natural resources management & conservation, medical records, nursing, technical & industrial illustration, automotive, aviation/aviation maintenance, drafting, drafting & tool design, machine tool, mechanical, welding, police science, commercial art & design, cosmetology

Lake Michigan College,
2755 East Napier, Benton Harbor, MI 49022
Public. Walter F. Browe, pres.
Bruce Blanding, dean, occ. studies
Total enrollment: 3,750
Technician enrollment: 1,758
Accreditation: NCA
Admission: High-school graduate
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, management & supervision, office machine operation, secretarial science, electro-mechanical, electronic, dental assistant, medical assistant, medical laboratory, nursing, X-ray, metallurgical, drafting, industrial drafting & design

Lake Superior State College,
Sault Ste. Marie, MI 49783
Public. Kenneth F. Light, pres.
Total enrollment: 2,494
Technician enrollment: 1,032
Accreditation: NCA, ABET, NLN
Admission: High-school graduate
TECHNOLOGIES: Accounting, business administration, computer science, secretarial science, building construction, electronic (2-4), air, water, & wastewater, natural resources management & conservation, medical (4), mental health, nursing (4), drafting**, mechanical**, criminal justice (2-4)

Lansing Community College*,
419 N. Capitol Ave., Lansing, MI 48901
Public. Philip J. Gannon, pres.
W.R. Monroe, dean, applied arts & sci.

Accreditation: NCA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Horticulture, accounting**, advertising/marketing**, banking & finance, business administration**, data processing & systems analysis**, insurance, management & supervision**, office machine operation*, real estate, secretarial science**, statistical*, architectural drafting**, architectural engineering, building construction, civil, construction, highway, masonry*, structural engineering & design, surveying, food processing & distribution**, interior design*, computer maintenance**, electrical*, electro-mechanical, electronic**, electronic communications*, electronic drafting*, industrial electronics**, radio & TV**, natural resources management & conservation, sanitary engineering, biomedical, dental**, dental assistant**, inhalation/respiratory therapy**, medical, nursing**, operating room assistant, X-ray**, engineering science*, graphic arts, industrial, instrumentation*, metallurgical*, numerical control, occupational safety, quality control, technical & industrial illustration*, air conditioning, heating, & refrigeration*, auto-diesel, automotive*, aviation/aviation maintenance, diesel*, drafting, drafting & tool design*, fluid power*, heavy equipment operation/service, hydraulic*, industrial drafting & design*, machine tool*, mechanical, mechanical & production*, sheet metal*, small engine mechanics**, welding*, correctional science, court reporting, fire science, legal/paralegal, library science**, police science**, air transport, commercial art & design**, criminal justice, transportation**

Lawrence Institute of Technology*,
21000 West Ten Mile Rd.,
Southfield, MI 48075
Private. Richard E. Marburger, pres.
R.E. Michel, dean, assoc. studies
Total enrollment: 5,260
Technician enrollment: 731
Accreditation: NCA, ABET
Admission: High-school graduate
TECHNOLOGIES: Data processing & systems analysis, architectural engineering, construction, electrical, chemical, industrial, mechanical

Macomb Community College,
P.O. Box 309, Warren, MI 48090
Public. Albert L. Lorenzo, pres.
L.R. Robertson, vice-pres. of instr.
Total enrollment: 28,429

Technician enrollment: 13,500
Accreditation: NCA
Admission: High-schoool graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, data processing & systems analysis, management & supervision, office machine operation, real estate, secretarial science, architectural drafting, building construction, civil, surveying, food processing & distribution, electrical, electro-mechanical, electronic, air, water, & wastewater, dental assistant, emergency medical, health, inhalation/respiratory therapy, medical assistant, nursing, engineering science, graphic arts, industrial, lithographic, metallurgical, plastics, aeronautical, air conditioning, heating, & refrigeration, auto body, automotive, drafting, drafting & tool design, fluid power, hydraulic, machine tool, mechanical, welding, fire science, legal/paralegal, library science, police science, recreation, criminal justice

Madonna College,
36600 Schoolcraft Ave., Livonia, MI 48150
Private. Sr. Mary Francilene, pres.
Sr. Rose Marie, acad. dean
Total enrollment: 3,580
Accreditation: NCA, NCATE, NLN, CSWE
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (2-4), advertising/marketing (2-4), banking & finance (2-4), business administration (2-4), computer science (2-4), data processing & systems analysis (2-4), management & supervision (2-4), apparel design/manufacturing (2-4), culinary (2-4), dietetics (4), emergency medical (2-4), laboratory technician (4), medical laboratory (4), operating room assistant, X-ray (4), occupational safety (2-4), child growth & care (2-4), correctional science (4), early childhood education (4), fire science (2-4), legal/paralegal (2-4), social welfare & services (4), commercial art & design (2-4), criminal justice (2-4), special education (4)

Mercy College,
8200 W. Outer Dr., Detroit, MI 48219
Private. Jeanne Umholtz, dir. of adm.
Total enrollment: 2,200
Admission: High-school graduate, ACT or SAT
TECHNOLOGIES: Accounting (4), business administration (4), computer science (2-4), apparel design/manufacturing (4), food processing & distribution (4), dietetics (2-4), inhalation/respiratory therapy (2-4), medical laboratory (2-4), medical records (2-4), nursing (4), correctional science (2-4), early childhood education (2-4), legal/paralegal (2-4), social welfare & services (2-4), criminal justice (2-4)

Michigan Career Institute,
14520 Gratiot, Detroit, MI 48205
Private. William C. Carson, pres.
Frank Banar, dir.
Total enrollment: 500
Technician enrollment: 500
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Automotive, diesel

Michigan Christian Junior College,
800 W. Avon Rd., Rochester, MI 48063
Private. Milton B. Fletcher, pres.
L.L. Jurney, acad. dean
Total enrollment: 353
Accreditation: NCA
Admission: High-school graduate, ACT
TECHNOLOGIES: Accounting, business administration, computer science, legal secretary, secretarial science, word processing

Michigan State University,
Institute of Agricultural Technology,
120 Agriculture Hall, East Lansing, MI 48824
Public. Clifford O. Jump, dir.
Total enrollment: 41,000
Technician enrollment: 600
Accreditation: NCA
Admission: High-school graduate or 2 years work experience and recommendation of employer
TECHNOLOGIES: Agri-business, agricultural, animal science, horticulture, soils, food processing & distribution, electrical, chemical, heavy equipment operation/service

Michigan Technological University,
Houghton, MI 49931
Public. D.F. Stein, pres.
Gerald J. Caspary, dean, sch. of tech.
Total enrollment: 7,500
Technician enrollment: 500
Accreditation: NCA, ABET
Admission: High-school graduate
TECHNOLOGIES: Forestry, civil, electrical, electro-mechanical, mechanical

Mid Michigan Community College,
Harrison, MI 48625
Public. Eugene W. Gillaspy, pres.
Ronald Verch, dean of instr.
Charles Corrigan, dean, occ. ed.
Total enrollment: 3,000
Technician enrollment: 2,100
Accreditation: NCA, State Ed. Dept.
Admission: Open-door policy
TECHNOLOGIES: Banking & finance, business administration, computer science, data processing & systems analysis, management & supervision, merchandising/sales, real estate*, retail management, secretarial science, word processing, architectural drafting*, building construction, construction, masonry, emergency medical**, medical laboratory, X-ray, cabinet & furniture making*, industrial, manufacturing, numerical control, quality control*, solar*, air conditioning, heating, & refrigeration, auto-diesel, automotive, diesel, drafting & tool design, industrial drafting & design, machine tool, welding, fire science, police science

Monroe County Community College,
1555 S. Raisinville, Monroe, MI 48161
Public. Robert Kollin, dean of instr.
Total enrollment: 2,100
Technician enrollment: 690
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, agricultural, accounting**, advertising/marketing, banking & finance, business administration, data processing & systems analysis, management & supervision, office machine operation*, secretarial science, architectural drafting, culinary, electronic, industrial electronics, emergency medical*, inhalation/respiratory therapy, nursing, radiation, industrial, numerical control*, automotive, drafting, drafting & tool design, hydraulic*, industrial drafting & design, machine tool, mechanical, welding**, child growth & care, police science, criminal justice

Montcalm Community College,
Sidney, MI 48885
Public. Herbert N. Stoutenburg, pres.
Don Burns, vice-pres.
Total enrollment: 1,224
Technician enrollment: 427
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting, advertising/marketing*, banking & finance*, business administration*, data processing & systems analysis*, insurance*, management & supervision, merchandising/sales*, office machine operation*, secretarial science, building construction, masonry*, electrical*, emergency medical*, mental health*, nursing, automotive, drafting*, drafting & tool design*, fluid power*, hydraulic*, industrial drafting & design*, machine tool*, welding, correctional science*, police science, cosmetology, technical writing*

Muskegon Business College,
141 Hartford, Muskegon, MI 49442
Private. Robert Jewell, pres.
Total enrollment: 1,300
Technician enrollment: 1,200
Accreditation: AICS, NCA (candidate)
Admission: Open-door policy
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, legal secretary, management & supervision, merchandising/sales, real estate, secretarial science, word processing, electrical, electro-mechanical, electronic, industrial electronics, medical assistant, medical records, drafting

Muskegon Community College*,
221 S. Quarterline Rd., Muskegon, MI 49443
Public. John G. Thompson, pres.
F.P. Marczak, dean of faculty
Total enrollment: 5,000
Technician enrollment: 1,000
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, real estate, secretarial science, electronic, radio & TV, dental, nursing, chemical, engineering science, graphic arts, industrial, metallurgical, automotive, drafting, mechanical, welding, fire science, police science, criminal justice, transportation

Nazareth College,
Gull Rd., Nazareth, MI 49074
Private. John E. Hopkins, pres.
L.W. Lindeman, dean, acad. affairs
Total enrollment: 620
Accreditation: NCA
Admission: High-school graduate
TECHNOLOGIES: Accounting (4), business administration (4), medical laboratory (4), nursing (4), criminal justice (4)

North Central Michigan College*,
1515 Howard, Petoskey, MI 49770
Public. A. Shankland, pres.
A. Francis, dean

Total enrollment: 1,800
Technician enrollment: 900
Accreditation: NCA, Mich. Commission on College Accreditation
Admission: High-school graduate, ACT
TECHNOLOGIES: Forestry*, horticulture*, advertising/marketing, banking & finance*, merchandising/sales, real estate*, secretarial science, architectural drafting, building construction*, surveying*, interior design*, electronic*, natural resources management & conservation*, emergency medical*, inhalation/respiratory therapy, laboratory technician, nursing, engineering science, industrial*, occupational safety*, photographic*, automotive*, drafting, hydraulic*, sheet metal*, small engine mechanics*, welding*, criminal justice

Northeastern School of Commerce*,
701 N. Madison Ave., Bay City, MI 48706
Private. Louis H. Bork, dir.
Total enrollment: 200
Technician enrollment: 200
Admission: High-school graduate or GED for day classes, open-door policy for evening classes
TECHNOLOGIES: Accounting, business administration, secretarial science

Northern Michigan University,
Marquette, MI 49855
Public. John X. Jamrich, pres.
Robert B. Glenn, provost
Total enrollment: 9,000
Technician enrollment: 3,500
Accreditation: NCA
Admission: High-school graduate

Public. Arlan A. Burmeister, pres.
J.D. Flannery, dean, ed. svcs.
Total enrollment: 850
Technician enrollment: 170
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Retail management, secretarial science, environmental, nursing, child growth & care

Bemidji Area Vocational-Technical Institute,
Grant Ave. & Roosevelt Rd.,
Bemidji, MN 56601
Public. Melvin O. Salberg, dir.
Total enrollment: 450
Technician enrollment: 450
Accreditation: State Ed. Dept.
Admission: High-school graduate or 16 years of age or older
TECHNOLOGIES: Forestry*, accounting**, advertising/marketing**, business administration, legal secretary*, secretarial science*, word processing*, building construction, dental assistant*, nursing*, auto body, automotive, machine tool

Bemidji State University,
Bemidji, MN 56601
Public. Lowell R. Gillett, pres.
Total enrollment: 4,311
Technician enrollment: 250
Accreditation: NCATE
Admission: High-school graduate in upper 1/2 of class or equivalent
TECHNOLOGIES: Accounting (2-4), business administration (2-4), computer science (4), management & supervision (2-4), office machine operation (2-4), secretarial science, architectural drafting (4), radio & TV (4), environmental (2-4), medical (4), medical laboratory (4), engineering science, graphic arts (4), industrial (2-4), technical & industrial illustration, aviation/aviation maintenance, industrial drafting & design (4), mechanical, child growth & care (4), community service (2-4), early childhood education (4), library science, recreation (4), social welfare & services (4), commercial art & design, criminal justice (2-4), journalism (4), marine (4), special education

Brainerd Community College,
Brainerd, MN 56401
Public. Cal Heine, pres.
Dale Nathan, dean
Total enrollment: 527
Technician enrollment: 90
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Nursing, early childhood education, broadcasting, journalism, special education

Brown Institute,
3123 E. Lake St., Minneapolis, MN 55406
Private. William Strehlow, dir.
William Johnson, asst. dir.
Total enrollment: 1,500
Technician enrollment: 700
Accreditation: NATTS
Admission: High-school graduate, aptitude test
TECHNOLOGIES: Data processing & systems analysis, commercial broadcast, computer maintenance, electronic, electronic communications, industrial electronics, radio & TV, biomedical, broadcasting

Canby Area Vocational-Technical Institute*,
Highway #68 W., Canby, MN 56220
Public. Dewain L. Englund, dir., vo-tech ed.
Total enrollment: 450
Technician enrollment: 325
Accreditation: State Ed. Dept.
Admission: 16 years of age or older
TECHNOLOGIES: Agri-business, agricultural, animal science, soils, accounting, secretarial science, architectural drafting, electrical, dental assistant, graphic arts, metallurgical, automotive, diesel, heavy equipment operation/service, welding

College of St. Benedict*,
St. Joseph, MN 56374
Private. S. Emmanuel Renner, pres.
Total enrollment: 1,720
Technician enrollment: 613
Accreditation: NCA
Admission: High-school graduate, ACT or SAT/PSAT
TECHNOLOGIES: Animal science (4), accounting (4), business administration (4), interior design (4), dietetics (4), medical laboratory (4), nursing (4), physical therapy (4), child growth & care (4), early childhood education (4), social welfare & services (4)

The College of St. Catherine,
2004 Randolph Ave., St. Paul, MN 55105
Private. Sr. Catherine McNamee, pres.

Detroit Lakes Area Vocational-Technical Institute, Detroit Lakes, MN 56501
Public. Dennis Hopman, dir.
Total enrollment: 600
Technician enrollment: 300
Accreditation: NCA, State Ed. Dept.
Admission: Open-door policy
TECHNOLOGIES: Agricultural, accounting, legal secretary, merchandising/sales, real estate, secretarial science, word processing, architectural drafting, culinary, nursing, forest products, technical & industrial illustration, auto body, auto-diesel, automotive, diesel, heavy equipment operation/service, industrial drafting & design, motorcycle mechanics, small engine mechanics, welding, fisheries, marine

Duluth Area Vocational-Technical Institute*,
2101 Trinity Rd., Duluth, MN 55811
Public. Elden Johns, dir.
Total enrollment: 1,300
Admission: Open-door policy
TECHNOLOGIES: Horticulture, accounting, data processing & systems analysis, merchandising/sales, retail management, secretarial science, architectural drafting, building construction, civil, electrical, electronic, medical assistant, nursing, occupational therapy, forest products, auto body, automotive, diesel, industrial drafting & design, machine tool, welding, broadcasting

Dunwoody Industrial Institute,
818 Wayzata Blvd., Minneapolis, MN 55403
Private. Warren E. Phillips, pres.
Robert E. Poupore, vice-pres.
Total enrollment: 1,669
Technician enrollment: 1,669
Accreditation: NATTS, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Architectural drafting, civil, surveying, culinary, computer maintenance, electrical, industrial electronics, environmental, graphic arts, lithographic, air conditioning, heating, & refrigeration, auto body, automotive, drafting & tool design, machine tool, sheet metal, welding

Eveleth Area Vocational-Technical Institute,
Highway 53, Eveleth, MN 55734
Public. Edward F. Russ, dir.
K.R. Lahti, dir., student svcs.
Total enrollment: 350
Technician enrollment: 50
Accreditation: State Ed. Dept.
Admission: 16 years of age or older
TECHNOLOGIES: Accounting, secretarial science, building construction, electro-mechanical, industrial electronics, optical, graphic arts, instumentation, automotive, welding

Faribault Area Vocational-Technical Institute,
1225 S.W. 3rd St., Faribault, MN 55021
1401 Cannon Circle, Faribault, MN 55021
631 S.E. 1st St., Faribault, MN 55021
Public. Viril Layton, dir.
Total enrollment: 550
Technician enrollment: 300
Accreditation: State Ed. Dept.
Admission: Open-door policy
TECHNOLOGIES: Agri-business, agricultural, accounting, advertising/marketing, management & supervision, office machine operation, secretarial science, building construction, construction, sanitary engineering, medical laboratory, nursing, drafting, drafting & tool design, machine tool, mechanical & production, small engine mechanics, welding, marine

Granite Falls Area Vo-Tech Institute,
Granite Falls, MN 56241
Public. E.W. Burgeson, dir.
Total enrollment: 460
Technician enrollment: 270
Accreditation: State Ed. Dept.
Admission: High-school graduate or GED, 16 years of age or older
TECHNOLOGIES: Accounting, electronic, industrial electronics, numerical control, plastics, auto body, drafting, drafting & tool design, fluid power, hydraulic, industrial drafting & design, machine tool

Hennepin Technical Centers,
1820 N. Xenium Lane,
Minneapolis, MN 55441
Public. Ken Eggert, student dir.
Total enrollment: 3,706
Accreditation: NCA, State Ed. Dept.
Admission: Requirements vary—contact school
TECHNOLOGIES: Agri-business, agricultural, animal science, horticulture, accounting, advertising/marketing, banking & finance, merchandising/sales, office machine operation, architectural drafting, civil, construction, masonry, surveying, culinary, food processing & distribution, interior design, electro-mechanical, electronic, radio & TV, environmental, natural resources management & conservation, biomedical, dental, dental assistant, nursing, chemical, graphic arts, industrial, metallurgical, photographic, plastics, quality control, air conditioning, heating, & refrigeration, auto body, automotive, diesel, drafting, fluid power, heavy equipment operation/service, industrial drafting & design, machine tool, mechanical, sheet metal, welding, child growth & care, recreation, commercial art & design, marine

Hutchinson Area Vocational-Technical Institute, 200 Century Ave.,
Hutchinson, MN 55350
Public. Warren E. Macemon, dir.
R.G. Jonas, asst. dir.
Total enrollment: 720

Accreditation: NCA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Data processing & systems analysis, surveying, electrical, electro-mechanical, electronic, electronic communications, industrial electronics, radio & TV, cabinet & furniture making, energy, metallurgical, plastics, solar, air conditioning, heating, & refrigeration, auto body, auto-diesel, automotive, diesel, drafting, drafting & tool design, hydraulic, industrial drafting & design, machine tool, mechanical, mechanical & production, sheet metal, welding, commercial art & design

Union College*,
Lincoln, NE 68506
Private. Dean Hubbard, pres.
John Wagner, dean
Total enrollment: 885
Technician enrollment: 220
Accreditation: NCA, AAC, AACTE, NCATE, NLN
Admission: High-school graduate
TECHNOLOGIES: Accounting (4), business administration (4), secretarial science (2-4), building construction, food processing & distribution, medical laboratory (4), nursing (4), auto body, automotive, commercial art & design

Universal Technical Institute,
902 Capitol Ave., Omaha, NE 68102
Private. Ivan Abdouch, pres./dir.
Total enrollment: 225
Technician enrollment: 225
Accreditation: NATTS
Admission: High-school graduate in most cases and/or mechanical aptitude
TECHNOLOGIES: Air conditioning, heating, & refrigeration, auto body, automotive

University of Nebraska,
3835 Holdrege, Lincoln, NE 68583
Public.
Total enrollment: 41,680
Technician enrollment: 1,000
Accreditation: NCA
Admission: High-school graduate
TECHNOLOGIES: Agricultural, data processing & systems analysis (4), secretarial science, construction (2-4), culinary, computer maintenance (4), electronic (2-4), dental (2-4), medical (4), nuclear medicine (2-4), radiation (2-4), graphic arts (2-4), industrial (2-4), fire science (2-4)

University of Nebraska at Omaha,
Omaha, NE 68182
Public. Harold L. Davis, dir., eng. tech.
Total enrollment: 15,000
Technician enrollment: 950
Accreditation: NCA, ABET, NAIT
Admission: High-school graduate
TECHNOLOGIES: Building construction (2-4), construction (2-4), electrical (2-4), industrial (4), manufacturing (2-4), drafting (2-4), fire science

University of Nebraska, School of Technical Agriculture, P.O. Box 66, Curtis, NE 69025
Public. Bill J. Siminoe, supt.
G.J. Huntwork, assoc. dir., acad. affairs
Total enrollment: 285
Technician enrollment: 285
Accreditation: NCA, State Ed. Dept.
Admission: High-school graduate or 16 years of age or older with special permission
TECHNOLOGIES: Agri-business, agricultural, agri-mechanics, animal science, horticulture, soils

Western Nebraska Technical College,
Sidney, NE 69162
Public. Gary Lund, campus dir.
Ted Kadlecek, dean, student svcs.
Lee Nelsen, instr. svcs. coord.
Ivan Fehringer, dir., support svcs.
Total enrollment: 320
Accreditation: State Ed. Dept., CETA, FAA, State Health Dept.
Admission: 16 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, management & supervision, office machine operation, secretarial science, word processing, architectural drafting, building construction, masonry, computer maintenance, electrical, electronic, industrial electronics, microelectronics, radio & TV, auto body, automotive, aviation/aviation maintenance, diesel, drafting, heavy equipment operation/service, mechanical, welding, cosmetology

York College,
York, NE 68467
Private. Gary Batholemew, pres.

Total enrollment: 360
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, business administration, computer science, office machine operation, secretarial science, word processing, health, child growth & care, recreation, journalism

NEVADA

Clark County Community College*,
3200 E. Cheyenne, North Las Vegas, NV 89030
Public. Judith Eaton, pres.
J.D. Hoggard, Jr., dir., applied sci. & tech.
Total enrollment: 10,134
Technician enrollment: 6,000
Accreditation: NWA
Admission: High-school graduate
TECHNOLOGIES: Accounting, banking & finance, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, management & supervision, real estate, secretarial science, architectural drafting, surveying, culinary, electronic, electronic communications, radio & TV, dental, emergency medical, nursing, graphic arts, occupational safety, automotive, drafting, welding, child growth & care, early childhood education, fire science, recreation (4), criminal justice

Northern Nevada Community College,
901 Elm St., Elko, NV 89801
Public. William J. Berg, pres.
Stan Aiazzi, assoc. dean
Total enrollment: 1,500
Technician enrollment: 600
Accreditation: NWA
Admission: Open-door policy
TECHNOLOGIES: Agricultural, business administration, secretarial science, nursing, automotive, diesel, early childhood education

Reno Business College,
258 Wonder St., Reno, NV 89502
Private. Mary T. Morrison, adm.
Total enrollment: 200
Technician enrollment: 200
Accreditation: AICS
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (4), business administration (4), data processing & systems analysis, management & supervision, secretarial science, word processing, legal/paralegal

Southern Nevada Vocational-Technical Center, 5710 Mountain Vista Dr.,
Las Vegas, NV 89120
Public. Mario C. Monaco, dir.
Total enrollment: 1,350
Accreditation: NWA, State Ed. Dept.
Admission: Open to high-school students and graduates
TECHNOLOGIES: Horticulture, accounting, data processing & systems analysis, management & supervision, office machine operation, secretarial science, building construction, electromechanical drafting, electronic, radio & TV, health, graphic arts, auto body, automotive, aviation/aviation maintenance, cosmetology

Truckee Meadows Community College*,
7000 El Rancho Dr., Sparks, NV 89511
Public. V. James Eardley, pres.
Total enrollment: 6,400
Accreditation: NWA
Admission: High-school graduate
TECHNOLOGIES: Accounting**, advertising/marketing**, banking & finance**, data processing & systems analysis**, hospitality—hotel, motel, & restaurant management**, insurance**, management & supervision**, merchandising/sales**, real estate**, retail management**, secretarial science**, electronic, radio & TV, dental assistant**, emergency medical**, nursing**, X-ray, automotive**, welding, fire science**, police science**

University of Nevada, College of Agriculture,
Reno, NV 89507
Public. Bernard M. Jones, dean, agriculture
Elwood L. Miller, assoc. dean
Total enrollment: 8,500
Technician enrollment: 45
Accreditation: NWA
Admission: High-school graduate or GED
TECHNOLOGIES: Agricultural, horticulture, management & supervision, mechanical

University of Nevada, College of Engineering
Reno, NV 89557
Public. Joseph N. Crowley, pres.
Peter A. Krenkel, dean
Total enrollment: 977
Technician enrollment: 116
Accreditation: NWA, ABET
Admission: High-school graduate, ACT or SAT, 15 years of age or older
TECHNOLOGIES: Architectural engineering, electronic

NEW HAMPSHIRE

Antioch/New England Graduate School,
103 Roxbury St., Keene, NH 03431
Private. Lewis Feldstein, dean
Total enrollment: 350
Accreditation: NCA
Admission: B.A. or B.S. degree or special permission
TECHNOLOGIES: Management & supervision, natural resources management & conservation, early childhood education, special education

Castle Junior College,
Searles Rd., Windham, NH 03087
Private. Sr. Sheila Garvey, pres.
Total enrollment: 130
Accreditation: AICS, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGY: Secretarial science

Hesser College,
25 Lowell St., Manchester, NH 03101
Private. Kenneth W. Galeucia, pres.
M.B. Allard, vice-pres., academic affairs
Total enrollment: 1,300
Technician enrollment: 95
Accreditation: AICS, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, business administration, computer science, data processing & systems analysis, legal secretary, management & supervision, merchandising/sales, secretarial science, computer maintenance, microelectronics, medical assistant, travel

Keene State College*,
Main St., Keene, NH 03431
Public. Barbara J. Seelye, pres.
T. Crowley, asst. dean, prof. studies
Total enrollment: 2,800
Technician enrollment: 180
TECHNOLOGIES: Industrial electronics, drafting & tool design, mechanical & production

New England Trade & Technical Institute,
750 Massabesic St., Manchester, NH 03103
Private. Socrates J. Chaloge, pres.
Total enrollment: 105
Technician enrollment: 60
Accreditation: NATTS, NAPSEC, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Computer science, building construction, computer maintenance, microelectronics, cabinet & furniture making

New Hampshire College*,
2500 River Rd., Manchester, NH 03104
Private. Edward M. Shapiro, pres.
J.L. Grace, Jr., acad. dean
Total enrollment: 5,000
Accreditation: NEA, AICS
Admission: High-school graduate or GED, SAT
TECHNOLOGIES: Accounting (2-4), advertising/marketing (4), banking & finance (4), business administration (2-4), data processing & systems analysis (2-4), hospitality—hotel, motel, & restaurant management (4), management & supervision (2-4), merchandising/sales (4), office machine operation, retail management (4), secretarial science, legal/paralegal, social welfare & services (4)

New Hampshire Technical Institute, Concord,
Fan Rd., Concord, NH 03301
Public. David E. Larrabee, Sr., pres.
Barbara A. Rousseau, dean, academic affairs
Total enrollment: 2,147
Accreditation: NEA, ABET, NLN, ADA, JRC
Admission: Requirements vary—contact school
TECHNOLOGIES: Accounting**, banking & finance*, business administration**, data processing & systems analysis (4), architectural engineering, electronic**, dental assistant*, dental hygiene, emergency medical, health**, mental health**, nursing**, X-ray, mechanical**, technical writing*

New Hampshire Vocational-Technical College, Berlin, Milan Rd., Berlin, NH 03570
Public. Larry B. Twitchell, pres.
Norman E. Brown, dean
Total enrollment: 400
Technician enrollment: 384
Accreditation: NEA
Admission: High-school graduate or GED, CGP exam
TECHNOLOGIES: Forestry, accounting**, advertising/marketing*, banking & finance*, business administration*, computer science*, data processing & systems analysis*, hospitality—hotel, motel, & restaurant management*, insurance*, management & supervision*, merchandising/sales*, office machine operation*, personnel*, retail management*, secretarial sci-

ence**. statistical*, word processing*, surveying, culinary**, computer maintenance**, electrical**, electro-mechanical drafting, electronic drafting*, industrial electronics**, air, water, & wastewater, natural resources management & conservation, nursing, manufacturing*, metallurgical*, numerical control*, automotive**, combustion power*, drafting & tool design**, internal combustion*, machine tool**, welding*

New Hampshire Vocational-Technical College, Claremont, Hanover St. Ext.,
Claremont, NH 03743
Public. Roland V. Stoodley, Jr., pres.
B.V. Mills, dean of instr.
Arthur Jillette, dean of adm.
Total enrollment: 350
Technician enrollment: 150
Accreditation: NEA
Admission: Requirements vary—contact school
TECHNOLOGIES: Electrical, industrial electronics, inhalation/respiratory therapy, medical assistant, medical laboratory, medical records, nursing, occupational therapy, physical therapy, drafting, special education

New Hampshire Vocational-Technical College, Manchester, 1066 Front St.,
Manchester, NH 03102
Public. Richard E. Mandeville, pres.
Total enrollment: 388
Technician enrollment: 388
Accreditation: NEA
Admission: Requirements vary—contact school
TECHNOLOGIES: Building construction, electrical, electronic, industrial electronics, nursing, air conditioning, heating, & refrigeration, automotive, drafting, machine tool, welding

New Hampshire Vocational-Technical College, Nashua, 505 Amherst St., Nashua, NH 03063
Public. Robert E. Bloomfield, pres.
Elise B. Tougas, dean of instr.
Total enrollment: 363
Technician enrollment: 234
Accreditation: NEA
Admission: High-school graduate or GED, interview
TECHNOLOGIES: Accounting**, advertising/marketing*, banking & finance*, business administration*, management & supervision**, merchandising/sales*, office machine operation*, personnel*, retail management*, secretarial science**, word processing**, computer maintenance, electro-mechanical drafting**, electronic communications*, electronic drafting*, industrial electronics**, metallurgical*, numerical control*, quality control*, auto body**, automotive**, drafting & tool design*, internal combustion*, machine tool**, sheet metal*, small engine mechanics*, welding*, technical writing*

New Hampshire Vocational-Technical College, Prescott Hill, Laconia, NH 03246
Public. Robert H. Turner, pres.
R. LaPointe, dean
Total enrollment: 229
Technician enrollment: 229
Accreditation: NEA
Admission: High-school graduate or GED
TECHNOLOGIES: Secretarial science, electrical, electro-mechanical drafting, industrial electronics, graphic arts, internal combustion, fire science

Notre Dame College,
2321 Elm St., Manchester, NH 03104
Private. Jeannette Vezeau, CSC, pres.
Total enrollment: 716
Accreditation: NEA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (2-4), office machine operation (2-4), secretarial science (2-4), medical (2-4), ceramic (4), graphic arts (4), commercial art & design (4)

Rivier College,
South Main Street, Nashua, NH 03060
Private. Sr. Jeanne Perreault, pres.
Total enrollment: 2,162
Accreditation: NEA
Admission: High-school graduate
TECHNOLOGIES: Accounting (4), advertising/marketing (4), business administration (4), computer science (4), data processing & systems analysis, management & supervision (4), office machine operation, secretarial science, dietetics (4), laboratory technician, medical laboratory (4), nursing, graphic arts (4), early childhood education (4), social welfare & services (4)

St. Anselm's College*,
Manchester, NH 03102
Private. Br. Joachim Froehlich, O.S.B., pres.
Total enrollment: 1,932
Technician enrollment: 843
Accreditation: NEA, NLN, State Ed. Dept.
Admission: High-school graduate
TECHNOLOGIES: Nursing, criminal justice

Stevens High School*,
Broad St., Claremont, NH 03743
Public. Frederick W. Carr, prin.
Accreditation: NEA, State Ed. Dept.
TECHNOLOGIES: Data processing & systems analysis, architectural drafting, building construction, drafting, industrial drafting & design, machine tool

Thompson School of Applied Science, University of New Hampshire,
Durham, NH 03824
Public. Louis Roberts, Jr., dir.
Total enrollment: 550

One Lomb Dr., Rochester, NY 14623
Private. M. Richard Rose, pres.
E.L. Guard, dir. of adm.
Total enrollment: 8,500
Accreditation: MSA
Admission: Requirements vary—contact school
TECHNOLOGIES: Accounting (4), business administration (4), computer science (4), hospitality—hotel, motel, & restaurant management (4), retail management (4), civil (4), construction (4), interior design (4), electrical (4), microelectronics (4), air, water, & wastewater (4), environmental (4), biomedical (4), nuclear medicine (4), energy (4), engineering science (4), graphic arts (4), manufacturing (4), photographic (4), mechanical (4), police science (4), social welfare & services (4), commercial art & design (4), criminal justice (4), travel (4)

Rockland Community College,
145 College Rd., Suffern, NY 10901
Public. Seymour Eskow, pres.
Total enrollment: 8,400
Accreditation: MSA
Admission: High-school graduate or GED
TECHNOLOGIES: Advertising/marketing, data processing & systems analysis, secretarial science, electronic, dental assistant, dietetics, laboratory technician, medical laboratory, medical records, occupational therapy, operating room assistant, engineering science, graphic arts, automotive, public service, social welfare & services, criminal justice

Schenectady County Community College,
Schenectady, NY 12305
Public. Wright L. Lassiter, Jr., pres.
Gabriel Basil, dean, academic affairs
Total enrollment: 3,051
Technician enrollment: 800
Accreditation: MSA
Admission: Open-door policy
TECHNOLOGIES: Accounting, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, management & supervision, secretarial science, word processing, electrical, engineering science, plastics, community service, fire science, legal/paralegal, police science, criminal justice

Sewanhaka High School,
500 Tulip Ave., Floral Park, NY 11001
Public. Henry Wessels, dist. dir., occ. ed.
Total enrollment: 8,000
Technician enrollment: 1,000
Accreditation: MSA, State Ed. Dept.
Admission: Requirements vary—contact school
TECHNOLOGIES: Horticulture, architectural engineering, electronic, electronic communications, industrial electronics, graphic arts, instrumentation, lithographic, automotive, machine tool, mechanical, cosmetology

State University of New York at Binghamton,
Vestal Parkway East, Binghamton, NY 13901
Public. Clifford D. Clark, pres.
J. Constable, dir., tech. prog.
Violet Breckbill, dean, nursing
Total enrollment: 11,265
Accreditation: MSA, NLN, ACS, ABET
Admission: Requirements vary—contact school
TECHNOLOGIES: Accounting (4), business administration (4), nursing (4), industrial (4)

State University of New York at Buffalo*,
Capen Hall, Buffalo, NY 14260
Public. Robert L. Ketter, pres.
R. Rossberg, vice-pres., academic affairs
Total enrollment: 27,000
Accreditation: MSA, State Ed. Dept.
Admission: High-school graduate in top 1/4 of class
TECHNOLOGIES: Accounting (4), advertising/marketing (4), business administration (4), data processing & systems analysis (4), civil (4), structural engineering & design (4), electrical (4), biomedical (4), dental (4), health (4), medical (4), nuclear medicine (4), nursing (4), occupational therapy (4), physical therapy (4), industrial (4), photographic, aeronautical & astronautical (4)

State University of New York Agricultural & Technical College at Alfred,
Alfred, NY 14802
Public. David H. Huntington, pres.
Total enrollment: 4,265
Admission: Requirements vary—contact school
TECHNOLOGIES: Agri-business, agricultural, animal science, forestry, horticulture, soils, accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, retail management, secretarial science, architectural drafting, building construction, construction, surveying, food processing & distribution, electrical, electro-mechanical, industrial electronics, environmental, health, medical assistant, medical laboratory, medical records, nursing, chemical, engineering science, air conditioning, heating, & refrigeration, auto body, automotive, drafting, heavy equipment operation/service, industrial drafting & design, internal combustion, mechanical & production, court reporting, social welfare & services

State University of New York Agricultural & Technical College at Canton,
Canton, NY 13617
Public. Earl MacArthur, pres.
Robert Fraser, vice-pres., academic affairs
Total enrollment: 2,638
Technician enrollment: 2,090
Accreditation: MSA, NLN, NAACLS, ABFSE, AVMA, ABET
Admission: Requirements vary—contact school
TECHNOLOGIES: Agricultural, agri-mechanics, animal science, soils, accounting*, business administration*, data processing & systems analysis*, hospitality—hotel, motel, & restaurant management, insurance, real estate, retail management**, secretarial science, word processing, building construction, civil, construction, electrical, electronic, laboratory technician, medical laboratory, nursing, industrial**, air conditioning, heating, & refrigeration, automotive, machine tool, mechanical, criminal justice, mortuary science

State University of New York Agricultural & Technical College at Cobleskill,
Cobleskill, NY 12043
Public. Walton A. Brown, pres.
Lawrence Poole, vice-pres., academic affairs
Total enrollment: 2,931
Technician enrollment: 2,538
Accreditation: MSA
Admission: High-school graduate, ACT or SAT
TECHNOLOGIES: Agri-business, agricultural, agri-mechanics, animal science, horticulture, accounting, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, secretarial science, culinary, food processing & distribution, laboratory technician, medical laboratory, early childhood education, fisheries

State University of New York Agricultural & Technical College at Delhi,
Delhi, NY 13753
Public. Seldon M. Kruger, pres.
G. Duncan, acting vice-pres., academic affairs
Total enrollment: 2,228
Technician enrollment: 1,983
Accreditation: MSA
Admission: High-school graduate or beyond high-school age, some programs have special requirements
TECHNOLOGIES: Agri-business, agricultural, agri-mechanics, animal science, horticulture, accounting, advertising/marketing, business administration, computer science, hospitality—hotel, motel, & restaurant management, secretarial science, architectural drafting, building construction, civil, construction, highway, masonry, food processing & distribution, electrical, air, water, & wastewater, nursing, energy, engineering science, industrial, air condition-

ing, heating, & refrigeration, automotive, drafting, welding, recreation

State University of New York Agricultural & Technical College at Farmingdale,
Melville Rd., Farmingdale, NY 11735
Public. Frank A. Cipriani, pres.
Joseph Monaco, exec. vice-pres.
Total enrollment: 13,427
Technician enrollment: 9,936
Accreditation: MSA, ABET, ADA, NLN, FAA
Admission: Requirements vary—contact school
TECHNOLOGIES: Agri-business, agricultural, animal science, horticulture, accounting, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, legal secretary, secretarial science, word processing, architectural engineering, civil, construction, surveying, food processing & distribution, electrical, electronic, microelectronics, biomedical, dental hygiene, medical laboratory, nursing, engineering science, graphic arts, manufacturing, numerical control, technical & industrial illustration, air conditioning, heating, & refrigeration, aviation/aviation maintenance, diesel, drafting, mechanical, early childhood education, police science, commercial art & design, criminal justice, mortuary science

State University of New York Agricultural & Technical College at Morrisville,
Morrisville, NY 13408
Public. Donald G. Butcher, pres.
Thomas C. Leamer, vice-pres., acad. affairs
Lawrence J. Baker, vice-pres., adm.
Total enrollment: 3,042
Technician enrollment: 2,071
Accreditation: MSA, State Ed. Dept.
Admission: High-school graduate
TECHNOLOGIES: Agri-business, agricultural, agri-mechanics, animal science, forestry, horticulture, soils, accounting**, advertising/marketing*, banking & finance*, business administration**, data processing & systems analysis, hospitality—hotel, motel, & restaurant management**, legal secretary**, management & supervision*, real estate*, secretarial science**, statistical*, word processing, culinary, food processing & distribution, electrical, electronic, industrial electronics, natural resources management & conservation, medical laboratory, nursing**, engineering science, forest products, plastics, automotive, industrial drafting & design, mechanical, child growth & care*, journalism**

State University of New York College at Brockport, Brockport, NY 14420
Public. John E. Van de Wetering, pres.
J. Phillips, Jr., dean, sch. of professions
Total enrollment: 7,500
Technician enrollment: 1,000
Accreditation: MSA, State Board of Regents
Admission: High-school graduate, ACT or SAT
TECHNOLOGIES: Business administration (4), computer science (4), environmental (4), health (4), nursing (4), early childhood education (4), recreation (4), social welfare & services (4), broadcasting (4), criminal justice (4), journalism (4)

State University of New York College at Fredonia, Fredonia, NY 14063
Public. Dallas Beal, pres.
P.S. Asty, dir., med. tech.
Total enrollment: 5,208
Technician enrollment: 160
Accreditation: MSA
Admission: High-school graduate
TECHNOLOGIES: Biomedical (4), medical (4)*, medical laboratory*, nursing*

State University of New York College at Geneseo*, Geneseo, NY 14454
Public. Edward B. Jakubauskas, pres.
Allen Reid, chm., med. tech.
David A. Martin, chm., bus. ad.
Total enrollment: 5,571
Accreditation: MSA
Admission: High-school graduate or GED, ACT or SAT
TECHNOLOGIES: Business administration (4), dietetics (4), laboratory technician (4)

State University of New York College at Oneonta, Oneonta, NY 13820
Public. Clifford J. Craven, pres.
Total enrollment: 6,124
Accreditation: MSA
TECHNOLOGIES: Accounting (4), air, water, & wastewater (4), dietetics (4)

State University of New York College at Oswego, Oswego, NY 13126
Public. Virginia Radley, pres.
Vernon Tyron, chm., ind. arts & tech.
Total enrollment: 7,180
Technician enrollment: 500
Accreditation: MSA, ACS, NASM
Admission: High-school graduate or GED, ACT or SAT
TECHNOLOGIES: Architectural drafting*, building construction*, electronic*, radio & TV*, ceramic (4), energy (4), graphic arts (4), industrial (4), lithographic (4), manufacturing (4), photographic (4), plastics (4), automotive*, drafting*, industrial drafting & design*, internal combustion (4), machine tool (4), sheet metal (4), small engine mechanics (4), welding (4)

State University of New York College at Plattsburgh, Plattsburgh, NY 12901
Public. Joseph C. Burke, pres.
J.H. Supple, vice-pres., academic affairs
Total enrollment: 5,616
Accreditation: MSA, NCATE, NLN, ACS, State Board of Regents
Admission: High-school graduate, ACT or SAT
TECHNOLOGIES: Accounting (4), business administration (4), computer science (4), environmental (4), emergency medical*, laboratory technician (4), nursing (4), early childhood education (4), recreation*, social welfare & services*, broadcasting (4), criminal justice (4), journalism*

State University of New York College of Environmental Science & Forestry,
Syracuse, NY 13210
Public. Edward E. Palmer, pres.
Robert L. Friedman, dir. of adm.
Total enrollment: 1,800
Technician enrollment: 110
Accreditation: MSA, Soc. of Amer. Foresters
Admission: High-school graduate, ACT or SAT or New York Board of Regents exam
TECHNOLOGIES: Forestry, pulp & paper, surveying, natural resources management & conservation, forest products, fire science, recreation

State University of New York College of Environmental Science & Forestry, School of Forestry, Forest Technology Program,
Wanakena, NY 13695
Public. Edward Palmer, pres.
W.E. Suhr, acting dir.
Total enrollment: 100
Technician enrollment: 100
Accreditation: MSA, Soc. of Amer. Foresters
Admission: High-school graduate, ACT or SAT
TECHNOLOGY: Forestry

State University of New York Downstate Medical Center, College of Health Related Professions, 450 Clarkson Ave.,
Brooklyn, NY 11203
Public. John R. Vigneau, acting dean
Total enrollment: 1,280
Technician enrollment: 190
Accreditation: MSA
Admission: Two years of college
TECHNOLOGIES: Medical records (4), nursing*, occupational therapy (4), physical therapy (4), X-ray (4)

Suburban Technical School,
175 Fulton Ave., Hempstead, NY 11550
Private. Annette Robb, dir.
Total enrollment: 825
Technician enrollment: 800
Accreditation: NATTS, State Ed. Dept.
Admission: High-school graduate or GED, entrance exam
TECHNOLOGIES: Computer maintenance, electronic, electronic communications, laser, radio & TV

Suffolk County Community College,
533 College Rd., Selden, NY 11784
Crooked Hill Rd., Brentwood, NY 11717
Riverhead, NY 11901
Public. Albert M. Ammerman, pres.
Orville Pfeifer, div. chm., eng. sci. & tech.
Total enrollment: 22,000
Technician enrollment: 9,000
Accreditation: MSA
Admission: Requirements vary—contact school

Technician enrollment: 547
Accreditation: NATTS
Admission: High-school graduate with 1 year of algebra
TECHNOLOGY: Electronic

Pennco Tech,
3815 Otter St., Bristol, PA 19007
Private. J.A. Hobyak, pres.
Total enrollment: 650
Technician enrollment: 650
Accreditation: NATTS
Admission: High-school graduate or GED, entrance exam, recommendation
TECHNOLOGIES: Computer science, data processing & systems analysis, electronic, auto body, auto-diesel, automotive, diesel, mechanical

Pennsylvania Institute of Technology*,
414 Sansom St., Upper Darby, PA 19082
Private. Walter R. Garrison, pres.
John C. Strayer, dir.
Total enrollment: 500
Technician enrollment: 500
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Architectural drafting, architectural engineering, civil**, highway*, structural engineering & design, surveying*, electro-mechanical, electro-mechanical drafting, electronic, electronic communications, electronic drafting, industrial electronics, microelectronics, instrumentation, aeronautical & astronautical, drafting, drafting & tool design, industrial drafting & design, machine tool, mechanical

The Pennsylvania State University, Altoona Campus, Altoona, PA 16603
Public. Carson W. Veach, dir.
Kjell Meling, assoc. dir., acad. affairs
Total enrollment: 1,980
Technician enrollment: 407
Admission: High-school graduate, SAT
TECHNOLOGIES: Agri-business, agricultural, data processing & systems analysis, retail management, electrical, environmental, natural resources management & conservation, biomedical, chemical, engineering science, nucleonics/nuclear engineering, drafting & tool design, mechanical, social welfare & services, commercial art & design

The Pennsylvania State University, Beaver Campus, Brodhead Rd., Monaca, PA 15061
Public. David B. Otto, dir.
Thomas C. Colemen, asst. dir., cont. ed.
Total enrollment: 1,391
Technician enrollment: 228
Accreditation: MSA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Agri-business, business administration, computer science, electrical, electronic communications, environmental, biomedical, chemical, nucleonics/nuclear engineering, mechanical

The Pennsylvania State University, Berks Campuses*, R.D. 5, Tulpehocken Rd.,
Reading, PA 19608
Public. Harold W. Perkins, dir.
S.M. Zervanos, asst. dir., cont. ed.
Total enrollment: 1,219
Technician enrollment: 291
Accreditation: MSA, ABET
Admission: High-school graduate, SAT; high-school graduate or GED for extension
TECHNOLOGIES: Agri-business, accounting*, business administration, hospitality—hotel, motel, & restaurant management, electrical, electro-mechanical*, air, water, & wastewater, environmental, chemical, engineering science, industrial*, nucleonics/nuclear engineering, drafting*, mechanical*, community service

The Pennsylvania State University, Delaware County Campus*, 25 Yearsley Mill Rd.,
Media, PA 19063
Public. John D. Vairo, dir.
M.K. Cote, asst. dir., cont. ed.
Total enrollment: 2,185
Technician enrollment: 862
Accreditation: MSA, ABET
Admission: High-school graduate, SAT; high-school graduate or GED for extension
TECHNOLOGIES: Agri-business, accounting*,

advertising/marketing*, business administration, electrical, electronic communications, air, water, & wastewater, environmental, engineering science, diesel*, mechanical**, fire science*, broadcasting, journalism

The Pennsylvania State University, DuBois Campus, College Pl., DuBois, PA 15801
Public. J.L. Schoch, dir.
Total enrollment: 524
Technician enrollment: 208
Accreditation: MSA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Agri-business, business administration, electrical, environmental, biomedical, chemical, mechanical

The Pennsylvania State University, Fayette Campus*, P.O. Box 519,
Uniontown, PA 15401
Public. Hugh M. Barclay, dir.
S.M. Priselac, assoc. dir., acad. affairs
Total enrollment: 1,220
Technician enrollment: 225
Accreditation: MSA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Agri-business, business administration, architectural engineering, electrical, mechanical

The Pennsylvania State University, Hazleton Campus, Highacres, Hazleton, PA 18201
Public. William J. David, campus dir.
J. Staudenmeier, assoc. dir., acad. affairs
Total enrollment: 1,136
Technician enrollment: 268
Accreditation: MSA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Business administration, electrical, medical laboratory, physical therapy, nucleonics/nuclear engineering, mechanical

The Pennsylvania State University, McKeesport Campus, University Dr.,
McKeesport, PA 15132
Public. Herbert G. McGibbeny, dir.
Total enrollment: 1,260
Technician enrollment: 296
Accreditation: MSA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Agri-business, business administration, computer science, electrical, mechanical

The Pennsylvania State University, Mont Alto Campus*, Mont Alto, PA 17237
Public. Vernon L. Shockley, campus dir.
G.N. Payette, asst. dir., resident instr.
Total enrollment: 815
Technician enrollment: 240
Accreditation: MSA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Forestry, surveying

The Pennsylvania State University, New Kensington Campus, 3550 Seventh St. Rd.,
New Kensington, PA 15068
Public. Robert D. Arbuckle, dir.
F.M. Knapp, assoc. dir., acad. affairs
Joseph Perrino, asst. dir., cont. ed.
Total enrollment: 2,000
Technician enrollment: 1,020
Accreditation: ABET, JRC, NAACLS
Admission: High-school graduate, SAT; high-school graduate or GED for extension
TECHNOLOGIES: Agri-business, advertising/marketing*, business administration, data processing & systems analysis, secretarial science*, electrical*, air, water, & wastewater, environmental*, biomedical, medical laboratory, nursing*, radiation, engineering science, industrial*, nucleonics/nuclear engineering, mechanical*, recreation

The Pennsylvania State University, Ogontz Campus*, 1600 Woodland Rd.,
Abington, PA 19001
Public. Robert A. Bernoff, dir.
Ruth David, asst. dir., cont. ed.
Total enrollment: 2,302
Technician enrollment: 130
Accreditation: MSA
Admission: High-school graduate, SAT
TECHNOLOGIES: Electrical, engineering science, mechanical, recreation

The Pennsylvania State University, Schuylkill Campus*, State Highway,
Schuylkill Haven, PA 17972
Public. Wayne D. Lammie, dir.
W.J. Zimmerman, asst. dir., cont. ed.
Total enrollment: 1,032
Technician enrollment: 210
Accreditation: MSA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Agri-business, business administration, data processing & systems analysis, electrical, environmental, biomedical, nucleonics/nuclear engineering

The Pennsylvania State University, Shenango Valley Campus, 147 Shenango Ave.,
Sharon, PA 16146
Public. Vincent DeSanctis, dir.
Total enrollment: 800
Technician enrollment: 350
Accreditation: MSA, ABET
Admission: High-school graduate, SAT; high-school graduate or GED for extension
TECHNOLOGIES: Agri-business, accounting, advertising/marketing, banking & finance, business administration, computer science, insurance*, management & supervision, real estate*, architectural engineering, electrical, electronic, environmental, biomedical, dietetics*, nursing*, metallurgical, nucleonics/nuclear engineering, solar, drafting & tool design

The Pennsylvania State University, University Park Campus*, University Park, PA 16802
Public. John W. Oswald, pres.
Floyd B. Fischer, vice-pres., cont. ed.
Total enrollment: 33,935
Technician enrollment: 56
Accreditation: MSA, ABET
Admission: High-school graduate, SAT; high-school graduate or GED for extension
TECHNOLOGIES: Agri-business, agricultural**, advertising/marketing*, business administration*, management & supervision*, architectural drafting*, building construction, civil*, electro-mechanical*, environmental*, nuclear medicine, nursing*, industrial*, nucleonics/nuclear engineering*, aeronautical*, drafting*, mechanical*, police science, public service*

The Pennsylvania State University, Wilkes-Barre Campus*, Box 1830, Shavertown, PA 18708
Public. J. Campbell, asst. dir., cont. ed.
Total enrollment: 700
Technician enrollment: 320
Accreditation: MSA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Agri-business, highway, surveying, electrical, biomedical, mechanical**

The Pennsylvania State University, York Campus, 1031 Edgecomb Ave.,
York, PA 17403
Public. Edward M. Elias, campus dir.
Total enrollment: 1,067
Technician enrollment: 267
Accreditation: MSA
Admission: High-school graduate, SAT
TECHNOLOGIES: Agri-business, data processing & systems analysis, electrical, biomedical, engineering science, nucleonics/nuclear engineering, mechanical

Philadelphia College of Textiles and Science,
School House Lane & Henry Ave.,
Philadelphia, PA 19144
Private. Donald B. Partridge, pres.
Total enrollment: 1,666
Accreditation: MSA
TECHNOLOGIES: Accounting (4), banking & finance (4), business administration (4), computer science (4), retail management (4), textile (4)

Philadelphia Wireless Technical Institute,
1533 Pine St., Philadelphia, PA 19102
Private. Harry A. Raske, dir.
Total enrollment: 350
Technician enrollment: 350
Admission: High-school graduate or GED
TECHNOLOGIES: Commercial broadcast, electronic communications, industrial electronics, radio & TV, air conditioning, heating, & refrigeration

Pittsburgh Institute of Aeronautics,
P.O. Box 10897, Pittsburgh, PA 15236
Private. Ivan D. Livi, pres.
Total enrollment: 600
Technician enrollment: 600
Accreditation: NATTS
Admission: High-school graduate, entrance exam, interview
TECHNOLOGIES: Aviation electronics, aeronautical

Point Park College*,
Wood St. & Blvd. of the Allies,
Pittsburgh, PA 15222
Private. J.V. Hopkins, pres.
J.M. Simon, tech. ed. chm.
Total enrollment: 265
Accreditation: MSA
Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Civil (2-4), electrical (2-4), electronic (2-4), mechanical (2-4)

Pottstown Senior High School,
600 N. Adams St., Pottstown, PA 19464
Public. Joseph Rinaldi, asst. prin./dir., voc-ed
Total enrollment: 1,138
Technician enrollment: 142
Accreditation: MSA
Admission: Open-door policy
TECHNOLOGIES: Data processing & systems analysis, electronic, industrial drafting & design

Reading Area Community College,
Box 1706, Reading, PA 19603
Public. Lewis W. Ogle, pres.
G. Wilkins, vice-pres., acad. affairs
Total enrollment: 1,300
Technician enrollment: 700
Accreditation: MSA
Admission: Open-door policy
TECHNOLOGIES: Accounting, business administration, computer science, data processing & systems analysis, legal secretary, management & supervision, secretarial science, word processing, laboratory technician, medical laboratory, nursing, industrial, child growth & care, correctional science, early childhood education, legal/paralegal, police science, public service, social welfare & services, criminal justice

Reading-Muhlenberg Area Vocational-Technical School, Spring Valley & Bilmar Rds., P.O. Box 3068, Reading, PA 19601
Public. Charles H. Matters, dir., voc-ed
Total enrollment: 1,515
Technician enrollment: 431
Accreditation: State Ed. Dept.
Admission: Open-door policy
TECHNOLOGIES: Horticulture, data processing & systems analysis, merchandising/sales, architectural drafting, building construction, construction, masonry, structural engineering & design, apparel design/manufacturing, culinary, interior design, upholstery, electrical, electronic, health, nursing, graphic arts, textile, air conditioning, heating, & refrigeration, appliance service, auto body, automotive, drafting & tool design, machine tool, sheet metal, small engine mechanics, welding, commercial art & design, cosmetology

R.E.T.S. Electronic Schools,
West Chester Pike & Malin Rd.,
Broomall, PA 19008
Public. John Founds, dir.
TECHNOLOGIES: Electronic, electronic communications, industrial electronics, microelectronics, biomedical

Saint Vincent College,
Latrobe, PA 15650
Private. Augustine Flood, pres.
Total enrollment: 946
Accreditation: MSA
Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Accounting (4), advertising/marketing (4), banking & finance (4), business administration (4), computer science (4), data processing & systems analysis (4), personnel (4), retail management (4), apparel design/manufacturing (4), food processing & distribution (4), interior design (4), dietetics (4), social welfare & services (4)

Somerset County Area Vocational-Technical School, R.D. 5, Vo-Tech Rd.,
Somerset, PA 15510
Public. Everett E. Nicklow, adm. dir.
Total enrollment: 702
TECHNOLOGIES: Forestry, horticulture, advertising/marketing, data processing & systems analysis, office machine operation, building construction, food processing & distribution, electronic, medical assistant, textile, automotive, drafting, welding, cosmetology

Spring Garden College,

Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Accounting (2-4), business administration (2-4), data processing & systems analysis (2-4), management & supervision (2-4), architectural engineering (2-4), building construction (2-4), civil (2-4), construction (2-4), computer maintenance (2-4), electrical (2-4), electronic (2-4), industrial electronics (2-4), medical (2-4), medical laboratory (2-4), energy (2-4), industrial (2-4), instrumentation (2-4), manufacturing (2-4), industrial drafting & design (2-4), mechanical (2-4), mechanical & production (2-4), technical writing (2-4)

SUN Area Vocational-Technical School*,
815 E. Market St., New Berlin, PA 17855
Public. John L. O'Brian, dir.
Total enrollment: 400
Technician enrollment: 400
TECHNOLOGIES: Agricultural, data processing & systems analysis, architectural drafting, masonry, apparel design/manufacturing, electrical, electronic, dental assistant, graphic arts, air conditioning, heating, & refrigeration, auto body, automotive, diesel, welding, commercial art & design, cosmetology

Temple University, College of Engineering Technology*, Philadelphia, PA 19122
Public. Marvin Wachman, pres.
R.M. Haythornthwaite, dean
Total enrollment: 33,158
Technician enrollment: 1,419
Accreditation: MSA, ABET
Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Building construction, civil (4), construction, electrical (4), electronic, environmental (4), biomedical (4), engineering science, mechanical (2-4)

Thomas Jefferson University, College of Allied Health Sciences, 11th & Walnut Sts.,
Philadelphia, PA 19107
Private. L. Abrams, dean, allied health
Total enrollment: 900
Accreditation: MSA, CAHEA/AMA, NLN, Comm. on Dental Accreditation, Penn. St. Board of Nurse Examiners
Admission: 2 years of college, 3rd and 4th year only at Thomas Jefferson
TECHNOLOGIES: Dental hygiene (4), medical (4), occupational therapy (4), operating room assistant (4), physical therapy (4), X-ray (4)

Thompson Institute*,
5650 Derry St., Harrisburg, PA 17111
Private. James F. Noone, dir.
Total enrollment: 500
Technician enrollment: 75
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, business administration, data processing & systems analysis, secretarial science, medical assistant, drafting

Tracey-Warner School,
401 N. Broad St., Philadelphia, PA 19108
Private. Lewis H. Warner, pres.
H. Vandeventer, design dir.
Total enrollment: 125
Technician enrollment: 125
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Merchandising/sales, retail management, apparel design/manufacturing, textile

Triangle Institute of Technology*,
635 Smithfield St., Pittsburgh, PA 15222
Private. James R. Agras, pres.
T.J. McMahon, dir.
Total enrollment: 500
Technician enrollment: 500
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Architectural drafting, upholstery, air conditioning, heating, & refrigeration, drafting, mechanical

Upper Bucks County Area Vocational-Technical School, R.R. 2, Box 207,
Perkasie, PA 18944
Public. Joseph J. Vallone, dir.
Total enrollment: 857
Technician enrollment: 103
Accreditation: MSA
Admission: Good academic standing
TECHNOLOGIES: Data processing & systems analysis, electrical, electronic, aviation/aviation maintenance

Vale Technical Institute*,
Vale Tech Center, Blairsville, PA 15717
Private. William A. Hart, exec. dir.
Total enrollment: 580
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Auto body, automotive, diesel

Villa Marie College,
2551 W. Lake Rd., Erie, PA 16505
Private. Sr. Lawreace Antoun, pres.
Dorothy Novello, acad. dean
Total enrollment: 581
Technician enrollment: 376
Accreditation: MSA, ADA, CSWE, NLN, Amer. Nurses' Assoc.
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (4), advertising/marketing (4), management & supervision (4), dietetics (4), laboratory technician, medical laboratory (2-4), nursing (2-4), physical therapy (2-4), early childhood education (2-4)

Washington Institute of Technology, Inc.,

Accreditation: NEA
Admission: High-school graduate or GED
TECHNOLOGIES: Business administration, data processing & systems analysis, retail management, secretarial science, computer maintenance, electronic, dental assistant, health, medical laboratory, nursing, X-ray, chemical, engineering science, instrumentation, mechanical, mechanical & production, fire science**, social welfare & services

Hall Institute, Drafting & Keypunch Divisions,
588 Pawtucket Ave., Pawtucket, RI 02860
Private. Robert S. Hall, pres.
Charles K. Rogers, vice-pres.
Total enrollment: 270
Technician enrollment: 270
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Architectural drafting, structural engineering & design, electro-mechanical drafting, electronic, electronic drafting, drafting, drafting & tool design, industrial drafting & design, machine tool, mechanical

Johnson & Wales College,
Abbott Park Pl., Providence, RI 02903
Private. Morris J.W. Gaebe, pres.
John A. Yena, vice-pres.
Total enrollment: 5,500
Technician enrollment: 5,500
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (2-4)*, advertising/marketing (2-4)*, banking & finance**, business administration, data processing & systems analysis (2-4)*, hospitality—hotel, motel, & restaurant management (2-4)*, insurance**, legal secretary**, management & supervision (2-4)*, merchandising/sales (2-4)*, real estate**, retail management (2-4)*, secretarial science**, word processing**, culinary, medical assistant**, court reporting**, recreation (2-4)*, travel (2-4)*

New England Institute of Technology,
184 Early St., Providence, RI 02907
Private. Richard I. Gouse, pres.
E. Foster Wiggins, dean, acad. affairs
T.A. Saillant, Jr., dir. of adm.
Total enrollment: 1,950
Technician enrollment: 1,950
Accreditation: NEA, NATTS
Admission: High-school graduate
TECHNOLOGIES: Data processing & systems analysis, architectural drafting, building construction, electrical, electronic, electronic drafting, radio & TV, medical assistant, cabinet & furniture making, air conditioning, heating, & refrigeration, appliance service, drafting, drafting & tool design, industrial drafting & design

Rhode Island College,
Providence, RI 02908
Public. W.F. Kavanaugh, chm., ind. tech.
Total enrollment: 9,000
Technician enrollment: 500
Accreditation: NCATE

Admission: High-school graduate
TECHNOLOGIES: Electrical (4), electronic (4), graphic arts (4), industrial (4), plastics (4), automotive (4), drafting (4), drafting & tool design (4), internal combustion (4), sheet metal (4), small engine mechanics (4)

Rhode Island School of Electronics,
14 Third St., Providence, RI 02906
Private. Robert E. Obenhaus, dir.
R. Boyajian, tech. dir.
Total enrollment: 700
Technician enrollment: 700
Accreditation: NATTS
Admission: Requirements vary—contact school
TECHNOLOGIES: Computer maintenance, electronic, electronic communications, radio & TV*

Roger Williams College,
Ferry Rd., Bristol, RI 02809
Private. Robert P. Nemec, dean of adm.
K. Cedergren, tech. trng. dir.
Total enrollment: 4,000
Technician enrollment: 2,000
Accreditation: NEA
Admission: High-school graduate or GED, recommendation
TECHNOLOGIES: Advertising/marketing (4)*, business administration (2-4)*, computer science (4)*, data processing & systems analysis (4)*, management & supervision (4)*, architectural engineering, civil (4)*, surveying*, electrical (4)*, engineering science, mechanical (4)*, social welfare & services (4), urban engineering/planning (4)

Salve Regina—The Newport College,
Ochre Point Ave., Newport, RI 02840
Private. Sr. Lucille McKillop, pres.
M. Dasovich, chm., management
Total enrollment: 200
Accreditation: NEA
Admission: High-school graduate
TECHNOLOGIES: Accounting (4), computer science (4), management & supervision (4), medical (4), nursing (4), criminal justice (4)

West Bay Vocational Technical School,
Foster Dr., Coventry, RI 02816
Public. John H. Ball, dir.
Total enrollment: 352
Technician enrollment: 200
Accreditation: NEA
Admission: Open-door policy
TECHNOLOGIES: Horticulture, construction, food processing & distribution, electronic, environmental, graphic arts, auto body, automotive, machine tool, mechanical & production, welding

SOUTH CAROLINA

Aiken Technical College,
P.O. Drawer 696, Aiken, SC 29801
Public. Ashley J. Little, pres.
R.F. Epps III, dean of instr.
Total enrollment: 1,800
Technician enrollment: 1,000
Accreditation: SA
Admission: Requirements vary—contact chool
TECHNOLOGIES: Accounting, advertising/marketing*, banking & finance*, business administration*, computer science*, data processing & systems anlaysis*, management & supervision, merchandising/sales*, office machine operation*, personnel*, real estate*, secretarial science, word processing*, surveying*, upholstery*, electrical*, electro-mechanical, electronic, air, water, & wastewater*, chemical*, instrumentation*, nucleonics/nuclear engineering, numerical control*, photographic*, quality control*, textile*, air conditioning, heating, & refrigeration*, automotive, diesel*, drafting*, hydraulic*, internal combustion*, machine tool, sheet metal*, small engine mechanics*, welding, fire science*, technical writing*

Baptist College at Charleston*,
Baptist College, SC 29411
Private. John A. Hamrick, pres.
Total enrollment: 2,444
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (4), advertising/marketing (4), banking & finance (4), business administration (4), data processing & systems analysis (4), hospitality—hotel, motel, & restaurant management (4), management & supervision (4), merchandising/sales (4), office machine operation (4), personnel (4), real estate (4), retail management (4), secretarial science (4), dental assistant (4), inhalation/respiratory therapy (4), medical records, nursing, early childhood education (4), police science (4), recreation (4), criminal justice (4), special education (4)

Beaufort Technical College,
100 Ribaut Rd., Beaufort, SC 29902
Public. George W. Goldsmith, Jr., pres.
K. Samuels, chief acad. officer
Total enrollment: 2,224
Technician enrollment: 1,377
Accreditation: SA
Admission: Open-door policy
TECHNOLOGIES: Accounting, business administration, computer science, hospitality—hotel, motel, & restaurant management, merchandising/sales, secretarial science, construction, masonry, electronic, industrial electronics, nursing, air conditioning, heating, & refrigeration, auto body*, automotive, welding, cosmetology, criminal justice

Bob Jones University, School of Applied Studies, Greenville, SC 29614
Private. Bob Jones III, pres.
H.N. McGeoch, dir.
Total enrollment: 6,207
Technician enrollment: 165
Admission: High-school graduate
TECHNOLOGIES: Secretarial science, building construction, electrical, automotive, aviation/aviation maintenance, diesel, child growth & care, library science

Clemson University, Engineering Technical Program, Clemson, SC 29631
Public. J. Charles Jennett, dean
Richard M. Roberds, head, eng. tech.
Total enrollment: 11,000
Technician enrollment: 275
Accreditation: SA, ABET
Admission: High-school graduate, SAT
TECHNOLOGIES: Electrical (4), electronic (4), industrial (4), mechanical (4)

Denmark Technical College,
P.O. Box 327, Soloman Blatt Blvd.,
Denmark, SC 29042
Public. J.W. Henry, pres.
Total enrollment: 743
Technician enrollment: 559
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, computer science, data processing & systems analysis, secretarial science, architectural engineering, building construction, masonry, electrical, electronic, radio & TV, graphic arts, industrial, nucleonics/nuclear engineering, air conditioning, heating, & refrigeration, auto body, automotive, drafting & tool design, machine tool, welding, social welfare & services, cosmetology

Florence-Darlington Technical College*,
Drawer 8000, Florence, SC 29501
Public. Fred C. Fore, pres.
Darrel Staat, dean of instr.
Total enrollment: 2,600
Accreditation: SA
Admission: High-school graduate
TECHNOLOGIES: Agricultural, accounting, advertising/marketing, business administration, data processing & systems analysis, merchandising/sales, secretarial science, architectural engineering, civil, surveying, aviation electronics, electrical, electronic drafting, dental, dental assistant, laboratory technician, medical assistant, medical laboratory, nursing, operating room assistant, X-ray, nucleonics/nuclear engineering, air conditioning, heating, & refrigeration, auto-diesel, automotive, aviation/aviation maintenance, machine tool, mechanical, sheet metal, welding, social welfare & services, criminal justice, mortuary science

Greenville Technical College,
P.C. Box 5616, Station B, Greenville, SC 29606
Public. Thomas E. Barton, Jr., pres.
Kay Grastie, vice-pres., ed.
Total enrollment: 8,500
Accreditation: SA, ADA, NLN, AMA
Admission: Open-door policy
TECHNOLOGIES: Accounting, advertising/marketing**, business administration, data processing & systems analysis, insurance, real estate*, secretarial science, architectural drafting, architectural engineering, building construction, civil, construction, masonry, food processing & distribution, interior design*, upholstery*, industrial electronics, radio & TV*, environmental, biomedical, dental, dental assistant, dietetics*, emergency medical*, inhalation/respiratory therapy, laboratory technician, medical laboratory, nursing, operating room assistant, optical, physical therapy, X-ray, chemical, industrial, occupational safety*, textile, air conditioning, heating, & refrigeration, appliance service*, automotive, diesel, drafting, heavy equipment operation/service, machine tool, mechanical, small engine mechanics*, welding, community service*, broadcasting*, criminal justice, transportation

Lander College,
Stanley Ave., Greenwood, SC 29646
Public. Larry A. Jackson, pres.
Oscar Page, vice-pres., acad. affairs

Total enrollment: 2,004
Technician enrollment: 168
Accreditation: SA
Admission: High-school graduate, SAT
TECHNOLOGIES: Secretarial science, medical laboratory (4), nursing

Midlands Technical College,
P.O. Box 2408, Columbia, SC 29202
Public. James R. Morris, pres.
J. Leon Jones, vice-pres., acad. affairs
Total enrollment: 17,000
Technician enrollment: 5,943
Accreditation: SA, ABET, NSRA, ABA, NAACLS, ADA, AMA, NLN
Admission: High-school graduate or GED or 18 years of age or older
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, data processing & systems analysis, legal secretary, management & supervision, office machine operation, secretarial science, word processing, architectural engineering, building construction, civil, computer maintenance, electrical, electro-mechanical drafting, electronic, electronic communications, radio & TV, dental assistant, dental hygiene, inhalation/respiratory therapy, medical laboratory, nuclear medicine, nursing, operating room assistant, pharmacy assistant, radiation, X-ray, graphic arts, air conditioning, heating, & refrigeration, auto-diesel, automotive, diesel, drafting & tool design, industrial drafting & design, machine tool, mechanical, office machine repair, court reporting, legal/paralegal, social welfare & services, criminal justice

Nielsen Electronics Institute*,
1600 Meeting St., Charleston, SC 29405
Private. Robert R. Nielsen, Sr., pres.
Total enrollment: 375
Accreditation: NATTS
TECHNOLOGY: Electronic

Orangeburg-Calhoun Technical College,
3250 St. Matthews Rd., Orangeburg, SC 29115
Public. M.R. Groomes, pres.
Total enrollment: 6,900
Technician enrollment: 2,283
Accreditation: SA
Admission: High-school graduate, SAT
TECHNOLOGIES: Animal science, accounting, data processing & systems analysis, office machine operation, secretarial science, electrical, electronic, medical, medical laboratory, nursing, X-ray, engineering science, forest products, graphic arts, industrial, air conditioning, heating, & refrigeration, automotive, diesel, drafting & tool design, machine tool, welding, criminal justice

Piedmont Technical College,
P.O. Drawer 1467, Greenwood, SC 29646
Public. Lex D. Walters, pres.
Total enrollment: 11,534
Technician enrollment: 1,776
Accreditation: SA, ABET
Admission: Open-door policy
TECHNOLOGIES: Accounting, advertising/marketing, data processing & systems analysis, management & supervision, office machine operation, secretarial science, construction, electronic, industrial electronics, inhalation/respiratory therapy, medical assistant, nursing, operating room assistant, X-ray, engineering science, industrial, textile, automotive, machine tool, welding, social welfare & services, criminal justice

Spartanburg Technical College,
Drawer 4386, Spartanburg, SC 29303
Public. Joe D. Gault, pres.
Total enrollment: 3,866
Technician enrollment: 1,800
Accreditation: SA, ABET, AMA, ADA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, management & supervision, office machine operation, secretarial science, civil, computer maintenance, electronic, industrial electronics, dental assistant, inhalation/respiratory therapy, medical laboratory, nursing, operating room assistant, X-ray, engineering science, industrial, air conditioning, heating, & refrigeration, auto body, automotive, drafting, machine tool, mechanical, welding, child growth & care, community service, special education, transportation

Sumter Area Technical College,
506 N. Guignard Dr., Sumter, SC 29150
Public. James L. Hudgins, pres.
Total enrollment: 2,801
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Agricultural**, accounting**, advertising/marketing**, banking & finance**, data processing & systems analysis, management & supervision**, office machine operation*, real estate*, secretarial science**, architectural drafting**, civil**, masonry*, interior design*, upholstery*, electrical**, electronic**, radio & TV*, environmental**, sanitary engineering*, emergency medical*, nursing, ceramic*, occupational safety*, photographic*, air conditioning, heating, & refrigeration**, automotive**, heavy equipment operation/service**, machine tool**, welding**, criminal justice

Tri-County Technical College,
P.O. Box 587, Pendleton, SC 29670
Public. Don C. Garrison, pres.
J.L. Hunter, dean of instr.
Total enrollment: 2,450
Technician enrollment: 2,180
Accreditation: SA
Admission: High-school graduate, placement exam
TECHNOLOGIES: Animal science, accounting, business administration, computer science, secretarial science, word processing, electronic, industrial electronics, microelectronics, medical laboratory, nursing, textile, air conditioning, heating, & refrigeration, auto body, automotive, drafting, welding, child growth & care, broadcasting, criminal justice

Trident Technical College*,
P.O. Box 10367, Charleston, SC 29411

Midland College,
3600 North Garfield, Midland, TX 79701
Public. Jess H. Parrish, pres.
Total enrollment: 3,228
Technician enrollment: 1,000
Accreditation: SA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, accounting, business administration, computer science, data processing & systems analysis, management & supervision, merchandising/sales, office machine operation, real estate, secretarial science, architectural drafting, architectural engineering, masonry*, electronic, radio & TV, inhalation/respiratory therapy*, nursing, ceramic*, graphic arts, auto-diesel, automotive, drafting, machine tool, welding, early childhood education*, police science, journalism

Midwestern State University,
3400 Taft Blvd., Wichita Falls, TX 76308
Public. Louis J. Rodriguez, pres.
Total enrollment: 4,800
Accreditation: SA
TECHNOLOGIES: Computer science (2-4), secretarial science (4), electronic, dental, dental hygiene (2-4), medical laboratory (2-4), X-ray (2-4), criminal justice (4)

Mountain View College,
4849 W. Illinois Ave., Dallas, TX 75211
Public. Bill Jordan, pres.
J. Nelson, assoc. dean, tech./occ.
Total enrollment: 6,000
Technician enrollment: 2,160
Accreditation: SA
Admission: High-school graduate or 18 years of age or older
TECHNOLOGIES: Accounting, data processing & systems analysis, management & supervision, secretarial science, electronic, instrumentation, aviation/aviation maintenance, drafting, machine tool, welding

National Education Center,
3040 N. Buckner, Dallas, TX 75228
Private. L.H. Broesder, dir.
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Computer science, data processing & systems analysis, computer maintenance, electronic, industrial electronics

Navarro College,
P.O. Box 1170, Corsicana, TX 75110
Public. Kenneth P. Walker, pres.
E.A. Kasprzyk, dean, career ed.
Total enrollment: 2,363
Technician enrollment: 900
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Agricultural, accounting, banking & finance, computer science, data processing & systems analysis, management & supervision, real estate, secretarial science, commercial broadcast, industrial electronics, radio & TV, medical laboratory, nursing, aeronautical, air conditioning, heating, & refrigeration, drafting, machine tool, welding, fire science, criminal justice

North Harris County College,
2700 W.W. Thorne Dr., Houston, TX 77073
Public. Lester Burks, dean, vo-tech ed.
Total enrollment: 10,300
Technician enrollment: 4,500
Accreditation: SA
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, legal secretary, management & supervision, merchandising/sales, office machine operation, personnel, real estate, retail management, secretarial science, word processing, electronic, dental, emergency medical*, nursing, air conditioning, heating, & refrigeration, auto-diesel, diesel, drafting, welding, police science, cosmetology, criminal justice

North Lake College,
5001 N. MacArthur Blvd., Irving, TX 75062
Public. James F. Horton, Jr., pres.
C.A. Weaver, assoc. dean, tech./occ. prog.
Accreditation: SA
TECHNOLOGIES: Accounting, advertising/marketing, business administration, computer science, management & supervision, office machine operation, real estate, secretarial science, word processing, building construction, electrical, optical, air conditioning, heating, & refrigeration, diesel

Odessa College,
P.O. Box 3752, Odessa, TX 79760
Public. Philip T. Speegle, pres.
J.R. Tarter, assoc. dean, occ. prog.
Total enrollment: 4,300
Technician enrollment: 2,200
Accreditation: SA, State Ed. Dept.
Admission: Open-door policy
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, management & supervision, merchandising/sales, office machine operation, real estate, retail management, secretarial science, word processing, architectural drafting, building construction, commercial broadcast, electrical, electronic, radio & TV, emergency medical, inhalation/respiratory therapy, medical laboratory, nursing, operating room assistant, X-ray, cabinet & furniture making, instrumentation, photographic, quality control, solar, technical & industrial illustration, air conditioning, heating, & refrigeration, auto body, auto-diesel, automotive, diesel, drafting, machine tool, welding, child growth & care, fire science, police science, recreation, teacher assistant, broadcasting, cosmetology, criminal justice, journalism

Paris Junior College,
2400 Clarksville St., Paris, TX 75460
Public. Louis B. Williams, pres.
Harley Davis, dean, applied sci.
Total enrollment: 2,753
Technician enrollment: 1,375
Accreditation: SA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, agricultural, agri-mechanics, accounting, business administration, computer science, data processing & systems analysis, management & supervision, office machine operation, real estate, secretarial science, word processing, construction, electronic, occupational therapy, cabinet & furniture making, solar, air conditioning, heating, & refrigeration, drafting, machine tool, welding, community service

Paul Quinn College*,
1020 Elm St., Waco, TX 76704
Private. Rev. William D. Watley, pres.
W. Walton, tech. ed. chm.
Total enrollment: 435
Technician enrollment: 32
Accreditation: SA
Admission: High-school graduate, ACT
TECHNOLOGIES: Accounting (4), business administration (4), insurance (4), secretarial science (4), dental assistant (4), laboratory technician (4), child growth & care (4), social welfare & services (4)

Prairie View A&M University,
Prairie View, TX 77445
Public. Percy A. Pierre, pres.
S.R. Collins, dean
Total enrollment: 4,700
Technician enrollment: 500
Accreditation: SA
Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Animal science (4), accounting (4), advertising/marketing (4), banking & finance (4), computer science (4), merchandising/sales (4), secretarial science, architectural engineering (4), building construction, construction, dietetics (4), cabinet & furniture making, air conditioning, heating, & refrigeration, automotive (2-4), community service*, library science (4), recreation (4), commercial art & design (4), criminal justice (4), transportation*

Ranger Junior College,
College Circle, Ranger, TX 76470
Public. Jack Elsom, pres.
L. Marusak, dean of instr.
Total enrollment: 600
Technician enrollment: 240
Accreditation: SA
Admission: Open-door policy
TECHNOLOGIES: Agricultural, animal science, banking & finance, business administration,

computer science, legal secretary, secretarial science, building construction, emergency medical*, air conditioning, heating, & refrigeration, automotive, welding

Richland College of Dallas Community College, 12800 Abrams Rd.,
Dallas, TX 75243
Public. Stephen K. Mittelstet, pres.
Total enrollment: 14,500
Technician enrollment: 2,600
Accreditation: SA
Admission: High-school graduate or GED or 18 years of age or older
TECHNOLOGIES: Horticulture, accounting, banking & finance, computer science, data processing & systems analysis, management & supervision, real estate, secretarial science, building construction, electrical, electro-mechanical, manufacturing, quality control, fluid power, hydraulic, mechanical, teacher assistant

Saint Edward's University,
3001 S. Congress, Austin, TX 78704
Private. Josie Barrett, dir. of adm.
Total enrollment: 2,500
Accreditation: SA
Admission: High-school graduate or GED, SAT or ACT
TECHNOLOGIES: Accounting (4), advertising/marketing (4), banking & finance (4), management & supervision (4), criminal justice (4)

Saint Philips College,

Total enrollment: 7,500
Technician enrollment: 4,800
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, legal secretary, management & supervision, merchandising/sales, office machine operation, real estate, secretarial science, word processing, architectural drafting, civil, apparel design/manufacturing, culinary, interior design, upholstery, electrical, industrial electronics, microelectronics, radio & TV, biomedical, inhalation/respiratory therapy, laboratory technician, nursing, occupational therapy, operating room assistant, X-ray, auto body, auto-diesel, automotive, aviation/aviation maintenance, diesel, industrial drafting & design, machine tool, sheet metal, welding

San Antonio College,
1300 San Pedro, San Antonio, TX 78284
Public. Max Castillo, pres.
Nellie Thorogood, dean, occ. ed. & tech.
Total enrollment: 20,585
Technician enrollment: 8,615
Accreditation: SA, NLN, ADA, AMA, Amer. Board of Funeral Svc. Ed., State Ed. Dept.
Admission: High-school graduate or GED or 21 years of age or older
TECHNOLOGIES: Advertising/marketing, banking & finance, business administration, data processing & systems analysis, legal secretary, management & supervision, office machine operation, real estate, secretarial science, word processing, architectural drafting, building construction, civil, construction, structural engineering & design, commercial broadcast, computer maintenance, electrical, electronic, electronic communications, electronic drafting, microelectronics, radio & TV, dental assistant, medical assistant, nursing, engineering science, manufacturing, occupational safety, drafting, industrial drafting & design, mechanical & production, child growth & care, correctional science, court reporting, early childhood education, fire science, legal/paralegal, library science, police science, broadcasting, commercial art & design, criminal justice, mortuary science

San Jacinto College, Central Campus,
8060 Spencer Hwy., Pasadena, TX 77505
Public. Ron Rucker, pres.
B. McKinnerney, dean, occ. ed.
Clay Kelley, dir., occ. ed.
Total enrollment: 10,400
Technician enrollment: 4,950
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Horticulture, accounting, advertising/marketing, banking & finance, business administration, computer science, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, management & supervision, merchandising/sales, real estate, secretarial science, word processing, architectural drafting, civil, surveying, apparel design/manufacturing, culinary, food processing & distribution, interior design, upholstery, computer maintenance, electrical, electro-mechanical, electro-mechanical drafting, electronic, electronic drafting, microelectronics, radio & TV, dietetics, emergency medical, inhalation/respiratory therapy, medical laboratory, nursing, operating room assistant, radiation, X-ray, chemical, energy, engineering science, graphic arts, industrial, instrumentation, manufacturing, metallurgical, occupational safety, photographic, quality control, solar, technical & industrial illustration, textile, aeronautical, air conditioning, heating, & refrigeration, appliance service, auto body, auto-diesel, automotive, drafting, fluid power, heavy equipment operation/service, industrial drafting & design, mechanical, mechanical & production, welding, child growth & care, correctional science, early childhood education, fire science, police science, commercial art & design, cosmetology, criminal justice, journalism, special education, technical writing, transportation

San Jacinto College, North Campus*,
5800 Uvalde Rd., Houston, TX 77049
Public. Thomas M. Spencer, pres.
E. Bryant, dean, tech. div.
Total enrollment: 3,000
Technician enrollment: 1,500
Accreditation: SA, State Ed. Dept.
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, management & supervision, real estate, construction, apparel design/manufacturing, culinary, interior design, computer maintenance, electrical, electronic, radio & TV, air, water, & wastewater, dietetics, nursing, air conditioning, heating, & refrigeration, appliance service, auto body, diesel, drafting, sheet metal, welding, child growth & care, fire science, police science, cosmetology

San Jacinto College, South Campus,
13735 Beamer Rd., Houston, TX 77089
Public. Tom Sewell, chancellor
Parker Williams, pres.
R. Robinson, dir., occ./tech. ed.
Total enrollment: 3,200
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, banking & finance, business administration, computer science, data processing & systems analysis, management & supervision, office machine operation, real estate, retail management, secretarial science, word processing, architectural drafting, architectural engineering, electrical, electronic, medical assistant, nursing, drafting, cosmetology

Schreiner College,
Kerrville, TX 78028
Private.
Total enrollment: 747
Accreditation: SA
Admission: High-school graduate or GED, SAT or ACT
TECHNOLOGIES: Management & supervision, real estate, secretarial science**, nursing*

South Plains College, Levelland,
Levelland, TX 79336
Public. Marvin Baker, pres.
Frank Hunt, dean, TVO div.
Total enrollment: 2,845
Technician enrollment: 1,346
Accreditation: SA
Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Agri-business, agricultural (4), horticulture (4), soils (4), accounting, advertising/marketing, business administration (4), data processing & systems analysis, management & supervision, office machine operation, real estate, secretarial science, food processing & distribution, electronic, radio & TV, air, water, & wastewater, medical, nursing, radiation, X-ray, air conditioning, heating, & refrigeration, auto body, automotive, diesel, drafting, industrial drafting & design, welding, legal/paralegal, police science, petroleum

South Plains College, Lubbock,
Lubbock, TX 79401
Public. Marvin Baker, pres.
Frank Hunt, dean, TVO div.
Ronnie Glasscock, dean
Total enrollment: 1,000
Accreditation: SA
Admission: High-school graduate
TECHNOLOGIES: Accounting, hospitality—hotel, motel, & restaurant management, legal secretary, management & supervision, real estate, secretarial science, food processing & distribution, electronic, dietetics, inhalation/respiratory therapy, medical records, medical secretary, nursing, operating room assistant, X-ray, automotive, child growth & care, fire science

South Plains College, Regional Occupational Center*, Plainview, TX 79072
Public. Marvin Baker, pres.
Frank Hunt, dean, TVO div.
Dan Shockey, dean, ROC

Total enrollment: 300
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Management & supervision, real estate, secretarial science, radio & TV, nursing, automotive, welding, child growth & care, fire science, social welfare & services

Southwest Texas Junior College,
Uvalde, TX 78801
Public. Billy A. Word, dir., vo-tech ed.
Total enrollment: 2,200
Technician enrollment: 570
Accreditation: SA
Admission: High-school graduate, ACT
TECHNOLOGIES: Agricultural, data processing & systems analysis, management & supervision, secretarial science, nursing, air conditioning, heating, & refrigeration, automotive, aviation/aviation maintenance, diesel, child growth & care, police science

Southwestern Adventist College,
Keene, TX 76059
Private. Don McAdams, pres.
C.M. Underhill, tech. ed. chm.
Total enrollment: 700
Technician enrollment: 50
Accreditation: SA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting (4), business administration (4), legal secretary, secretarial science (2-4), architectural drafting, culinary, food processing & distribution, electrical, dietetics, medical laboratory (4), nursing (2-4), industrial (2-4), drafting, social welfare & services (2-4), broadcasting (4)

Sul Ross State University,
Alpine, TX 79830
Public. C.R. Richardson, pres.

TECHNOLOGIES: Accounting (4), advertising/marketing (4), business administration (4), management & supervision (4), commercial broadcast (4), radio & TV (4), biomedical (4), emergency medical*, health (4), medical assistant (4), medical laboratory (4), medical records (4), nursing (4), early childhood education (4), recreation (4), social welfare & services (4), broadcasting (4), special education (4), technical writing (4)

Beckley College,
P.O. Drawer AG, Beckley, WV 25801
Private. John W. Saunders, pres.
Total enrollment: 1,581
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting*, advertising/marketing*, banking & finance, business administration, computer science, merchandising/sales*, office machine operation*, real estate*, secretarial science, broadcasting

Davis and Elkins College,
Elkins, WV 26241
Private. C. Brent DeVore, pres.
Blaine E. Steensland, tech. ed. chm.
Total enrollment: 951
Technician enrollment: 225
Accreditation: NCA
Admission: High-school graduate, SAT or ACT
TECHNOLOGIES: Accounting (2-4), advertising/marketing (4), banking & finance (4), computer science, management & supervision (4), merchandising/sales, retail management (4), secretarial science (2-4), environmental (4), nursing, chemical (4), early childhood education (4), social welfare & services (4), journalism (4)

Fairmont State College,
Fairmont, WV 26554
Public. Wendell Hardway, pres.
James Hales, dir., tech.
Total enrollment: 5,220
Technician enrollment: 2,295
Accreditation: NCA

Admission: Open-door policy
TECHNOLOGIES: Animal science, accounting (2-4), advertising/marketing (2-4), banking & finance (2-4), business administration (2-4), computer science, insurance, legal secretary, management & supervision (2-4), merchandising/sales, office machine operation, real estate, retail management, secretarial science, architectural drafting, architectural engineering, building construction, civil, construction, structural engineering & design, surveying, food processing & distribution, interior design, commercial broadcast, electrical, electro-mechanical, radio & TV, emergency medical, health, medical laboratory, medical records, mental health, nursing, graphic arts, occupational safety (4), drafting, child growth & care, community service, correctional science (2-4), fire science, library science (4), police science, broadcasting, commercial art & design, criminal justice (2-4)

Glenville State College,
Glenville, WV 26351
Public. William Simmons, pres.
Edwin Grafton, chm., forest tech.
Total enrollment: 1,500
Technician enrollment: 200
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Forestry, business administration, secretarial science, surveying

James Rumsey Vocational Technical Center,
Rte. #6, Box 268, Martinsburg, WV 25401
Public. Charles I. Rhodes, dir.
Total enrollment: 980
Technician enrollment: 80
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGY: Electronic

Marshall University,
Huntington, WV 25701
Public. Robert B. Hayes, pres.
Glenn E. Smith, acting dean
Total enrollment: 11,741
Technician enrollment: 1,680
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, banking & finance, business administration, legal secretary**, management & supervision, real estate, retail management, secretarial science, emergency medical*, nursing, fire science**, legal/paralegal, library science, police science

Parkersburg Community College,
Rte. 5, Box 167-A,
Parkersburg, WV 26101
Public. Eldon Miller, pres.
Allan F. Gates, dean of instr.
Total enrollment: 3,365
Technician enrollment: 1,790
Accreditation: NCA
Admission: Requirements vary—contact school
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, real estate, secretarial science, electronic, emergency medical, medical laboratory, nursing, X-ray, engineering science, air conditioning, heating, & refrigeration, automotive, drafting, industrial drafting & design, machine tool, mechanical, welding, child growth & care, court reporting, fire science, social welfare & services, criminal justice

Potomac State College of West Virginia University, Keyser, WV 26726
Public. J.L. McBee, Jr., exec. dean
D.A. Harrington, assoc. dean
Total enrollment: 1,105
Technician enrollment: 249
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, agricultural, agri-mechanics, animal science, horticulture, soils, accounting, business administration, computer science, data processing & systems analysis, secretarial science, civil, engineering science, mechanical

Raleigh County Vocational Technical Center*,
410-1/2 Stanaford Rd., Beckley, WV 25801
Public. Clacy E. Williams, prin.
Total enrollment: 1,075
Technician enrollment: 1,075
Accreditation: NCA, State Ed. Dept.
Admission: Entrance exam
TECHNOLOGIES: Accounting, data processing & systems analysis, architectural drafting, civil, construction, masonry, culinary, food processing & distribution, commercial broadcast, electronic, industrial electronics, radio & TV, environmental, natural resources management & conservation, dental assistant, medical assistant, nursing, graphic arts, metallurgical, auto body, automotive, machine tool, mechanical, welding, broadcasting, special education

Shepherd College,
Shepherdstown, WV 25443
Public. James A. Butcher, pres.
Carolyn Zinn, acad. dean
Total enrollment: 3,138
Technician enrollment: 616
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, merchandising/sales, secretarial science, emergency medical, nursing, photographic, fire science, commercial art & design

Southern West Virginia Community College,
Logan Campus, Logan, WV 25601
Williamson Campus, Williamson, WV 25661
Public. Gregory D. Adkins, pres.
William E. Barrett, dean of instr.
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting, banking & finance*, data processing & systems analysis*, management & supervision*, office machine operation*, personnel*, real estate*, retail management**, secretarial science, statistical*, electro-mechanical*, medical laboratory, nursing, occupational safety*, automotive, drafting, welding, child growth & care, social welfare & services, criminal justice

West Liberty State College,
West Liberty, WV 26074
Public. James L. Chapman, pres.
Clyde Campbell, acad. dean
Total enrollment: 2,500
Accreditation: NCA
Admission: High-school graduate, ACT
TECHNOLOGIES: Accounting (4), advertising/marketing (4), banking & finance (4), business administration (4), data processing & systems analysis (4), hospitality—hotel, motel, & restaurant management (4), retail management (4), secretarial science (4), dental (2-4), health (4), medical laboratory (4), nursing (4), public service (4), broadcasting (4), commercial art & design (4), criminal justice (4), urban engineering/planning (4)

West Virginia College of Technology*,
2345 Chesterfield Ave. S.E.,
Charleston, WV 25304
Private. Douglas Stromberg, dir.
George R. Sutterly, adm. dir.
Total enrollment: 280
Admission: High-school graduate or GED
TECHNOLOGIES: Data processing & systems analysis, electronic, electronic communications, radio & TV, biomedical

West Virginia Institute of Technology,
Montgomery, WV 25136
Public. Leonard C. Nelson, pres.
Donald Hagen, dean, comm. tech. college
Total enrollment: 3,344
Technician enrollment: 947
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting, data processing & systems analysis, legal secretary, retail management, secretarial science, building construction, civil, surveying, electrical, electronic (4), dental hygiene, medical secretary, nursing, engineering science (4), graphic arts, drafting, fluid power, mechanical, mining (2-4)

West Virginia Northern Community College,
College Square, Wheeling, WV 26003
Public. Daniel B. Crowder, pres.
Rita S. Meyer, dean of instr.
Total enrollment: 3,814
Technician enrollment: 2,000
Accreditation: NCA
Admission: Open-door policy, special requirements for allied health
TECHNOLOGIES: Accounting, advertising/marketing, banking & finance, business administration, data processing & systems analysis, hospitality—hotel, motel, & restaurant management, insurance, legal secretary, management & supervision, merchandising/sales, office machine operation, real estate, secretarial science, electro-mechanical, electro-mechanical drafting, electronic, environmental, emergency medical, inhalation/respiratory therapy, laboratory technician, nursing, operating room assistant, occupational safety, air conditioning, heating, & refrigeration, correctional science, fire science, police science, social welfare & services

West Virginia State College,
Institute, WV 25112
Public. Thomas W. Cole, Jr., pres.
Harry V. Scott, dean of CC
Ancella Bickley, vice-pres., acad. affairs
Total enrollment: 4,414
Technician enrollment: 1,397

Accreditation: NCA, ACS, NCATE, CSWE
Admission: High-school graduate, ACT; open-door policy for CC programs
TECHNOLOGIES: Accounting (2-4), banking & finance, computer science, hospitality—hotel, motel, & restaurant management (2-4), insurance, management & supervision, merchandising/sales, real estate, secretarial science (2-4), architectural drafting (2-4), building construction (2-4), electronic, dental, medical assistant, nuclear medicine, chemical, graphic arts (2-4), automotive, machine tool, fire science, recreation, social welfare & services (2-4), criminal justice (2-4), transportation

WISCONSIN

Acme Institute of Technology, Inc., Hales Corners, 5101 S. 116th St.,
Hales Corners, WI 53130
Private. William W. Warren, pres.
Total enrollment: 81
Technician enrollment: 81
Accreditation: NATTS
Admission: High-school graduate or GED
TECHNOLOGIES: Industrial, manufacturing, plastics, drafting, drafting & tool design

Acme Institute of Technology, Inc., Manitowoc, 1122 Washington St.,
Manitowoc, WI 54220
Private. William W. Warren, pres.

River Falls, WI 54022
Public. George R. Field, chancellor
Gary E. Rohde, dean

Total enrollment: 5,500
Accreditation: NCA
Admission: High-school graduate
TECHNOLOGIES: Agri-business (2-4), agricultural (2-4), agri-mechanics (2-4), animal science, forestry (2-4), horticulture (2-4), soils (2-4), food processing & distribution (2-4), electrical, natural resources management & conservation (2-4), heavy equipment operation/ service, mechanical, recreation

University of Wisconsin—Stevens Point,
Stevens Point, WI 54481
Public. Philip Marshall, chancellor
P. McDonough, vice-chancellor
Total enrollment: 9,100
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Forestry (4), pulp & paper (4), soils (4), accounting (4), business administration (4), computer science, culinary (4), food processing & distribution (4), interior design (4), air, water, & wastewater (4), natural resources management & conservation (4), medical laboratory (4), early childhood education (4), recreation, fisheries (4)

University of Wisconsin—Stout,
Menomonie, WI 54751
Public. Robert S. Swanson, chancellor
M.J. Bensen, dean, ind. & tech.
Total enrollment: 7,600
Technician enrollment: 4,500
Accreditation: NCA, NCATE
Admission: High-school graduate or GED
TECHNOLOGIES: Business administration (4), hospitality—hotel, motel, & restaurant management (4), merchandising/sales (4), building construction (4), apparel design/manufacturing (4), food processing & distribution (4), interior design (4), electronic (4), graphic arts (4), industrial (4), occupational safety (4)

University of Wisconsin—Superior,
Superior, WI 54800
Public. Karl W. Meyer, chancellor
Total enrollment: 2,171
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Business administration (4), data processing & systems analysis (4), secretarial science (2-4), laboratory technician (4), criminal justice (4)

Viterbo College,
815 9th St., LaCrosse, WI 54601
Private. Robert E. Gibbons, pres.
Total enrollment: 1,165
Accreditation: NCA
Admission: High-school graduate or GED, SAT or ACT
TECHNOLOGIES: Accounting (4), business administration (4), computer science (4), personnel (4), dietetics (4), medical records (4), nursing (4), early childhood education (4), social welfare & services (4), commercial art & design (4), journalism

Waukesha County Technical Institute,
800 Main St., Pewaukee, WI 53072
Public. Richard T. Anderson, dist. dir.
J. Catania, asst. dist. dir.
Total enrollment: 36,000
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Accounting, advertising/marketing, data processing & systems analysis, management & supervision, merchandising/sales, real estate, retail management, secretarial science, culinary*, electronic, radio & TV*, emergency medical*, medical assistant*, nursing*, operating room assistant*, engineering science, occupational safety, auto body, automotive, drafting, industrial drafting & design, welding, child growth & care, fire science, police science, cosmetology, criminal justice

Western Wisconsin Technical Institute,
6th & Vine Sts., LaCrosse, WI 54601
Public. Charles Richardson, dir.
Victor Larsen, instr. svcs.
Total enrollment: 3,500
Technician enrollment: 2,400
Accreditation: NCA
Admission: Requirements vary—contact school
TECHNOLOGIES: Agri-business**, agricultural*, agri-mechanics*, animal science*, horticulture*, soils*, accounting**, advertising/marketing**, banking & finance**, data processing & systems analysis**, hospitality—hotel, motel, & restaurant management*, management & supervision**, merchandising/sales, office machine operation*, personnel*, real estate**, retail management**, secretarial science**, word processing, building construction*, masonry (4), surveying*, apparel design/manufacturing*, interior design**, upholstery*, commercial broadcast*, computer maintenance, electro-mechanical, industrial electronics, radio & TV*, air, water, & wastewater*, environmental, biomedical**, dental assistant**, emergency medical*, inhalation/respiratory therapy*, laboratory technician, medical assistant*, medical records**, nursing**, operating room assistant*, pharmacy assistant*, X-ray**, cabinet & furniture making, graphic arts**, industrial**, instrumentation*, lithographic**, manufacturing, metallurgical*, numerical control*, photographic*, plastics*, quality control*, solar*, technical & industrial illustration, air conditioning, heating, & refrigeration**, appliance service*, auto body*, auto-diesel**, automotive**, diesel**, drafting*, drafting & tool design*, fluid power*, hydraulic*, industrial drafting & design**, machine tool**, mechanical*, mechanical & production*, sheet metal*, small engine mechanics*, welding, child growth & care, early childhood education*, fire science**, police science**, commercial art & design**, cosmetology*, special education*, technical writing*

Wisconsin Indianhead Technical Institute, Ashland, 2100 Beaver Ave.,
Ashland, WI 54806
Public. Don Marcouiller, dir.
Total enrollment: 341
Technician enrollment: 145
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting, banking & finance, hospitality—hotel, motel, & restaurant management, management & supervision*, secretarial science, culinary, nursing, automotive, machine tool, welding

Wisconsin Indianhead Technical Institute, New Richmond, 1019 S. Knowles Ave.,
New Richmond, WI 54017
Public. Marylin McCarty, adm.
W. Leonard, instr. svcs. coord.
Peter Strong, student svcs. coord.
Total enrollment: 500
Technician enrollment: 350
Accreditation: NCA, State Ed. Dept.
Admission: 16 years of age or older, special requirements for some programs
TECHNOLOGIES: Agricultural, agri-mechanics, animal science, soils*, accounting, advertising/marketing, data processing & systems analysis, secretarial science, word processing, computer maintenance, medical assistant, nursing, industrial, machine tool, small engine mechanics, welding, court reporting

Wisconsin Indianhead Technical Institute, Rice Lake, 1900 College Dr., Rice Lake, WI 54868
Public. Don Mense, adm.
John W. Graf, T&I supv.
Albert Schultz, ag. & bus. supv.
Albert Richard, bus./mktg. supv.
Total enrollment: 778
Technician enrollment: 280
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, accounting, advertising/marketing, banking & finance, secretarial science, word processing*, architectural drafting, nursing, industrial drafting & design, machine tool

Wisconsin Indianhead Technical Institute, Superior, 600 N. 21st St.,
Superior, WI 54880
Public. Richard R. Parish, dir.
B.M. Miller, student svcs.
Total enrollment: 890
Technician enrollment: 600
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting, advertising/marketing, data processing & systems analysis, secretarial science, word processing*, industrial electronics, nursing, industrial drafting & design, machine tool, cosmetology

WYOMING

Casper College,
125 College Dr., Casper, WY 82601
Public. Don Knerl, dir., career studies
Total enrollment: 4,389
Technician enrollment: 677
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, agricultural, animal science, accounting, advertising/marketing, computer science, data processing & systems analysis, management & supervision, secretarial science, word processing, construction, computer maintenance, electrical, electronic, air, water, & wastewater, natural resources management & conservation, nursing, X-ray, chemical, automotive, diesel, drafting, heavy equipment operation/service, welding, criminal justice

Central Wyoming College,
Riverton, WY 82501
Public. Edward M. Donovan, pres.
Vincent Zocco, dean of instr.

TECHNOLOGIES: Agri-business, agricultural, accounting, advertising/marketing, banking & finance, business administration, insurance, real estate, secretarial science, building construction, civil, surveying, food processing & distribution, commercial broadcast, electrical, electronic, electronic communications, industrial electronics, radio & TV, automotive, drafting, library science, police science, broadcasting, criminal justice

Eastern Wyoming College,
3200 West C, Torrington, WY 82240
Public. Charles Rogers, pres.
Guido E. Smith, dean
Total enrollment: 1,000
Technician enrollment: 300
Admission: Open-door policy
TECHNOLOGIES: Agri-business, animal science, soils, office machine operation, secretarial science, health, air conditioning, heating, & refrigeration, welding, early childhood education, police science, cosmetology, special education

Laramie County Community College,
1400 E. College Dr., Cheyenne, WY 82001
Public. Robert P. Schliske, dean of instr.
Total enrollment: 6,200
Technician enrollment: 1,520
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agri-business, agricultural, computer science, data processing & systems analysis, management & supervision, office machine operation, secretarial science, food processing & distribution, environmental, X-ray, engineering science, auto body, diesel, heavy equipment operation/service, internal combustion, small engine mechanics, welding, correctional science, early childhood education, fire science, legal/paralegal, police science, criminal justice, journalism

Northwest Community College,
Powell, WY 82435
Public. SinClair Orendorff, pres.
Richard Weeks, dean of instr.
S. Christensen, assoc. dean, occ. prog.
Total enrollment: 1,350
Technician enrollment: 400
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Agri-business, agricultural, agri-mechanics, animal science, horticulture, business administration, data processing & systems analysis, secretarial science, word processing, environmental, natural resources management & conservation, medical laboratory, nursing, graphic arts, lithographic, photographic, welding, commercial art & design, journalism

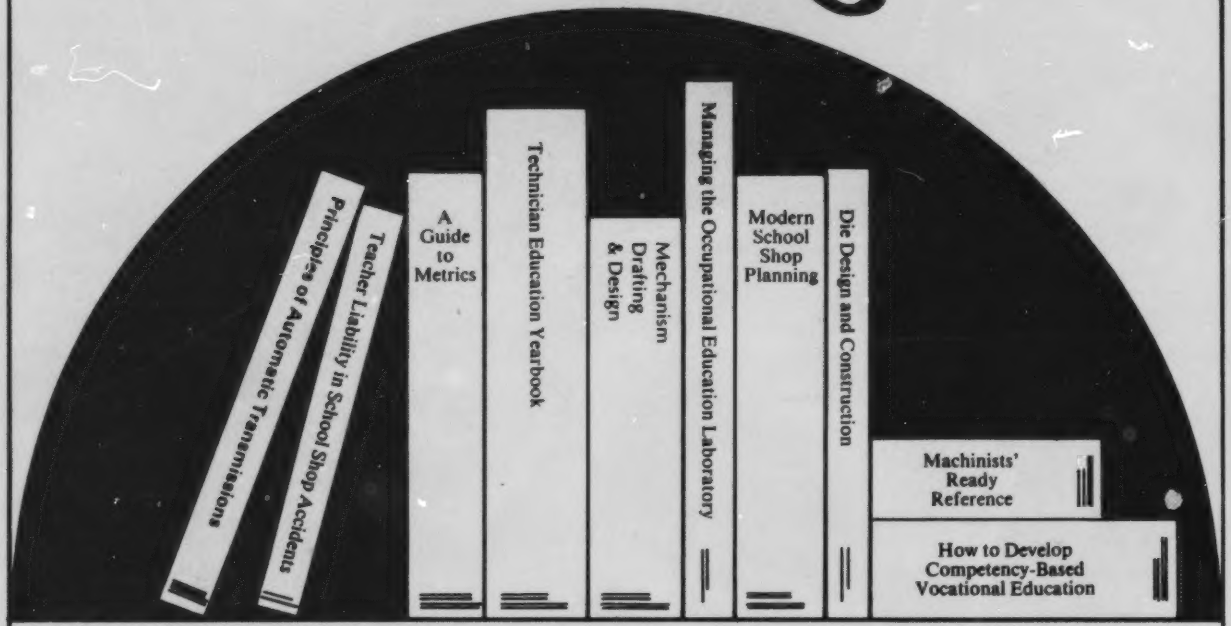
Sheridan College,
Sheridan, WY 82801
Public. Gordon Ward, pres.
Fred P. Black, chm., career/tech. div.
Total enrollment: 1,295
Accreditation: NCA
Admission: High-school graduate or GED
TECHNOLOGIES: Agricultural, accounting, advertising/marketing, banking & finance, business administration, computer science, management & supervision, secretarial science, civil, electrical, environmental, natural resources management & conservation, dental, dental assistant, laboratory technician, nursing, engineering science, solar, diesel, small engine mechanics, criminal justice

Western Wyoming Community College,
2500 College Dr., Rock Springs, WY 82901
Public. Bert S. Slafter, pres.
David Kathka, dean of instr.
Total enrollment: 2,800
Technician enrollment: 490
Accreditation: NCA
Admission: Open-door policy
TECHNOLOGIES: Accounting*, advertising/marketing, banking & finance, business administration, computer science, management & supervision, secretarial science, word processing, building construction, electrical, electromechanical, electronic, industrial electronics, inhalation/respiratory therapy, medical assistant, medical laboratory, medical records, X-ray, engineering science, instrumentation, auto-diesel*, diesel*, fluid power*, hydraulic*, machine tool, welding

From the publishers of *Technician Education Yearbook*

(people with a really special interest in industrial vocational-technical education)

Books



Principles of Automatic Transmissions
Teacher Liability in School Shop Accidents
A Guide to Metrics
Technician Education Yearbook
Mechanism Drafting & Design
Managing the Occupational Education Laboratory
Modern School Shop Planning
Die Design and Construction
Machinists' Ready Reference
How to Develop Competency-Based Vocational Education

- **REFERENCE BOOKS**
- **SUPPLEMENTARY BOOKS**
- **TEXTBOOKS**
- **TEXT-WORKBOOKS**

Books that can be used for the full gamut of industrial education. Useful as texts or supplementary material in junior high and senior high industrial arts and vocational education courses, in area vocational schools, in community colleges and technical institutes, in teacher-training institutions, in apprentice training, and in adult education.

Directory of Technologies Offered by Institutions

THIS directory lists 160 different technologies being offered today, with the names of the institutions offering each technology given alphabetically by state. The listing was compiled from the questionnaires returned by the institutions themselves.

The 160 technologies are grouped into 11 major categories: Agriculture, Business-Related, Civil, Consumer Sciences, Electrical/Electronics, Environmental Control, Health, Industrial, Mechanical, Public Service, and Miscellaneous. Only the names of the institutions are included in this directory. To find out the address for admission, accreditation, etc., refer to its listing in the Directory of Institutions, pages 57-207.

The following abbreviations are used in this directory:

AVTC—Area Vocational-Technical Center
AVTI—Area Vocational-Technical Institute
AVTS—Area Vocational-Technical School
Ad.—Adults.
Adm.—Admissions
Admin.—Administration
Aero—Aeronautics, Aeronautical
Ag.—Agriculture
Ag-Tech—Agricultural & Technical
Assts.—Assistants
BOCES—Board of Cooperative Educational Services
C—College
CC—Community College
CUNY—City University of New York
Co.—County
Comm.—Community
Comp.—Comprehensive
Corp.—Corporation
Ctr(s).—Center(s)
Dept.—Department
Dist.—District
Div.—Division
Ed.—Education(al)
Engin.—Engineering
Ext.—Extension
Gen.—General
Grad.—Graduate
HS—High School
Ind.—Industrial
Inst.—Institute
Int'l—International
JC—Junior College
Jt.—Joint
Lab.—Laboratory
Med.—Medical
Mgmt.—Management
Occ.—Occupational
Polytech—Polytechnical
PSU—Pennsylvania State University
Pub.—Public
Rd.—Road
Reg.—Regional
SC—State College
SU—State University
SUNY—State University of New York
Sch(s).—School(s)
Sr.—Senior
St.—State
Svc.—Service
Tech.—Technical, Technology
Trng.—Training
U—University
Vo-Ed—Vocational Education
Vo-Tech—Vocational-Technical
Voc.—Vocational

Directory of Federal and State Officials of Technician Education

THIS directory of federal and state officials in charge of technician education has been carefully compiled from authoritative sources. Thanks are due the state directors of vocational and technical education for their cooperation.

This directory shows the person or persons responsible for the technician training programs in each state, even though the title may not include the words "technical education." In some states technician education is administered under the vocational education department. Other states, however, have a separate department for technician education.

Guidance counselors and other persons desiring specific information on technician education in the various states should find this directory valuable.

Federal Officials

U.S. DEPT. OF EDUCATION

Section 4

Professional Organizations Concerned with Technician Education

The American Association of Community and Junior Colleges

THE mission of the American Association of Community and Junior Colleges is to act as advocate, exert leadership, and provide services in support of community, junior, and technical colleges as these institutions deliver accessible educational opportunities designed to address the needs of individuals, organizations, and communities forming their constituencies. A majority of the 1,219 two-year colleges in the U.S., with a total regular credit enrollment of nearly five million students, are institutional members of AACJC, a nonprofit professional organization established in 1920 and headquartered in Washington, D.C.

The community college movement began around the turn of the century when there were approximately eight such institutions with a total enrollment of about 100 students. In 1962, there were 704 two-year colleges with an enrollment of approximately 818,869 students. Now, adding summer credit and adult education noncredit enrollment to the five million cited above, the nation's community, junior, and technical colleges are expected to have served nearly 12 million students by the end of the 1982-83 college year. During the past decade, the number of students receiving an associate degree increased by 60 percent, compared to an increase of 11 percent for baccalaureate degree recipients. In 1970, associate degrees comprised 18 percent of all degrees awarded. By 1980, they accounted for 23 percent.

Historians of the community college movement describe the colleges as the only type of educational institution which can truly be stamped "Made in U.S.A." The report of the Truman Commission on Higher Education in 1947 is considered the community college's manifesto. It called for opening the doors of higher education to those members of society who, throughout America's past, had lingered on the periphery of the American dream of equality for all. The commission stressed the role of the community college in tapping the vast potential of millions of citizens by offering opportunities for access to education and training.

The word *community* is central to the purposes of the colleges. Community, junior, and technical colleges are, in fact, community resources that shape their programs to meet the specific, endemic needs and interests of citizens residing in their service areas. The colleges pride themselves on offering "opportunity with excellence," a slogan that succinctly expresses AACJC's underlying purpose.

Four key characteristics capture the essence of community colleges. First, they are *community-based institutions* that establish linkages with community groups and employers and deliver programs at times and places convenient to students. Second, they are *cost effective*, offering high quality programs at low cost. In the 1982-83 academic year, for example, the annual average cost of tuition and fees at public two-year colleges was $558. Third, the colleges provide *a caring environment*, employing faculty who have expertise in their field are known for excellent teaching and meeting students' needs, regardless of age, sex, race, current job status, or previous academic preparation. Fourth, they *offer comprehensive programs*, including: (1) occupational/technical programs that prepare students for employment or assist those already employed to upgrade their skills; (2) liberal arts/transfer curricula that provide the first two years of preparation for a baccalaureate degree; (3) developmental education programs that help students improve their basic academic skills and competencies; and (4) adult and continuing education courses that respond to students' social, intellectual, and recreational interests.

Occupational/technical programs are the most popular at the community, junior, or technical college. More than 63 percent of all credit students in the colleges in the 1982-83 academic year were enrolled in these programs. At last count, the colleges offered approximately 1,400 different technical programs. One of the reasons for the proliferation and popularity of these programs is the leadership provided by AACJC. Over the past 20 years, the association has administered a rich variety of technically-oriented national demonstration programs with federal and private financial support. These programs have focused on health professions, police and fire science, criminal justice, organized labor cooperation, environmental sciences, energy education, and paralegal education. AACJC has also conducted projects in faculty and management development, curriculum development, programs for veterans and service personnel, voluntary board member training, and programs for the aging.

Most recently, AACJC has been the leader in a nationwide campaign for human resource development, stressing the significance of two-year colleges in helping the nation regain its former prominence in the world economy. AACJC's "Putting America Back to Work" program is designed to inform business leaders and public officials about the resources available in local colleges that, once tapped, could complement economic development activities; to organize local leadership groups to coordinate economic recovery efforts; to inform local colleges about opportunities available through federal and state government funding programs; and to provide training to ensure greater success in small business ventures. The association has also embarked on an aggressive federal legislative agenda aimed at stimulating an even greater community, technical, and junior college response to major technological changes in the economy.

AACJC's study of the associate degree, undertaken during the past year, should have an important impact on the future of these programs. The value and appropriateness of this degree, now awarded to more than 400,000 students annually, will be considered in terms of the mushrooming demand for technicians. The association also is considering the expansion of a new technology degree program that combines the last two years of high school with two years at the two-year college, enabling students to move competently into newly emerging high-technology occupations.

Current activities, model programs, trends, and projections are communicated to the community, junior, and technical college network through conferences and publications. In addition to the annual convention, AACJC conducts professional development programs and specialty workshops, often in cooperation with individual colleges or other organizations. AACJC annually publishes the *Directory of Community, Technical and Junior Colleges*, providing enrollment, cost, and staffing data on all accredited colleges offering the associate degree; the *Community and Junior College Journal;* the *AACJC Letter*, a biweekly newsletter addressed to college presidents; and a number of other newsletters and technical assistance documents.

Membership in AACJC is not limited to eligible institutions. Educational, individual, and business associate memberships are available with special advantages for each. For further information, contact the American Association of Community and Junior Colleges, Suite 410, One Dupont Circle N.W., Washington, D.C. 20036.

American Technical Education Association, Inc.

THE American Association of Technical High Schools and Institutes, the forerunner of the American Technical Education Association, Inc., was organized at Cass Technical High School in Detroit, Michigan, in December of 1928.

At the annual meeting in Miami, Florida, in December 1950, in the interest of simplicity and to indicate its broader scope, the name of the association was changed from the American Association of Technical High Schools and Institutes to the American Technical Education Association.

In 1960, the Regents of the University of the State of New York granted an absolute charter to the American Technical Education Association. The association is incorporated as a nonprofit education corporation. Dues are deductible in filing income taxes. The following is taken from the charter: "The purposes for which such corporation is formed are *(a)* To promote technical education for interested and qualified youth and adults; *(b)* To recommend standards for technical education; *(c)* To provide an opportunity for an exchange of ideas among persons in the technical education field."

There are several organizations with excellent activities in certain areas of technical education. ATEA cooperates with all of them, but ATEA is the one organization that devotes its energies exclusively to the field of technical education in *all* occupational areas, and at all levels, in both public and private schools. The U.S. Department of Education has chosen ATEA to cosponsor the National Conferences on Technical Education every year since 1969.

Newsletters—With the establishment of the new post of executive secretary, which was part of the constitution adopted in Philadelphia in 1957, the association began the publication of the ATEA *Journal.* The first of these was issued on June 19, 1958. These newsletters are issued six times a year. They contain a digest of much of the current literature in the field of technical education, including new textbooks. They are designed to inform ATEA members of pertinent, significant events and developments in the field of technical education, in schools and industry, and of both hardware and software teaching aids that are available.

Services to Individual Members—In addition to the conferences referred to above:

1. An annual convention is held with outstanding speakers who discuss the problems of technical education and their solutions.
2. Regional conferences are also held. These provide for greater participation by members.
3. Copies of many of the ATEA convention speeches and other addresses are sent to members.
4. Significant and informative newsletters provide members with selected information which is difficult, if not impossible, to obtain without membership.
5. From the great mass of literature on technical education, selected quality publications are sent to all members.
6. Members receive the annual report of the executive secretary and a certified finanical statement of the association.
7. The association provides consulting services on a wide variety of problems involved in establishing, expanding, and improving technical education.

Institutional Member Service—Institutional memberships for schools offering technical courses are available to public and private technical institutes, community and junior colleges, technical high schools, and vocational-technical schools in the United States and Canada.

Institutional members receive the services listed above. In addition, they receive selected professional publications which are too expensive to send to individual members or of which the supply is too limited. For example, institutional members were sent a copy of *Science Education as It Relates to Techncial Education*. They also receive a copy of the proceedings of the annual clinics on technical education.

Industrial Member Service—Industrial membership is open to those companies which employ technicians or are interested in increasing the supply of well-trained technicians, including companies which make equipment for the training of technicians or which publish texts for the training of technicians. Pamphlets which describe opportunities for technicians in industrial member companies, and brochures which describe their equipment in more detail than can be included in the ATEA *Journal*, are sent to all institutional members.

Plans for Extended Services—A decision to form regional councils was made at a meeting of the trustees and regional representatives held in Dallas, Texas, on December 8, 1968. Within three months, regional councils were formed, and more are in the process of being organized. These councils, which have teacher and industry representation in addition to educational administrators, have as their principal objective to bring ATEA to the "grass roots" and to involve more members, particularly teachers, in the activities of the ATEA.

Regional conferences on technical education are one method of bringing ATEA to the "grass roots." Such conferences have been held in more than 25 locations. Each conference has as its host a school in which technical programs are offered. These schools usually work with a local motel to organize the conference. Exhibits of books, teaching aids, and equipment are usually a part of the conference.

ATEA has members in Canada and in every one of the 50 states as well as in a few foreign countries.

The headquarters of the American Technical Education Association, Inc., is at North Dakota State School of Science, Wahpeton, 58075. Odin Stutrud is executive director.

AMERICAN TECHNICAL EDUCATION ASSOCIATION, INC.

Officers (1982-83)

Robert Keck, *President*
State Regents for Higher Education
Oklahoma City, Oklahoma

Bob E. Childers, *President-Elect*
Southern Association of Colleges & Schools
Atlanta, Georgia

Harry Pokorny, *Vice-President & Membership Chair*
Milwaukee Area Technical College

State Technical Institute
Memphis, Tennessee

Peter Zanetti
Technovate, Inc.
Pompano Beach, Florida

Engineering Technology College Council and Engineering Technology Division, American Society for Engineering Education

THE American Society for Engineering Education (ASEE) has had a vital interest in the technician-technology type of higher education for over a quarter of a century. The early interest of the society in the education of engineering technicians led to the organization of the Engineering Technology Division, formerly the Technical Institute Division, which has proved to be a significant factor in the development of the technical-institute type of program.

In keeping with the technological explosion, education in engineering technology more recently became involved in such a broad area of activity that it no longer was possible to deal properly with academic and administrative details within the division. The American Society for Engineering Education, therefore, established what is now the Engineering Technology College Council for the purpose of dealing primarily with administrative matters. The chairman of the council serves on the ASEE Board of Directors.

The purposes of the Engineering Technology College Council are:

- To work toward the improvement of technician-technology areas of higher education and the development of a greater recognition of the value of accreditation of curricula;
- To seek more widespread recognition of the engineering technician-technologist and his work, including the support of certification programs;
- To bring about cooperation between engineering colleges and technician-technology institutions, to better serve the total needs of technical education at all levels;
- To cooperate with governmental agencies in those areas where technician-technology education relates to public safety and welfare;
- To bring about better understanding and cooperation between technician-technology institutions and engineering societies, trade and professional organizations, and other industrial groups;
- To work toward the development of public understanding of technician-technology education through cooperation with schools, guidance organizations, and other informational groups;
- To act as an instrument of inquiry into matters that relate to the effective administration of institutions involved in technician-technology programs; and
- To provide a means for dealing with all administrative problems involving technician-technology education.

The Engineering Technology Division acts as a general forum for the exchange and accumulation of ideas and activities pertinent to the teaching and training field. This division offers members a unique opportunity to benefit from up-to-date information and personal contact. The purposes of the Engineering Technology Division are:

- To promote and develop technician-technology education as a means of preparing for careers in engineering technology:
- To deal with curricula, teaching methods, teacher training and development, and the welfare and guidance of the student;
- To assume responsibility for the presentation of the James H. McGraw Award;
- To promote individual memberships in the American Society for Engineering Education; and
- To arrange programs in the area of engineering technology of interest and value to the individual membership of the Engineering Technology Division.

Among the more important activities of the Engineering Technology College Council and Division is the awards dinner held each year in conjunction with the annual conference of the American Society for Engineering Education.

The James H. McGraw Award is made to one who has contributed in an outstanding way to technician-technology education. At the annual meeting, the Engineering Technology Division presents a varied program of considerable value to those responsible for technician-technology curriculum development and the guidance of students in engineering technology.

The Engineering Technology College Council conducts studies and initiates actions having a far-reaching effect on technician-technology education. Manpower studies and surveys are important activities of the Council and have consistently indicated a significant increase in technician-technology enrollments, new students, and graduates. The Engineering Technology College Council cooperates very closely with the Accreditation Board for Engineering and Technology (formerly the Engineers' Council for Professional Development), the major recognized accrediting agency for programs leading to associate and baccalaureate degrees in engineering technology, in evaluation, and in promotional activities.

The headquarters of the American Society for Engineering Education is at Eleven Dupont Circle, Suite 300, Washington, D.C. 20036. W. Edward Lear is currently executive director.

ENGINEERING TECHNOLOGY COLLEGE COUNCIL, ASEE

Nashville, Tennessee

National Association of Industrial Technology

THE National Association of Industrial Technology (NAIT) is an organization of educators, industrialists, and businessmen concerned with training youth to apply technological and managerial sciences to industry. The major purpose of the association is to foster the improvement of baccalaureate-degree-level curricula of industrial technology within institutions of higher education. However, membership is not limited to faculties of four-year institutions. A number of two-year community college faculties are also members, in keeping with the "two-plus-two" concept of education and because many technology programs are designed for acceptance of community college transfer students. NAIT currently represents approximately 244 active members, 263 student members, 52 institutional members, 5 industrial members, and 6 affiliate members.

The discipline of industrial technology evolved as industry developed a growing need for trained professionals with managerial talent. Because industry is "dynamic," so, too, is the direction and scope of industrial technology. In the years since its founding, the definitions used as standards by NAIT have been redefined and refined to the following levels:

Industrial Technology: A profession which requires such education and experience as is necessary to understand and apply technological and managerial sciences to industry.

Typical Elements of an Industrial Technology Baccalaureate Program: A management-oriented technical curriculum built on a balanced program of studies drawn from a variety of disciplines related to industry. Included are a sound knowledge and understanding of materials and production process, principles of distribution, and concepts of industrial management and human relations; experiences in communication skills, humanities, and social sciences; and a proficiency level in the physical sciences, mathematics, design, and technical skills to permit the graduate to capably resolve technical-managerial and production problems.

The Industrial Technology Graduate: A professional with broad technical and managerial background in a variety of disciplines related to industry. Typically included in this background are a functional knowledge and understanding of materials and production processes, industrial management and human relations, communications skills, the physical sciences, mathematics, and current technical skills to enable the graduate to effectively meet technical, managerial, and industrial requirements. The graduate may specialize in a professional field such as manufacturing, industrial marketing, transportation, or construction. Typical areas include advanced material technology, industrial processes, automated computerized systems, production planning and control, industrial methods and control, construction project management, plant and facility management, safety, cost analysis and control, product effectiveness, and industrial management.

In 1965 and again in 1966, a group of industrial leaders and educators met to discuss the issues and problems of the four-year degree programs in industrial technology. These two national conferences provided the foundation for the development of the present National Association of Industrial Technology. A third meeting was held in 1967, where officers and regional directors were elected and the NAIT became a reality. At this time, five task forces laid the foundation for the future growth of the association. They dealt with curriculum structure, program trends, faculty development, membership services, and representation by teachers, industrialists, and outside organizations.

The association was incorporated in the state of Ohio in 1969. One of its initial goals was to develop an accrediting program for the field of industrial technology education. In 1973, the National Commission on Accrediting (NCA) had authorized NAIT to accredit baccalaureate degree industrial technology programs. NAIT is currently a member of the Assembly of Specialized Accrediting Bodies.

Accreditation activity by NAIT is intended as a "consultative" rather than "inspection" process. The association believes that the greatest value to a program, an institution, and the professions served comes not from the accreditation process itself, but from the self-study. NAIT also holds the philosophy that accreditation status should be based more on an assessment of the product than on the process. To this end, considerable emphasis is given to the accomplishment and attitudes of graduates. Baccalaureate-level industrial technology programs at 26 institutions across the country have been accredited by the association as of December 1982. The NAIT National Board of Accreditation contains industrial and lay representation.

As well as providing a means of identity for programs in industrial technology, NAIT also strives:

- To promote the establishment and maintenance of industrial technology programs.
- To promote the establishment and maintenance of curricula standards designed to serve the best interest of industry and the profession.
- To provide opportunities for the study and discussion of all questions, issues, and problems related to the curricula of industrial technology.
- To promote and sustain worthwhile research endeavors related to the curricula of industrial technology.
- To collect, develop, and disseminate information concerning industrial technology education among its members, industrial personnel, fellow educators, administrators, counselors, students, and laymen.
- To promote the goals and interests of the association by cooperating with other national, regional, and local special interest organizations having related interests and goals.

Activities and services include: accreditation, curriculum and program consultation, placement statistics, national representation, National Industrial Advisory Council, professional meetings (national and regional), professional publicity, parent organization for affiliate groups.

Association membership is divided into six geographical regions; each is headed by a regional director who acts as the hub for activities in that region. Regional meetings take place frequently, and a national convention is held the latter part of October each year. The offices of president and first and second vice-presidents are elected annually by the membership-at-large. The Board of Trustees consists of the last three presidents, who act as consultants to the association.

Publications are periodically issued on subjects of research or monographs. The national convention proceedings are published annually, as is a membership listing. Lists of accredited institutions, lists of all technology programs nationally, and information about other timely subjects are available from the executive secretary.

The home office of the National Association of Industrial Technology is located at the address of the executive secretary. This is currently: Eastern Michigan University, Ypsilanti, Michigan 48197. Jeffrey T. Luftig is executive director/secretary.

NATIONAL ASSOCIATION OF INDUSTRIAL TECHNOLOGY

Executive Committee (1982-83)

Alvin E. Rudisill, *President*
Eastern Michigan University
Ypsilanti, Michigan

Orin R. Robinson, *1st Vice-President*

National Association of Trade and Technical Schools

THE National Association of Trade and Technical Schools is a voluntary association of private schools. Its primary purpose is to establish and maintain high educational standards and ethical business practices in the private trade and technical school field.

The association was organized in Chicago on March 19, 1965, and operated on an interim basis until the first official annual meeting was held in Chicago on June 18 and 19 of that year. The constitution and bylaws were adopted and officers were elected at the meeting. The association was incorporated in the District of Columbia on July 16, 1965.

The purposes of the association, as outlined in its constitution, are: to promote the interests and general welfare of the private and technical school field; to promote high educational standards and ethical business practices; to cooperate with local, state, and federal authorities and with business, commercial, and industrial groups in the maintenance of standards and sound policies; to develop a national accreditation program on the basis of established federal standards; to conduct and promote research for the advancement of the field; to encourage and sponsor the development of local, state, and regional private trade and technical school organizations; to cooperate with local, state, regional, and national associations in the development and exchange of information helpful to the advancement of the field; to engage in publicity and public relations activities for the purpose of increasing public interest and a sound understanding of the services offered by the field; and to engage in other activities (consistent with the public interest and the interest of the trade and technical school field) as may be necessary and proper for the accomplishment of these objectives.

NATTS's nationally recognized accrediting program provides a means of assisting good private trade and technical schools in becoming better schools, assuring the public of high quality trade and technical education in private schools, and setting standards to which all private trade and technical schools can aspire.

An autonomous accrediting commission, consisting of nine members—five representatives of the trade and technical schools and four outstanding persons from outside the private school field—has the final authority to determine whether or not individual schools meet the standards. The Accrediting Commission of NATTS is listed by the U.S. Department of Education as a nationally recognized accrediting agency under the provisions of Chapter 33, Title 38, U.S. Code, and subsequent legislation.

Standards for accreditation developed by the accrediting commission and subject to public comment cover the following characteristics: educational objectives, courses and curricula, faculty, student services, student success and achievement, admission policies and practices, tuition policies, student recruitment, physical facilities, management, and self-improvement programs.

Each year NATTS offers a variety of workshops to its members in areas such as education, competency-based staff development, executive management, financial aid, and recruitment. Newsletters and tool kits covering accreditation, public relations, financial aid, education, and administration help keep members on top of the rapid changes in the industry that may directly or indirectly influence their schools.

A Handbook of Trade and Technical Careers and Training is published annually in September. The handbook (free of charge) lists careers offered and schools where training is available. Over 500 accredited schools are listed in the handbook. NATTS distributes to its members news releases and information relevant to the industry and works with

Congress on proposed legislation which may have an impact on the trade and technical school field.

Additional information or copies of the free handbook can be obtained by writing to the National Association of Trade and Technical Schools, Dept. ED, 2021 K Street, N.W., Washington, D.C. 20006.

NATIONAL ASSOCIATION OF TRADE AND TECHNICAL SCHOOLS

Officers (1983-84)

M. Michael Freedland, *President*
Philadelphia Printing School
Philadelphia, Pennsylvania

R. Wade Murphree, *Vice-President*
Denver Institute of Technology
Denver, Colorado

Dorothy K. Cann, *Secretary*
Apex Technical School
New York, New York

Robert I. Sweet, *Treasurer*
Universal Technical Institute
Phoenix, Arizona

Board of Directors (1983-84)

Ross L. Alloway
Rosston Schools of Men's Hair Design
Anaheim, California

Manfred Bloch
Arundel Institute of Technology
Baltimore, Maryland

W.L. Brown
Porter & Chester Institute
Rocky Hill, Connecticut

William C. Carson
American Technical Institutes
Chicago, Illinois

Jim Craddock
American Trades Institute
Dallas, Texas

J. Warren Davies
Lincoln Technical Institutes
West Orange, New Jersey

Marsha Fuerst
North-West College of Medical-Dental Assistants
West Covina, California

John Griffin, Jr.
East Coast Aero Technical School
Lexington, Massachusetts

Henry J. Herzing
Herzing Institutes
Milwaukee, Wisconsin

I.D. Voldness
Ohio Career Schools
Columbus, Ohio

National Institute for Certification in Engineering Technologies

THE National Institute for Certification in Engineering Technologies (NICET) was formed in 1981 to replace the Institute for the Certification of Engineering Technicians (ICET) and the Engineering Technologist Certification Institute (ETCI). ICET was founded in 1961 by the National Society of Professional Engineers to serve the career needs of technician members of the engineering team. ETCI was established in 1977 to provide a meaningful certification program for technologists that did not conflict with either the state-administered registration processes for engineers or the ICET certification programs for technicians. The certification programs have continually changed to keep abreast of technology, manpower application practices, and educational trends. NICET's objective is to support a viable career for engineering technicians and technologists, thereby improving the quality and quantity of engineering services deliverable per dollar of cost.

The institute is an examining body whose function is to evaluate the qualifications of those who voluntarily apply for certification. Personal recommendations, written examinations, and verification of the applicant's work experience, competency, and knowledge are all part of the evaluation process. As evidence of satisfactory attainment of its criteria, the institute grants and issues certificates in several grades and also maintains a registry of holders of such certificates. Technician certificate number 68,300 was assigned in July 1983. Technologist certificate number 500 was assigned in July 1983.

The NICET certification programs for technicians and technologists are being developed as a nationally applicable, individualized, job-competency-based, non-discriminatory certification system which can be interfaced with educational/training resources and a variety of personnel systems. Certification is presently available in the following technical areas:

Work Element Program

- Construction Materials Testing—Asphalt, Concrete and Soils
- Engineering Model—Piping Systems
- Fire Protection—Automatic Sprinkler System Design
- Mechanical—Process Piping
- Transportation—Highway Construction
  - Highway Design
  - Highway Maintenance
  - Highway Materials
  - Highway Surveys
  - Highway Traffic Operations

Standardized Examination Program

- Architectural and Building Construction
- Civil Engineering Technology
- Electrical/Electronics Engineering Technology
- Electrical Power Engineering Technology
- Fluid Power Engineering Technology
- Industrial Engineering Technology
- Mechanical Engineering Technology
- Metallurgical Engineering Technology

Teams of carefully selected professional engineers and senior engineering technicians representing all facets of engineering have been trained by the institute in its policies and certification procedures for the purpose of advising and making recommendations to the Board of Governors in its final review and evaluation of applicants. The institute also maintains an advisory council comprised of representatives from nationally recognized engineering societies.

Complete details on the certification programs and procedures for acquiring certification are available in the informative booklet "NICET Certification Programs." You may write or telephone for a free copy of the booklet. NICET is located at 2029 K Street N.W., Washington, D.C. 20006. The phone number is (202) 463-2335. John D. Antrim, P.E., is currently general manager.

NATIONAL INSTITUTE FOR CERTIFICATION IN ENGINEERING TECHNOLOGIES

Board of Governors (1983-84)

William M. Bissell, P.E.
El Paso, Texas

Fred S. Faber, P.E.
York, Pennsylvania

Cliff J. Knezek, S.E.T.
Austin, Texas

William J. Mooney, S.E.T.
Rochester, New York

Alan G. Olson, C.T.
Corvallis, Oregon

Robert Salvin, P.E.
Dunnellen, New Jersey

Elden G. Spier, S.E.T.
Bismarck, North Dakota

Technical Education Division, The American Vocational Association

ALTHOUGH the American Vocational Association encompasses all fields of vocational-technical and adult education, there is a strong divisional interest in technical education. As one of 13 divisions, the Technical Education Division contributes to the total objectives of AVA and participates as a strong component of the organization.

The main general purposes of the Technical Education Division are: (1) to develop high professional standards among the membership; (2) to provide a better understanding of technical education; (3) to disseminate information relating to technical education; (4) to encourage interrelationships among agencies, organizations, and institutions concerned with technical education; (5) to identify the function of technical education in preparing students for the world of work; and (6) to acquaint technical education educators with the work of AVA—its goals, its objectives, and its accomplishments—and to encourage participation in its activities.

The American Vocational Association is a federation of state-affiliated associations formed in 1925 by a merger of the National Society for Vocational Education and the Vocational Education Association of the Middle West. It is the only national educational organization devoting its total effort to the growth and development of vocational, technical, and practical arts education. Current AVA membership of 50,000 includes teachers, coordinators, supervisors, directors, teacher educators, and others, including the lay public. Members are involved in education at the local, state, and national levels. Divisions, in addition to the Technical Education Division, are concerned with administration, agricultural education, business and office education, marketing and distributive education, guidance, health occupations education, home economics education, industrial art education, employment and training, trade and industrial education, special needs, and a New and Related Services Division, which includes cooperative education, general and related subjects, research, adult education, special education, public information, and personnel.

Membership in the Technical Education Division is limited to AVA members who are professionally engaged in or interested in postsecondary and technical education.

The National Headquarters of the American Vocational Association is at 2020 North 14th Street, Arlington, Virginia 22201.

AMERICAN VOCATIONAL ASSOCIATION

Officers (1983-84)

Joe D. Mills, *President*
State Department of Education
Tallahassee, Florida

George Mehallis, *Vice-President*
Technical Education Division
Broward Community College
Fort Lauderdale, Florida

Headquarters Staff

Gene Bottoms, *Executive Director*
Dean Griffin, *Assistant Executive Director/Government Relations*
Ione Phillips, *Assistant Executive Director/Programs*
John Hudson, *Conferences and Convention Manager*
Don Tharpe, *Membership Processing Manager*
Letitia Combs, *Membership Field Services Manager*
Gladys Santo, *Publications Manager*
Roni Posner, *Director of Planning and Development*
James Watkins, *Assistant Executive Director for Operations*

Policy Committee, Technical Education Division (1983-84)

Hugh Anderson
State Technical Institute at Memphis
Memphis, Tennessee

Dan Becallo
State Technical Institute at Memphis
Memphis, Tennessee

Adelle V. Cooter
State Technical Institute at Knoxville
Knoxville, Tennessee

Janet Finch
Nashville State Technical Institute
Nashville, Tennessee

Robert L. Garrett
Ranken Technical Institute
St. Louis, Missouri

Donal Hay
Morehead State University
Morehead, Kentucky

Verna Jackson
Tri-Cities State Technical Institute
Blountville, Tennessee

Art Kincannon
Oscar Rose Junior College
Midwest City, Oklahoma

Anne McNutt
Nashville State Technical Institute
Nashville, Tennessee

Ross Moreton
Nova University
Fort Lauderdale, Florida

Roger A. Mussell
William Rainey Harper College
Palantine, Illinois

Harry Pokorny
Milwaukee Area Technical College
Oak Creek, Wisconsin

Ada Shotwell
Memphis, Tennessee

Mary Louise Spencer
Rich Mountain Vo-Tech School
Mena, Arkansas

William G. Welch, Sr.
Western Wisconsin Technical Institute
LaCrosse, Wisconsin

Ex Officio Members

Charles O. Whitehead
Past Vice-President
State Technical Institute at Memphis
Memphis, Tennessee

Bob E. Childers
ATEA Representative
Southern Association of Colleges & Schools
Atlanta, Georgia

Walter J. Brooking
DOE Representative
Office of Vocational & Adult Education
Washington, D.C.

Program Planning
State Technical Institute at Memphis
Memphis, Tennessee

Joseph Arnold
NAITTE Representative
University of Akron
Akron, Ohio

Other Professional Organizations

IN addition to the organizations already cited in this section, there are many organizations which are now active in promoting technician education in particular fields. Some have organized special sections or departments dealing with technician education; others have appointed special committees to study technician-related problems. Many of the organizations are involved in promoting the status of the technician and have established student chapters. Other organizations cited in this section are useful in planning and curriculum development. The following listing, which is not to be considered complete, gives the names and addresses of some of the associations most active in these areas.

Accreditation Board for Engineering and Technology
345 East 47th Street
New York, New York 10017

American Association for Adult and Continuing Education
1201 16th Street N.W., Suite 301
Washington, D.C. 20036

American Association for the Advancement of Science
1515 Massachusetts Avenue N.W.
Washington, D.C. 20005

American Association of Medical Assistants
20 North Wacker Drive, Suite 1575
Chicago, Illinois 60606

American Chemical Society
1155 16th Street N.W.
Washington, D.C. 20036

American Dental Assistants Association
666 North Lakeshore Drive, Suite 1130
Chicago, Illinois 60611

American Dental Hygienists' Association
444 North Michigan Avenue
Chicago, Illinois 60611

American Dietetic Association
430 North Michigan Avenue
Chicago, Illinois 60611

American Institute of Biological Sciences
1401 Wilson Boulevard
Arlington, Virginia 22209

American Society of Allied Health Professions
National Center for Higher Education
One Dupont Circle N.W., Suite 30
Washington, D.C. 20036

American Society for Medical Technologists
330 Meadowfern Drive
Houston, Texas 77067

American Society of Radiologic Technologists
55 East Jackson Boulevard, Suite 1820
Chicago, Illinois 60604

Association of Independent Colleges and Schools
1730 "M" Street N.W., Suite 600
Washington, D.C. 20036

Association of Physician Assistant Programs
2341 Jefferson Davis Highway, Suite 700
Arlington, Virginia 22202

Association of Surgical Technologists
Caller No. E
Littleton, Colorado 80120

Center for Occupational Research and Development
601 Lake Air Drive
Waco, Texas 76760

Electronics Technicians Association International
Route 3, Box 564
Greencastle, Indiana 46135

Foundation for Interior Design Education Research
242 West 27th Street
New York, New York 10001

Graphic Arts Technical Foundation
4615 Forbes Avenue
Pittsburgh, Pennsylvania 15213

Institute of Environmental Sciences
940 East Northwest Highway
Mt. Prospect, Illinois 60056

Instrument Society of America
67 Alexander Drive
P.O. Box 12277
Research Triangle Park, North Carolina 27709

International Association of Word Processing Specialists
1669 South Voss, Suite 100
Houston, Texas 77057

International Society of Certified Electronics Technicians
2708 West Berry, Suite #8
Fort Worth, Texas 76109

International Society for Clinical Laboratory Technologists
818 Olive, Suite 918
St. Louis, Missouri 63101

National Association of Emergency Medical Technicians
P.O. Box 334
Newton Highlands, Massachusetts 02161

National Association of Independent Colleges and Universities
1717 Massachusetts Avenue N.W., Suite 503
Washington, D.C. 20036

National Association of Industry-Education Cooperation
235 Hendricks Boulevard
Buffalo, New York 14226

National Association for Practical Nurse Education and Service
254 West 31st Street
New York, New York 10001

National Association of Professional Word Processing Technicians
Fairmount House
2601 Parkway
Philadelphia, Pennsylvania 19130

National Commission on Certification of Physician's Assistants
3384 Peachtree Road N.E., Suite 560
Atlanta, Georgia 30326

National League for Nursing
Ten Columbus Circle
New York, New York 10019

National Occupational Competency Testing Institute
45 Colvin Avenue
Albany, New York 12206

National Vocational Guidance Association
1607 New Hampshire Avenue N.W.
Washington, D.C. 20009

PICA Foundation, Inc.
301 Hawthorne Lane
P.O. Box 4487
Charlotte, North Carolina 28204

Plastics Education Foundation
c/o Maurice Keroack
P.O. Box 12443
Albany, New York 12212

Society of Fire Protection Technicians
Delaware Technical and Community College
400 Christiana-Stanton Road
Newark, Delaware 19702

Society of Manufacturing Engineers
Manufacturing Engineering Education
One SME Drive
P.O. Box 930
Dearborn, Michigan 48128

Society of Plastics Engineers
14 Fairfield Drive
Brookfield Center, Connecticut 06805

Technical Association of the Pulp and Paper Industry
Technology Park/Atlanta
P.O. Box 105113
Atlanta, Georgia 30348

Technical Education Research Centers, Inc.
44 Brattle Street
Cambridge, Massachusetts 02138

Selected Bibliography

THIS bibliography is made up primarily of books, reports, and magazine and journal articles published since the tenth edition of the *Technician Education Yearbook* (1982), although a few other types of recent publications are included as well. For references to technician education materials published earlier, see bibliographies appearing in the first through tenth editions of the *Yearbook* (1963-82).

Listings included here represent a wide variety of sources, and these are identified. Two in particular should be noted. Where the letters "EDRS" appear (followed by an order number), publications may be obtained from the Educational Resources Information Center, Documentation Reproduction Service, P.O Box 190, Arlington, Virginia 22210. Copies are available in microfiche (MF) and/or paper copy (PC); a postage charge will be added to the prices quoted.

Where the letters "CIJE" appear (followed by an order number), article reprints may be ordered from the Article Copy Service—CIJE, University Microfilms International, 300 N. Zeeb Road, Ann Arbor, Michigan 48106, for a price of $4.00 each, paper copy (PC).

For some publications, both paper (PC) and hard cover (HC) prices are given.

Books

Adult Access to Education and New Careers: A Handbook for Action. Harvey B. Schmelter, ed. Princeton, N.J.: College Board Publications, 1980. Pp. 141. $9.75.

Agricultural and Automotive Diesel Mechanics. Gene L. Davis. Englewood Cliffs, N.J.: Prentice-Hall, Inc., 1983. Pp. 208. $17.95.

Art Career Guide (Fourth Revised Edition). Donald Holden. New York: Watson-Guptill, 1983. Pp. 320. $14.95.

Basic Mathematics for Trades and Technologies. Cheryl Cleaves, Margie Hobbs, and Paul Dudenhefer. Englewood Cliffs, N.J.: Prentice-Hall, Inc., 1983. Pp. 640. $21.95.

Career Education: Where It Is and Where It Is Going. Kenneth B. Hoyt. Salt Lake City, Utah: Olympus Publishing Company, 1981. Pp. 410. $19.95.

The Career Education and Financial Aid Guide. Robert L. Bailey. New York: Arco Publishing, Inc., 1982. Pp. 210. $7.95.

Careers Encyclopedia. Craig T. Norback. Homewood, Ill.: Dow Jones-Irwin, 1980. Pp. 456. $27.50.

Careers in Agribusiness and Industry (3rd edition). Archie A. Stone, Harold E. Gulvin, and Marcella L. Stone. Danville, Ill.: Interstate Printers and Publishers, 1980. Pp. 365. $12.95.

Careers in Criminal Justice. Erik Beckman. Springfield, Ill.: Charles C. Thomas, 1981. Pp. 152. $15.50.

Current Career and Occupational Literature: 1982. Leonard H. Goodman. New York: H.W. Wilson Co., 1982. Pp. 195. $15.00.

Digital Electronics and Microprocessor Technology. Patrick J. O'Connor. Englewood Cliffs, N.J.: Prentice-Hall, Inc., 1983. Pp. 576. $29.95.

Directory of Tourism Education Programs: A Guide to Programs in Aviation, Hospitality, and Tourism. Lloyd E. Hudman, ed. Wheaton, Ill.: Merton House Publish-

ing Co., 1981. Pp. vii + 107. $6.50.

Electricity for Technicians (3rd edition). Abraham Marcus and Charles M. Thomson. Englewood Cliffs, N.J.: Prentice-Hall, 1982. Pp. 512. $19.95.

Fundamentals of Energy Technology (Energy Technology Series). Waco, Tex.: Center for Occupational Research and Development, Inc., 1981. Pp. 290. $17.50.

Graphic Design Career Guide. James Craig. New York: Watson-Guptill, 1983. Pp. 160. $14.95.

Heating Technology. S. Don Swenson. Albany, N.Y.: Breton Publishers, 1983. Pp. 400. $24.95.

Introduction to Criminal Justice. Vergil L. Williams, John C. Watkins, Jr., and William A. Fromby. Albany, N.Y.: Delmar Publishers, Inc., 1982. Pp. 504. $19.80.

Linking the Worker to Postsecondary Education: A Manual for Training Study Organizers in America. Harvey B. Schmelter. Princeton, N.J.: College Board Publications, 1980. Pp. 99. $9.75.

Mechanical Engineering Technology: Product Design and Drafting Problems. John G. Nee. Ann Arbor, Mich.: Prakken Publications, 1983. Pp. viii + 154. $11.95.

Medical Assistant. Mary Francis. Austin, Tex.: Extension Instruction and Materials Center—Univ. of Texas at Austin, 1982. Pp. 87. $12.00.

Microprocessor/Microcomputer Technology. Frederick F. Driscoll. Albany, N.Y.: Breton Publishers, 1983. Pp. 500. $24.95.

Motorcycle Mechanics. William H. Crouse and Donald L. Anglin. New York: McGraw Hill/Gregg, 1982. Pp. 360. $15.95.

The Official Guide to Food Service and Hospitality Management Careers. Alexander Clark Morton. New York: Arco Publishing, Inc., 1982. Pp. 120. $8.95.

120 Careers in the Health Care Field. Melvin Alperin and Stanley Alperin. Cambridge, Mass.: Ballinger Publishing Co., 1980. Pp. 306. $22.50.

Operational Amplifiers for Technicians. Jefferson C. Boyce. Albany, N.Y.: Breton Publishers, 1983. Pp. 416. $24.95.

Opportunities in Environmental Careers (VGM Career Horizons). Odom Fanning. Skokie, Ill.: National Textbook Co., 1981. Pp. 164. $7.95 HC, $5.95 PC.

Physical Therapy Aide. Diana Ferguson. Austin, Tex.: Extension Instruction and Materials Center—Univ. of Texas at Austin, 1982. Pp. 65. $8.00.

Plastics Fabricator. L.A. Grimes, Jr. Austin, Tex.: Extension Instruction and Materials Center—Univ. of Texas at Austin, 1982. Pp. 120. $13.95.

Practical Problems in Mathematics for Electronics Technicians. Richard L. Sullivan. Albany, N.Y.: Delmar Publishers, Inc., 1982. Pp. 212. $6.80.

Practical Welding Technology. Rudy Mohler. New York: Industrial Press Inc., 1983. Pp. 220. $27.50.

Refrigeration and Air Conditioning Technology. Rex Miller. Peoria, Ill.: Bennett Publishing Co., 1983. Pp. 542. $18.64.

Respiratory Therapy Assistant. Judy A. Jones. Austin, Tex.: Extension Instruction and Materials Center—Univ. of Texas at Austin, 1983. Pp. 117. $15.00, student manual. Instructor's guide available.

Secretarial Procedures for the Electronic Office. Rita C. Kutie and Joan L. Rhodes. Somerset, N.J.: John Wiley & Sons, Inc., 1983. Pp. 372. $17.95.

Sheet Metal Worker. L.A. Grimes, Jr. Austin, Tex.: Extension Instruction and Materials Center—Univ. of Texas at Austin, 1982. Pp. 155. $14.50, student manual. Instructor's guide available.

The Solar Jobs Book. Katharine Ericson. Andover, Mass.: Brick House Publishing Co., 1980. Pp. 211. $8.95.

Technical and Business Communication in Two-Year Programs. W. Keats Sparrow and Nell Ann Pickett, eds. Urbana, Ill.: National Council of Teachers of English, 1983. Pp.205. $8.95.

Technician Education Yearbook 1982. Lawrence W. Prakken, ed. Ann Arbor, Mich.: Prakken Publications, Inc., 1982. Pp. vi + 370. $35.00.

Writing for Technicians. Marva T. Barnett. Albany, N.Y.: Delmar Publishers, Inc., 1982. Pp. 358. $11.00.

Reports and Other Publications

Accreditation and Its Significance for Programs of Higher Education in Criminology and Criminal Justice: A Review of the Literature. Antony E. Simpson. March 1979. Pp. 88. Available from Joint Commission on Criminology and Criminal Justice Education and Standards, University of Illinois, Box 4348, Chicago, Illinois 60680.

Animal Science Basic Core Curriculum (Kansas Postsecondary Farm and Ranch Management Project). James Albracht, ed. Manhattan, Kan.: Kansas State University, 1980. Pp. 1,012. EDRS: ED 210 457. $2.17 MF, $72.15 PC.

Appliance Repair (Post Secondary Curriculum Guide). James F. Watkins, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp.487. EDRS: ED 216 109. $1.17 MF, $35.40 PC.

An Approach to a One-School-Year Technical/Occupational Program Articulation between the Secondary and Post-Secondary Levels. Nancy H. Emerson. Dallas, Tex.: Dallas County Community College District, 1980. Pp. 18. EDRS: ED 212 299. $.97 MF, $2.15 PC.

Architectural Technician. Largo, Fla.: Careers, Inc., 1979. Brochure. Pp. 2. $.60.

Attitudes Toward the Skilled Trades: Employment Issues in the Precision Metalworking Industry. Louis Harris and Associates, Inc. Fort Washington, Md.: Task Force on the Skilled Trades Shortage, 1982. Pp. 84. Free.

Auto Body (Articulation Guide). 1982. $10.95. Available from Extension Instruction and Materials Center, P.O. Box 7218, University of Texas at Austin, Austin, Texas 78712.

Auto Mechanics (Post Secondary Curricu-

lum Guide). James F. Watkins, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 655. EDRS: ED 216 110. $1.37 MF, $47.65 PC.

Aviation Mechanics (Post Secondary Curriculum Guide). James F. Watkins, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 526. EDRS: ED 216 111. $1.17 MF, $38.90 PC.

Career Opportunities as a Medical Record Technician. 1981. Pp. 5. Free. Available from American Medical Record Association, 875 N. Michigan Ave., Chicago, Illinois 60601.

Carpentry/Cabinet Making (Post Secondary Curriculum Guide). Michael D. Moye, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 249. EDRS: ED 216 113. $.97 MF, $17.90 PC.

Civil Technology. Surveying (Post Secondary Curriculum Guide). Beverly J. Fitzpatrick, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 318. EDRS: ED 216 114. $.97 MF, $23.15 PC.

Community, Junior, and Technical College Directory. 1982. Pp. 96. $15.00. Available from American Association of Community and Junior Colleges, One Dupont Circle N.W., Suite 410, Washington, D.C. 20036.

A Comparison of the Perceptions of Laboratory Directors and Medical Technology Educators Toward Career-Entry Competencies for Associate and Baccalaureate Degree Laboratory Technology Graduates. Pamela Buccelli. Philadelphia, Pa.: Hahnemann Medical College and Hospital, 1980. Pp. 43. EDRS: ED 208 164. $.97 MF, PC not available from EDRS.

Competency-Based Curriculum Guide for Laser Technology. September 1980-June 1981. John J. Fioroni. Glen Ellyn, Ill.: College of DuPage, 1981. Pp. 182. EDRS: ED 205 815. $.97 MF, $14.40 PC.

Computer Service Technician. Largo, Fla.: Careers, Inc., 1981. Brochure. Pp. 2. $.60.

Conservation Directory 1983: A List of Organizations, Agencies, and Officials Concerned with Natural Resource Use and Management (28th edition). Jeanette Bryant, ed. Washington, D.C.: National Wildlife Federation, 1983. Pp. 309. $9.00.

Cosmetology (Post Secondary Curriculum Guide). Michael D. Moye, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 211. EDRS: ED 216 106. $.97 MF, $16.15 PC.

Curriculum Guide and Instructional Materials in Agricultural Supplies and Services. Iowa Department of Public Instruction. 1981. Pp. 399. Available from Iowa Department of Public Instruction, Grimes State Office Building, Des Moines, Iowa 50319.

Data Processing Curriculum Guide. James Payne, et al. 1982. Pp. 339. Available from Michigan Vocational-Technical Research Center, Michigan State University, East Lansing, Michigan 48824.

Dental Assistant (Post Secondary Curriculum Guide). Bruce Simpson, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 524. EDRS: ED 216 115. $1.17 MF, $37.15 PC.

Diesel Mechanic (Articulation Guide). 1983. $10.95. Available from Extension Instruction and Materials Center, P.O. Box 7218, University of Texas at Austin, Austin, Texas 78712.

Diesel Mechanics (Post Secondary Curriculum Guide). Edward P. Kahler, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 665. EDRS: ED 216 126. $1.37 MF, $47.65 PC.

Drafting/Design Technology (Post Secondary Curriculum Guide). Beverly J. Fitzpatrick, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 518. EDRS: ED 216 116. $1.17 MF, $37.15 PC.

Electrical Technology (Post Secondary Curriculum Guide). Raymond H. Butler, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 381. EDRS: ED 216 117. $.97 MF, $28.40 PC.

Electromechanical Technology (Post Secondary Curriculum Guide). Raymond H. Butler, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 552. EDRS: ED 216 118. $1.17 MF, $40.65 PC.

Electronics (Post Secondary Curriculum Guide). Hoyt Sappe, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 564. EDRS: ED 216 119. $1.17 MF, $40.65 PC.

Energy-Related Activities in Community, Junior, and Technical Colleges: A Directory. Shelby T. Duncan and James R. Mahoney, comps. Washington, D.C.: American Association of Community and Junior Colleges, 1981. Pp. 1,717. EDRS: ED 211 322. $3.57 MF, $121.15 PC.

Engineering Technology Programs. Preliminary Curriculum Planning Guide. Waco, Tex.: Center for Occupational Research and Development, 1982. EDRS: ED 220 718. $.97 MF, $9.15 PC.

A Forest Products Technology Program for Washington Community Colleges. Final Report. Robert T. Grotefend. Olympia, Wash.: Washington State Commission for Vocational Education, 1981. Pp. 102. EDRS: ED 217 183. $.97 MF, $9.15 PC.

Handbook for Developing Competency Based Curricula for New and Emerging Occupations. A Handbook for California Vocational Educators. G.W. Maxwell and Linda Nunes West. San Jose, Cal.: San Jose State University, 1980. Pp. 104. EDRS: ED 210 518. $.97 MF, $9.15 PC.

Health Occupations Cluster Guide. Oregon Department of Education. 1981. Pp. 85. $2.50. Available from Documents Clerk, Oregon Dept. of Ed., 700 Pringle Parkway S.E., Salem, Oregon 97310.

The Impact of Nursing and Allied Health Professional Organizations and Accrediting Agencies on Community College Curricula. Robert R. Evans. Paper presented at the Annual Convention of the American Association of Community and Junior Colleges; St. Louis, Missouri: April 1982. Pp. 8. EDRS: ED 215 738. $.97 MF, $2.15 PC.

Industrial Electricity (Post Secondary Cur-

riculum Guide). Beverly J. Fitzpatrick, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 386. EDRS: ED 216 120. $.97 MF, $28.40 PC.

In-Service Training Program for Library Paraprofessionals: A Report. Donna R. Bafundo. Fairfax, Virginia: George Mason University, 1981. Pp. 213. EDRS: ED 207 536. $.97 MF, $16.15 PC.

Instrumentation Technology. Volume I (Post Secondary Curriculum Guide). Hoyt Sappe, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 803. EDRS: ED 216 125. $1.77 MF, $58.15 PC.

It's Your Business: Cooperative Efforts Between Community Colleges and Business/Industry (Directory). Mildred Bulpitt and Judith Kaderlik, eds. Joint project of League for Innovation in the Community College (Dallas, Texas) and Maricopa County Community College District (Phoenix, Arizona), 1980. Pp. 66. EDRS: ED 208 240. $.97 MF, $5.65 PC.

Masonry (Post Secondary Curriculum Guide). Michael D. Moye, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 257. EDRS: ED 216 128. $.97 MF, $19.65 PC.

Mathematics Requirements of Electronics Ratings in the Job Environment. Technical Report, February 1980-November 1980. Meryl S. Baker. San Diego, Cal.: Navy Personnel Research and Development Center, 1981. Pp. 31. EDRS: ED 209 091. $.97 MF, $3.90 PC.

Mechanical Technology (Post Secondary Curriculum Guide). Raymond H. Butler, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 654. EDRS: ED 216 129. $1.37 MF, $47.65 PC.

Medical Lab Technician (Post Secondary Curriculum Guide). Bruce Simpson, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 391. EDRS: ED 216 130. $.97 MF, $28.40 PC.

Medical Lab Technology (Articulation Guide). 1983. $10.95. Available from Extension Instruction and Materials Center, P.O. Box 7218, University of Texas at Austin, Austin, Texas 78712.

Medical Laboratory Technicians. Largo, Fla.: Careers, Inc., 1981. Brochure. Pp. 2. $.60.

Mid-Management Guide for Post Secondary Marketing and Distributive Education. A VTS and Community College. Emporia, Kan.: Emporia State University, 1981. Pp. 42. EDRS: ED 210 459. $.97 MF, $3.90 PC.

A Model Package to Assess the Education and Training Needs of Business, Industry, and Labor. The National Postsecondary Alliance of Institutions/Districts. Leonard O. Nasman, compiler. 1981. Pp. 59. $5.10. Available from The National Center for Research in Vocational Education, The Ohio State University, 1960 Kenney Road, Columbus, Ohio 43210.

1982 Texas Competency Validation Project for Auto Mechanics, Diesel Mechanics, Office Occupations, Printshop Trades, and Welding (Final Report). Sandra K. Rogers and Maurine F. Dahlberg. Killeen, Tex.: Central Texas College, 1982. Pp. 48. EDRS: ED 218 500. $.97 MF, $3.90 PC.

Office Machine Service Technician. Largo, Fla.: Careers, Inc., 1981. Brochure. Pp. 7. $.85.

Office Occupations Curriculum Course Guide—Postsecondary. Margaret Aucoin, et al. Baton Rouge, La.: State Dept. of Education, 1981. Pp. 85. EDRS: ED 211 715. $.97 MF, $7.40 PC.

Operating Room Assistant (Post Secondary Curriculum Guide). Bruce Simpson, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 244. EDRS: ED 216 133. $.97 MF, $17.90 PC.

Perceptions of Competence of Three Levels of Medical Laboratory Personnel. Judith A. Davis. Paper presented at the Annual Meeting of the American Society of Medical Technology. 1981. Pp. 41. EDRS: ED 208 781. $.97 MF, $3.90 PC.

Police Science (Articulation Guide). 1983. $10.95. Available from Extension Instruction and Materials Center, P.O. Box 7218, University of Texas at Austin, Austin, Texas 78712.

Practical Nursing (Post Secondary Curriculum Guide). Bruce Simpson, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 387. EDRS: ED 216 135. $.97 MF, $28.40 PC.

Radio and TV Repair (Post Secondary Curriculum Guide). Pamela E. Smith, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 430. EDRS: ED 216 136. $.97 MF, $31.90 PC.

Radiological Technology (Post Secondary Curriculum Guide). Bruce Simpson, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 420. EDRS: ED 216 137. $.97 MF, $30.15 PC.

Recruiting Trends 1981-82. A Study of 428 Businesses, Industries, Governmental Agencies, and Educational Institutions Employing New College Graduates. John D. Singleton and L. Patrick Scheetz. December 1, 1981. Pp. 82. $5.00. Available from Placement Services, Michigan State University, East Lansing, Michigan 48824.

Refrigeration, Heating and Air Conditioning (Post Secondary Curriculum Guide). Joe C. Garrison, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 496. EDRS: ED 216 138. $1.17 MF, $35.40 PC.

Relationship Between Accreditation Status and Hourly Wages of Medical Record Technicians. David Lynn Passmore and Michael Marron. Paper presented at the Annual Convocation of the Northeastern Educational Research Association; Ellenville, New York; October 22, 1981. Pp. 9. EDRS: ED 208 215. $.97 MF, $2.15 PC.

Resource Guide to Competency-Based Vocational Education: Health Occupations. Phillip R. Foster, comp. 1980. Pp. 164. Available from The Maryland Vocational Curriculum Production Project, Western Maryland Vocational Resource Center, P.O. Box 5448, McMullen Highway, Cresaptown, Maryland 21502.

Retraining and Upgrading Workers: A Guide for Postsecondary Educators. Catharine P. Warmbrod and Constance R. Faddis. 1983. Pp. 208. $12.50. Available from The National Center for Research in Vocational Education, The Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210.

Sharing Resources in Allied Health Education. Stephen N. Collier, ed. Bethesda, Md.: Health Resources Administration, 1981. Pp. 60. EDRS: ED 208 237. $.97 MF, $5.65 PC.

Sharing Resources: Postsecondary Education and Industry Cooperation. Catharine P. Warmbrod. 1981. Pp. 170. $10.00. Available from The National Center for Research in Vocational Education, The Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210.

Small Engine Mechanics (Post Secondary Curriculum Guide). James F. Watkins, et al. Atlanta, Ga.: Georgia State Dept. of Education—Office of Vocational Education, 1981. Pp. 401. EDRS: ED 216 139. $.97 MF, $30.15 PC.

Solar Energy Technicians. Moravia, N.Y.: Chronicle Guidance Publications, 1981. Brochure. Pp. 4. $1.50.

A Study of Mathematics Needed for Dental Laboratory Technology, Medical Laboratory Technology, and Respiratory Technology. Keith J. Roberts. Paper presented at the Annual Convention of the American Vocational Association; Atlanta, Ga.; December 5, 1981. Pp.16. EDRS: ED 210 554. $.97 MF, $2.15 PC.

Syllabus Design and Construction In Criminal Justice Education. Robert C. Culbertson and Adam F Carr. January 1981. Pp. 88. Available from Joint Commission on Criminology and Criminal Justice Education and Standards, University of Illinois, Box 4348, Chicago, Illinois 60680.

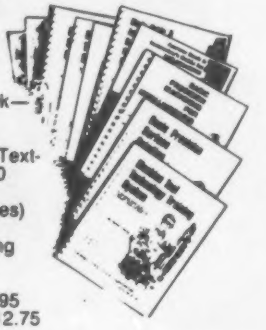
Techniques and Strategies in Clinical Laboratory Science Education. Marie Vittetoe and Frances J. Morris. Paper presented at the Annual Meeting of the American Society for Medical Technology. 1981. Pp. 33. EDRS: ED 209 968. $.97 MF, $3.90 PC.

Two-Year College Contributions to Energy

An Industry Approved Metalworking Curriculum

Harig Education Systems has developed complete Machine Tool Technology programs for high schools, vocational schools and college training. These systems are designed to train students to become qualified specialists in the Metalworking Industry. Brochure describes available courses in detail and how the training books and work sheets guide student step by step through entire curriculum. The Harig System completely trains each student to become qualified as a highly trained specialist or a machinist Class B in the metalworking industry. These one and two year training programs serve industry's need for specialists and provide an opportunity for those who desire careers in the metalworking field.

Training books available:
- Machine Tool Technology Training System $18.95
- Basic Precision Surface Grinding $16.50
- Study Guide & Answer Book—Basic Precision Surface Grinding 9.50
- Basic Precision Machining Textbook Kit (526 pages) $35.00
- Basic Precision Machining Instructor's Guide (223 pages) $21.00
- Basic Jig and Fixture Making (149 pages) $13.00
- Instructor's Guide—Basic Jig and fixture Making $10.95
- Estimating Stamping Dies 12.75



Send for | FREE—Machine Tool Training Curriculum Brochure. Gives you complete details on all available courses and textbooks.
